## Issues for Debate in Social Policy

### Selections From CQ Researcher

SAGE Publications This collection of non-partisan reports focuses on 18 hot-button social policy issues written by award-winning CQ Researcher journalists. As an annual that comes together just months before publication, the volume is as current as possible. And because it's CQ Researcher, the social policy reports are expertly researched and written, showing all sides of an issue. Chapters follow a consistent organization, exploring three issue questions, then offering background, current context, and a look ahead, as well as featuring a pro/con debate box. All issues include a chronology, bibliography, photos, charts, and figures.

## Connecting Social Problems and Popular Culture

### Why Media is Not the Answer

Routledge Is violence on the streets caused by violence in video games? Does cyber-bullying lead to an increase in suicide rates? Are teens promiscuous because of Teen Mom? As Karen Sternheimer clearly demonstrates, popular culture is an easy scapegoat for many of society's problems, but it is almost always the wrong answer. Now in its second edition, *Connecting Social Problems and Popular Culture* goes beyond the news-grabbing headlines claiming that popular culture is public enemy number one to consider what really causes the social problems we are most concerned about. The sobering fact is that a "media made them do it" explanation fails to illuminate the roots of social problems like poverty, violence, and environmental degradation. Sternheimer's analysis deftly illustrates how welfare "reform," a two-tiered health care system, and other difficult systemic issues have far more to do with our contemporary social problems than Grand Theft Auto or Facebook. The fully-revised new edition features recent moral panics (think sexting and cyberbullying) and an entirely new chapter exploring social media. Expanded discussion of how we understand society's problems as social constructions without disregarding empirical evidence, as well as the cultural and structural issues underlying those ills, allows students to stretch their sociological imaginations.

## Our Social World

### Condensed Version

Pine Forge Press *Our Social World: Introduction to Sociology, Brief Edition* introduces the discipline of sociology to the contemporary student and provides an integrated, comprehensible framework from which to view the world in a concise format. In each chapter, authors Jeanne H. Ballantine and Keith A. Roberts provide an organizing theme that is

not exclusively tied to one theoretical paradigm to help students see relationships between topics. Our Social World presents the perspective of students living in the larger global world. Features of this brief edition: - Offers a strong global focus: A global perspective is integrated into each chapter to encourage students to think of global society as a logical extension of their own micro world. - Deep Learning Approach: Encourages Students to think critically about the social World - Presents The Social World Model in each chapter: This organizing framework helps students understand the interrelatedness of core concepts.

## Issues in Aging

Routledge *Opportunities and optimism in Aging. Issues in Aging*, 3rd edition takes an optimistic view of aging and human potential in later life. This book presents the most up-to-date facts on aging today, the issues raised by these facts, and the societal and individual responses that will create a successful old age for us all. Mark Novak presents the full picture of aging--exhibiting both the problems and the opportunities that accompany older age. The text illustrates how generations are dependent on one another and how social conditions affect both the individual and social institutions. Learning Goals -Upon completing this book, readers will be able to: -Understand how large-scale social issues--social attitudes, the study of aging, and demographic issues--affect individuals and social institutions - Identify the political responses to aging and how individuals can create a better old age for themselves and the people they know -Separate the myths from the realities of aging -Recognize the human side of aging -Trace the transformation of pension plans, health, and opportunities for personal expression and social engagement to the new ecology of aging today

## European Social Problems

Routledge *European Social Problems* is the first book to examine social issues in Europe from the perspective of the social sciences. It considers many of these social problems following the UK's 'leave' vote. Key topics examined here include: immigration; multiculturalism and religion; health; inequalities; education; riots and protest; drugs and crime; sexuality. These core issues run as a thread through Europe and are experienced by Europeans themselves as social problems. As such, this text facilitates students' direct engagement with some of the problematic constituents in their own lives. This text is suitable for those studying social policy, sociology, politics, international relations, criminology and education studies. In this way it functions as an accessible 'reader' for final year undergraduates as well as postgraduate students.

