Undertaker of the Mind

John Monro and Mad-Doctoring in Eighteenth-Century England

Univ of California Press **As visiting physician to Bethlem Hospital, the archetypal "Bedlam" and Britain's first and (for hundreds of years) only public institution for the insane, Dr. John Monro (1715-1791) was a celebrity in his own day. Jonathan Andrews and Andrew Scull call him a "connoisseur of insanity, this high priest of the trade in lunacy." Although the basics of his life and career are well known, this study is the first to explore in depth Monro's colorful and contentious milieu. Mad-doctoring grew into a recognized, if not entirely respectable, profession during the eighteenth century, and besides being affiliated with public hospitals, Monro and other mad-doctors became entrepreneurs and owners of private madhouses and were consulted by the rich and famous. Monro's close social connections with members of the aristocracy and gentry, as well as with medical professionals, politicians, and divines, guaranteed him a significant place in the social, political, cultural, and intellectual worlds of his time. Andrews and Scull draw on an astonishing array of visual materials and verbal sources that include the diaries, family papers, and correspondence of some of England's wealthiest and best-connected citizens. The book is also distinctive in the coverage it affords to individual case histories of Monro's patients, including such prominent contemporary figures as the Earls Ferrers and Orford, the religious "enthusiast" Alexander Cruden, and the "mad" King George III, as well as his crazy would-be assassin, Margaret Nicholson. What the authors make clear is that Monro, a serious physician neither reactionary nor enlightened in his methods, was the outright epitome of the mad-trade as it existed then, esteemed in some quarters and ridiculed in others. The fifty illustrations, expertly annotated and integrated with the text, will be a revelation to many readers.**

Barry McCauley **'I am a serial killer. You don't know me. You may know of my work, my accomplishments, my deeds and my triumphs. You will not, however, know of my mistakes, my near misses or what made and inspired me to be the person I am today.'** Gary Robinson has an ordinary name, but not an ordinary life. He's a man who takes a great amount of care, and derives a great amount pleasure from his work. He is a mass murderer, a monster. He kills for the

pleasure of it. This is his story, written as only he can tell it. It is not for the faint-hearted.

A Plague of Murder

The Rise and Rise of Serial Killing in the Modern Age

Diversion Books From the bestselling author of *THE OUTSIDER* Serial killers are the headline-grabbing criminals of the modern world. But despite extensive police investigations, court trials, and news stories, a complete map of the serial-killer mindset has proven elusive. This fascinating study by one of the world's foremost popular criminologists lays bare the roots of a terrifying modern phenomenon. The term "serial killer" is still relatively new, coined by the FBI to describe those who murder repeatedly and obsessively, usually with a sexual motive. Who are these killers? What social and psychological pressures have produced them? Can we understand and learn to predict their behavior? Colin Wilson examines the changing face of murder over more than a century. Here are studies of some of the most infamous killers of our era, from Jack the Ripper to Jeffrey Dahmer, the monster of Milwaukee; Reginald Christie to Dennis Nilsen, who killed for company; the Boston Strangler to Donald Gaskins, who murdered more than 100 victims; as well as Richard Ramirez, the Night Stalker and many more.

The Subject of Murder

Gender, Exceptionality, and the Modern Killer

University of Chicago Press The subject of murder has always held a particular fascination for us. But, since at least the nineteenth century, we have seen the murderer as different from the ordinary citizen—a special individual, like an artist or a genius, who exists apart from the moral majority, a sovereign self who obeys only the destructive urge, sometimes even commanding cult followings. In contemporary culture, we continue to believe that there is something different and exceptional about killers, but is the murderer such a distinctive type? Are they degenerate beasts or supermen as they have been depicted on the page and the screen? Or are murderers something else entirely? In *The Subject of Murder*, Lisa Downing explores the ways in which the figure of the murderer has been made to signify a specific kind of social subject in Western modernity. Drawing on the work of Foucault in her studies of the lives and crimes of killers in Europe and the United States, Downing interrogates the meanings of media and texts produced about and by murderers. Upending the usual treatment of murderers as isolated figures or exceptional individuals, Downing argues that they are ordinary people, reflections of our society at the intersections of gender, agency, desire, and violence.

