Down to Earth

Nature's Role in American History

Oxford University Press *In this ambitious and provocative text, environmental historian Ted Steinberg offers a sweeping history of our nation--a history that, for the first time, places the environment at the very center of our story. Written with exceptional clarity, Down to Earth re-envision the story of America "from the ground up." It reveals how focusing on plants, animals, climate, and other ecological factors can radically change the way that we think about the past. Examining such familiar topics as colonization, the industrial revolution, slavery, the Civil War, and the emergence of modern-day consumer culture, Steinberg recounts how the natural world influenced the course of human history. From the colonists' attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good, the author reminds readers that many critical episodes in our history were, in fact, environmental events. He highlights the ways in which we have attempted to reshape and control nature, from Thomas Jefferson's surveying plan, which divided the national landscape into a grid, to the transformation of animals, crops, and even water into commodities. The text is ideal for courses in environmental history, environmental studies, urban studies, economic history, and American history. Passionately argued and thought-provoking, Down to Earth retells our nation's history with nature in the foreground--a perspective that will challenge our view of everything from Jamestown to Disney World.*

EBOOK: The Future Public Health

McGraw-Hill Education (UK) *Obesity, depression, addiction, loss of wellbeing: these are issues which sap the resources and spirit of modern practitioners. Public health is being challenged by the existence of an 'ingenuity gap' - the gap between an interacting kaleidoscope of problems and our capacity to respond effectively. This innovative text bridges the gap between current public health values and skills and those required to tackle future challenges. The authors introduce the key models and theories of public health, as well as the factors that have shaped its history and development. The book also: Establishes the links between current public health problems and emerging threats like global warming and resource depletion Explores the true nature of modern and emerging threats to health Creates a new model for the 'future public health' Explores what these changes will mean for the future public health practitioner This is a book which sets out the reasons why we need a fundamentally new approach to public health and explores how this might be achieved. The Future Public Health is informed by a six year research project, commissioned by the Scottish Government, to trace the development of our current situation and look for solutions to the challenges facing public health. Dettingen 1743

Miracle on the Main

Bloomsbury Publishing *The death of the Emperor Charles VI in 1741 was the catalyst for a conflict ostensibly about the female inheritance of the Hapsburg patrimony but, in reality, about the succession to the Imperial Throne. The great European powers were divided between those, such as Britain, who supported the Pragmatic Sanction and the rights of the Archduchess Maria-Theresia, daughter of Charles VI, and those who challenged it, including Bavaria which were supported by France. The conflict quickly escalated into what is now known as the War of the Austrian Succession, and a series of turbulent political events brought the crisis to a head on the road to Hanau, near Dettingen. There, the French moved to put into place a complex manoeuvre which had the potential to end the war at a single stroke. A column of French troops would cross the Main near Dettingen and block the road to Hanau, their orders being to simply hold their ground and bar the route of the Allied British and Hanovarian advance. A second column would cross the Main behind the enemy and then follow their line of march northwards. The bulk of the army would use a combination of bridges and pontoon-bridges to cross the Main and engage the enemy from the flank as they were strung out on the line of march. However, the plan relied heavily on the blocking force, and command of this crucial sector fell to an inexperienced nobleman Louis-Auguste, Duc de Grammont, who chose to attack rather than hold his position. Consequently, the manoeuvre failed and the French broke, fleeing for the Main and safety, with the Gardes Francaises famously swimming the river. Supported by specially commissioned artwork including maps and battleplates, this title explores the battle in depth, detailing its build-up, events, and aftermath, as well as analysing the strengths and weaknesses of the commanders, armies, and tactics of both sides.*

Selous Scouts

Rhodesian Counter-insurgency Specialists

Helion & Company Limited "Its members consisted of some of the finest guerrilla-fighting men in the western world, unconventional in many ways, disregarding of parade-ground discipline, unorthodox in their dress, yet a force so tightly knit in the face of danger that those who knew anything about them could only marvel" - *The Citizen*. Formed in 1973 by the legendary Lieutenant-Colonel Ron Reid-Daly at the behest of Rhodesian military supremo General Peter Walls, the Selous Scouts were to write their name into the annals of military history as one of the finest counterinsurgency units of all time, through their innovative pseudo-guerrilla tactics, brilliant reconnaissance operations into Zambia and Botswana and daring flying-column raids into Mozambique. Feared and hated by the liberation movements ZIPRA and ZANLA, the Scouts wreaked untold havoc and destruction on their Soviet- and Chinese-backed enemies, accounting for 68% of guerrilla casualties within Rhodesia alone during the bitter bush war of the 1970s. Uniquely ahead of its time, the regimen - a brotherhood of men that traversed cultural and racial barriers; their Shona motto was 'Pamwe Chete' (together only) - was to produce the type of soldier that earned for the unit one Grand Cross of Valour, nine Silver Crosses and 22 Bronze Crosses of Rhodesia.

