RADAR INSTRUCTION MANUAL

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. THE RISK MANAGEMENT PROCESS FOR FEDERAL FACILITIES: AN INTERAGENCY SECURITY COMMITTEE STANDARD

One of the Department of Homeland Security's (DHS) priorities is the protection of Federal employees and private citizens who work within and visit U.S. Government-owned or leased facilities. The Interagency Security Committee (ISC), chaired by DHS, consists of 53 Federal departments and agencies, has as its mission the development of security standards and best practices for nonmilitary Federal facilities in the United States. As Chair of the ISC, I am pleased to introduce the new ISC document titled The Risk Management Process: An Interagency Security Committee Standard (Standard). This ISC Standard defines the criteria and processes that those responsible for the security of a facility

should use to determine its facility security level and provides an integrated, single source of physical security countermeasures for all nonmilitary Federal facilities. The Standard also provides guidance for customization of the countermeasures for Federal facilities.

THE 9TH SYMBOL

Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the

Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

TELLING HANDS AND TEACHING FEET

NONVERBAL COMMUNICATION IN TWO OF THE NARRATIVES IN ACTS

Peter Lang Limited, International Academic Publishers **This book represents an extensive examination of human hands and feet and their functions as media of nonverbal communication in the transmission of the mission and message of Jesus by the early church. Research sources for the task include the Greek text of Acts and the Gospel of Luke as well as Greek Second Temple Jewish writings, contemporary Greek literature and medical works. Scholarly definitions and descriptions from the field of interpersonal communication lend credibility to the enquiry. In the process of discovering whether or not these media of nonverbal communication contribute effectively to the advancement of the mission and message of Jesus, the author's interesting and innovative approach casts light on the text as several new and creative insights emerge. The book concludes with some practical applications of its findings to the life of the church of today.**

UPGRADING AND REPAIRING SERVERS

Pearson Education **As the price of servers comes down to the level of desktop PCs, many small- and medium-sized businesses are forced to provide their own server setup, maintenance and support, without the high-dollar training enjoyed by their big corporation counterparts. Upgrading and Repairing Servers is the first line of defense for small- and medium-sized businesses, and an excellent go-to reference for the experienced administrators who have been asking for a reference guide like this one for a long time! It's all here in one, incredibly useful tome that you will refer to again and again. Inside is in-depth coverage of server design and implementation, building and deploying, server hardware components, network and backup operations, SAN, fault tolerance, server racks, server rooms, server operating systems, as well as SUN Microsystems servers. No other computer hardware book has ever dared tackle this enormous topic - until now!**

ADA 95

THE LOVELACE TUTORIAL

Springer Science & Business Media Lovelace provides an introduction to Ada 95, one of the most widely used programming languages in the world. Although the reader is assumed to have a basic understanding of programming, no prior exposure to Ada is assumed and all the basics of the language are covered. The book comprises eighteen chapters

each of which is composed of short sections designed to cover a small number of key concept and to provide a test question to check the reader's understanding of the concepts covered. Each chapter then concludes with a small quiz to help ensure that the reader has grasped the principles covered in the chapter. One of Ada 95's new features, its object-oriented facilities, is covered in depth, and all of the essential features of Ada programming are covered thoroughly. In Ada 95 significant enhancements were also added to Ada's ability to interface with other programming languages (such as C, Fortran, and Cobol) and these are covered in one chapter. As a result both students and professional programmers learning Ada for the first time will welcome this new text.

REMEMBERING WASHINGTON STATE

Remembering Washington State has a rich history. Known for its stunning natural beauty and diversity, Washington was populated for centuries by a large number of Native American tribes. Explored by British sea captains in the late eighteenth century, the region was opened in the early nineteenth century with the aid of explorers Lewis and Clark. With the coming of the railroads, cities such as Seattle, Tacoma, and Spokane grew rapidly, while other communities sprouted up around the state. From coal mining in King County and logging in the deep forests, to farming in the Palouse and fishing on the Columbia, everyday men and women attempted to carve a living. With a selection of fine historic images from his best-selling book, *Historic Photos of Washington State*, Dale E. Soden provides a valuable and revealing historical retrospective on the growth and development of Washington State. Selected from several archival collections, these photographs include a number of images from two of Washington's best-known photographers, brothers Edward and Asahel Curtis. Published in striking black-and-white, *Remembering Washington State* reveals the history of what has become one of the most intriguing states in the nation.

ESTIMATING MARKET VALUE AND ESTABLISHING MARKET RENT AT SMALL AIRPORTS

"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.
