## Economic Analysis of the Digital Economy

**University of Chicago Press** *There is a small and growing literature that explores the impact of digitization in a variety of contexts, but its economic consequences, surprisingly, remain poorly understood. This volume aims to set the agenda for research in the economics of digitization, with each chapter identifying a promising area of research. Economics of Digitization identifies urgent topics with research already underway that warrant further exploration from economists. In addition to the growing importance of digitization itself, digital technologies have some features that suggest that many well-studied economic models may not apply and, indeed, so many aspects of the digital economy throw normal economics in a loop. Economics of Digitization will be one of the first to focus on the economic implications of digitization and to bring together leading scholars in the economics of digitization to explore emerging research.*

## The Oxford Handbook of the Digital Economy

**Oxford University Press** *The economic analysis of the digital economy has been a rapidly developing research area for more than a decade. Through authoritative examination by leading scholars, this Handbook takes a closer look at particular industries, business practices, and policy issues associated with the digital industry. The volume offers an up-to-date account of key topics, discusses open questions, and provides guidance for future research. It offers a blend of theoretical and empirical works that are central to understanding the digital economy. The chapters are presented in four sections, corresponding with four broad themes: 1) infrastructure, standards, and platforms; 2) the transformation of selling, encompassing both the transformation of traditional selling and new, widespread application of tools such as auctions; 3) user-generated content; and 4) threats in the new digital environment. The first section covers infrastructure, standards, and various platform industries that rely heavily on recent developments in electronic data storage and transmission, including software, video games, payment systems, mobile telecommunications, and B2B commerce. The second section takes account of the reduced costs of online retailing that threatens offline retailers, widespread availability of information as it affects pricing and advertising, digital technology as it allows the widespread employment of novel price and non-price strategies (bundling, price discrimination), and auctions, as well as better tar. The third section addresses the emergent phenomenon of user-generated content on the Internet, including the functioning of social networks and open source. Finally, the fourth section discusses threats arising from digitization and the Internet, namely digital piracy, privacy and internet security concerns.*

## Moon-face and Other Stories

**IndyPublish.com** JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. "The son of the Wolf" (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, "The Call of the Wild" (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including "The Sea-Wolf" (1904), "White Fang" (1906), "South Sea Tales" (1911), and "Jerry of the South Seas" (1917). One of London's most interesting novels is the semi-autobiographical "Martin Eden" (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

## True Crime Writings in Colonial India

## Offending Bodies and Darogas in Nineteenth-Century Bengal

**Taylor & Francis** *The emergent culture of crime writings in late 19th century colonial Bengal (India) is an interesting testimony to how literature is shaped by various material forces including the market. This book deals with true crime writings of the late 1800s published by 'lowbrow publishing houses' — infamous for publishing 'sensational' and the 'vulgar' literature — which had an avid bhadralok (genteel) readership. The volume focuses on select translations of true crime writings by Bakaulah and Priyanath Mukhopadhyay who worked as darogas (Detective Inspectors) in the police department in mid-late nineteenth century colonised Bengal. These published accounts of cases investigated by them are among the very first manifestations of the crime genre in India. The writings reflect their understandings of criminality and guilt, as well as negotiations with colonial law and policing. Further, through a selection of cases in which women make an appearance either as victims or offenders, (or sometimes as both,) this book sheds light on the hidden gendered experiences of the time, often missing in mainstream Bangla literature. Combining a love for suspense with critical readings of a cultural phenomenon, this book will be of much interest to scholars and researchers of comparative literature, translation studies, gender studies, literary theory, cultural studies, modern history, and lovers of crime fiction from all disciplines.*