Murder of the U.S. Attorney: Congressman Sickles' Crime of Passion in 1859 (A Historical True Crime Short)

R. Barri Flowers From R. Barri Flowers, award-winning criminologist and bestselling author of *Murdered by the King of Western Swing*, *Murder at the Pencil Factory*, *Murder of the Doctor's Wife*, and *Murder During the Chicago World's Fair*, comes the gripping historical true crime short, *Murder of the U.S. Attorney: Congressman Sickles' Crime of Passion in 1859*. On February 27, 1859, Philip Barton Key II, the forty-year-old U.S. Attorney for the District of Columbia, was gunned down while standing in Lafayette Square, a public park across from the White House. His killer was Rep. Daniel Sickles, a thirty-nine-year-old New York congressman and lawyer whose striking young wife, Teresa Sickles, Key had been having an affair with. Upon discovering his wife's infidelity, Sickles became enraged and had the deadly encounter with her suitor. Afterward, he surrendered to authorities, confessed, was charged with murder, and went to trial. In spite of the cold-blooded and premeditated nature of the attack, Sickles used a defense of temporary insanity for his actions, the first such time this type of legal defense was employed in the United States. He was acquitted as a result and the "temporarily insane" justification for homicide or other serious intimate-involved offenses became a common defense for so-called crimes of passion. Sickles, who was no stranger to public scandals and controversy, was able to effectively get away with murder. He would reconcile with his wife for a short time, continue his career in politics, and become a decorated soldier for the Union Army during the Civil War, and a diplomat, before dying in his nineties. His long life notwithstanding, taking the life of his wife's lover, Philip Key, in a fit of jealousy would forever remain a major part of Daniel Sickles' legacy, as chronicled in this compelling trip back in time of more than 150 years. Bonus material includes a complete and riveting historical true crime short, *Dead at the Saddleworth Moor: The Crimes of Serial Killers Ian Brady & Myra Hindley*; and excerpts from the author's bestselling true crime anthologies, *The Dreadful Acts of Jack the Ripper and Other True Tales of Serial Murder and Prostitutes*, and *Murder and Menace: Riveting True Crime Tales (Vol. 3)*.

Dead at the Saddleworth Moor

The Crimes of Serial Killers Ian Brady & Myra Hindley (A True Crime Short)

R. Barri Flowers From R. Barri Flowers, award winning criminologist and international bestselling author of *The Sex Slave Murders* and *Murder at the Pencil Factory*, comes a riveting new true crime short, *Dead at the Saddleworth Moor: The Crimes of Serial Killers Ian Brady & Myra Hindley*. In this frightening tale of dark fantasies, pornography, rape, and murder, British serial killers Ian Brady and Myra Hindley targeted children in the early 1960s--killing five and burying most of them in the Saddleworth Moor in Northern England--before being brought to justice. Included as a bonus is a complete true crime short, *The Sunset Strip Killers*, about serial killers Douglas Clark and Carol Mary Bundy, who targeted runaways and prostitutes in Hollywood, California in 1980 for rape, torture, murder, and necrophilia. An added bonus is an excerpt from R. Barri Flowers bestselling true crime short, *The Pickaxe Killers*, the unnerving tale of double murderers Karla Faye Tucker and Daniel Garrett, and the resulting national debate on the death penalty.

Serial Killers and the Media

The Moors Murders Legacy

Springer This book examines the media and cultural responses to the awful crimes of Brady and Hindley, whose murders provided a template for future media reporting on serial killers. It explores a wide variety of topics relating to the Moors Murders case including: the historical and geographical context of the murders, the reporting of the case and the unique features which have become standard for other murder cases e.g. nicknames for the serial killers, and it discusses the nature of evil and psychopaths and how they are represented in film, drama, novels and art. It also questions the ethics of the "serial killing industry" and how the modern cultural fixation on celebrity has extended to serial killers, and it explores the impact on the journalists and police officers from being involved in such cases including some interviews with them. The treatment of Brady and Hindley by the media also raises profound questions about the nature of punishment including the links between mental illness and crime and whether there is ever the prospect of redemption. This book draws on cultural studies, criminology, sociology and socio-legal studies to offers a multi-dimensional analysis of the impact of this case and then uses this as a basis for the analysis of more recent cases such as the crimes of Peter Sutcliffe and Harold Shipman.

