It's All Politics

WINNING IN A WORLD WHERE HARD WORK AND TALENT AREN'T ENOUGH

Currency **From It's All Politics** Like business in general, politics is not a spectator sport. You cannot afford to be apolitical at work if you have any aspirations for advancement. The only way to avoid politics is to avoid people—by finding an out-of-the-way corner where you can do your job. Of course, it's the same job you'll likely be doing for the rest of your career. In any job, when you reach a certain level of technical competence, politics is what makes all the difference with regard to success. At that point, it is indeed all politics. Everyday brilliant people take a backseat to their politically adept colleagues by failing to win crucial support for their ideas. Sometimes politics involves going around or bending rules, but more typically it's about positioning your ideas in a favorable light, and knowing what to say, and how and when to say it.... Keep in mind that people benefit from perpetuating the image of politics as something you either know or you don't. Ignore them. Political acumen is largely learned from observation. And then it's a matter of practice, practice, practice. When a journalist suggested that golfing great Gary Player was very lucky, he replied: "It's funny, but the more I practice, the luckier I get." The same is true of politics. An indispensable guide to mastering the ins and outs of office politics—the single most important factor in getting ahead in your career As management professor and consultant Kathleen Reardon explains in her new book, *It's All Politics*, talent and hard work alone will not get you to the top. What separates the winners from the losers in corporate life is politics. As Reardon explains, the most talented and accomplished employees often take a backseat to their politically adept coworkers, losing ground in the race to get ahead—sometimes even losing their jobs. Why? Because they've failed to manage the important relationships with the people who can best reward their creativity and intelligence. To determine whether you need a crash course in Office Politics 101, ask yourself the following questions: Do I get credit for my ideas? Do I know how to deal with a difficult colleague? Do I get the plum assignments? Do I have a mentor? Do I say no gracefully and pick my battles wisely? Am I in the loop? Reardon has interviewed hundreds of employees, from successful veterans to aspiring hopefuls, examining why some people who work hard and effectively at their jobs fall behind, while those who are adept at "reading the office tea leaves" forge ahead. Being politically savvy doesn't mean being unethical or devious. At heart, it's about listening to and relating to others, and making choices that advance everyone's goals. Like it or not, when it comes to work, it's all politics. And politics is all about knowing what to say, when to say it, and who to say it to.

No Is Not Enough

Resisting Trump's Shock Politics and Winning the World We Need

Haymarket Books **The New York Times**-bestselling roadmap to resistance in the Trump era from the internationally acclaimed activist and author of *On Fire* and *The Battle for Paradise*. The election of Donald Trump is a dangerous escalation in a world of cascading crises. Trump's vision—a radical deregulation of the US economy in the interest of corporations, an all-out war on "radical Islamic terrorism," and a sweeping aside of climate science to unleash a domestic fossil fuel frenzy—will generate wave after wave of crises and shocks, to the economy, to national security, to the environment. In *No Is Not Enough*, Naomi Klein explains that Trump, extreme as he is, is not an aberration but a logical extension of the worst and most dangerous trends of the past half-century. In exposing the malignant forces behind Trump's rise, she puts forward a bold vision for a mass movement to counter rising militarism, nationalism, and corporatism in the United States and around the world. Longlisted for the National Book Award "I hope that Klein's book is read by more than just her (mostly) leftwing fan base. For whatever you think about her economic arguments, she makes a powerful and an important point: that you cannot understand Trump without looking at how he reflects bigger cultural and social dynamics. And what is perhaps refreshing about *No Is Not Enough* is that Klein tries to move beyond mere outrage and hand-wringing to offer a practical manifesto for opposition." —Financial Times "Brimms with ideas rarely heard in the mainstream media. And her fiery, punchy writing style, which is occasionally laced with humor, makes it hard to put down." —The Georgia Straight

The World We Could Win

Administering Global Governance

IOS Press **Global Governance** represents a new way of thinking about the world we live in. This new vision of Global Governance is the result of two converging forces. One is historical, the other conceptual. One is the fact that the world is growing closer empirically, linked by the thousands of wires and streams of information and satellites and phones and screens and jet-planes that bind us now. Conceptually, the world needs to be able to step outside itself and see itself and then develop a language to capture that new vision. We can view the globe as one unit with, not necessarily a government, but certainly a system of governance. The fact that there is no world government does not mean that there is no system of global governance. It is a place, it is a polity, it has a system by which authority is shared and spread and used; and for that the new word 'governance' that has emerged in the academic literature, is the mot juste. It has no implication of entitlement to decide, it is simply a word to describe a process. The first part of this book, with six essays, looks thematically at different elements or facets of Global Governance and the issues that arise. The second half of this volume deals with some regional perspectives on Global Governance. Our aim in this book is to raise our eyes beyond the currently known world in public administration and look at the new unit of analysis clearly. It is the world we could win.

