Ecstatic Encounters

Bahian Candomblé and the Quest for the Really Real

Amsterdam University Press "Reality does not comply with our narrations of it. And that is most certainly the case with the narrations produced in academia. An anthropologist in Bahia, Brazil, fears to become possessed by the spirits he had come to study; falls madly in love withan 'informant'; finds himself baffled by the sayings of a clairvoyant; and has to come to grips with the murder of one of his best friends. Unsettling events that do not belong to the orderly world of scientific research, yet leave their imprint on the way the anthropologist comes to understand the world. REflecting on his long research experience with the spirit possession cult Candomblê, the author shows, in a probing manner, how definitions of reality always require the exclusion of certain perceptions, experiences and insights. And yet, this 'rest-of-what-is' turns out to be an inexhaustible source of amazement, seduction and renewal." --P [4] of cover.

Elements of Semiology

Macmillan "In his Course in General Linguistics, first published in 1916, Saussure postulated the existence of a general science of signs, or Semiology, of which linguistics would form only one part. Semiology, therefore aims to take in any system of signs, whatever their substance and limits; images, gestures, musical sounds, objects, and the complex associations of all these, which form the content of ritual, convention or public entertainment: these constitute, if not languages, at least systems of signification . . . The Elements here presented have as their sole aim the extraction from linguistics of analytical concepts which we think a priori to be sufficiently general to start semiological research on its way. In assembling them, it is not presupposed that they will remain intact during the course of research; nor that semiology will always be forced to follow the linguistic model closely. We are merely suggesting and elucidating a terminology in the hope that it may enable an initial (albeit provisional) order to be introduced into the heterogeneous mass of significant facts. In fact what we purport to do is furnish a principle of classification of the questions. These elements of semiology will therefore be grouped under four main headings borrowed from structural linguistics: I. Language and Speech; II. Signified and Signifier; III. Syntagm and System; IV. Denotation and Connotation."--Roland Barthes, from his Introduction

Brazil and the Dialectic of Colonization

[University of Illinois Press](#) A classic of Brazilian literary criticism and historiography, *Brazil and the Dialectic of Colonization* explores the unique character of Brazil from its colonial beginnings to its emergence as a modern nation. This translation presents the thought of Alfredo Bosi, one of contemporary Brazil's leading intellectuals, to an English-speaking audience. Portugal extracted wealth from its Brazilian colony. Slaves--first indigenous peoples, later Africans--mined its ore and cut its sugarcane. From the customs of the colonists and the aspirations of the enslaved rose Brazil. Bosi scrutinizes signal points in the creation of Brazilian culture--the plays and poetry, the sermons of missionaries and Jesuit priests, the Indian novels of José de Alencar and the *Voices of Africa* of poet Castro Alves. His portrait of the country's response to the pressures of colonial conformity offers a groundbreaking appraisal of Brazilian culture as it emerged from the tensions between imposed colonial control and the African and Amerindian cults--including the Catholic-influenced ones--that resisted it.

Traditional Brazilian Black Magic

The Secrets of the Kimbanda Magicians

[Destiny Books](#) A guide to the history and practice of Kimbanda, the black magic tradition of Brazil • Explains how Kimbanda's presiding deity Eshu embodies both masculine and feminine principles, both god and devil, and thus represents human nature itself with all its vices and virtues • Discusses Kimbanda's magical practices, initiation rites, sacred knives, and sacrificial offerings • Details the seven realms and the entities that inhabit and govern each of them Although it has been demonized as a form of Satanic cult, Kimbanda--the tradition of Afro-Brazilian black magic--is a spiritual practice that embraces both the light and dark aspects of life through worship of the entities known as Eshu and Pombajira. Exploring the history and practice of Kimbanda, also known as Quimbanda, Diego de Oxóssi builds a timeline from the emergence of Afro-Brazilian religions in the 17th century when African slaves were first brought to Brazil, through the development of Orisha cults and the formation of Candomblé, Batuque, Macumba, and Umbanda religious

