### THE AMERICAN EPHEMERIS FOR THE 21ST CENTURY AT NOON

Astro Communications Services *THE AMERICAN EPHEMERIS FOR THE 21ST CENTURY AT NOON 2000-2050, 2E* is the #1 most essential astrological reference book. Daily planetary positions from 2000-2050, moon phases, eclipses, void of course times, aspects, direct and retrograde station times, and "astrological weather" are included.

### THE AMERICAN EPHEMERIS 1950-2050 AT NOON

ACS Publications *The American Ephemeris 1950-2050 at Noon, Trans-Century Edition*, is published in response to multiple requests for a one hundred year ephemeris covering these "most useful years." With the years 1950 through 2050, only one ephemeris needs to be at hand, especially when traveling, for an astrologer to do quick lookups of both birth data and future transits for most people he or she might encounter. Since the 1976 publication of the first version of *The American Ephemeris, 1931-1980*, Neil F. Michelsen's ground-breaking series of ephemerides for astrologers have consistently set standards for accuracy in astrology, becoming indispensable to astrologers worldwide at every level from student to professional. The tradition continues with the addition of this new tropical ephemeris spanning from mid 20th century through mid 21st century, which is published in two versions. This one is calculated for noon UT, and the other for Midnight UT. Rique Pottenger has revised and expanded the Michelsen programming with updated Jet Propulsion Laboratory data and improvements in the computer generating program that, for example, enable finding double ingresses in a single day, plus more accurate station times. A new formula increases the accuracy of the Galactic Center calculation. Other new features have been added, the most obvious of which are the dwarf planets Ceres and Eris, in response to the 2006 decisions of the International Astronomical Union. Monthly positions have also been added for the remaining three of the former four major asteroids in wide use among astrologers, Pallas, Juno and Vesta, and also for the centaur, Chiron. 978-1-934976-27-2 624 pages \$29.95

### 2000 TO 2050 NOON

ACS Publications Since the 1976 publication of his first version of *The American Ephemeris, 1931-1980*, Neil F. Michelsen's ground-breaking series of ephemerides have consistently set standards for accuracy in astrology, becoming indispensable to astrologers worldwide at every level from student to professional. The tradition continues with this Revised & Expanded Third Edition of *The American Ephemeris for the 21st Century, 2000-2050 at Noon*. Revisions and additions are programmed by Rique Pottenger, who became head programmer for ACS Publications after Michelsen's passing. Additions and improvements include new Jet Propulsion Laboratory data and programming refinements that enable finding double ingresses in a single day plus more accurate station times. A new formula increases the accuracy of the Galactic Center. Phenomena in the Astro Data section are now sorted by time as well as by date, and R appears with Planetary Ingress Data if a planet is retrograde when it ingresses. The most notably obvious additions in this new edition include the dwarf planet Ceres in daily longitude listings between Mars and Jupiter, and monthly positions are given for Eris, Chiron, Pallas, Juno and Vesta.

### A PRIMER ON HELIOCENTRIC ASTROLOGY

Llewellyn Worldwide Limited Take a step forward into a new universe of astrological interpretation, when you shift focus from Earth-centered charts to Sun-focused interpretations, in *The Sun at the Center* by Philip Sedgwick. The paths of astrology and astronomy diverged during the Renaissance and the Age of Reason as more facts and data became available. People relied less on intuition and more on the powers of observations enhanced with more powerful telescopes. Curiously, astrology began—who knows how many millennia ago—as a strictly observational art. When people could observe more, they said that the Sun, not the Earth, was at the center of the solar system. Old astrology didn't suddenly stop working with the advent of heliocentric awareness. Because we live on the Earth, geocentric astrology makes sense—no scientific advancement can nullify it. But, if we can create a system where the planets and signs are seen in relation to the Earth, we can do the same with the Sun. The question is, how do we come up with astrology from a Sun-centered perspective? *The Sun at the Center* answers that question. ·Learn how discover the heliocentric positions of the planets ·Ideal for use in mundane astrology and analysis of spontaneous mass behavior ·Adds new information to geocentric astrological interpretations ·Provides a new way for looking at individuals ·Discover how solar activity influences revolutionary actions *The Sun at the Center* is a complete primer of heliocentric astrology. It can be used by itself, giving new insights, or in combination with geocentric astrology to enhance and expand upon what you already know. *The Sun at the Center* takes astrology in a new direction and back to its origins. Join this journey when you get *The Sun at the Center*.

