## **PROFESSIONAL NURSING CONCEPTS: COMPETENCIES FOR QUALITY LEADERSHIP**

---

**Jones & Bartlett Learning** "Professional Nursing Concepts takes a patient-centered, traditional approach to nursing education and provides the foundation pre-

licensure nursing students need in order to successfully transition into practice. Grounded in the Institute of Medicine's five core competencies for healthcare professionals, the current edition logically flows from the basics of the nursing profession and the dynamics of patient care into critical healthcare delivery discussions, ranging from health policy and political action to community health and leadership in nursing practice. Each chapter features discussion questions, critical thinking activities, and "stop and consider" sections that encourage students to reflect on important chapter topics in meaningful ways. Students can further interact with text content in "Working Backwards to Develop a Case", an in-text feature that allows students to creatively apply what they have learned to their own unique case scenarios, bringing these foundational concepts to life. Above all, Professional Nursing Concepts reminds students that quality patient care is at the heart of the nursing profession. The fifth edition will continue to focus heavily on a patient-centered approach and will include new and updated features to engage students in their own learning. References will be updated as appropriate. The following changes are proposed for this fifth edition. Note that there are no new chapters planned but the text addresses some reviewer concerns, such as a need for more emphasis on community and population health perspectives and evidence-based practice"--

## **CRITICAL THINKING IN NURSING**

---

---

### **A COGNITIVE SKILLS WORKBOOK**

---

**Lippincott Williams & Wilkins** This text introduces nursing students to the cognitive skills, or thought processes, required of professional nurses. Using a practical approach and a nursing process framework throughout, the book provides a bridge between the theory and the application of these skills. Cognitive skills are presented in a competency-based, clinically oriented format, with emphasis on teaching critical thinking. Chapters end with a workbook section, to provide students with real-world applications of what they have learned. Case studies and checklists throughout aid the student in applying content. The book is written at an accessible reading level.

## **MANAGEMENT AND LEADERSHIP IN NURSING AND HEALTH CARE**

---

## **AN EXPERIENTIAL APPROACH, THIRD EDITION**

---

**Springer Publishing Company** Time-tested leadership and management strategies based on experiential learning activities are at the foundation of this text for undergraduate and graduate students in nursing and health care leadership or management courses. It is grounded in theories and concepts applied to the health care environment from business, organizational psychology, health care law, and educational administration fields. The text encompasses theories of effective communication, problem analysis, conflict resolution, and time management challenges. This new edition includes three new chapters that cover current theories of creative leadership, working with diverse groups, and ethics for leaders and managers in health care, as well as new experiential learning activities throughout. These activities make theory application palpable and support the development of skills that students can use to motivate, educate, and lead those in health care to achieve the goals of a group, team, or organization. Included among the experiential learning activities are case studies, simulation, review questions, suggested assignments, and expected learning outcomes. The text will also be of value to nurse managers who wish to enhance their current leadership or managerial skills. Key Features: Provides strong direction for improving leadership and management skills in the health care environment Includes three new chapters on creative leadership, working with diverse groups, and ethics for healthcare leaders and managers Offers

new learning activities throughout, including review questions and suggested assignments Features over 35 Experiential Exercises which invite the reader to experience new behaviors in a safe environment

## MANAGING CLIENT CARE

---

**Elsevier Health Sciences** Providing a focus on the knowledge and skills needed to become a successful first-line manager, this unique text emphasizes successful client care by addressing the role of nurses in managing quality and the available resources needed. It also discusses each of the essential components of the manager of care role, as well as the basic or core competencies required of staff nurses inherent in the direct care of clients. Thoroughly revised and updated, this 3rd edition reflects the numerous changes related to evolving management concepts - including understanding the health care system, using personal strengths most effectively, and nurturing professional integrity. Content focuses on client care management, rather than staff management, to go beyond basic management concepts and help those whose role will be managing quality client care. Essential theoretical information is covered with an emphasis on practical application. Application Exercises at the end of each chapter challenge readers to apply what they've just learned. A brief clinical situation is followed by questions or commands to describe the solution, based on what was learned in the chapter. Critical Thinking Scenarios at the end of each chapter give readers a short case study to consider and questions to test their application of knowledge. A competency-based format is applied throughout and is based on a research study that identifies clinical management skills needed by beginning staff nurses. Objectives and Key Concepts at the beginning of each chapter provide readers with a glimpse at important information contained within. Key concepts are also shown in boldface upon first mention in that chapter. Cartoons are provided throughout to keep readers more actively interested in the text content. Terrorism readiness and disaster management content has been added to prepare readers for today's most relevant issues. The chapter on Understanding the Context of Health has been thoroughly revised to offer readers a glimpse into the heart of the business of health care. New content in this chapter includes economic and political ties to seamless health care, nursing informatics, and technology in practice. The latest issues facing staff nursing are covered - including content on staff shortages, mandatory overtime, agency nurses/temps, self-preservation, and continuing education. Revised and updated instructor's resources are now located online for added flexibility.

