### Citizenship Education

### Second Report of Session 2006-07 : Report, Together with Formal Minutes, Oral and Written Evidence

*The Stationery Office* In light of the recommendations of the Crick report on citizenship education ('Education for citizenship and the teaching of democracy' which can be downloaded at [http://www.qca.org.uk/downloads/6123\\_crick\\_report\\_1998.pdf](http://www.qca.org.uk/downloads/6123_crick_report_1998.pdf)) published in September 1998, the subject was introduced into the school curriculum in 2002, on a compulsory basis for secondary schools and as part of the non-statutory framework for primary schools. The Committee's report assesses the progress made during the last four years to deliver quality citizenship programmes and examines the barriers that exist to its successful implementation. It finds that, when well done, citizenship education motivates and inspires young people, but the quality and extent of these programmes are still inconsistent across the country. This patchiness needs to be tackled head-on, and progress accelerated, requiring strong support from the DfES and Ministers as well as action from those on the ground. The Committee welcomes the Government's decision to accept the recommendations of the report by Sir Keith Ajegbo which highlighted the need for citizenship curriculum to have a closer focus on issues of identity, diversity and belonging. More can be done to disseminate between settings good practice information about approaches that are working in other institutions, particularly in relation to 'whole-school' (or college) approaches that develop opportunities for active citizenship, although it is essential that programmes are locally-owned and relevant to the particular context. The development of the workforce is also important to the success of citizenship education, and although the expansion of the Continuing Professional Development (CPD) citizenship certificate programme is welcome, more resources are needed to develop capacity in initial teacher training places for citizenship education.

*Bloomsbury Publishing* First written in response to a JACT survey of over 100 schools, and now endorsed by OCR, this textbook has become a standard resource for students in the UK and for readers across the world who are looking for a clear and thorough introduction to the language of the ancient Greeks. Revised throughout and enhanced by coloured artwork and text features, this edition will support the new OCR specification for Classical Greek (first teaching 2016). Part 1 covers the basics and is self-contained, with its own reference section. It covers the main declensions, a range of active tenses and a vocabulary of 250 Greek words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: Aesop, Homer's Odyssey and Alexander the Great, providing an excellent introduction to Greek culture alongside the language study. Written by a long-time school teacher and examiner, this two-part course is based on experience of what pupils find difficult, concentrating on the essentials and on the understanding of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. It aims to be user-friendly, but also to give pupils a firm foundation for further study.