An Evolutionary Leap

Colin Wilson on Psychology

Routledge When the existential philosopher Colin Wilson died in December 2013, it was suggested by one perceptive obituary writer that, despite the seemingly diverse subject matter of his books, his true legacy lay in the field of Consciousness Studies. This is particularly apparent when studying his many essays and books on psychology and taking into consideration his close association with the celebrated American psychologist Abraham Maslow whose concept of 'Peak Experiences'(PEs) became, for Wilson, an important link to experiencing enhanced consciousness. Maslow, however, felt that PEs could not be induced at will; Wilson thought otherwise and through his work sought to encourage his readers and students to live more vital and appreciative lives thereby paving the way toward an evolutionary leap for mankind in consciousness--indeed, a change in consciousness that would potentially change everything. In this study, Colin Stanley, Wilson's bibliographer and author of *Colin Wilson's 'Outsider Cycle': A Guide for Students* and *Colin Wilson's 'Occult Trilogy': A Guide for Students*, provides an illuminating essay on each of Wilson's nine major books on psychology.

Using Murder

The Social Construction of Serial Homicide

Transaction Publishers In the last decade, serial murder has become a source of major concern for law enforcement agencies, while the serial killer has attracted widespread interest as a villain in popular culture. There is no doubt, however, that popular fears and stereotypes have vastly exaggerated the actual scale of multiple homicide activity. In assessing the concern and the interest, Jenkins has produced an innovative synthesis of approaches to social problem construction. It includes an historical and social-scientific estimate of the objective scale of serial murder; a rhetorical analysis of the construction of the phenomenon in public debate; and a cultural studies-oriented analysis of the portrayal of serial murder in contemporary literature, film, and the mass media. *Using Murder* suggests that a problem of this sort can only be understood in the context of its political and rhetorical dimension; that fears of crime and violence are valuable for particular constituencies and interest groups, which put them to their own uses. In part, these agendas are bureaucratic, in the sense that exaggerated concern about the offense generates support for criminal justice agencies. But other forces are at work in the culture at large, where serial murder has become an invaluable rhetorical weapon in public debates over issues like gender, race, and sexual orientation. Serial murder is worthy of study not so much for its intrinsic significance, but rather for what it suggests about the concerns, needs, and fears of the society that has come to portray it as an "ultimate evil." *Using Murder* is a highly original study of a powerful contemporary mythology by a criminologist and historian versed in the constructionist literature on the origins of "moral panics."

Sin and Forgiveness

New Responses in a Changing World

Routledge Originally published in 2003. Western attitudes to crime were in the past rooted in concepts of sin, and therefore of hopes for redemption and forgiveness. So what happens - to offenders and society as a whole - in a world where people no longer talk of sin but of evil. If hopes of redemption go too, will revenge take the place of forgiveness? Kay Carmichael explores these dilemmas in this topical and provocative book. She traces the stories of Myra Hindley, Mary Bell, Sarah Payne, James Bulger and his killers, comparing public responses to such crimes in various Western countries. Art and literature are examined for the light they throw on the evolution of our ideas about sin and forgiveness - from Rembrandt to Nathaniel Hawthorne, Samuel Becket, Dali and writings inspired by the Holocaust. Turning to our own day, Carmichael discusses the emergence of structural sins or 'iniquities' in which we may all find ourselves involved: poverty, slavery, violence and war are her themes. Her analysis leaves her sceptical about many contemporary appeals for forgiveness, but hopeful about ideas of restorative justice.