## **NURSING HOME ADMINISTRATION, SEVENTH EDITION**

---

**Springer Publishing Company** Sixth Edition Named a 2013 Doody's Essential Purchase! A detailed road map of essential knowledge for obtaining licensure and employment as a nursing home administrator, the Seventh Edition of this classic text is updated to reflect the 2014 National Association of Boards of Examiners of Nursing Home Administrators (NAB) Domains of Practice. With more than 50 new topics, it comprehensively addresses all new regulations for managing a nursing facility along with a detailed overview of the skills and knowledge required to be a successful administrator. The Seventh Edition responds to the many changes that have recently occurred in the long-term care field. It provides a completely new Minimum Data Set 3.0 (MDS), 2015 Federal Requirements for Electronic Records, the new International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM), new Quality Measures, updated Instructions for Making Data as per the Centers for Medicare and Medicaid, the impacts of the Affordable Care Act (ACA), and several new federal regulations. The Seventh Edition clearly describes what nursing home managers do, how they think, and how they lead. It breaks down the art of management into its basic tasks—forecasting, planning, organizing, staffing, directing, controlling quality, innovating, and marketing—and examines them in depth. The text pinpoints all of the separate components of nursing home

administration—management, human resources, team dynamics, conflict resolution, finance and business, industry laws and regulations, and patient care—and describes how they fit together to form the coordinated activity set required of a successful nursing home administrator. ## **COMMUNICATION AND INTERPERSONAL SKILLS FOR NURSES**

---

**SAGE** Good communication and interpersonal skills remain one of the enduring and fundamental characteristics of high-quality nursing and midwifery practice. This is despite major developments in our knowledge of scientific, technological and pharmacological health treatments. However, because communication is viewed as an implicit part of everyday life, the skills required for effective communication and appropriate professional interactions are often overlooked. This book provides student nurses with the essential information on communication and interpersonal skills. It clearly explores the core concepts and evidence base and is practical and accessible, helping students to gain confidence in these skills.

## **PEDIATRIC NEUROCRITICAL CARE**

---

**Demos Medical Publishing** "Pediatric Neurocritical Care is by far the most comprehensive book I have read dealing with this topic... This text will provide an excellent reference for those interested in the pediatric intensive care cases or pediatrics in general. It is written very well and is chock-full of information that Practitioners in a pediatric ICU setting would use." --Donna Jacobs, R. EEG T., CNIM, The Neurodiagnostic Journal Caring for children with neurocritical illness often requires multi-specialty collaboration and the understanding of an ever-expanding body of data. This book gives clinicians the up-to-date, concise, and clinically relevant guidance they need to provide optimal care to children with these acute neurologic disorders. The chapters in Pediatric Neurocritical Care are authored by

experts in each individual topic, and co-edited by a neurologist and intensivist to ensure that all topics have been fully addressed from both perspectives. The book covers the complete continuum of care from assessment, monitoring, and condition specific management through rehabilitation. Early chapters present differential diagnosis and management approaches to common overarching problems such as coma, headache, and elevated intracranial pressure, followed by chapters focusing on the evaluation and management of specific conditions including traumatic brain injury, stroke, seizures, central nervous system infections, and demyelinating disorders. The final chapters address important associated psychological, social, and ethical issues. To reflect the full spectrum of specialties involved in the burgeoning field of pediatric neurocritical care, the book brings together an international group of experts from multiple disciplines including critical care medicine, anesthesiology, neurology, neurosurgery, rehabilitation medicine, psychology, and pediatric subspecialties. Pediatric Neurocritical Care features: Every topic is addressed from a neurologic and critical care perspective. Comprehensive coverage includes the evaluation of common overarching problems and management of specific conditions, in addition to discussion of related psychological, ethical, and social issues. Chapters are written by internationally known experts from the fields of critical care medicine, anesthesiology, neurology, neurosurgery, rehabilitation medicine, and many affiliated specialties.