Building a Win-Win World

Life Beyond Global Economic Warfare

Berrett-Koehler Publishers “She finds paths from competition to cooperation . . . from global abuse to grassroots solutions—and thus from isolated despair to communal action.” —Gloria Steinem World-renowned futurist Hazel Henderson extends her twenty-five years of work in economics to examine the havoc the current economic system is creating at the global level. Markets are now spreading worldwide—a spread which is often equated with the hope of democracy spreading along with it. But markets still run on old textbook models that ignore social and environmental costs—leading to a new kind of warfare: global economic warfare. Building a Win-Win World examines how jobs, education, health care, human rights, democratic participation, socially responsible business, and environmental protection are all sacrificed to “global competitiveness.” Henderson shows many ways out of the dilemmas faced by all countries. She also describes a trend toward “grassroots globalism” —citizens movements that are addressing poverty, social inequities, pollution, resource-depletion, violence, and wars. Grassroots globalism, she says, is about thinking and acting—globally and locally. It is pragmatic problem-solving, implementing local solutions that keep the planet in mind. Such social innovations can raise the ethical floor under the global playing field so that the most ethical companies and countries can win. “At a time when conventional economics is tottering into senility, a handful of thinkers are forging imaginative alternatives. Hazel Henderson is among the most eloquent, original—and readable—of the econo-clasts.” —Scientific American “Hazel Henderson again challenges our fundamental economic systems, our musty ways, and our minds; she is a visionary who describes what should be our future.” —Joan Bavaria, President, Coalition for Environmentally Responsible Economies

Your Choice, Your Voice, Our Future

An Application for Maine's Governorship 2018

Createspace Independent Publishing Platform **Your Choice, Your Voice, Our Future** What I am offering Maine is nothing like what others who have run for this position have offered. I have never wanted someone to be my voice, and I do not offer to be yours. I am using this opportunity to shine light on the system that creates a stage for elites and keeps everyone else from having a voice. I am running for Governor of Maine to educate, and if we win, I am smashing the stage so everyone may have their voice heard equally. Our system is disenfranchising, falsely binary, oppressive, and fraught with contention and slavery. We can rise against this or we can continue on the same path. It has been the result of the American system that generation after generation left this nation (and the world) freer and more prosperous than the last. We cast off race-based slavery, we have destroyed the notion that one gender should rule while the other obeys, we had built a nation of rights and freedom... but, we have backslidened. Our nation is not better off than it was a generation ago. We are in unprecedented debt, have resurfaced racism and sexism, we have instilled a class warfare, and we are being oppressed by fascism and authoritarians. Generation X and Millennials have less opportunity, less ability to grow and flourish, and less unity than our grandparents. We have been slowly taken over by a rotting infestation of cronies, puppet masters, propogandists, and dictators. As our nations becomes more centralized, Maine can stand in opposition. We have an opportunity to demonstrate what America has lost. Maine has strong educators, doctors, nurses, social workers, counselors, laborers of all types, and most respectably, we have strong work and moral ethics. Our State has diversity and a will to surpass obstacles and be reveled across the nation and world. We need the will to see an opportunity through the despair. By continuing what we do best, by growing rather than contracting, by embracing innovation and adaptation rather than antiquity and failed ideas, we can guide America back to prosperity. Maine can be the economic engine of tomorrow's America. Through this book, we have covered Education, Healthcare, ideological spectrums, Corrections, Rehabilitation, Culture, Community, politics, Economics, Energy, business, debt, governance, and a slew of other topics. Through this journey, we have delved into what keeps us from growth, how we can overcome oppressing obstruction, and what we could do to drop the shackles and pick up prosperous freedom. Reaching a better future for everyone takes change. Change is not always easy; change is often coupled with fear. We need not fear the future and change when we can be so positively impacted. When we decide to swallow our fear and move toward a better future, we will be unstoppable. I am applying for a job: the executive position of our State of Maine. This is your choice, your voice, our future. Richard Lee Light

The Big Sort

Why the Clustering of Like-Minded America Is Tearing Us Apart

Houghton Mifflin Harcourt The award-winning journalist reveals the untold story of why America is so culturally and politically divided in this groundbreaking book. Armed with startling demographic data, Bill Bishop demonstrates how Americans have spent decades sorting themselves into alarmingly homogeneous communities—not by region or by state, but by city and neighborhood. With ever-increasing specificity, we choose the communities and media that are compatible with our lifestyles and beliefs. The result is a country that has become so ideologically inbred that people don't know and can't understand those who live just a few miles away. In *The Big Sort*, Bishop explores how this phenomenon came to be, and its dire implications for our country. He begins with stories about how we live today and then draws on history, economics, and our changing political landscape to create one of the most compelling big-picture accounts of America in recent memory.