## StadiumATLAS

**Ernst & Sohn** *This StadiumATLAS is a building-type planning guide for the construction of spectator stands in modern sports and event complexes. A methodological comparison of the venues of the FIFA World Cup 2006 in Germany continues into a catalogue of "Technical recommendations and requirements" for the new erection or the modernization of multi-functional sports arenas on the basis of current European building regulations. The main focus lies on all essential and relevant aspects of planning and developing future concepts for the construction of grandstands. Requirements for the building type of "gathering space" have changed significantly within the course of the last decades. Achieving higher convenience for spectators and a better commercial exploitation have become guiding principles for the design of new sports complexes. In this handbook, the principles of building regulations and the guidelines of important sports associations are analyzed and interrelated in order to clarify dependencies and enable critical conclusions on the respective regulations. The StadiumATLAS aims to illustrate the constructional and geometrical effects of certain specifications and to facilitate decision-making for planners and clients regarding important parameters of stadium design.*

## Godlis Streets

*David Godlis captures the grit and grandeur of 1970s-'80s New York City in his street photography. When he is on the street armed with his camera, photographer David Godlis (born 1951) describes himself as "a gunslinger and a guitar picker all in one." Ever since he bought his first 35mm camera in 1970, Godlis has made it his mission to capture the world on film just as it appears to him in reality. Godlis is most famous for his images of the city's punk scene and serving as the unofficial official photographer for the Film Society of Lincoln Center. For 40 years, his practice has also consisted of walking around the streets of New York City and shooting whatever catches his eye: midnight diner patrons, stoop loiterers, commuters en route to the nearest subway station. With an acute sense of both humor and pathos, Godlis frames everyday events in a truly arresting manner. This publication presents Godlis' best street photography from the 1970s and '80s in a succinct celebration of New York's past. The book is introduced by an essay written by cultural critic Luc Sante and closes with an afterword written by Blondie cofounder and guitarist Chris Stein.*

## The Hidden Lamp

## Stories from Twenty-Five Centuries of Awakened Women

**Simon and Schuster** *The Hidden Lamp is a collection of one hundred koans and stories of Buddhist women from the time of the Buddha to the present day. This revolutionary book brings together many teaching stories that were hidden for centuries, unknown until this volume. These stories are extraordinary expressions of freedom and fearlessness, relevant for men and women of any time or place. In these pages we meet nuns, laywomen practicing with their families, famous teachers honored by emperors, and old women selling tea on the side of the road. Each story is accompanied by a reflection by a contemporary woman teacher--personal responses that help bring the old stories alive for readers today--and concluded by a final meditation for the reader, a question from the editors meant to spark further rumination and inquiry. These are the voices of the women ancestors of every contemporary Buddhist.*

This book provides an accessible introduction to the economics of the internet and a comprehensive account of the mechanisms of the digital economy. The volume examines how internet and digital economics have transformed the organization of firms, industries, markets, commerce, modes of distribution, money, finance, and innovation processes, and provides the analytical tools to understand both these recent transformations and the likely future directions of the 'New Economy'.

## Prince2 Foundation Training Manual

Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

## Discrimination in Elite Public Schools

### Investigating Buffalo

**Teachers College Press** School choice is an increasingly important part of today's educational landscape and this timely volume presents fresh research about the competitive admissions policies of choice systems. Based on their investigation of a unique civil rights challenge to school choice admissions policies in politically and racially divided Buffalo, New York, and the struggle to open its best schools to students of color, authors Orfield and Ayscue contend that without intentional effort, choice systems are likely to exacerbate problems of inequality and segregation. Focusing on issues that will continue to be contested in the courts and in the policy arena, the authors offer research-based recommendations for reducing barriers to enrollment and for creating competitive-admissions choice systems that will allow all students access to important educational opportunities. The book outlines specific steps school systems can take, including developing a district-wide diversity plan, providing more accessible information, conducting holistic admissions processes, expanding the availability of choices, and offering preparation programs to assist students long excluded from these highly competitive schools. Contributors: Natasha Amlani, Jongyeon Ee, Genevieve Siegel-Hawley, Jenna Tomasello, Brian Woodward "This important book ought to inspire a national debate. I hope it will be widely read." —Jonathan Kozol, education activist and bestselling author *In the News: Buffalo Parents Slam School District's Response to Civil Rights Complaint*: "This time around, parents with the District Parent Coordinating Council say that the proposal does not go far enough in addressing their complaints or the recommendations that Orfield proposed earlier this year." —Excerpt from *Education Week* (10/1/15)
