Qualitative-quantitative Research Methodology

Exploring the Interactive Continuum

SIU Press Through graphic and narrative descriptions, Newman and Benz show research to be a holistic endeavor in the world of inquiry. To clarify their argument, they provide a diagram of the "qualitative-quantitative interactive continuum" showing that qualitative analysis with its feedback loops can easily modify the types of research questions asked in quantitative analysis research and that the quantitative analysis results and its feedback can change what will be asked qualitatively.

Research Methods for Social Justice and Equity in Education

Bloomsbury Publishing *Research Methods for Social Justice and Equity in Education* offers researchers a full understanding of very important concepts, showing how they can be used as a means to develop practical strategies for undertaking research that makes a difference to the lives of marginalised and disadvantaged learners. It explores different conceptualisations of social justice and equity, and leads the reader through a discussion of what their implications are for undertaking educational research that is both moral and ethical and how it can be enacted in the context of their chosen research method and a variety of others, both well-known and more innovative. The authors draw on real, practical examples from a range of educational contexts, including early childhood, special and inclusive education and adult education, and cultures located in both western and developing nations in order to exemplify how researchers can use methods which contribute to the creation of more equitable education systems. In this way, the authors provide a global perspective of the contrasting and creative ways in which researchers reflect on and integrate principles of social justice in their methods and their methodological decision making. It encourages the reader to think critically about their own research by asking key questions, such as: what contribution can research for equity and social justice make to new and emerging methods and methodologies? And how can researchers implement socially just research methods from a position of power? This book concludes by proposing a range of methods and

methodologies which researchers can use to challenge inequality and work towards social justice, offering a springboard from which they can further their own studies.

Qualitative Research Methods for Second Language Education

Constructing Methodology for Qualitative Research Researching Education and Social Practices

Palgrave Macmillan This book explores the webs of vulnerability in methodological decision-making that illustrate the deceptive strength of qualitative research. Each chapter will resonate with readers differently as they read themselves into the tensions and tangles of qualitative research when confronted with the challenges of establishing methodological frameworks for educational and social enquiry. The authors are postgraduate, early career researchers and supervisors who analyse their methodological encounters with the nimble, fluid, messy and iterative processes of qualitative research. The book flows structurally from positioning the researcher within these processes to the manoeuvring of self across necessarily selective social science disciplines in education, arts and humanities. It rejuvenates the pioneering spirit, the sense of mission and innovativeness of qualitative research.