## The Global 1980s

### People, Power and Profit

Routledge *The Global 1980s* takes an international perspective on the upheaval across the world during the long 1980s (1979-1991) with the end of the Cold War, a move towards a free-market economic system, and the increasing connectedness of the world. The 1980s was a decade of unimaginable change. At its start, dictatorships across the world appeared stable, the state was still seen as having a role to play in ensuring people's well-being, and the Cold War seemed set to continue long into the future. By the end of the decade, dictatorships had fallen, globalisation was on the march and the opening of the Berlin Wall paved the way for the end of the Cold War. Divided into four chronological parts, sixteen chapters on themes including domestic politics, the global spread of democracy, international relations and global concerns including AIDS, acid rain and nuclear war, explore how world-wide change was initiated both from above and below. The book covers such topics as ideological changes in the liberal democratic west and socialist east, protests against nuclear weapons and for democratic governance, global environmental worries, and the end of apartheid in South Africa. Offering an overview of a decade in transition, as the global order established after 1945 broke down and a new, globalised world order emerged, and supported by case studies from across the world, this truly global book is an essential resource for students and scholars of the long 1980s and the twentieth century more generally.

## The Austro-Libertarian Point of View

### Essays on Austrian Economics and Libertarianism

Springer Nature This book covers several areas of economic theory and political philosophy from the perspective of Austrian Economics and libertarianism. As such, it deals with Epistemology and Methodology, Microeconomics, Macroeconomics, Labor Economics, International Economics, Political Philosophy, Law and Public Policy, all from the Austro-libertarian perspective. Hence, this book offers an integrated view of libertarianism and Austrian economics in the light of recent debates in the areas of economic science and political philosophy. Moreover, it builds from the foundations of the Austrian approach (epistemology and methodology), while the latter material deals with its application to the individual from the microeconomic perspective, which in turn allows an exploration of subjects in macroeconomics. Additionally, this work applies Austro-libertarianism to law, politics, and public policy. Thus, it offers a unified view of the entire approach, in a logical progression, allowing the readers to judge this perspective in full. Futerman and Block say that their book is not a manual, which I suppose it is not. But it is a collection of highly pertinent essays, from which you can understand what is mistaken in the orthodoxy of economics, law, and politics. The central term of art in Austrian economics is that phrase "human action." It is the exercise of human will, not the blind bumping of one molecule against another or one organism against another, as in the physical sciences... Futerman and Block distinguish Austrian economics as a scientific enterprise based on liberty of the will from "libertarianism" as an advocacy based on policies implied by such liberty. "Although Austrian economics is positive and libertarianism is normative," they write, "this book shows how both are related; how each can support the other." Indeed they do. Deirdre N. The second section, "Synchrony through Verbal and Nonverbal Signals", presents 21 revised lectures that provide theoretical and practical solutions to the modelling of timing synchronization between linguistic and paralinguistic expressions, actions, body movements, activities in human interaction and on their assistance for an effective communication.

## Black Feminist Thought

### Knowledge, Consciousness, and the Politics of

### Empowerment

Routledge In spite of the double burden of racial and gender discrimination, African-American women have developed a rich intellectual tradition that is not widely known. In *Black Feminist Thought*, Patricia Hill Collins explores the words and ideas of Black feminist intellectuals as well as those African-American women outside academe. She provides an interpretive framework for the work of such prominent Black feminist thinkers as Angela Davis, bell hooks, Alice Walker, and Audre Lorde. The result is a superbly crafted book that provides the first synthetic overview of Black feminist thought.

## State of the Adivasis in Odisha 2014

## A Human Development Analysis

[SAGE Publications India](#) **The State of the Adivasis in Odisha 2014: A Human Development Analysis** endeavours to identify and highlight the development concerns of the tribals of the state, explore their causes and provide an opportunity to the state planners in prioritising the human development issues specific to this community. As one of the most excluded communities of India, Adivasis face many challenges in their daily lives: extreme poverty, social exclusion, poor access to healthcare, education and employment opportunities, displacement from their lands and forests and so on. The key objective of this report is to understand these areas of deprivations. It is imperative for the government to ensure food and nutritional security to Adivasis. Efforts should be made for conservation of forests. The tribes need to be provided with hospitals, schools and basic infrastructural facilities. Equal participation of women in project committees at all levels and in training schemes and commercial ventures should be taken to reduce gender inequality. Based on primary and secondary data analysis, this report studies the poor socio-economic condition of the Adivasis and offers possible solutions for empowering the tribal community as a whole.

## Orientalism

Vintage More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.

