THE FEDERALIST PAPERS

Read Books Ltd Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

THE OFFICIAL HISTORY OF THE JOINT INTELLIGENCE COMMITTEE

VOLUME I: FROM THE APPROACH OF THE SECOND WORLD WAR TO THE SUEZ CRISIS

Routledge Volume One of the Official History of the Joint Intelligence Committee draws upon a range of released and classified papers to produce the first, authoritative account of the way in which intelligence was used to inform policy. For almost 80 years the Joint Intelligence Committee (JIC) has been a central player in the secret machinery of the British Government, providing a co-ordinated intelligence service to policy makers, drawing upon the work of the intelligence agencies and Whitehall departments. Since its

creation, reports from the JIC have contributed to almost every key foreign policy decision taken by the British Government. This volume covers the evolution of the JIC since 1936 and culminates with its role in the events of Suez in 1956. This book will be of much interest to students of intelligence studies, British politics, international diplomacy, security studies and International Relations in general. Dr Michael S. Goodman is Reader in Intelligence and International Affairs in the Department of War Studies, King's College London. He is author or editor of five previous books, including the Routledge Companion to Intelligence Studies (2013).

CLASS, CULTURE AND COMMUNITY

NEW PERSPECTIVES IN NINETEENTH AND TWENTIETH CENTURY BRITISH LABOUR HISTORY

Cambridge Scholars Publishing In recent years, historians have debated fervently on the reason for the decline of British Labour History as an academic discipline. Most certainly the challenge of Thatcherism to the working classes and trade unions in the 1980s, and the fragmentation of Labour history into gender studies, industrial studies and women's history, have contributed to its apparent decline. Post-modernists' challenges to the concept of class, culture and community have done their damage. As a result "Labour history", in its broad-school sense, has been taught less and less in British universities. Yet it survives and there are grounds for believing that it will revive. This collection of chapters arose from a conference held at the University of Huddersfield in November 2010, held under the auspices of the Society for the Study of Labour History, where nineteen papers were presented. Ten of this disparate array of papers form the basis of this collection. The theme of community and localised struggle form the first section, ranging as it does from the newspapers' representation of Yorkshire miners to brass bands and the development of separate culture. The second section deals with the more traditional trade unionism and varieties of industrial struggle. The third section focuses upon the political aspects of working-class activity, drawing upon the role of women, and Labour policy on steel nationalisation and defence. The fourth deals with radicalism, ranging from the failure of Chartism, the policy of working-class organisations to emigration, and the failure of the "soft" section of the British left in the 1920s and 1930s. There is no all-embracing concept here for what is a varied collection of chapters. However, what can be said is that British Labour history continues to provide new areas for research. Indeed, its death as an academic discipline has been greatly exaggerated. This collection of book chapters represents the current revival in Labour history which has emerged in a form that brings together community and culture alongside class and political representation to explore the breadth and depth of working-class identity.

THE MEDITERRANEAN CONTEXT OF EARLY GREEK HISTORY

John Wiley & Sons The Mediterranean Context of Early Greek History "Drawing extensively on the latest archaeological data from the

entire Mediterranean basin, Nancy Demand offers a compelling argument for situating the origins of the Greek city-state within a pan-Mediterranean network of maritime interactions that stretches back millennia.” Jonathan Hall, University of Chicago “Nancy Demand’s book is a remarkable achievement. Her Heraklian labors have produced stunning documentation of the consequences of the vast spectrum of interaction between the peoples surrounding the Mediterranean Sea from the Mesolithic into the Iron Age.” Carol Thomas, University of Washington Were the origins of the Greek city-state – the polis – a unique creation of Greek genius? Or did their roots extend much deeper? Noted historian Nancy H. Demand joins the growing group of scholars and historians who have abandoned traditional isolationist models of the development of the Greek polis and cast their scholarly gaze seaward, to the sparkling waters of the Mediterranean. The Mediterranean Context of Early Greek History reveals the role the complex interaction of Mediterranean cultures and maritime connections had in shaping and developing urbanization, including the ancient Greek city-states. Utilizing, and enhancing upon, the model of the “fantastic cauldron” first put forth by Jean-Paul Morel in 1983, Demand reveals how Greek city-states did not simply emerge in isolation in remote country villages, but rather, sprang up along the shores of the Mediterranean in an intricate maritime network of Greeks and non-Greeks alike. We learn how early seafaring trade, such as the development of obsidian trade in the Aegean, stimulated innovations in the provision of food (the Neolithic Revolution), settlement organization (“political form”), materials for tool production, and concepts of divinity. With deep scholarly precision, The Mediterranean Context of Early Greek History offers fascinating insights into the wider context of the Greek city-state in the ancient world.

