E-COMMERCE

THE CUTTING EDGE OF BUSINESS

As E-Commerce refers to the paperless exchange of business information using Electronic Data Interchange (EDI), electronic funds transfer and other network-based technologies, companies have to look at integrating their backend and front office processes and activities. This book presents the technology and non-technology aspects of e-commerce and takes it to a level that gives a clear understanding of the basic building blocks for its implementation. The book begins with the basics in the first and second part, and describes the Internet and Intranets. The third part describes EDI, the UN/EDIFACT Standards, Extranets and tracking tools. Part four comprises security - a critical component of e-commerce. Different cryptographic systems and Public Key Certification method based on X.509 standards have been covered. Part five delves into reengineering and management of change and legal issues.

PRIME TIME SOAP OPERAS ON INDIAN TELEVISION

Taylor & Francis This book examines the phenomenon of prime time soap operas on Indian television. An anthropological insight into social issues and practices of contemporary India through the television, this volume analyzes the production of soaps within India's cultural fabric. It deconstructs themes and issues surrounding the "everyday" and the "middle class" through the fiction of the "popular". In its second edition, this still remains the only book to examine prime time soap operas on Indian television. Without in any way changing the central arguments of the first edition, it adds an essential introductory chapter tracking the tectonic shifts in the Indian "mediascape" over the past decade - including how the explosion of regional language channels and an era of multiple screens have changed soap viewing forever. Meticulously researched and persuasively argued, the book traces how prime time soaps in India still grab the maximum eyeballs and remain the biggest earners for TV channels. The book will be of interest to students of anthropology and sociology, media and cultural studies, visual culture studies, gender and family studies, and also Asian studies in general. It is also an important resource for media producers, both in content production and television channels, as well as for the general reader.

LAW & PRACTICE

DOING BUSINESS 2009

World Bank Publications The Doing Business series provides research, data, and analysis on regulation in 181 economies across 10 areas of the business life cycle. Doing Business 2009 identifies top reformers in business regulation and highlights best practices and global reform trends. This year's report builds upon the five previous editions, adding new economies and updating all indicators. This year's report covers 3 additional economies, bringing the total number of economies covered to 181. Now included are the Bahamas, Bahrain, and Qatar. The report also adds a preface on Doing Business methodology, as well as in-depth analysis throughout the report on the main trends and findings of the past six years of Doing Business. Doing Business is an invaluable resource for entrepreneurs, investors, advisors, academics, professionals, and policymakers. The indicators benchmark regulation across 10 areas of a typical business lifecycle, and are used to analyze economic and social outcomes that matter such as equal opportunity, unemployment, poverty, and growth. This annually-published report gives policymakers the ability to measure regulatory performance in comparison to other economies, and learn from best practices.

THE WHITE TIGER

A NOVEL

Simon and Schuster SOON TO BE A MAJOR MOTION PICTURE The stunning Booker Prize-winning novel from the author of *Amnesty* and *Selection Day* that critics have likened to Richard Wright's *Native Son*, *The White Tiger* follows a darkly comic Bangalore driver through the poverty and corruption of modern India's caste society. "This is the authentic voice of the Third World, like you've never heard it before" (John Burdett, *Bangkok 8*). The white tiger of this novel is Balram Halwai, a poor Indian villager whose great ambition leads him to the zenith of Indian business culture, the world of the Bangalore entrepreneur. On the occasion of the president of China's impending trip to Bangalore, Balram writes a letter to him describing his transformation and his experience as driver and servant to a wealthy Indian family, which he thinks exemplifies the contradictions and complications of Indian society. Recalling *The Death of Vishnu* and *Bangkok 8* in ambition, scope, *The White Tiger* is narrative genius with a mischief and personality all its own. Amoral, irreverent, deeply endearing, and utterly contemporary, this novel is an international publishing sensation—and a startling, provocative debut.

DOING BUSINESS IN 2005

REMOVING OBSTACLES TO GROWTH

World Bank Publications *Doing Business in 2005: Obstacles to Growth* is the second in a series of annual reports investigating the scope and manner of regulations that enhance business activity and those that constrain it. New quantitative indicators on business regulations and their enforcement can be compared across more than 130 countries, and over time. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why. Topics in *Doing Business in 2005* include: Licensing and Inspections: Having registered a business, now what? In most countries, firms face a myriad of sector specific licenses as well as inspections to enforce compliance. The *Doing Business* database constructs two sets of indicators on the regulation of operations. One measures the steps, time and costs of complying with licensing and permit requirements for ongoing. The other assesses the enforcement of regulations through two of the most common types of inspections-labor and tax. Registering Property: Property registries were first developed to help raise tax revenue. What was good for the tax authorities has since proven to be good for strengthening property rights-the registries strengthen incentives to invest, facilitate trade, and expand access to credit. New indicators cover the steps, time and cost to register property. Measures of the legal provisions that strengthen property rights and the efficiency of property registries are also developed. Protecting Investors: Corporate governance issues are often thought to affect only publicly listed companies in developed countries. In fact, corporate governance is relevant for every large privately held company that has more than one owner. New indicators examine several possible types of shareholder expropriation, including related-party transactions, guarantees and loans to company managers and directors, mergers and acquisitions, disclosure of ownership information, and treatment of conflicts of interest. Including a new emphasis on gender, *Doing Business* not only provides insights into business constraints throughout the world but highlights particular barriers faced by women. *Doing Business* is a comprehensive resource that no investor, economic adviser, business developer, or economic policymaker should be without.

