Today, there is a recrudescence of interest in his thought, especially in light of his later work, published in English as *Philosophy of the Encounter* (Verso, 2006). This has led to renewed debates on the reformulation of conflicting notions of materialism, on the event as both philosophical concept and political construction, and on the nature of politics and the political. These original essays by leading scholars aim to provide a new assessment of Althusser's thought, especially in relation to contemporary debates. Organized in four sections that represent the main currents in Althusser's scholarship, the book discusses materialism and the different formulations of the relationship between politics and philosophy, Althusser's interpretations of political thinkers (including Machiavelli, Deleuze and Gramsci), the resources he provides to critique political economy and politics in post-Marxist thought, and the theorization of ideology and politics. **Encountering Althusser** is a groundbreaking resource that highlights Althusser's continuing relevance to contemporary radical thought. **Women's Lives around the World: A Global Encyclopedia [4 volumes]** [ABC-CLIO](#) Providing an in-depth look at the lives of women and girls in approximately 150 countries, this multivolume reference set offers readers transnational and postcolonial analysis of the many issues that are critical to the survival and success of women and girls. • Presents a broad postcolonial feminist examination of the lives of women and girls worldwide through essays about the female experience in individual countries • Provides sidebars that highlight details about individual women and interesting topics that affect women and girls • Includes primary

**The Politics of Size: Perspectives from the Fat Acceptance Movement [2 volumes]** [ABC-CLIO](#) This book presents an unprecedented opportunity for people to hear from a simultaneously ostracized, ridiculed, and ignored group: fat Americans. Find out how the members of this very diverse group of people describe their actual lived experiences, quality of life, hopes and dreams, and demands.

- Provides readers with unprecedented insights into the lived experiences of fat people, unfiltered by a media that can be steeped in "fat bias," as well as information about the science and research regarding obesity
- Reframes the discussion about obesity from a medical issue to a social one and overturns misconceptions readers may have about overweight individuals
- Provides support for readers, especially young women, who may be the subject of bullying and discrimination
- Documents how obese people are as diverse as any group of individuals who share a single physical characteristic, encompassing every ethnicity, political and religious affiliation, and sexual orientation as well as vegans and athletes

**Places of Encounter, Volume 2 Time, Place, and Connectivity in World History, Volume Two: Since 1500** [Westview Press](#) **Places of Encounter** provides a place-based approach to world history, focusing on specific locations at critical moments when human history was transformed as a result of encounters—physical, political, cultural, intellectual, and religious. Original, contributed essays by leading academics in the field explore places from Hadar to Xi'an, Salvador to New York, and numerous other locations that have produced historical shockwaves and significant global impact throughout history. With a chronologically organized table of contents, each chapter dissects a particular moment in history, with personal commentary from each contributor, a narrative of the location's historical significance at the time, and a section on significant global connections. Primary sources and discussion questions at the end of each chapter allow students a view into the lives of individuals of the time. Students will experience the narrative of historic individuals as well as modern scholars looking back over documentation to offer their own views of the past, providing students with the perfect opportunity to see how scholars form their own views about history. This text can be purchased as two volumes, providing a breadth of information for survey courses in world history.

Over the next eighteen months, Britain was sucked into a costly campaign on the far side of the world. The Spaniards were humbled on the battlefield and Montevideo was taken by storm, but the campaign ended in disaster when 6000 redcoats and riflemen surrendered following a bloody battle in the streets of the Argentine capital. So ended one of the most humiliating and neglected episodes of the entire

**Napoleonic Wars. In The British Invasion of the River Plate Ben Hughes tells the story of this forgotten campaign in graphic detail. His account is based on research carried out across two continents. It draws on contemporary newspaper reports, official documents and the memoirs, letters and journals of the men who were there. He describes the initially successful British invasion, which was stopped when their troops were surrounded in Buenos Aires main square and forced to surrender, and the second British attack which was eventually defeated too. His narrative covers the course of the entire campaign and its aftermath. While focusing on the military and political aspects of the campaign, his book gives an insight into the actions of the main protagonists William Carr Beresford, Sir Home Popham, Santiago de Liniers and Black Bob Craufurd and into the experiences of the forgotten rank and file. He also considers the long-term impact of the campaign on the fortunes of the opposing sides. Many of the British survivors went on to win glory in the Peninsular War. For the Uruguayans and Argentines, their victory gave them a sense of national pride that would eventually encourage them to wrest their independence from Spain.**

**Contributors Behavioral Science & Policy [Brookings Institution Press](#)**

**The success of nearly all public- and private- sector policies hinges on the behavior of individuals, groups, and organizations. Today, such behaviors are better understood than ever, thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this new journal will become a meeting ground: a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By**

design, the scope of BSP is broad, with topics spanning health care, financial decisionmaking, energy and the environment, education and culture, justice and ethics, and work place practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The journal is a key offering of the Behavioral Science & Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective. The first issue's contents follow.