How to be Well Read

A guide to 500 great novels and a handful of literary curiosities

Random House As the annual flood of published novels grows ever greater, it's a hard a job to keep up, let alone sort the wheat from the chaff. Fortunately, literary sleuth and academic John Sutherland is on hand to do precisely that. In the course of over 500 wittily informative pieces he gives us his own very personal take on the most rewarding, most remarkable and, on occasion, most shamelessly enjoyable works of fiction ever written - the perfect reading list for the would-be literary expert. His taste is impressively eclectic. An appreciation of Apuleius's *The Golden Ass* - arguably the first-ever novel - is followed by a consideration of Ian Fleming's *Goldfinger*. *The Handmaid's Tale* is followed by *Hangover Square*, *Jane Eyre* by *Jaws*. There are imposing Victorian novels, entertaining contemporary thrillers and everything in between, from dystopian works to romance. The flavour of each is brilliantly evoked and its relative merits or demerits assessed. At the same time, John Sutherland shows how the work fits into a broader context - whether that of the author's life or of other books from the same genre or period. And he offers endless snippets of intriguing information: did you know, for example, that the Nazis banned *Bambi* or that William Faulkner wrote *As I Lay*

Dying on an upturned wheelbarrow; that Voltaire completed *Candide* in three days, or that Anna Sewell was paid £20 for *Black Beauty*? Encyclopedic and entertaining by turns, this is a wonderful dip-in book, whose opinions will inform and on occasion, no doubt, infuriate. It is also effectively a history of the novel in 500 or so bite-sized pieces.

Why War?

Psychoanalysis, Politics and the Return to Melanie Klein

John Wiley & Sons Over the past decade, psychoanalysis has been a focus of continuing controversy for feminism, and at the centre of debates in the humanities about how we read literature and culture. In these essays, Jacqueline Rose continues her engagement with these issues while arguing for a shift of attention - from an emphasis on sexuality as writing to the place of the unconscious in the furthest reaches of our cultural and political lives. With essays on war, capital punishment and the dispute over seduction in relation to Freud, she opens up the field of psychopolitics. Finally in two extended essays on Melanie Klein and her critics, she suggests that it is time for a radical rereading of Klein's work.

Inside the Law

25 Years of True Crime Writing

Clan Destine Press Vikki Petraitis took to writing true crime because, unlike crime fiction, it was so raw and it told the story of real people, real grief, real loss, real horror. A school teacher by day, Vikki had no idea that writing one book about one unsolved murder would give her a second career that has run alongside her chosen profession for 25 years. She has researched, investigated and written about real Australian crimes, from the well-known to the obscure; and interviewed countless police, crime scene professionals, victims, survivors and families. She did ride-alongs with members of Victoria Police so she could learn about their most memorable cases, and found herself right there with them when a serial killer's third victim was found. Vikki spent time with the dog squad learning how the four-legged police officers are trained to work with their two-legged partners. And she's become biographer to two well-known former cops, and to one of the many victims of institutional child abuse. Her career as a true crime writer has resulted in 13 books and counting, with subjects and titles as diverse as *The Frankston Serial Killer*, *Crime Scene Investigations*, *Forensics*, *Cops*, *Once a Copper: Brian 'the Skull' Murphy*, and the one that started it all - *The Phillip Island Murder*. *Inside the Law* is Vikki's life in crime; a collection of her favourite, personally influential, most memorable stories with a fresh narrative thread of the why, when and how she came to write them.

Parents Killing Children

Crossing the Invisible Line

Routledge *Parents Killing Children: Crossing the Invisible Line* explores hidden forms of violence within the family. This socio-legal study addresses the interactions between the family and the state, focusing on six parent perpetrators and the ways in which child endangerment is concealed within society. Drawing on symbolic interactionism, mythology and a modelling of case study data, this book puts forward a unique conceptualisation of representation and risk, both on familial and state levels. The failure of the state to intervene and neutralise volatile perpetrators also sheds light on the socio-legal status of children - society's most vulnerable - and the book concludes by discussing means by which the underlying social conditions and maladies symptomatic of child abuse and killing should be addressed.

