**The Case of the iPad Mobile Literacies in Education Springer** This book brings together an international group of literacy studies scholars who have investigated mobile literacies in a variety of educational settings. Approaching mobility from diverse theoretical perspectives, the book makes a significant contribution to how mobile literacies, and tablets in particular, are being conceptualised in literacy research. The book focuses on tablets, and particularly the iPad, as a prime example of mobile literacies, setting this within the broader context of literacy and mobility. The book provides inspiration and direction for future research in mobile literacies, based upon 16 chapters that investigate the relationship between tablets and literacy in diverse ways. Together they address the complex and multiple forces associated with the distribution of the technologies themselves and the texts they mediate, and consider how apps, adults and children work together as iPads enter the mesh of practices and material arrangements that constitute the institutional setting. iPad 4th Generation and iPad mini Portable Genius John Wiley & Sons My iPhone for Seniors Covers all iPhones running iOS 11 Que Publishing Easy, clear, readable, and focused on what you want to do. The main theme in this publication is the development of connections between bio-informatics and medical informatics. Tools and concepts from both disciplines can complement each other. Databases and Information Systems IV Selected Papers from the Seventh International Baltic Conference, DB&IS'2006 IOS Press "This publication contains papers that present original results in business modeling and enterprise engineering, database research, data engineering, data quality and data analysis, IS engineering, Web engineering, and application of AI methods. The contributions are from academics and practitioners from the entire world. We hope that the presented results will contribute to the further development of research in DB and IS field. The conference where these papers were presented has been approved by the IEEE Communication Society for Technical Cosponsorship. All papers have been extended significantly and rewritten completely. They have been reviewed by at least 3 reviewers from different countries who evaluated their originality, significance, relevance, and presentation and found their quality suitable for the publication in this volume." Selected Readings in Cybersecurity Cambridge Scholars Publishing This collection of papers highlights the current state of the art of cybersecurity. It is divided into five major sections: humans and information security; security systems design and development; security systems management and testing; applications of information security technologies; and outstanding cybersecurity technology development trends. This book will mainly appeal to practitioners in the cybersecurity industry and college faculty and students in the disciplines of cybersecurity, information systems, information technology, and computer science. Concepts of Biology Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when