The Cuban Intervention in Angola, 1965-1991

From Che Guevara to Cuito Cuanavale

Routledge A new examination of why Cuba, a Caribbean country, sent half a million of its citizens to fight in Angola in Africa, and how a short-term intervention escalated into a lengthy war of intervention. It clearly details how in January 1965 Cuba formed an alliance with the Angolan MPLA which evolved into the flagship of its global 'internationalist' mission, spawning the military intervention of November 1975 culminating in Cuba's spurious 'victory' at Cuito Cuanavale and Cuba's fifteen-year occupation of Angola. Drawing on interviews with leading protagonists, first-hand accounts and archive material from Cuba, Angola and South Africa, this new book dispels the myths of the Cuban intervention, revealing that Havana's decision to intervene was not so much an heroic gesture of solidarity, but rather a last-ditch gamble to avert disaster. By examining Cuba's role in the Angolan War in a global context, this book demonstrates how the interaction between the many players in Angola shaped and affected Cuba's intervention as it headed towards its controversial conclusion.

US Army and Marine Corps MRAPs

Mine Resistant Ambush Protected Vehicles

Bloomsbury Publishing The Mine Resistant Ambush Protected (MRAP) vehicle is the newest land warfare system in the United States Army and Marine Corps inventory. Designed to meet the challenges of operating in a counterinsurgency environment, the MRAP has taken survivability to a new level. MRAPs are currently manufactured by three companies: BAE Systems, Navistar International Military Group, and Force Protection Inc. Each company manufactures an MRAP according to one of three classifications set by the US Department of Defense: Category I, Category II, or Category III. The Category I MRAPs are designed for urban combat. Category II covers the MRAPs designed for convoy security, medical evacuation, and explosive ordnance disposal. The Category III MRAP performs the same function as Category II but is designed to carry more personnel. Since their introduction in 2007, MRAPs have performed remarkably in the asymmetric warfare environment. Their unique design and survivability characteristics have saved the lives hundreds of soldiers who otherwise would have been lost to landmines or IED attacks. As with any combat system, however, the MRAP is not without its drawbacks.

Winch and cable systems

Springer Science & Business Media The book is a civil engineering handbook on winch and cable systems. The handbook may be used as textbook for university studies in civil engineering and forestry and as the basis for studies in schools on a technical level. It should be a useful reference book for construction engineers, civil engineers, logging engineers, foresters and leaders of operational activities under difficult terrain conditions. The content in the book is based on more than 35 years experience with practical winch and cable operations. As a leader of the Norwegian Institute of Forest Operations, the author has carried out research work in this field since 1947. Achtung-Panzer!

The Development of Armoured Forces, Their Tactics and Operational Potential

Arms & Armour This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Global Peace Operations Review - Annual Compilation 2015

The *Global Peace Operations Review* is an interactive web-portal presenting in-depth analysis and detailed data on military peacekeeping operations and civilian-led political missions by the United Nations, regional organizations, and ad-hoc coalitions. The web-portal is a product of the New York University Center on International Cooperation (CIC) and a continuation of its long-standing print publications the *Annual Review of Global Peace Operations* and the *Review of Political Missions*. For almost a decade, the *Annual Review of Global Peace Operations* (ARGPO) was the flagship publication of the Center on International Cooperation (CIC). During that time, CIC also released three editions of the *Review of Political Missions*. Together, they set the standard for analyzing UN and non-UN peace operations with enduring thematic essays, thorough country profiles, and detailed mission data. This publication represents our desire to get the Peace Operations analysis and data into the hands of a wider range of policymakers. We wanted to reach those serving in peace operations in the field, and, most importantly, the citizens of those countries that rely on peace operations for their security.

Inside Story of a Rhodesian Special Branch Officer

Galago Pub. The Rhodesian Bush War had grumbled on at a low key since the early 1960s, but it escalated sharply in late 1972 when major infiltrations of ZANLA guerillas from Mozambique began. The Rhodesian forces found it difficult to engage the guerrillas using conventional counter-insurgency methods, because the enemy's tactic was to merge with the local tribal population. This resulted in the formation of the Selous Scouts whose role was to infiltrate pseudo-geurillas into enemy groups, gather intelligence and turn captured guerillas into pro-government fighters. The Selous Scouts accounted for 68% of all guerillas killed or captured during the war.
