Cochrane Handbook for Systematic Reviews of Interventions *Wiley* Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Manual for developing intercultural competencies story circles *UNESCO Publishing* "This book presents a structured yet flexible methodology for developing intercultural competence in a variety of contexts, both formal and informal. Piloted around the world by UNESCO, this methodology has proven to be effective in a range of different contexts and focused on a variety of different issues. It therefore can be considered an important resource for anyone concerned with effectively managing the growing cultural diversity within our societies to ensure inclusive and sustainable development. Intercultural competence refers to the skills, attitudes and behaviours needed to improve interactions across difference, whether within a society (differences due to age, gender, religion, socio-economic status, political affiliation, ethnicity, and so on) or across borders. The book serves as a tool to develop those competences, presenting an innovative adaptation of what could be considered an ancient tradition of storytelling found in many cultures. Through engaging in the methodology, participants develop key elements of intercultural

competence including greater self-awareness, openness, respect, reflexivity, empathy, increased awareness of others, and in the end, greater cultural humility. This book will be of great interest to intercultural trainers, policymakers, development practitioners, educators, community organizers, civil society leaders, university lecturers and students -- all who are interested in developing intercultural competence as a means to understand and appreciate difference, develop relationships with those across difference, engage in intercultural dialogue and bridge societal divides"--

Strengthening Forensic Science in the United States A Path Forward *National Academies Press* Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website. Jersey Shore Impressionists The Fascination of Sun and Sea 1870-1940 *Down the Shore Pub* Water and light have seduced artists through the years and the quality of these elements at the New Jersey Shore continues to attract artists to this day. Between the late 1800s and 1940, an inspired group of painters were drawn to the New Jersey coastline, forming communities of artists. Jersey Shore Impressionists breaks new ground in the history of American art by recognizing the distinct influence of New Jersey and its Shore on impressionist era American painters. This book establishes - for the first time - a category of impressionist American painters who focused on, or were profoundly influenced by, the landscapes and seascapes of this Shore -- from Sandy Hook and Highlands to the Barnegat Bay region to Cape May. "Not since 1964, nearly 50 years ago, and only once before that in 1938 has there been published a book on painters in New Jersey," says the book's author, Roy Pedersen. "Never until now has there appeared a survey of the regional impressionist painters of New Jersey. This book and the accompanying exhibition for the first time celebrate these unrecognized works into the history of New Jersey and American art." Jersey Shore Impressionists is produced in conjunction with a 2013 exhibition at the Morven Museum & Garden in Princeton, NJ. The exhibition, titled "Coastal Impressions: Painters of the Jersey Shore, 1880-1940" seeks to examine how the New Jersey shore was home to artist colonies whose output rivaled that of the better-known colonies of Old Lyme and Cos Cob, Connecticut, and Bucks County, Pennsylvania. In a Foreword, Richard J. Boyle, former director of the Pennsylvania Academy of the Fine Arts, describes the foundation of art colonies, and how they traveled from origins in mid-nineteenth century France to the plein-air attraction of the Jersey Shore's "special light." The first art colony - at Manasquan - forms around 1880 as young artists fresh from European training in Germany, France and Italy begin to arrive, and the book includes work from these artists - Will Hicok Low, Theodore Robinson, Albert Grantley Reinhart, Charles Freeman and Caroline Coventry Haynes. The next generation - Edward Boulton, Ida Wells Stroud, Julius Golz - trained in America, join and form new colonies to paint the unique light as well as the activities of the Shore. The passionate work created by these artists stands as an important, but unsung, chapter of American Impressionism and is celebrated in this book, establishing the important contribution to American art in general, and New Jersey's cultural heritage in particular. Parenting Matters Supporting Parents of Children Ages 0-8 *National Academies Press* Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States. Training in the Motor Vehicle Repair and Sales Sector in the Netherlands Report for the FORCE Programme Training in the motor vehicle repair and sales sector in the Netherlands was examined in a study that included the following approaches: review of the sector's structure/characteristics, institutional and social context, employment practices, changing conditions, and available education and training; in-depth case studies of four auto repair shops and dealerships (two small, one medium-sized, and one large firm); and identification of economic, employment, and training trends. It was discovered that, in response to stagnation of the Dutch motor vehicle sales and repair industry in the 1990s, both the Dutch government and the industry have increased their commitment to vocational training and inservice courses and have created a training infrastructure that compares favorably with those of other sectors in the Dutch economy. All four businesses studied in depth were managed by individuals who were very involved in training, had access to good facilities and opportunities for on-the-job teaching/training, and could avail themselves of good external provisions for inservice training. Quality of service was an important element of training philosophy. Training needs were not always analyzed in a very structured way, and none of the businesses studied evaluated systematically the costs/benefits of training. Contains 20 references and 19 tables/figures. (MN) PC Mag PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services.