### ASTROLOGICAL TRANSITS

---

---

---

### THE BEGINNER'S GUIDE TO USING PLANETARY CYCLES TO PLAN AND PREDICT YOUR DAY, WEEK, YEAR (OR DESTINY)

---

Fair Winds Press Your birth chart is a snapshot of the sky taken at the moment and place of your birth, one that reflects your character, personality, strengths, and challenges. But the moment after that picture was taken, the planets moved on--some quickly, some very slowly. Astrologers call the moving planets "transits," and by comparing their movements to your birth chart you can gain a complete view of how best to prepare for challenges, meet opportunities, and stay grounded in a constantly-changing world. In *Astrological Transits*, astrologer April Elliott Kent will guide you through the best ways to make the most of your birth chart. Learn how to make the most of good transits and harness and transform the energy of "bad" ones. You'll also understand planetary cycles and anticipate your own transits. Finally, you'll know how to read planetary return charts, work with planetary retrogrades, and use eclipses to recognize major patterns and turning points in your life. If you are comfortable reading a birth chart, you are ready to move your chart into the future using transits. Instructions, tables, and worksheets will make tracking your transit cycles simple and exciting!

### MARSILIO FICINO

---

North Atlantic Books Marsilio Ficino was one of the most influential humanist philosophers of the early Italian Renaissance. Though an ordained priest, he was also a practicing astrologer and magician whose daunting life's work was to reconcile religious faith with philosophical reason — which included integrating pagan magical practice with Christianity. In a lengthy introduction, editor Angela Voss puts Ficino's achievement in context as a complete re-visioning of traditional astrological practice and the beginning of a humanistic and psychological approach that prefigured contemporary holistic approaches to astrology as therapy.

### THE CHALLENGE OF PLUTO IN CAPRICORN

---

*Schiffer Publishing Limited* Now you can understand how astrologers comprehend environmental issues of the 21st century. In this ground-breaking work, traditional astrological methods for assessing outer planet cycles, then the full integration of the meanings of the upcoming Neptune and Pluto cycles through 2065, are studied in depth. A full history is presented with over seventy complete examples of how the Aries Ingress charts and the Jupiter-Saturn conjunction series were developed to appreciate both short-term and long-term trends. This work does not require prior knowledge of either classical or mundane astrology (however, experience in these areas would be helpful). Discover how the astrological events of 2012 are not as important as future configurations, although it is so important that the configurations are understood now.

## THE NEW AMERICAN EPHEMERIS 2007-2020

---

*Starcrafts Pub* Astrologers worldwide made the late Neil F. Michelsen's *American Ephemeris* series best sellers. In 2006, Rique Pottenger revised and updated Michelsen's earlier work with *The New American Ephemeris for the 21st Century 2000-2100 at Midnight*, complete with newly named planets Ceres and Eris, plus much more. Now, following the debut of the big full century book, astrologers will find this new, lightweight 14-year version a "must have!" In easy -to-scan 8.25 x 11 format, it has all the new features of its forerunner and even more. For each month you'll also find a daily Declination and Latitude Table and a detailed Daily Aspectarian. Both Ceres and Chiron are included in daily longitude positions, and in the aspectarian. In Declination and Latitude, Sun through Saturn (including Ceres) are given daily, with Chiron, Uranus, Neptune, Pluto, Pallas, Juno, Vesta and Eris in 5 day increments.
