El diagnóstico en odontología

Programa Editorial UNIVALLE El objetivo de esta obra es mostrar aspectos generales de las enfermedades que son más frecuentes en la consulta del odontólogo, haciendo énfasis en lo fundamental y lo práctico. Se inicia con historia clínica, pasando por las alteraciones del sistema estomatognático, y se finaliza con las enfermedades sistémicas que comprometen al paciente y que representan para el profesional un reto académico. Este libro es un complemento y no tiene como objetivo sustituir los criterios del profesional, pero sí ofrecer elementos para actualizar sus conocimientos y afinar sus habilidades diagnósticas. En el texto se describen numerosas enfermedades desde el componente clínico, histológico y radiográfico en una forma sencilla, logrando así que los temas sean comprendidos y aplicados fácilmente. En la primera parte se expone lo referente a la historia clínica sin un formato predeterminado, pero sí con una secuencia lógica que permita al profesional investigar según sus propias habilidades sin dejar ningún contenido que podría ser de utilidad en el diagnóstico. La segunda parte es una aproximación a las lesiones más prevalentes en la consulta odontológica. No se profundiza en la histopatología porque este texto tiene una finalidad ante todo clínica; lo más importante es lograr identificar una lesión entre un grupo de posibles diagnósticos diferenciales y así determinar el diagnóstico final, apoyado en estudios paraclínicos y el reporte histopatológico. El material fotográfico original, está compuesto por 438 imágenes recopiladas durante varios años de trabajo clínico del autor, como profesor universitario, las cuales muestran lesiones con características particulares que acercan al lector a un conocimiento más preciso sobre la enfermedad.

The Body Where I was Born

Seven Stories Press *The first novel to appear in English by one of the most talked-about and critically acclaimed writers of new Mexican fiction. From a psychoanalyst's couch, the narrator looks back on her bizarre childhood—in which she was born with an abnormality in her eye into a family intent on fixing it. In a world without the time and space for innocence, the narrator intimately recalls her younger self—a fierce and discerning girl open to life's pleasures and keen to its ruthless cycle of tragedy. With raw language and a brilliant sense of humor, both delicate and unafraid, Nettel strings together hard-won, unwieldy memories—taking us from Mexico City to Aix-en-Provence, France, then back home again—to create a portrait of the artist as a young girl. In these pages, Nettel's art of storytelling transforms experience into inspiration and a new startling perception of reality. "Nettel's eye...gives rise to a tension, subtle but persistent, that immerses us in an uncomfortable reality, disquieting, even disturbing—a gaze that illuminates her prose like an alien sun shining down on our world." —Valeria Luiselli, author of Sidewalks and Faces in the Crowd "It has been a long time since I've found in the literature of my generation a world as personal and untransferable as that of Guadalupe Nettel." —Juan Gabriel Vásquez, author of The Sound of Things Falling "Nettel reveals the subliminal beauty within beings...and painstakingly examines the intimacies of her soul." —Magazine Littéraire "Guadalupe Nettel's storytelling power is majestic."—Typographical Era In*

Nutritional disorders in the elderly

SICS Editore *Deterioration of the nutritional status in an elderly person should be identified. Clinical findings alone are not sensitive indicators of malnutrition. Sufficient intake of energy, proteins and other nutrients through diet should be guaranteed. An overweight person less than 75 years of age may slim with caution if he/she has comorbidities. Patients aged over 75 years rarely benefit from slimming programmes. To ensure sufficient intake of vitamin D, a supplementation of 20 µg (800 IU) daily throughout the year is recommended for persons aged over 60 years.*

The Body Hunters

Testing New Drugs on the World's Poorest Patients

New Press, *The Hailed* by John le Carré as "an act of courage on the part of its author" and singled out for praise by the leading medical journals in the United States and the United Kingdom, *The Body Hunters* uncovers the real-life story behind le Carré's acclaimed novel *The Constant Gardener* and the feature film based on it. "A trenchant exposé . . . meticulously researched and packed with documentary evidence" (*Publishers Weekly*), *Sonia Shah's riveting journalistic account shines a much-needed spotlight on a disturbing new global trend. Drawing on years of original research and reporting in Africa and Asia, Shah examines how the multinational pharmaceutical industry, in its quest to develop lucrative drugs, has begun exporting its clinical research trials to the developing world, where ethical oversight is minimal and desperate patients abound. As the New England Journal of Medicine notes, "it is critical that those engaged in drug development, clinical research and its oversight, research ethics, and policy know about these stories," which tell of an impossible choice being faced by many of the world's poorest patients—be experimented upon or die for lack of medicine.*

Cruelty and Utopia

Cities and Landscapes of Latin America

Princeton Architectural Press *This landmark collection of illustrated essays explores the vastly underappreciated history of America's other cities -- the great metropolises found south of our borders in Central and South America. Buenos Aires, So Paulo, Mexico City, Caracas, Havana, Santiago, Rio, Tijuana, and Quito are just some of the subjects of this diverse collection. How have desires to create modern societies shaped these cities, leading to both architectural masterworks (by the likes of Luis Barragn, Juan O'Gorman, Lcio Costa, Roberto Burle Marx, Carlos Ral Villanueva, and Lina Bo Bardi) and the most shocking favelas? How have they grappled with concepts of national identity, their colonial history, and the continued demands of a globalized economy? Lavishly illustrated, Cruelty and Utopia features the work of such leading scholars as Carlos Fuentes, Edward Burian, Lauro Cavalcanti, Fernando Oayrzn, Roberto Segre, and Eduardo Subirats, along with artwork ranging from colonial paintings to stills from Chantal Akerman's film From the Other Side. Also included is a revised translation of Spanish King Philip II's influential planning treatise of 1573, the "Laws of the Indies," which did so much to define the form of the Latin American city.*

The Crisis of Public Health

Reflections for the Debate

Pan Amer Health Org *The crisis of public health: Reflections for the debate brings together an important and informative group of papers relating to the process of analysis that PAHO has fostered for the last four years. The book first looks at the programmatic priorities established by PAHO's Governing Bodies relative to this issue and then presents representative points of view from throughout the hemisphere on what constitutes the crisis as such. These latter contributions were also the object of an initial discussion held in New Orleans, Louisiana, in October 1991, which is summarized in the third part of the book. Finally, a proposed agenda for future debate at the country level is presented. The principal objective of The crisis of public health: Reflections for the debate is to stimulate public health professionals to undertake a more thorough analysis, with the hope of effecting a change in both what is examined (broaden the object of analysis) and how it is examined (use more far-reaching analytical traditions.) Readers will realize that the book is not merely a culmination of current concern over public health but rather a point of departure for further analysis and action.*