**Heidegger's Entscheidung "Decision" Between "Fate" and "Destiny"** [Taylor & Francis](#) This book critically examines the debate on Martin Heidegger's concept of Entscheidung ("decision") and his engagement and confrontation with Nazism in terms of his broader philosophical thought. It argues that one cannot explain Heidegger's actions without accounting for his idea of "decision" and its connection to his understanding of individual "fate" and national (and European) "destiny." The book looks at the relation of biography to philosophy and the ethical and political implications of appropriating Heidegger's thinking in these domains of inquiry. It highlights themes such as Heidegger's differences with the neo-Kantians in Germany; Heidegger on Kant and practical reason; and his reading of Nietzsche and Hegel. It offers a philosophical assessment grounded in Heidegger's own texts, with reference to historical and other philosophical commentaries on the rise of National Socialism in post-Weimar Germany and the philosophical issues associated with the interpretation of Nazi genocide and ideology. An

important intervention in Western philosophy, this book will be of great interest to scholars and researchers of political philosophy, continental philosophy, German philosophy, philosophy in general, and political studies. **Proceedings of the 5th Brazilian Technology Symposium Emerging Trends, Issues, and Challenges in the Brazilian Technology, Volume 2** [Springer Nature](#) This book presents the proceedings of the 5th Edition of the **Brazilian Technology Symposium (BTSym)**. Given the diversity of human societies, gathering and organizing the sheer mass of information in a meaningful way is a daunting challenge for any world history survey course. The seven-part chronological organization enables students to understand the development of the world through time, while also exploring broader, big-picture thematic issues in world history. Through new and revised chapter-level and part-level features, the hallmark twin themes of traditions and encounters emerge in greater clarity than ever before in this sixth edition. As a result, students have resources that enable them to move beyond the facts of history and examine the past critically, analyze causes and effects, and recognize similarities and differences across world regions and time periods. By digging deeper into the implications of world history's stories—not just the who, the what, and the where, but also the why and the how—students can make sense of the human past. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more

However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. **Strengthening Forensic Science in the United States: A Path Forward** provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. **Strengthening Forensic Science in the United States** gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. **Diagnostic and Statistical Manual of Mental Disorders DSM-5-TR** "DSM-5-TR includes fully revised text and references, updated diagnostic criteria and ICD-10-CM codes since DSM-5 was published in 2013. It features a new disorder, prolonged grief disorder, as well as codes for suicidal behavior available to all clinicians of any discipline without the requirement of any other diagnosis. With contributions from over 200 subject matter experts, this updated volume boasts the most current text updates based on the scientific literature. Now in four-color and with the ability to authenticate each printed copy, DSM-5-TR provides a cohesive, updated presentation of criteria, diagnostic codes, and text. This latest volume offers a common language for clinicians involved in the diagnosis and study of mental disorders and facilitates an objective assessment of symptom presentations across a variety of clinical settings-inpatient, outpatient, partial hospital, consultation-liaison, clinical, private practice, and primary care. Important updates in DSM-5-TR include 1) fully revised text for each disorder with updated sections on associated features, prevalence, development and course, risk and prognostic factors, culture, diagnostic markers, suicide, differential diagnosis, and more; 2) addition of prolonged grief disorder (PGD) to Section II; 3) over 70 modified criteria sets with helpful clarifications since publication of DSM-5; 4) fully updated Introduction and Use of the Manual to guide usage and provide context for important terminology; 5) considerations of the impact of racism and discrimination on mental disorders integrated into the text; 6) new codes to flag and monitor

suicidal behavior, available to all clinicians of any discipline and without the requirement of any other diagnosis; 7) fully updated ICD-10-CM codes implemented since 2013, including over 50 coding updates new to DSM-5-TR for substance intoxication and withdrawal and other disorders"-- Global Trends 2030 Alternative Worlds [Createspace Independent Publishing Platform](#)

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001.

Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations.

**Salafi-Jihadism and Digital Media The Nordic and International Context**  
Routledge This book explores the online strategies and presence of Salafi-Jihadi actors in the Nordic as well as the international context. Global Salafi-jihadism has been at the epicentre of international focus during the past decade. This book explores how the Swedish and other Nordic Salafi-jihadist sympathisers have used social digital media to radicalise, recruit, and propagate followers in relation to foreign terrorist fighters (FTFs) and online communities. The chapters in this volume unpack different perspectives of Salafi-jihadi communications strategies, as well as how the international Salafi-jihadi community has constantly reconfigured and adapted to changing security conditions. The case studies of the Nordics constitute a microcosm of wider Salafi-jihadi narratives in relation to the rise and fall of the Islamic State's so-called 'digital caliphate'. This book will be of much interest to students of terrorism studies, counter-extremism and counter-terrorism, social media and security studies.

**Encounters Between Peoples Proceedings of a Public Seminar on Archaeological Discoveries on National Road Schemes, August 2011** This monograph contains the proceedings of the NRA National Archaeology Seminar held in the City Wall Space, Wood Quay Venue, Dublin Civic Offices, on 25 August 2011. Encounters between Peoples contains seven papers by a number of archaeologists and a historian who were invited to address the multifaceted nature of our archaeological heritage and the varied peoples that contributed to its creation. In these proceedings we encounter early prehistoric farming communities in County Wexford, Iron Age assembly and ritual in County Meath and the diverse peoples who inhabited a County Tipperary townland over six millennia. Encounters between Peoples also presents material evidence for interactions between communities of differing religion and ethnicity during the historic period.

**Building Peace in America** Rowman & Littlefield Publishers America may not be at war, but it is not at peace. Recent public and political rhetoric have revealed the escalation of a pervasive and dangerous "us versus them" ideology in the United States. This powerful book is motivated by the contributors' recognition of continuing structural violence and injustice, which are linked to long-standing systems of racism, social marginalization, xenophobia, poverty, and inequality in all forms. Calls to restore America's greatness are just the most recent iteration of dehumanizing language against minority communities. The violation of the civil and human rights of vulnerable groups presents a serious threat to American democracy. These deeply rooted and systemic inequities have no

easy solutions, and the destructive nature of today's conflicts in America threaten to impede efforts to build peace, promote justice, and inspire constructive social change. Acknowledging the complexity of building peace in the United States, this volume represents the first step in envisioning a more just, peaceful country—from the grassroots to the highest levels of leadership. The editors have brought together a diverse group of scholars, conflict resolution practitioners, civil society leaders, community peacebuilders, and faith leaders who are committed to pro-social change. Collectively, they examine how best to understand the current issues, deescalate destructive public rhetoric, undermine the “us versus them” polarity, and support those currently working for positive change. Together, the contributors share experiences and perspectives on the past, present, and future of peacebuilding; develop a vision for how we can collectively respond in our communities, campuses, and congregations; and catalyze action during this pivotal moment in America.

Topics presented and discussed at th **Colliding Worlds How Cosmic Encounters Shaped Planets and Life** [Oxford University Press](#) Simone Marchi presents the emerging story of how cosmic collisions shaped both the solar system and our own planet, from the creation of the Moon to influencing the evolution of life on Earth. The Earth emerged out of the upheaval and chaos of massive collisions in the infancy of the Solar System, more than four billion years ago. The largest of these events sent into orbit a spray of molten rocks out of which the Moon coalesced. As in ancient mythological tales, this giant catastrophe marks the birth of our planet as we know it. Space exploration has shown that signs of ancient collisions are widespread in the Solar System, from the barren and once-habitable Mars to the rugged asteroids. On Earth these signs are more subtle, but still cataclysmic, such as the massive asteroid strike which likely sparked the demise of the dinosaurs and many other forms of life some 66 million years ago. Signatures of even more dramatic catastrophes are concealed in ancient rocks. These events wreaked havoc on our planet's surface, influencing global climate and topography, while also enriching the Earth with gold and other rare elements. And recently, modern science is finding that they could even have contributed to developing the conditions conducive to life. In **Colliding Worlds**, Simone Marchi explores the key role that collisions in space have played in the formation and evolution of our solar system, the development of planets, and possibly even the origin of life on Earth. Analysing our latest understanding of the surfaces of Mars and Venus, gleaned from recent space missions, Marchi presents the dramatic story of cosmic collisions and their legacies. **A Just Peace Ethic**