practices, to the modern codification of Kimbanda by Mãe Ieda do Ogum in the 1960s. He explains how Kimbanda's presiding deity Eshu Mayoral embodies both masculine and feminine principles, both god and devil, and thus represents human nature itself with all its vices and virtues. Discussing the magical practices, initiation rites, and spiritual landscape of Kimbanda, the author explains how there are seven realms, each with nine dominions, and he discusses the entities that inhabit and govern each of them. The author explores spirit possession and Kimbanda's sacrificial practices, which are performed in order to honor and obtain the blessing of the entities of the seven realms. He discusses the sacred knives of the practice and the role each plays in it. He also explores the 16 zimba symbols and sigils used to attract the spirits most apt to realizing the magician's will as well as traditional enchantment songs to summon and work with those spirits. Offering an accessible guide to Kimbanda, the author shows that this religion of the people is popular because it recognizes the dark and light sides of human morality and provides a way to interact with the deities to produce direct results.

Sacred Leaves of Candomblé

African Magic, Medicine, and Religion in Brazil

University of Texas Press **Candomblé, an African religious and healing tradition that spread to Brazil during the slave trade, relies heavily on the use of plants in its spiritual and medicinal practices. When its African adherents were forcibly transplanted to the New World, they faced the challenge not only of maintaining their culture and beliefs in the face of European domination but also of finding plants with similar properties to the ones they had used in Africa. This book traces the origin, diffusion, medicinal use, and meaning of Candomblé's healing pharmacopoeia—the sacred leaves. Robert Voeks examines such topics as the biogeography of Africa and Brazil, the transference—and transformation—of Candomblé as its adherents encountered both native South American belief systems and European Christianity, and the African system of medicinal plant classification that allowed Candomblé to survive and even thrive in the New World. This research casts new light on topics ranging from the creation of African American cultures to tropical rain forest healing floras.**

University of Illinois Press **Concentrating on the Caribbean Basin and the coastal area of northeast South America, Yvonne Daniel considers three African-derived religious systems that rely heavily on dance behavior--Haitian Vodou, Cuban Yoruba, and Bahamian Candomble. Combining her background in dance and anthropology to parallel the participant/scholar dichotomy inherent to dancing's "embodied knowledge," Daniel examines these misunderstood and oppressed performative dances in terms of physiology, psychology, philosophy, mathematics, ethics, and aesthetics.**

The Social Life of Spirits

University of Chicago Press **Spirits can be haunters, informants, possessors, and transformers of the living, but more than anything anthropologists have understood them as representations of something else—symbols that articulate facets of human experience in much the same way works of art do. The Social Life of Spirits challenges this notion. By**

stripping symbolism from the way we think about the spirit world, the contributors of this book uncover a livelier, more diverse environment of entities—with their own histories, motivations, and social interactions—providing a new understanding of spirits not as symbols, but as agents. The contributors tour the spiritual globe—the globe of nonthings—in essays on topics ranging from the Holy Ghost in southern Africa to spirits of the “people of the streets” in Rio de Janeiro to dragons and magic in Britain. Avoiding a reliance on religion and belief systems to explain the significance of spirits, they reimagine spirits in a rich network of social trajectories, ultimately arguing for a new ontological ground upon which to examine the intangible world and its interactions with the tangible one.

Tent of Miracles

What Kinship Is-And Is Not

University of Chicago Press In this pithy two-part essay, Marshall Sahlins reinvigorates the debates on what constitutes kinship, building on some of the best scholarship in the field to produce an original outlook on the deepest bond humans can have. Covering thinkers from Aristotle and Lévy- Bruhl to Émile Durkheim and David Schneider, and communities from the Maori and the English to the Korowai of New Guinea, he draws on a breadth of theory and a range of ethnographic examples to form an acute definition of kinship, what he calls the “mutuality of being.” Kinfolk are persons who are parts of one another to the extent that what happens to one is felt by the other. Meaningfully and emotionally, relatives live each other’s lives and die each other’s deaths. In the second part of his essay, Sahlins shows that mutuality of being is a symbolic notion of belonging, not a biological connection by “blood.” Quite apart from relations of birth, people may become kin in ways ranging from sharing the same name or the same food to helping each other survive the perils of the high seas. In a groundbreaking argument, he demonstrates that even where kinship is reckoned from births, it is because the wider kindred or the clan ancestors are already involved in procreation, so that the notion of birth is meaningfully dependent on kinship rather than kinship on birth. By formulating this reversal, Sahlins identifies what kinship truly is: not nature, but culture.