BOMBAY 3

Bloomsbury Publishing Mumbai is an ever-evolving city, bustling and brimming, never sleeping for a wink. But the past four decades brought upheavals of great magnitude that shaped the city as we know today. Marred by communal riots, gang wars and terrorism, the spirit of Mumbai has emerged indomitable every single time. Born and raised in the lanes of Bombay 3, this is the story of Jagan Kumar who dreams of being a television journalist and changing the world. But once he achieves this, he realises that television journalism has lost its path, now afflicted with sensationalism, corruption and bias. As a crime reporter, he comes across various unscrupulous means that law enforcement agencies adopt to combat organised crime syndicates. He is shocked to witness interdepartmental rivalry that often jeopardises public security. Disenchanted, in conflict with his conscience and confused about his calling, he is about to quit when something happens that changes the course of his life. *Bombay 3* begins from the bylanes of old Bombay of the seventies and then takes you to Mosul in ISIS's Iraq of 2014 and finally to the streets of Bangkok where the underworld of Mumbai has spread its tentacles. A fast-paced thriller, it answers certain questions about life in Mumbai and raises a few new ones.

THE JUNGLES COLLECTION 3

INTRODUCING CHILDREN TO RECYCLING AND CONSERVATION

What happens when the world runs out of bananas? Or any other valuable resource which we depend on such as oil? Have you ever wondered about the danger that garbage which is incorrectly disposed of poses to animals? Or even to humans? The two stories in "The Junglies Collection 3" are intended to create awareness about these questions and their answers through the usual delightful stories woven by Francois and beautifully illustrated by Agassi Tjong. In "Te Junglies and the Last Banana", earth has run out of bananas. Kiki and Abbit go to the moon to fetch the last living banana tree so the world can grow new crops of bananas. On the moon, they meet aliens who are looking for Earth. Their planet has run out of resources and now they want Earth's resources! Can Abbit and Kiki save Earth by misleading the aliens? This story is intended to make us ask what we would do if Earth ran out of resources and serves to help teach young children about the importance of green living. In "Kiki in the Bottle", Kiki gets his head stuck in a bottle. He can't get his head out of the bottle and seeks help but everyone runs away as they don't recognize him and think he is a monster. Will Kiki be saved or will his head be stuck in a bottle forever? This story highlights the importance of disposing of garbage in the proper manner as well as creating awareness about recycling. We should be teaching our children to be responsible with regard to respecting and conserving nature and resources while setting an example for our children at the same time. The "Junglies" stories are about the adventures of five jungle animals and their game warden friend. The stories are good to introduce children to the subject of "Unity in Diversity" as the animals are best friends despite being different. The "Junglies" can also be used to introduce children to the subject of "endangered species" as the animals represented by the characters all have at least one sub-species that is endangered including rabbits!

ANYWHERE VIII

Artists and curators have long reached beyond the constraints of established institutional structures and traditional exhibition spaces. These tendencies were first clearly articulated (with some notable historical avant-garde precedents) in the language that framed conceptual and systems-based art in the 1960s and 1970s. The focus then, as it is today, was upon locating or creating alternative circuits. Today, notwithstanding our significantly technologically augmented capacity to reach and create new audiences, much contemporary artistic activity still invariably plays directly to an audience of connected peers. Moreover, given that much of this activity is now documented and disseminated as it happens through its surrounding peer network, the robustness of documentation and critical discussion can become easily distorted. Consequently, an inherent correlation to social acceptance and favorability can limit our capacity to meaningfully evaluate quality, and often excludes contributions outside a core group. Also, given that much art now shares media with other databases and websites, algorithmically driven perceptions of popularity can further influence ways in which art is evaluated, interpreted and valued. This situation invariably presents challenges to artists and curators seeking to establish new audiences or disseminate ideas. Today, new artistic and curatorial approaches are emerging in tandem with digitally-activated modes of presentation and dissemination distinguished by perpetual reproducibility, multiple intersecting temporalities and materializations, and the subsidence of physical space. Significantly, many of these approaches are no longer necessarily connected to singular events or spaces and are perhaps better understood as omnidirectional movements between modes of conception, production and dissemination connected through the screen as a communal space. This communal space might offer either access to new works, illuminate the existence of works understood to be elsewhere in time and space, or offer multiple or alternative materializations, versions, attributions, interpretations and representations of existing works. Artistic research can be represented in multiple ways as it moves between modes of conception, production and dissemination. This volume explores a broad range of questions associated with presenting, experiencing, discussing and evaluating art located anywhere and elsewhere in space and time. We are delighted to welcome you to the many worlds contained within.
