RESIDENTIAL DUCT SYSTEMS - MANUAL D

THIRD EDITION, VERSION 2. 50

Debolsillo *The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.*

POCKET MANUAL FOR THERMPROCESS TECHNOLOGY

Vulkan-Verlag GmbH This pocket manual provides a selective survey of available engineering for the product range of LOI Thermoprocess GmbH. Furthermore, important information material based on specialized literature is summarized. The pocket manual primarily focuses on engineering aspects. Information on process technology is limited to topics which concern all or most of all plant equipment (furnaces) in order not to exceed the pocket manual concept. Data is mainly provided numerically in tables in order to simplify direct calculable utilization. Diagrams are only used if they improve illustration or to feature the plant equipment (furnace) based origin of the data. The SI measuring units are used pragmatically. For most tables the conversion factor is directly assigned for the area in which the Anglo- American language prevails. The American notation is used for designation of magnitude of the numerical values.