The City of Women

UNM Press "The City of Women, first published in 1947, is anthropologist Ruth Landes's study of candomble religious society in Brazil just before World War II. Afro-Brazilian candomble is a woman-centered, spirit possession religion developed by West African slaves in colonial plantation societies. Abandoning the scientific concept of culture that dominated anthropology in her time, Landes lets Brazil speak to her on its own terms. In The City of Women, she draws portraits of the priestesses and other women she visited in private homes and observed in candomble temples, all nuanced by her awareness of gender, race, and sexuality. Marketed as an exotic travelogue and dismissed by anthropologists when it appeared in 1947, The City of Women is now considered a classic of postmodern anthropology and a basic primary source for candomble studies."--BOOK JACKET.

Objects of Knowledge

A&C Black **Volume 1 in a series designed to act as a forum for the dissemination and discussion of new research currently being undertaken in the field of Museum Studies. The series aims to cover the whole museum field and to broadly address the history and operation of the museum as a cultural phenomenon. The papers published are of a high academic standard, and are also intended to relate directly to matters of immediate museum concern. The publication aims to fill a major gap in the present scope of museum-based literature. This volume is concerned with the ways in which meaning is created through museum objects, and the processes which this involves. The papers, however, adopt a wide diversity of stances, ranging widely across the field; some take a broadly theoretical line, and others examine specific areas like museum education and the relationship of museums to native peoples. The volume concludes with a Review Section, covering recent books, exhibitions and conferences.**

Stars and Stardom in Brazilian Cinema

Berghahn Books **Despite the recent explosion of scholarly interest in "star studies," Brazilian film has received comparatively little attention. As this volume demonstrates, however, the richness of Brazilian stardom extends well beyond the ubiquitous Carmen Miranda. Among the studies assembled here are fascinating explorations of figures such as Eliane Lage (the star attraction of São Paulo's Vera Cruz studios), cult horror movie auteur Coffin Joe, and Lázaro Ramos, the most visible Afro-Brazilian actor today. At the same time, contributors interrogate the inner workings of the star system in Brazil, from the pioneering efforts of silent-era actresses to the recent advent of the non-professional movie star.**

Religions in Rio

Joao do Rio (1881-1921) was a literary journalist before his time, before the term existed, before anyone saw that journalism could be raised to the level of art by infusing it with intellectual insight and sociological analysis. He went wherever necessary to observe life as Rio de Janeiro struggled to enter the 20th century while clinging to its traditional imperial politics and lifestyle. He flaunted his homosexuality a century before it became socially acceptable. Here, for the first time in English, are Joao do Rio's reports on the bizarre confluence of European, North American, and African religions that found adherents in Rio de Janeiro. Candomble, Spiritism, Positivism, Satanism, Judaism, the Cult of the Sea, the New Jerusalem, the Physiologists, the Priestesses, the Evangelicals...they all fell under his scrutiny. Ana Lessa-Schmidt's translation of *As Religioes no Rio*, brilliant and true to the original, brings Joao do Rio's insight and revelations to full light. Just as Joao do Rio took readers down the dark streets of the low-life and into dark houses of worship, Lessa-Schmidt's translation takes readers into one of the world's most glorious and mysterious cities during its post-imperial heyday at the turn of the 20th century."