Brady and Hindley

Genesis of the Moors Murders

Open Road Media The shocking true crime story of child murderers Ian Brady and Myra Hindley, Great Britain's most horrific serial killers. During the early 1960s, just as Beatlemania was exploding throughout the United Kingdom, a pair of psychopathic British killers began preying on the very young, innocent, and helpless of Greater Manchester. Between 1963 and 1965, Ian Brady and his lover and partner, Myra Hindley, were responsible for the abduction, rape,

torture, and murder of five young victims, ranging in age from ten to seventeen years old. The English press dubbed the grisly series of homicides “the Moors Murders,” named for the desolate landscape where three of the corpses were eventually discovered. Based in part on the author’s face-to-face prison interviews with the killers, Fred Harrison’s fascinating and disturbing true crime masterwork digs deeply into Brady and Hindley’s personal histories to examine the factors that led to their mutual attraction and their evolution into the UK’s most notorious pair of human monsters. It was during these interviews that new details about the killers’ terrible crimes surfaced, compelling the police to reopen what was arguably the most shocking and sensational homicide case in the annals of twentieth-century British crime. With a new introduction by the author, meticulously researched and compellingly written, *Brady and Hindley* is the definitive account of Britain’s most hated serial killers.

Ian Brady

The untold story of the Moors Murders

Robson Since May 1966 when Ian Brady and Myra Hindley were sentenced to life imprisonment at Chester Assizes the British public has been absorbed and horrified by the Moors Murders. Ian Brady has often been aptly described as ‘the most evil man alive’ or ‘the Daddy of the Devils’, while Myra Hindley, Britain’s first female serial killer, became the most hated woman in Britain. Here is the definitive account, drawing on exclusive, never-before-seen material. It changes forever our understanding of the Moors couple and their heinous crimes. Why did they do it? What actually happened? Unlikely as it may appear to those detectives, psychiatrists, authors, criminologists, journalists and the victims’ families, who have all sought in their own ways for decades to discover it, this book is possibly as near as we shall ever get to understanding how the victims died. It proves beyond question that the parents of the victims were right all along in their claims about Hindley’s part in the murders. Did Brady give an account to anyone of his life, Myra Hindley and their crimes before he died? Yes, he did - here it is.

Monstrosity

The Human Monster in Visual Culture

Bloomsbury Publishing From the 'Monster of Ravenna' to the 'Elephant Man', Myra Hindley and Ted Bundy, the visualisation of 'real', human monsters has always played a part in how society sees itself. But what is the function of a monster? Why do we need to embody and represent what is monstrous? This book investigates the appearance of the human monster in Western culture, both historically and in our contemporary society. It argues that images of real (rather than fictional) human monsters help us both to identify and to interrogate what constitutes normality; we construct what is acceptable in humanity by depicting what is not quite acceptable. By exploring theories and examples of abnormality, freakishness, madness, otherness and identification, Alexa Wright demonstrates how monstrosity and the monster are social and cultural constructs. However, it soon becomes clear that the social function of the monster - however altered a form it takes - remains constant; it is societal self-defence allowing us to keep perceived monstrosity at a distance. Through engaging with the work of Michel Foucault, Julia Kristeva and Canguilhem (to name but a few) Wright scrutinises and critiques the history of a mode of thinking. She reassesses and explodes conventional concepts of identity, obscuring the boundaries between what is 'normal' and what is not.

Face to Face with Evil

Conversations with Ian Brady

Metro Publishing ON 15 MAY 2017, IAN BRADY DIED IN HOSPITAL, ENTIRELY UNREPENTANT OF HIS EVIL CRIMES. WITH HIM ALMOST CERTAINLY DIED THE SECRET OF WHERE THE BODY OF TWELVE-YEAR-OLD KEITH BENNETT, THE LAST OF HIS AND MYRA HINDLEY'S YOUNG VICTIMS, LIES. Ian Brady was one of the most notorious and reviled serial killers in Britain. With his co-conspirator, Myra Hindley, he committed what became known as 'the Moors Murders' in which five children were abducted, assaulted and murdered. Dr Chris Cowley has a PhD in Cognitive Psychology and lectures in Forensic Criminology. He is in the unique position of having had exclusive access to Brady and, for six years, conducted groundbreaking research by corresponding with Brady and visiting him in prison. By gaining his trust, Cowley was able to take an unrivalled look inside the mind of a serial killer. This in-depth and revealing book reproduces letters and transcripts of conversations with Brady which, until the first edition came out, had never been published before. Using this fresh perspective and original material, Dr Cowley sheds new light on what went wrong in Brady's formative years to set him on a path of crime, and how Hindley became the lethal factor that started Brady's murder cycle. It also reveals Brady's unflinching account of being caught and convicted of serial murder, and his thoughts and emotions concerning Hindley, recorded as he moved into his second decade on hunger strike. This important study provides information that is essential to our understanding of the psychology of serial killers. By broadening our knowledge of these complex issues, we can increase the likelihood of catching murderers, and perhaps even prevent their terrible crimes from taking place.

