Materials in this field guide provide law enforcement with a tool for identifying persons who are mentally ill or developmentally disabled and for handling these situations in a safe and effective manner. Law enforcement contacts with persons who are mentally ill and developmentally disabled are some of the most challenging, potentially dangerous, and sensitive situations officers encounter. De-institutionalization, lack of funding, patients rights, and the numbers of people in need of care suggest that law enforcement will play an increasing role in responding to people with mental or developmental disabilities. This guide is designed to provide officers with strategies to effectively intervene and safely manage these encounters. **Basic Course Instructor Unit Guide Traffic enforcement Crowd Management and Civil Disobedience Guidelines** These guidelines are intended for California law enforcement agencies to consider when addressing the broad range of issues related to crowd management and civil disobedience. These guidelines reflect the generally accepted principles by which agencies respond to lawful and unlawful assemblies. After the statement of each of the 14 guidelines, suggestions are offered for its implementation. The first guideline states that law enforcement agencies should establish policies and procedures that recognize and address law enforcement objectives and provide for the legal protection of the constitutional rights of all persons; and the second guideline indicates that agencies should use the Incident Command System as mandated by the standardized Emergency Management System when managing crowds and acts of civil disobedience. The next three guidelines state that agencies should establish policies and procedures designed to manage crowds; develop procedures to identify, develop, and use stakeholders; and have managers and supervisors be guided by their agency's policies and procedures as well as be familiar with the Law Enforcement Guide for Emergency Operations. The sixth guideline states that agencies should be prepared to respond to various types of crowds and recognize behavior patterns or characteristics. This is followed by a guideline that recommends that each agency develop tactical precepts to address the management of crowds and civil disobedience. Other guidelines are as follows: establish procedures for declaring unlawful assemblies and issuing dispersal orders; develop use-of-force policies, procedures, and training for managing crowds and civil disobedience; establish policies and procedures for the deployment of nonlethal chemical agents during incidents of civil disobedience; develop procedures for managing mass arrests and bookings; establish procedures to investigate and prosecute criminal activity associated with civil disobedience; have policies and procedures for documenting crowd management and civil disobedience incidents; and establish procedures for training law enforcement command and line members in managing crowds and civil disobedience situations. An information guide addresses protestor tactics, trends, and techniques. Also included are terms and definitions, applicable California statutes, and applicable case law on various relevant issues in crowd management and civil disobedience. **California. Court of Appeal (4th Appellate District). Division 2. Records and Briefs G005382, Appellant's Reply Procedural Considerations in the Investigation of Complaints Against Law Enforcement Personnel** This manual contains a brief review of major case law and legislative action on the issue of discovery of police personnel records, the destruction of personnel records and investigative files, civil rights for peace officers, and due process requirements concerning employee suspension and termination. Because of this, we have focused only on current judicial and legislative actions. Substantive material covered may soon be outdated. Nevertheless, the manual will serve as a guide to the police executive in the administration of internal discipline for the immediate future. **Police Training and Performance Study Submitted to the New York City Police Dept. by the Project Staff Law Enforcement Ethics** SAGE Law Enforcement Ethics is an attempt to be at the forefront of engaging in the conversation about the future of law enforcement ethics, while examining many of the classic, enduring challenges posed by the profession itself. The conversation explores a host of foundational issues that include who should be hired as a law enforcement officer; what training should look like during the basic academy, as well as over the span of one's career; common ethical challenges, such as force and interrogations; what an ethical promotional process should entail; international best practices and problems; psychology of marginality; role of the media in promoting accountability; and the roles played by social learning, sub-culture, organizational policies, and PTSD in misconduct. 1. Each of the book's 18 chapters explores some major theoretical aspect of law enforcement ethics, while offering practical advice on what law enforcement agencies at the local, state, and federal level can do to create more ethical organizations. 2. The contributing authors include not only academicians but clinical psychologists, professional trainers, accreditation consultants, ethicists, medical professionals, and law enforcement supervisors and administrators representing a broad cross-section of agencies. 3. Rather than relying on a single theoretical framework or discipline (e.g., sociology or criminology), the book takes an interdisciplinary look at the phenomenon of law enforcement ethics by offering contributions from authors in the fields of clinical psychology, medicine, criminology, criminal justice, law, ethics, organizational leadership, sociology, and public policy. 4. Chapters begin with an opening vignette or case study to help motivate the content to come. 5. Chapters will conclude with summaries and 4-5 discussion questions. **Effective Police Supervision** Taylor & Francis Outstanding first-line supervisors are essential to the success of any law enforcement agency, yet many officers lack the supervision training necessary to excel.