they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

These developments are collectively best characterized as Active Media Technology (AMT), a new area of intelligent information technology and computer science that emphasizes the proactive, seamless roles of interfaces and systems as well as new media in all aspects of digital life. An AMT based computer system offers services that enable the rapid design, implementation, deploying and support of customized solutions. This book brings together papers from researchers from diverse areas, such as Web intelligence, data mining, intelligent agents, smart information use, networking and intelligent interface. The book includes papers on the following topics: Active Computer Systems and Intelligent Interfaces; Adaptive Web Systems and Information Foraging Agents; Web mining, Wisdom Web and Web Intelligence; E-Commerce and Web Services; Data Mining, Ontology Mining and Data Reasoning; Network, Mobile and Wireless Security; Entertainment and Social Applications of Active Media; Agent-Based Software Engineering and Multi-Agent Systems; Digital City and Digital Interactivity; Machine Learning and Human-Centered Robotics; Multi-Modal Processing, Detection, Recognition, and Expression Analysis; Personalized, Pervasive, and Ubiquitous Systems and their Interfaces; Smart Digital Media; and Evaluation of Active Media and AMT Based Systems. Teach Yourself VISUALLY iPhone is your personal map for exploring your new tech companion. Information Modelling and Knowledge Bases XXXII IOS Press Information modeling and knowledge bases are important technologies for academic and industrial research that goes beyond the traditional borders of information systems and computer science. The amount and complexity of information to be dealt with grows continually, as do the levels of abstraction and the size of databases. This book presents the proceedings of the 30th International Conference on Information Modelling and Knowledge Bases (EJC2020), due to be held in Hamburg, Germany on 8 and 9 June 2020, but instead held as a virtual conference on the same dates due to the Corona-virus pandemic restrictions. The conference provides a research forum for the exchange of scientific results and experiences, and brings together experts from different areas of computer science and other disciplines with a common interest in information modeling and knowledge bases. The subject touches on many disciplines, with philosophy and logic, cognitive science, knowledge management, linguistics and management science, as well as the emerging fields of data science and machine learning, all being relevant areas. The 23 reviewed, selected, and upgraded contributions included here are the result of presentations, comments, and discussions from the conference, and reflect the themes of the conference sessions: learning and linguistics; systems and processes; data and knowledge representation; models and interfaces; formalizations and reasoning; models and modeling; machine learning; models and programming; environment and predictions; modeling emotion; and social networks. The book provides an overview of current research and applications, and will be of interest to all those working in the field. Assessing the Threat of Weapons of Mass Destruction The Role of Independent Scientists IOS Press Assessing the Threat of Weapons of Mass Destruction is a collection of papers delivered at the NATO Advanced Research Workshop of the same name, which examined the role of independent scientists in assessing WMD threat. Such threat assessment has a profound impact on the policies of governments and international organizations. It raises numerous questions: What exactly is an independent scientist and what threatens their independence? What role do cultural dependencies play within assessments? Artificial Intelligence Applications and Innovations IFIP 18th World Computer Congress TC12 First International Conference on Artificial Intelligence Applications and Innovations (AIAI-2004) 22-27 August 2004 Toulouse, France Springer Artificial Intelligence and Innovations (AIAI) will interest researchers, IT professionals and consultants by examining technologies and applications of demonstrable value. The conference focused on profitable intelligent systems and technologies. AIAI focuses on real world applications; therefore authors should highlight the benefits of AI technology for industry and services. Novel approaches solving business and industrial problems, using AI, will emerge from this conference. Public Management and Governance, Second Edition Taylor & Francis This textbook examines what it means to have efficient management and good quality services in the public sector and how public sector performance can be improved. #Myprivacy #Myright Protect It While You Can Partridge Publishing Singapore If you ever thought you could run away into the wilderness without being noticed, think again. Right from the time you get up in the morning, picking up your mobile devices, wearing your fitness tracker, and every aspect of your life is connected to an unknown world—a world that decides whether you are noteworthy or play worthy of being tracked. A common man is caught up in a world that is intertwined between your private life, gains of the government through surveillance capitalism and the law of the internet and dark web. This book takes you through a journey that looks at various privacy aspects of your private life and unusual case laws. Laws that have challenged the courts to think beyond the traditional line of thinking. They have also influenced the media who are looking for juicy scoops to make stories more enticing for their viewership/ readership. It further dwells into the idea of Artificial Intelligence, and it will make things even more invasive with the unknown sources and data of an individual that is out there. Finally, the book attempts to answer the question of what should individuals do if they are caught up in a storm of data breaches. Remember, once the information is out on the internet, it is virtually impossible to redact it back. A City Is Not a Computer Other Urban Intelligences Princeton University Press A bold reassessment of "smart cities" that reveals what is lost when we conceive of our urban spaces as computers Computational models of urbanism—smart cities that use data-driven planning and algorithmic administration—promise to deliver new urban efficiencies and conveniences. Yet these models limit our understanding of what we can know about a city. A City Is Not a Computer reveals how cities encompass myriad forms of local and indigenous intelligences and knowledge institutions, arguing that these resources are a vital supplement and corrective to increasingly prevalent algorithmic models. Shannon Mattern begins by examining the ethical and ontological implications of urban technologies and computational models, discussing how they shape and in many cases profoundly limit our engagement with cities. She looks at the methods and underlying assumptions of data-driven urbanism, and demonstrates how the "city-as-computer" metaphor, which undergirds much of today's urban policy and design, reduces place-based knowledge to information processing. Mattern then imagines how we might sustain institutions and infrastructures that constitute more diverse, open, inclusive urban forms. She shows how the public library functions as a steward of urban intelligence, and describes the scales of upkeep needed to sustain a city's many moving parts, from spinning hard drives to bridge repairs. Incorporating insights from urban studies, data science, and media and information studies, A City Is Not a Computer offers a visionary new approach to urban planning and design. ThompsonCourierRakeRegister\_2018-06-14\_all.pdf Augmentative and Alternative Communication Challenges and Solutions Plural Publishing Providers of Augmentative and Alternative Communication (AAC) face a myriad of challenges in a rapidly changing and developing field. Augmentative and Alternative Communication: Challenges and Solutions is a unique solution-oriented text intended to prepare professionals to face those challenges with a can do perspective. Featuring contributions from

prominent AAC researchers and providers, as well as actual AAC users, this resource traverses a wide range of scenarios that clinicians deal with on a daily basis. **Augmentative and Alternative Communication: Challenges and Solutions** is divided into five sections with each chapter offering a different evidence-based solution. Part I provides an introduction and basis for the rest of the book. Part II focuses on the unique challenges of providing AAC in childhood, while Part III centers on dealing with adult disorders. In Part IV, the authors delve into special populations and issues, such as assisting individuals with multiple disabilities. In Part V, clinicians will find tips for becoming a solution-oriented provider. **Key Features:** \* Contributions from national experts in AAC \* Quotes and vignettes representing the experiences of actual AAC users \* Featured challenges faced by providers and users alike \* Evidence-based solutions for ready application in clinical contexts \* Tools for implementing certain strategies, including example meeting scripts \* A comprehensive glossary of terms \* A highly readable writing style \* An introductory chapter with bolded key terms to improve retention of the material