All the News That's Fit to Sell

How the Market Transforms Information into News

Princeton University Press **That market forces drive the news is not news. Whether a story appears in print, on television, or on the Internet depends on who is interested, its value to advertisers, the costs of assembling the details, and competitors' products. But in *All the News That's Fit to Sell*, economist James Hamilton shows just how this happens.**

Furthermore, many complaints about journalism--media bias, soft news, and pundits as celebrities--arise from the impact of this economic logic on news judgments. This is the first book to develop an economic theory of news, analyze evidence across a wide range of media markets on how incentives affect news content, and offer policy conclusions. Media bias, for instance, was long a staple of the news. Hamilton's analysis of newspapers from 1870 to 1900 reveals how nonpartisan reporting became the norm. A hundred years later, some partisan elements reemerged as, for example, evening news broadcasts tried to retain young female viewers with stories aimed at their (Democratic) political interests. Examination of story selection on the network evening news programs from 1969 to 1998 shows how cable competition, deregulation, and ownership changes encouraged a shift from hard news about politics toward more soft news about entertainers. Hamilton concludes by calling for lower costs of access to government information, a greater role for nonprofits in funding journalism, the development of norms that stress hard news reporting, and the defining of digital and Internet property rights to encourage the flow of news. Ultimately, this book shows that by more fully understanding the economics behind the news, we will be better positioned to ensure that the news serves the public good.

Critical Terms for Literary Study, Second Edition

University of Chicago Press Since its publication in 1990, *Critical Terms for Literary Study* has become a landmark introduction to the work of literary theory—giving tens of thousands of students an unparalleled encounter with what it means to do theory and criticism. Significantly expanded, this new edition features six new chapters that confront, in different ways, the growing understanding of literary works as cultural practices. These six new chapters are "Popular Culture," "Diversity," "Imperialism/Nationalism," "Desire," "Ethics," and "Class," by John Fiske, Louis Menand, Seamus Deane, Judith Butler, Geoffrey Galt Harpham, and Daniel T. O'Hara, respectively. Each new essay adopts the approach that has won this book such widespread acclaim: each provides a concise history of a literary term, critically explores the issues and questions the term raises, and then puts theory into practice by showing the reading strategies the term permits. Exploring the concepts that shape the way we read, the essays combine to provide an extraordinary introduction to the work of literature and literary study, as the nation's most distinguished scholars put the tools of critical practice vividly to use.

Fundamentação Do Mistério Exu Na Umbanda

The Nobility and Excellence of Women and the Defects and Vices of Men

University of Chicago Press A gifted poet, a women's rights activist, and an expert on moral and natural philosophy, Lucrezia Marinella (1571-1653) was known throughout Italy as the leading female intellectual of her age. Born into a family of Venetian physicians, she was encouraged to study, and, fortunately, she did not share the fate of many of her female contemporaries, who were forced to join convents or were pressured to marry early. Marinella enjoyed a long literary career, writing mainly religious, epic, and pastoral poetry, and biographies of famous women in both verse and prose. Marinella's masterpiece, *The Nobility and Excellence of Women, and the Defects and Vices of Men* was first published in 1600, composed at a furious pace in answer to Giuseppe Passi's diatribe about women's alleged defects. This polemic displays Marinella's vast knowledge of the Italian poetic tradition and demonstrates her ability to argue against authors of the misogynist tradition from Boccaccio to Torquato Tasso. Trying to effect real social change, Marinella argued that morally, intellectually, and in many other ways, women are superior to men.

Last Lectures

Collège de France 1968 And 1969

Benveniste's lectures had a shaping influence on a generation of scholars that includes Barthes, Deleuze, Foucault, Derrida, Kristeva and Todorov and here, for the first time, these are made available in English for a new generation of linguists and philosophers of language. This book includes the full course of fifteen lectures which Benveniste gave in the Collège de France on the rue des Écoles in Paris between December 1968 and December 1969. Benveniste's work as offered here presents the first serious attempt at reconciling the sign theories of Saussure and Peirce and draws together, language, writing and society into a comprehensive theory of signifying. Benveniste's philosophy of language considers key concepts such as utterance, enunciation, speaker, discourse, subjectivity and as such is central to the areas of discourse analysis, text linguistics, pragmatics, semantics, conversational analysis, stylistics and semiotics.