## Contemporary Issues in International Law

## Environment, International Trade, Information Technology and Legal Education

Springer This book explores the changing nature of international law and its ability to respond to the contemporary issues related to international environment, trade and information technology. The evolution of international law has reached a stage where we are witnessing diminishing power of the state and its capacity to deal with the economic matters challenging the existing notions of territory and sovereignty. Recent trends in international law and international relations show that states no longer have exclusive control over the decision-making process at the global level. Keeping this in mind, the book brings together the perspectives of various international and national scholars. The book considers diverse issues such as, sustainable development, climate change, global warming, Rio+20, technology transfer, agro-biodiversity and genetic resource, authority for protection of environment, human right to water, globalization, human rights, sui generis options in IP laws, impact of liberalization on higher education, regulation of international trade, intellectual property rights, collective administration of copyright, broadcast reproduction rights, implementation of copyright law, communication rights under copyright law, arbitration for IP disputes, doctrine of exhaustion of rights, trans-border reputation of trademark, information as an asset, cyber obscenity and pornography, e-governance, taxation of e-commerce, computer crime, information technology, domain names, research excellence in legal education, ideological perspective on legal education, challenges for law teachers, and clinical legal education. The topics, though diverse, are closely interrelated, with the common concern throughout being that the global environment, international trade, information technology and legal education need appropriate national normative and institutional responses as well as the global cooperation of members of the international community. Presenting reflections of a number of Asian, African and European scholars on these varied facets, the book is of great value to scholars, practitioners, teachers and students associated with contemporary international law.

## Strengthening Forensic Science in the United States

### A Path Forward

[National Academies Press](#) Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

## The Problem of Social Cost

[Createspace Independent Publishing Platform](#) The Problem of Social Cost is an article dealing with economic problem of externalities. It draws from a number of English legal cases and statutes to illustrate Coase's belief that legal rules are only justified by reference to a cost-benefit analysis, and that nuisances that are often regarded as being the fault of one party are more symmetric conflicts between the interests of the two parties.

## The UK Regional–National Economic Problem

### Geography, globalisation and governance

Routledge In recent years, the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development, Philip McCann utilises current statistics, examines historical trends and makes pertinent international comparisons to assess the state of the nation. The UK Regional-National Economic Problem brings attention to the highly centralised, top down governance structure that the UK deploys, and demonstrates that it is less than ideally placed to rectify these inequalities. The 'North-South' divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity, incomes, employment status and wealth. Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland, in contrast the Midlands, the North of England, Northern Ireland and Wales lag behind by most measures of prosperity. This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored. The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends, although this definitive study suggests that some areas of improvement are possible if they are well implemented. This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government.

### Voluntary Action and Illegal Drugs

### Health and Society in Britain since the 1960s

Springer A unique exploration of the changing ideas about the place of voluntarism and health care within society in Britain since the 1960s. By considering the work of voluntary organisations with illegal drug users, the authors provide a lens through which wider developments in the relationship between the state and civil society are examined.

### Financial Capability and Asset Holding in Later Life

#### A Life Course Perspective

Oxford University Press With today's availability of Social Security and Medicare, we typically think of the older years as a stage in life where people are supported financially. However, of the more than 40 million old adults currently living in the US, many are struggling financially living below or near the poverty line. They are lacking the assets necessary to see them through a period of life that is often longer than expected and that requires more health and long-term care. While financial vulnerability can be most pronounced in old age, it is often created across decades, revealing itself in later years when there is little opportunity to reverse a lifetime of disadvantage. The concept of Financial Capability refers to both an individual and structural idea that combines a person's ability to act with their opportunity to act in their best financial interests. In Financial Capability and Asset Holding in Later Life: A Life Course Perspective the concept of Financial Capability is used to underscore the importance of acquiring knowledge and skills while

addressing policies and services than can build financial security. The volume assembles the latest evidence on financial capability and assets among older adults using a life course perspective, arguing that older adults need financial knowledge and financial services in order to build secure lives, and that this process needs to begin before it is too late to make effective changes and choices. Broken into three parts, the book's chapters - written by leading experts in the field - blend together empirical findings, economic and social theory, and case studies. Part 1 opens the book with a conceptual and empirical overview of financial capability and assets among older adults using a life course perspective. Part 2 presents chapters addressing financial vulnerability of diverse racial and ethnic groups, people with disabilities, and immigrants. Part 3 includes chapters describing current policies, programs, and innovations, including a review of important issues of working and caregiving in later life, and a detailed assessment of "age-friendly" banking principles, banking products, services, and policies.