**Child Protective Services A Guide for Caseworkers**  
From the Preface: This manual, **Child Protective Services: A Guide for Caseworkers**, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in **A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice**. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based—including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

**The Development of E-Government in Central and Eastern Europe [CEE]. IOS Press** " The aim of this publication is to take an x-ray of CEE e-government and provide readers with an in-depth comparative study of e-government phenomena in the CEE region. The CEE region covers a very diverse set of countries, which have in many respects very little in common, geographically, historically, politically, and economically. Yet there is one common factor; most of these countries are emerging from the hegemony of the Soviet Empire. And, as they do so, more liberal governmental and democratic values are being struggled with. So, although there is much diversity in the region there is a common point of reference and a trajectory of change and development that brings value to a collection of papers on CEE. The countries of CEE include those placed by the Cap Gemini regular measurements (Cap Gemini Ernst & Young, 2006) that belong in the upper third of the EU25s most advanced countries for e-government readiness, while there are many countries in the same region that still find themselves at the very beginning of this process. This diversity has led to change the course of observation and set somewhat different criteria for this publication. "

**Transdisciplinary Engineering: Crossing Boundaries Proceedings of the 23rd ISPE Inc. International Conference on Transdisciplinary Engineering October 3 - 7, 2016 IOS Press** The Concurrent Engineering (CE) approach was developed in the 1980s, based on the concept that different phases of a product life cycle should be conducted concurrently and initiated as early as possible within the Product Creation Process (PCP). CE concepts have matured and become the foundation of many new ideas, methodologies, initiatives, approaches and tools. This book contains the proceedings from the 23rd ISPE Inc. International Conference on Transdisciplinary (formerly: Concurrent) Engineering, held in Curitiba, Parana, Brazil, in October 2016. The conference, entitled 'Transdisciplinary Engineering: Crossing Boundaries', provides an important forum for international scientific exchange on Concurrent Engineering and collaborative enterprises, and attracts the participation of researchers, industry experts and students, as well as government representatives. The 108 peer reviewed papers and keynote speech included here, range from theoretical and conceptual to strongly pragmatic works, which are organized into 17 sections including: Concurrent Engineering and knowledge exchange; engineering for sustainability; multidisciplinary project management; collaborative design and engineering; optimization of engineering operations and data analytics; and multidisciplinary design optimization, among others. The book gives an overview of the latest research, advancements and applications in the field and will be of interest to researchers, design practitioners and educators.

**Computational Science and Its Applications - ICCSA 2014 14th International Conference, Guimarães, Portugal, June 30 - July 3, 2014, Proceedings, Part V Springer** The six-volume set LNCS 8579-8584 constitutes the refereed proceedings of the 14th International Conference on Computational Science and Its Applications, ICCSA 2014, held in Guimarães, Portugal, in June/July 2014. The 347 revised papers presented in 30 workshops and a special track were carefully reviewed and selected from 1167. The 289 papers presented in the workshops cover various areas in computational science ranging from computational science technologies to specific areas of computational science such as computational geometry and security.

**We See It All Liberty and Justice in an Age of Perpetual Surveillance PublicAffairs** This investigation into the legal, political, and moral issues surrounding how the police and justice system use surveillance technology asks the question: what are citizens of a free country willing to tolerate in the name of public safety? As we rethink the scope of police power, Jon Fasman's chilling examination of how the police and the justice system use the unparalleled power of surveillance technology—how it affects privacy, liberty, and civil rights—becomes more urgent by the day.

Embedding himself within police departments on both coasts, Fasman explores the moral, legal, and political questions posed by these techniques and tools. By zeroing in on how facial recognition, automatic license-plate readers, drones, predictive algorithms, and encryption affect us personally, Fasman vividly illustrates what is at stake and explains how to think through issues of privacy rights, civil liberties, and public safety. How do these technologies impact how police operate in our society? How should archaic privacy laws written for an obsolete era—that of the landline and postbox—be updated? Fasman looks closely at what can happen when surveillance technologies are combined and put in the hands of governments with scant regard for citizens' civil liberties, pushing us to ask: Is our democratic culture strong enough to stop us from turning into China, with its architecture of control?

**APPLYING UML & PATTERNS 3RD EDITION** Larman covers how to investigate requirements, create solutions and then translate designs into code, showing developers how to make practical use of the most significant recent developments. A summary of UML notation is included.

**Photoshop Elements 10 For Dummies** John Wiley & Sons Shows how to use Photoshop Elements to retouch, repair, publish, and add effects to digital photographs and graphics by altering such factors as lighting, composition, and texture, and through editing, cropping, and filtering.