Debating Political Reform in China

Rule of Law vs. Democratization

Routledge **The growing disconnect between China's market-oriented economy with its emerging civil society, and the brittle, anachronistic, and authoritarian state has given rise to intense discussion and debate about political reform, not only by Western observers, but also among Chinese intellectuals. While some expect China's political reform to lead to democratization, others have proposed to strengthen the institution of single-party rule and provide it with a solid legal base. This book brings the ongoing debate to life and explores the options for political reform. Offering the perspectives of both Western and Chinese scholars, it presents the controversial argument for building a consultive rule of law regime as an alternative to liberal democracy. It provides several critiques of this thesis, and then tests the thesis through empirical studies on the development of the rule of law in China.**

The Unfinished Revolution

How New Labour Changed British Politics Forever

Abacus The Unfinished Revolution is the definitive story of New Labour from its genesis to its election defeat 2010 - covering over 25 years and six general elections of strategy, rebuilding and reinvention. In this extraordinary book, Philip Gould, one of the world's leading political strategists and a key adviser to Tony Blair during the period, brilliantly describes how New Labour came to dominate, falter and fall, assessing how successful it was in government, and where it should go from here. Drawing on his years of experience at the heart of New Labour he gives us his unique perspective on how best to understand the electorate, how to communicate policy and how to adapt in a rapidly changing world.

A Philosophy of Political Myth

Cambridge University Press In this book, Chiara Bottici argues for a philosophical understanding of political myth. Bottici shows that myth is a process, one of continuous work on a basic narrative pattern that responds to a need for significance. Human beings need meaning in order to master the world they live in, but they also need significance in order to live in a world that is less indifferent to them. This is particularly true in the realm of politics. Political myths are narratives through which we orient ourselves, and act and feel about our political world. Bottici shows that in order to come to terms with contemporary phenomena, such as the clash between civilizations, we need a Copernican revolution in political philosophy. If we want to save reason, we need to look at it from the standpoint of myth.

Running, Winning, Serving

The Candidate's Guide to Local Elections

Createspace Independent Publishing Platform When you're running for local office for the first time, there are plenty of mistakes you can make. The good thing is that you're not the first person ever to face the challenges of running for office - even though sometimes it might seem like it. In this book, Craig W. Turner collects stories, advice, warnings and best practices from local candidates from around the country who have been there and done that. They've already seen what you're about to see, and they've generously shared their experiences for the benefit of you and other first-time candidates for local office. This is no poli-sci class. This is "in the trenches" life experience. Everyone interviewed for this book as part of The Campaign Coach Podcast, has run and won at least one election. Some are now retired, some have moved on to higher office, and some are still serving in the capacity we discussed in their interview. In these pages, you will find insights that no guidebook or online course can give you - they will inspire you, and scare you, and motivate you and smack you in the face with a reality check. But, they will also make you a stronger candidate. Whether it's talking with voters, fundraising, understanding local government policy, promoting your candidacy or even knowing how to best serve your community, learning from these people's experiences - and avoiding mistakes that they've already made for you - will give you a leg up on any opponent.

Democracy for Realists

Why Elections Do Not Produce Responsive Government

Princeton University Press Why our belief in government by the people is unrealistic—and what we can do about it Democracy for Realists assails the romantic folk-theory at the heart of contemporary thinking about democratic politics and government, and offers a provocative alternative view grounded in the actual human nature of democratic citizens. Christopher Achen and Larry Bartels deploy a wealth of social-scientific evidence, including ingenious original analyses of topics ranging from abortion politics and budget deficits to the Great Depression and shark attacks, to show that the familiar ideal of thoughtful citizens steering the ship of state from the voting booth is fundamentally misguided. They demonstrate that voters—even those who are well informed and politically engaged—mostly choose parties and candidates on the basis of social identities and partisan loyalties, not political issues. They also show that voters adjust their policy views and even their perceptions of basic matters of fact to match those loyalties. When parties are roughly evenly matched, elections often turn on irrelevant or misleading considerations such as economic spurts or downturns beyond the incumbents' control; the outcomes are essentially random. Thus, voters do not control the course of public policy, even indirectly. Achen and Bartels argue that democratic theory needs to be founded on identity groups and political parties, not on the preferences of individual voters. Now with new analysis of the 2016 elections, Democracy for Realists provides a powerful challenge to conventional thinking, pointing the way toward a fundamentally different understanding of the realities and potential of democratic government.

War in the Nineteenth Century

1800-1914

John Wiley & Sons This book provides an accessible and up-to-date account of the rich military history of the nineteenth century. It takes a fresh approach, making novel links with conflict and coercion, and moving away from teleological emphases. Naval developments and warfare are included, as are social and cultural dimensions of military activity. Leading military historian Jeremy Black offers the reader a twenty-first century approach to this period, particularly through his focus on the dynamic drive provided by different forms of military goals, or "tasking". This allows echoes with modern warfare to come to the fore and provides a fuller understanding of a period sometimes considered solely as background to the total war of 1914-45. Alongside state-to-state warfare and the move toward "total war", Black's emphasis on different military goals gives due weight to trans-oceanic conflict at the expense of non-Europeans. Irregular, internal and asymmetric war are all considered, ranging from local insurgencies to imperial expeditions, and provide a deliberate shift from Western-centricity. At the very cutting edge of its field, this book is a must read for all students and scholars of military history and its related disciplines.