THE MAKING OF A HISTORY

WALTER PRESCOTT WEBB AND THE GREAT PLAINS

University of Texas Press Walter Prescott Webb became one of the best known interpreters of the American West following the

publication of *The Great Plains* in 1931. That book remained one of the outstanding studies of the region for decades and attracted considerable attention over the years for its unusual emphasis on the impact of geographic factors on the process of settlement. Using manuscript sources, some of which had not previously been available, Gregory M. Tobin has traced the elements that went into the planning and writing of *The Great Plains* and that account for its distinctive approach to the writing of a regional history. Tobin emphasizes two aspects of Webb's life that molded the historian's outlook: his early family life and community connections in West Texas and his admiration for the ideas of scholar Lindley Miller Keasbey. Webb reacted strongly against the assumption that the only cultural values of any real worth emanated from the urban and sophisticated East; he was determined to write the history of his own people in a way that would reveal the scale of their anonymous contribution to American civilization. By reverting to Keasbey's stress on the relationship between natural environment and social institutions, Webb broadened his study to take in what he believed to be a distinct geographic environment. The result was *The Great Plains*, an assertion of individual and regional identity by a man with a personal stake in establishing the image of a distinctive Plains civilization. Although *The Making of a History* is not a full biography of Walter Prescott Webb, it is the first biographically oriented study of a man regarded as one of the twentieth century's major western historians. It places his development within the framework of his intellectual and social setting and, in a sense, subjects his career to the same type of scrutiny that he advocated as the basis of the study of evolving cultures.

THE GOVERNOR AND THE COLONEL

A DUAL BIOGRAPHY OF WILLIAM P. HOBBY AND OVETA CULP HOBBY

University of Texas Press William P. “Will” Hobby Sr. and Oveta Culp Hobby were one of the most influential couples in Texas history. Both were major public figures, with Will serving as governor of Texas and Oveta as the first commander of the Women’s Army Corps and later as the second woman to serve in a presidential cabinet. Together, they built a pioneering media empire centered on the Houston Post and their broadcast properties, and they played a significant role in the transformation of Houston into the fourth largest city in the United States. Don Carleton’s dual biography details their personal and professional relationship—defined by a shared dedication to public service—and the important roles they each played in local, state, and national events throughout the twentieth century. This deeply researched book not only details this historically significant partnership, but also explores the close relationships between the Hobbys and key figures in twentieth-century history, from Texas legends such as LBJ, Sam Rayburn, and Jesse Jones, to national icons, including the Roosevelts, President Eisenhower, and the Rockefellers. Carleton's chronicle reveals the undeniable impact of the Hobbys on journalistic and political history in the United States.

THE GLASGOW UNIVERSITY CALENDAR

TEACHER PRACTICE ONLINE

SHARING WISDOM, OPENING DOORS

Teachers College Press Teachers know how complicated their work is. They constantly balance considerations of individual students with those of the group; they think about how past events affect today’s lessons; and they constantly adapt and revise for future lessons. But few people ever get to see teachers’ work in this way. The most energizing, relational, complicated, inspiring, disheartening parts of teaching remain largely invisible. Over nearly a decade at the Carnegie Foundation for the Advancement of Teaching, Désirée Pointer Mace worked with dozens of teachers across the country to “open their doors” by creating multimedia, web-based representations of teaching practice. This book describes how such multimedia representations are envisioned, documented, created, and shared and how others might engage in this process. This practical book: Examines the cutting edge of electronic-media documentation of teaching practice. Features cases studies that represent diverse grades, cultures, and contexts with both novice and veteran teachers. Provides clear examples of how multimedia representations of teaching can be used as alternative texts in teacher

learning environments. Describes the positive outcomes for teachers and learners when teaching is made public. Includes screen images of teachers' websites, as well as classrooms and children participating in projects. "[This book] is a rare find. . . . We not only learn from Pointer Mace's examples, but also get inside what we need to know to learn the power and possibilities of making our own websites, to learn from our own practice, and to secure a position in the conversation about learning from one's own teaching."
—From the Foreword by Ann Lieberman, Senior Scholar, Carnegie Foundation for the Advancement of Teaching "Désirée Pointer Mace is in the vanguard of a new generation of teacher educators. This volume will become a classic reference in the emergence of a new signature pedagogy for the initial preparation and professional development of teachers." —Lee S. Shulman, Charles E. Ducommun Professor of Education Emeritus, Stanford University "The practices discussed in this book are at the cutting edge of current efforts to preserve and learn from the wisdom of expert teachers. This book is must reading for teacher educators at all levels of the teaching career." —Ken Zeichner, Hoefs-Bascom Professor of Teacher Education, University of Wisconsin-Madison "Pointer Mace creates a community of teacher-scholars with an important story to tell us about their lives in the classroom. Teachers, researchers, doctoral students, parents, and, yes, students will be changed by reading this book." —Ricki Goldman, New York University