**Health Information Management: Empowering Public Health** IOS Press The effective and efficient management of healthcare institutions is key to the successful development of national health systems. In an increasingly digital society, the skills involved in health information management become a primary factor in ensuring this development. Employment is projected to grow in all areas of healthcare, but especially in those related to information management, such as applied informatics, public health informatics and medical informatics. This book, *Health Information Management: Empowering Public Health*, aims to provide a clear and comprehensive introduction to the study and development of health information management. It is designed for use by university and vocational courses to train allied health professionals. It can also be used as an in-service training tool for new healthcare-facility personnel, for those working in government healthcare institutions, independent billing and health assurance services, or individually by health information specialists. The book describes health information management, and explains how it merges the fields of health care and information technology. Readers will learn logical thinking and communication, and will be introduced to the organizational processes in healthcare institutions, as well as finding out how to organize and analyze health care data; accurately record, store and assess health data; use an electronic patient record system; and provide statistical analysis and interpret the results. The book will be of interest to all those wishing to gain a better insight into what is involved health information management, and to all those studying the subject.

Covers macOS Mojave, released September 2018. Table of Contents: 1. Introducing macOS Mojave 2. Getting Up and Running 3. Finder 4. Navigating in macOS Mojave 5. macOS Mojave Apps 6. Getting Productive 7. Internet and Email 8. Digital Lifestyle 9. Sharing macOS 10. Networking 11. Maintaining macOS

**Communicating Process Architectures 2017 & 2018** WoTUG-39 & WoTUG-40 IOS Press Concurrent and parallel systems are intrinsic to the technology which underpins almost every aspect of our lives today. This book presents the combined post-proceedings for two important conferences on concurrent and parallel systems: *Communicating Process Architectures 2017*, held in Sliema, Malta, in August 2017, and *Communicating Process Architectures 2018*, held in Dresden, Germany, in August 2018. CPA 2017: Fifteen papers were accepted for presentation and publication, they cover topics including mathematical theory, programming languages, design and support tools, verification, and multicore infrastructure and applications ranging from supercomputing to embedded. A workshop on domain-specific concurrency skeletons and the abstracts of eight fringe presentations reporting on new ideas, work in progress or interesting thoughts associated with concurrency are also included in these proceedings. CPA 2018: Eighteen papers were accepted for presentation and publication, they cover

topics including mathematical theory, design and programming language and support tools, verification, multicore run-time infrastructure, and applications at all levels from supercomputing to embedded. A workshop on translating CSP-based languages to common programming languages and the abstracts of four fringe presentations on work in progress, new ideas, as well as demonstrations and concerns that certain common practices in concurrency are harmful are also included in these proceedings. The book will be of interest to all those whose work involves concurrent and parallel systems. Knowledge-based Software Engineering Proceedings of the Eighth Joint Conference on Knowledge-Based Software Engineering IOS Press Addresses various topics in the context of knowledge-based software engineering, including challenges that have arisen in this area of research. This book includes topics such as knowledge-based requirements engineering, domain analysis and modeling; development processes for knowledge-based applications; and, knowledge acquisition. Cases on Adoption, Diffusion, and Evaluation of Global E-governance Systems Impact at the Grass Roots IGI Global "This book accommodates theories, issues and methodologies for designing, implementing and operating e-government systems, presenting cases covering a variety of services and applications that have been improving the governance of nations and economies"--Provided by publisher. Cases on Semantic Interoperability for Information Systems Integration: Practices and Applications Practices and Applications IGI Global "This book presents the use of semantic interoperability for a variety of applications ranging from manufacturing to tourism, e-commerce, energy Grids' integration, geospatial systems interoperability and automated agents interoperability for web services"--Provided by publisher. Geospatial Infrastructure, Applications and Technologies: India Case Studies Springer This book is a valuable resource for the increasing body of researchers and practitioners in the field of geospatial technologies. Written by leading researchers and experts it is designed in such a way that technical achievements and challenges of geospatial computing applications are followed by various applications developed for society. As such, they serve as a bridge between technologists and solution developers, which is critical in the context of developing countries. There have been significant advances in geospatial technologies in India in the last decade, including advances in spatial data infrastructures, geocomputation and spatial databases, and innovative applications in natural resource development. Ranging from LIDAR standards, to data integration using ontologies, and mobile computing, such progress enhances the utility of the technology for both urban and rural development. This book discusses these achievements and considers the way forward. Connecticut Code of Evidence West Group Publishing A Commercial Law of Privacy and Security for the Internet of Things Cambridge University Press Elvy explores the consumer ramifications of the Internet of Things through the lens of the commercial law of privacy and security.
