UNDERSTANDING THE GLOBAL SPA INDUSTRY

Routledge The spa industry is currently the fastest growing segment of the hospitality and leisure industry with revenues exceeding those from amusement parks, box office receipts, vacation ownership gross sales and ski resort ticket sales. Understanding the Global Spa Industry is the first book to examine management practices in this industry and offers a groundbreaking and comprehensive approach to global spa management, covering everything from the beginnings of the industry through to contemporary management and social and ethical issues. With contributions from internationally renowned business leaders, practitioners and academics, this unique book is packed with case studies, examples and advice for all those working in, and studying, the international spa industry. Understanding the Global Spa Industry brings an analytic lens to the spa movement, examining past, current and future trends and the potential for shaping wellness and health services in the 21st century.

THE INFLUENCE OF GLOBAL ENVIRONMENTAL CHANGE ON INFECTIOUS DISEASE DYNAMICS

WORKSHOP SUMMARY

National Academies Press The twentieth century witnessed an era of unprecedented, large-scale, anthropogenic changes to the natural environment. Understanding how environmental factors directly and indirectly affect the emergence and spread of infectious disease has assumed global importance for life on this planet. While the causal links between environmental change and disease emergence are complex, progress in understanding these links, as well as how their impacts may vary across space and time, will require transdisciplinary, transnational, collaborative research. This research may draw upon the expertise, tools, and approaches from a variety of disciplines. Such research may inform improvements in global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health. The Influence of Global Environmental Change on Infectious Disease Dynamics is the summary of a workshop hosted by the Institute of Medicine Forum on Microbial Threats in September 2013 to explore the scientific and policy implications of the impacts of global environmental change on infectious disease emergence, establishment, and spread. This report examines the observed and potential influence of environmental factors, acting both individually and in synergy, on infectious disease dynamics. The report considers a range of approaches to improve global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health in the face of ongoing global environmental change.

BEAUTY THERAPY FACT FILE

Heinemann Educational Publishers This new edition has been fully updated to cover new trends and includes the underpinning knowledge for the skills you will need in your practice as a beauty therapist.

THE TWEAKMENTS GUIDE

FRESHER FACE

The first comprehensive guide to the fast-growing field of non-surgical cosmetic treatments. Alice Hart-Davis is a multiple award-winning journalist, widely considered by doctors to be the UK's leading non-medical expert in this field. She has tried these tweakments herself and provides clear unbiased information on how tweakments work.

GUY'S HOSPITAL DENTAL SCHOOL

FACIALS AND SKIN CARE IN ESSENCE

Hodder Education Go beyond the basics with this comprehensive and motivational introductory guide to facials and skincare. This resource provides detailed information on the structure of the skin, common skin diseases and disorders, skin types and conditions and how to analyse skin accurately. It also includes treatment planning advice for specific skin types, facial product knowledge, a step-by-step routine of a deep-cleansing facial and information on the different types of facial treatments available. It is the perfect companion for students on short courses, NVQ Level 2 and 3 Beauty Therapy students, practising therapists continuing their professional development and anyone interested in beauty therapy or cosmetology. - Includes an introduction to other specialised

facial treatments and the latest non-surgical methods of advanced skin care and rejuvenation commercially in demand, such as Botox® and dermal fillers - Features numerous case studies which provide context and FAQs at the end of each chapter to consolidate understanding - Assumes no prior knowledge of contraindications and physiological complaints

ADVANCED SKIN ANALYSIS

"With a complete update of the anatomy and physiology of the skin, Advanced Skin Analysis shares the relevant discoveries about the skin over the past decade and presents them in an easy to understand, informative manner that links structure and function to various skin conditions." - Back cover.

ENCYCLOPEDIA OF HAIR REMOVAL

A COMPLETE REFERENCE TO METHODS, TECHNIQUES AND CAREER OPPORTUNITIES

HOW WE REASON

Oxford University Press Good reasoning can lead to success; bad reasoning can lead to catastrophe. Yet, it's not obvious how we reason, and why we make mistakes - so much of our mental life goes on outside our awareness. In recent years huge strides have been made into developing a scientific understanding of reasoning. This new book by one of the pioneers of the field, Philip Johnson-Laird, looks at the mental processes that underlie our reasoning. It provides the most accessible account yet of the science of reasoning. We can all reason from our childhood onwards - but how? 'How we reason' outlines a bold approach to understanding reasoning. According to this approach, we don't rely on the laws of logic or probability - we reason by thinking about what's possible, we reason by seeing what is common to the possibilities. As the book shows, this approach can answer many of the questions about how we reason, and what causes mistakes in our reasoning that can lead to disasters such as Chernobyl. It shows why our irrational fears may become psychological illnesses, why terrorists develop 'crazy' ideologies, and how we can act in order to improve our reasoning. The book ends by looking at the role of reasoning in three extraordinary case histories: the Wright brothers' use of analogies in inventing their flyer, the cryptanalysts' deductions in breaking the German's Enigma code in World War II, and Dr. John Snow's inductive reasoning in discovering how cholera spread from one person to another. Accessible, stimulating, and controversial, How we Reason presents a bold new approach to understanding one of the most intriguing facets of being human.

AFRAID OF ALL THE THINGS

TORNADOES, CANCER, ADOPTION, AND OTHER STUFF YOU NEED THE GOSPEL FOR

B&H Publishing Group What does the gospel say about your fears? What does it say about the irrational ones, like sinkholes in the Target parking lot? How does it speak to the rational ones, like pet scan predictions? And does the gospel have a word for the fears you feel you'll have for life, like the possibility of losing the one you love most? Growing up in the green room of SNL, being born to a fire-eater and adopted by a SWAT cop, having internal organs explode, and adopting a deaf girl from China, Scarlet Hiltibidal has been given some strange life experiences—and lived in fear through most of them. But life changed for Scarlet when she learned to hold the gospel up to her fears. She realized that though she can't fix herself or protect herself, Jesus walked into this broken, sad, scary place to rescue, love, and cast out her—and your—fear. Seeing life in light of the cross will help you avoid fear, overcome fear when you can't avoid it, and live beyond fear when you don't overcome it. You don't have to be afraid of all the things.

ANATOMY AND PHYSIOLOGY FOR HOLISTIC THERAPISTS

Nelson Thornes The best selling book for holistic therapists by Francesca Gould has now been updated and revised with a new full color design. It makes learning fun through enjoyable activities such as crossword puzzles. It is a basic level text describing anatomy and physiology in the simplest terms for those wanting to learn the basics in a holistics or beauty therapy context.
