Daylighting and electric lighting retrofit solutions [Universitätsverlag der TU Berlin](#) Energy efficient lighting is said to be one of the most cost-effective approaches to save energy and reduce CO2 emissions. In order to stimulate the application of lighting retrofits of good quality, IEA Task 50, Subtask B "Daylighting and Electric Lighting solutions" has looked into the assessment of existing and new technical retrofit solutions in the field of façade and daylighting technology, electric lighting and lighting controls. The document provides information for those involved in the development of retrofit products or involved in the decision making process of a retrofit project, such as buildings owners, authorities, designers and consultants, as well as the lighting and façade industry. This source book addresses both electric lighting solutions and daylighting solutions, and offers a method to compare these retrofit solutions on a common basis, including a wide range of quality criteria of cost-related and lighting quality aspects. Simple retrofits, such as replacing a lamp or adding interior blinds, are widely accepted, often applied because of their low initial costs or short payback periods. The work presented in this report aims at promoting state-of-the-art and new lighting retrofit approaches that might cost more but offer a further reduction of energy consumption while improving lighting quality to a greater extent. *Energieeffiziente Beleuchtung ist eine der effektivsten Möglichkeiten, Energie zu sparen und damit die Emission von CO2 zu vermindern. Im Rahmen des IEA Task 50, Subtask B "Daylighting and Electric Lighting solutions" wurden daher neue und vorhandene technische Sanierungslösungen für Gebäude in den Bereichen Fassade, Tageslichttechnik, künstliche Beleuchtung sowie Lichtsteuerung bewertet, um die Anwendung hochwertiger Lösungen voranzutreiben. Die Informationen sind dabei für alle in den Sanierungsprozess einbezogenen Personen von großem Interesse, wie z. B. Gebäudeeigentümer, Behörden, Planer und Berater aber auch für Hersteller und Entwickler von Beleuchtungs- und Fassadenlösungen. Betrachtet werden sowohl künstliche als auch Beleuchtungslösungen mit Tageslicht, wobei eine Methode entwickelt wurde, die Sanierungslösungen grundlegend miteinander zu vergleichen. Hierbei werden zahlreiche Kriterien berücksichtigt, die energetische, lichttechnische, thermische und kostenbezogene Aspekte beinhalten. Einfache Sanierungsmaßnahmen wie der Austausch von Lampen oder die Montage innenliegender Jalousien werden weitgehend akzeptiert und oft verwendet, da sie kostengünstig sind und sich schnell amortisieren. Die vorliegende Arbeit hat es sich zum Ziel gesetzt, die Anwendung neuer und dem Stand der Technik entsprechender Beleuchtungslösungen für die Sanierung zu fördern. Diese verursachen zwar eventuell höhere Kosten, ermöglichen jedoch eine weitere Energieeinsparung bei gleichzeitiger Verbesserung der Beleuchtungsqualität.*

Climate Change Solutions and Environmental Migration The Injustice of Maladaptation and the Gendered 'Silent Offset' Economy [Routledge](#) This book lifts the taboo on maladaptation, a different driver of environmentally induced migration, which shines a light on the negative consequences arising from the solutions to climate change, adaptation and mitigation policies. Through a systematic analysis and critique of existing mitigation and adaptation policies under the United Nations Framework Convention on Climate Change (UNFCCC) and international development community, and supplemented by a small empirical study in Indonesia, this book catalogues how maladaptation is manufactured under existing climate change solutions. It posits that customary communities in general- and women in particular- are disproportionately affected by the dominant market-driven logics that underscore current climate change solutions adopted by the UNFCCC. The injustice of maladaptation is highlighted as multi-faceted and explored using political, economic, social and ecological lenses, and the concept of environmental reintegration is also explored as a possible solution to this issue. Further possibilities are then presented in the Afterword, as a combination of what the new (post-neoliberalism) conjuncture could potentially look like. This volume will be of great interest to students, scholars and practitioners of climate change, environmental policy, environmental migration and displacement, development studies, I/NGOs and civil society actors and activists more broadly. **100 technical questions and answers for job interview Offshore Drilling Rigs** [Petrogav International](#) The job interview is probably the most important step you will take in your job search journey.