**Primer Building Sustainable Peace and Breaking Cycles of Violence**  
Georgetown University Press **The just peace movement offers a critical shift in focus and imagination. Recognizing that all life is sacred and seeking peace through violence is unsustainable, the just peace approach turns our attention to rehumanization, participatory processes, nonviolent resistance, restorative justice, reconciliation, racial justice, and creative strategies of active nonviolence to build sustainable peace, transform conflict, and end cycles of violence. A Just Peace Ethic Primer illuminates a moral framework behind this praxis and proves its versatility in global contexts. With essays by a diverse group of scholars, A Just Peace Ethic Primer outlines the ethical, theological, and activist underpinnings of a just peace ethic. These essays also demonstrate and revise the norms of a just peace ethic through conflict cases involving US immigration, racial and environmental justice, and the death penalty, as well as gang violence in El Salvador, civil war in South Sudan, ISIS in Iraq, gender-based violence in the Democratic Republic of Congo, women-led activism in the Philippines, and ethnic violence in Kenya. A Just Peace Ethic Primer exemplifies the ecumenical, interfaith, and multicultural aspects of a nonviolent approach to preventing and transforming violent conflict. Scholars, advocates, and activists working in politics, history, international law, philosophy, theology, and conflict resolution will find this resource vital for providing a fruitful framework and implementing a creative vision of sustainable peace.**

American Medical Association Press **Thomas Cole's Journey Atlantic Crossings**  
Metropolitan Museum of Art **Thomas Cole (1801-1848) is celebrated as the greatest American landscape artist of his generation. Though previous scholarship has emphasized the American aspects of his formation and identity, never before has the British-born artist been presented as an international figure, in direct dialogue with the major landscape painters of the age. Thomas Cole's Journey emphasizes the artist's travels in England and Italy from 1829 to 1832 and his crucial interactions with such painters as Turner and Constable. For the first time, it explores the artist's most renowned paintings, The Oxbow (1836) and The Course of Empire cycle (1834-36), as the culmination of his European experiences and of his abiding passion for the American wilderness. The four essays in this lavishly illustrated catalogue examine how Cole's first-hand knowledge of the British industrial revolution and his study of the Roman Empire positioned him to create works that offer a distinctive, even dissident, response to the economic and political rise of the United States, the ecological and economic changes then underway, and the dangers that faced the young nation. A detailed chronology of Cole's life, focusing on his European tour, retraces the artist's travels as documented in his journals, letters, and sketchbooks, providing new insight into his encounters and observations. With discussions of over seventy works by Cole, as well as by the artists he admired and influenced, this book allows us to view his work in relation to his European antecedents and competitors, demonstrating**

In the Interests of Safety The absurd rules that blight our lives and how we can change them [Sphere](#) Does an airline pilot really need to surrender his tweezers at airport security when he's about to board an aircraft equipped with an axe on the back of the cockpit door Can a mobile phone really cause a major explosion at a gas station And is there really a good reason why you should be prevented from swimming in a lake more than a foot deep These rules exist, and they exist in the name of our own protection. But in this engrossing dissection of global health, safety and security regulations, authors Tracey Brown and Michael Hanlon dig a little deeper to discover the real reasons behind many of the instructions we obey without questioning their creators' motives. Their conclusions range from the startling to the staggering, and in presenting them the authors seek to empower readers to question the people and organisations who come up with them in the first place. **person-centred policies. The United Nations Convention on the Rights of Persons with Disabilities (UNCRPD) clearly stipulates that the most effective way of delivering on the promise of an inclusive society is through a Universal Design approach. Sitting at the intersection of the fields of Higher Education and Universal Design, this book presents papers delivered at the Universal Design and Higher Education in Transformation Congress (UDHEIT2018), held in Dublin, Ireland, from 30 October to 2 November 2018. This event brings together key experts from industry, education, and government and non-government organization sectors to share experiences and knowledge with all participants. The 86 papers included here are grouped under 17 headings, or themes, ranging from education and digital learning through healthcare to engagement with industry and urban design. Celebrating and integrating all that is good in design, diversity and education, this book will be a valuable resource for all those interested in the inspiring and empowering developments in both Universal Design and higher education.**