Born Killers

Childhood Secrets of the World's Deadliest Serial Killers

Kings Road Publishing It's an age-old question: is it nature or nurture? Can there really be a 'demon seed' that causes serial killers to act the way they do? Or is it an unfortunate combination of influences and events during their formative years that has turned them into such monsters? But no matter how many people they have killed, no matter how many lives they have ruined and whatever the nature of their sickening crimes, serial killers are still human. Analysing the early years of the lives of men like Jeffrey Dahmer, who abused and killed 17 young men, offers a fascinating insight into the effects of a dysfunctional or abusive childhood. Criminologists Christopher Berry-Dee and Steven Morris have spoken and corresponded with killers all over the world in a quest to discover what made them the way they are. For the first time, the inner workings of the minds of the most destructive individuals on the planet are revealed in shocking detail. *Born Killers* shows, through a sophisticated system of psychological profiling, how the potential serial killer develops. Read it and you too may be able to spot the signs...

The Killers Among Us

An Examination of Serial Murder and Its Investigation

This is an introduction to serial killers and killings. It includes seven case studies, a discussion of the myths surrounding serial murderers and the reasons why they continue to kill, the seven major problems of investigating a serial murder, and an analysis of the fourteen different law enforcement agencies who respond to a serial murder. Other topics covered include: -- how the media treats serial murder; an essay on victimology; -- a discussion on the concept of "the less dead" or how victims of serial killers are devalued".

Intimate Enemies

Moral Panics in Contemporary Great Britain

Transaction Publishers *Intimate Enemies* describes the creation of a journalistically induced panic in Great Britain during the the 1980s - a decade of intense concern about a closely related set of perceived problems: sexual abuse of children, child pornography, satanic rituals, and serial murder. It was widely alleged that such practices became more common during the decade, and the notoriety attracted major attention from the mass media, as well as from agencies in law enforcement, social welfare, and mental health.

Inside the Mind of One of Britain's Most Notorious Child Murderers

Waterside Press **NEW TWENTY-FIFTH ANNIVERSARY EDITION.** It is now ten years since the death of sex-offending expert and founder of the Gracewell Clinic, Ray Wyre. It is also the twenty-fifth anniversary of the main events described in this book and 40 years since newspaper girl Genette Tate 'disappeared into thin air'. Tim Tate and Charmaine Richardson (Wyre's widow) have meticulously re-visited a work out of print for a decade, adding a fresh Introduction, Preface, Index and endpiece, 'Twenty-five Years Later...'. They show how events have moved on, including the further conviction of Black for the murder of Jennifer Cardy and developments in policing methods, but criticise a continuing, possibly worse, failure to protect children from paedophiles in the internet age. They voice real concern that Ray Wyre's call to learn more about sex-offenders, their methods of operation and strategies of denial, distortion, deflection of blame and need for treatment, have gone unheeded. Ultimately, the book paints a picture of political regression. Contains extracts from Ray Wyre's revealing interviews with child serial-killer Robert Black (Wyre was the only person Black ever opened-up to). Analyses Black's murders of children, including Susan Maxwell, Caroline Hogg and Sarah Harper as well as his implied confession to the murder of Genette Tate. Reviews 'A tribute to the extraordinary skill of Ray Wyre?...who possessed a unique ability to enter the mind of offenders and by doing so provide the evidence which would bring to an end years of offending and unsolved crimes.