## Critical Issues in Healthcare Policy and Politics in the Gulf Cooperation Council States

[Georgetown University Press](#) This is the first book to examine challenges in the healthcare sector in the six Gulf Cooperation Council (GCC) countries (Saudi Arabia, Oman, the United Arab Emirates, Qatar, Kuwait, and Bahrain). These countries experienced remarkably swift transformations from small fishing and pearling communities at the beginning of the twentieth century to wealthy petro-states today. Their healthcare systems, however, are only now beginning to catch up. Rapid changes to the population and lifestyles of the GCC states have completely changed—and challenged—the region's health profile and infrastructure. While major successes in combatting infectious diseases and improving standards of primary healthcare are reflected in key health indicators, new trends have developed; increasingly "lifestyle" or "wealthy country" diseases, such as diabetes, heart disease, and cancer, have replaced the old maladies. To meet these emerging healthcare needs, GCC states require highly trained and skilled healthcare workers, an environment that supports local training, state-of-the-art diagnostic laboratories and hospitals, research production and dissemination, and knowledge acquisition. They face shortages in most if not all of these areas. This book provides a comprehensive study of the rapidly changing health profile of the region, the existing conditions of healthcare systems, and the challenges posed to healthcare management across the six states of the GCC.

## Minority Issues in Europe: New Ideas and Approaches

### Volume 2

[Frank & Timme GmbH](#) As the political landscape of Europe transforms, so too does the field of minority issues. New areas of focus encompass topics as varied as populism and media representation, anthropological insights and intersectional feminist considerations, education in human rights and participatory mechanisms, and the changing categories and roles of minority communities as important actors in a variety of forums. Volume 2 of *Minority Issues in Europe* reflects a growing range of disciplinary approaches to the field, and a fresh outlook on the issues facing Europe's diverse communities. Bringing together research from experienced experts and young researchers, this book aims to equip students with critical and considered insights to some of the most pressing questions in minority studies today.

## Urban Poverty in Turkey

## Development and Modernisation in Low-Income Communities

[Bloomsbury Publishing](#) Gecekondu settlements-or shanty towns-in large Turkish cities are mostly populated by low-income families, many of which have migrated from the villages of Central Anatolia. The rise of the Islamist party AKP in the 1990s and 2000s had a large impact on how these gecekondu are examined, and how they are perceived to reflect key issues at play in Turkish society: welfare, local identity, religious communities and the rise of civil society. Having lived in one of these neighbourhoods in Ankara, Burcu ?enturk's book sheds light on the experience of gecekondu dwelling in Turkey. By focusing on this aspect, she brings to the fore issues such as urbanisation, modernisation and development, as well as examining the impact these kinds of phenomena have on generation gaps and the role of women in Turkish society. By using the framework of the experience of three generations of gecekondu

dwelling, ?enturk is able to chart the emergence, development and the gradual breakdown of social relations, and how the dynamics of these have changed during the course of the latter half of the twentieth century."

## Global Trends 2040

### A More Contested World

**Cosimo Reports** "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

## Handbook of Consumer Finance Research

**Springer** This second edition of the authoritative resource summarizes the state of consumer finance research across disciplines for expert findings on—and strategies for enhancing—consumers' economic health. New and revised chapters offer current research insights into familiar concepts (retirement saving, bankruptcy, marriage and finance) as well as the latest findings in emerging areas, including healthcare costs, online shopping, financial therapy, and the neuroscience behind buyer behavior. The expanded coverage also reviews economic challenges of diverse populations such as ethnic groups, youth, older adults, and entrepreneurs, reflecting the ubiquity of monetary issues and concerns. Underlying all chapters is the increasing importance of financial literacy training and other large-scale interventions in an era of economic transition. Among the topics covered: Consumer financial capability and well-being. Advancing financial literacy education using a framework for evaluation. Financial coaching: defining an emerging field. Consumer finance of low-income families. Financial parenting: promoting financial self-reliance of young consumers. Financial sustainability and personal finance education. Accessibly written for researchers and practitioners, this Second Edition of the Handbook of Consumer Finance Research will interest professionals involved in improving consumers' fiscal competence. It also makes a worthwhile text for graduate and advanced undergraduate courses in economics, family and consumer studies, and related fields.
