What Changed When Everything Changed

9/11 and the Making of National Identity

Yale University Press DIV Beautifully written and carefully reasoned, this bold and provocative work upends the conventional wisdom about the American reaction to crisis. Margulies demonstrates that for key elements of the post-9/11 landscape—especially support for counterterror policies like torture and hostility to Islam—American identity is not only darker than it was before September 11, 2001, but substantially more repressive than it was immediately after the attacks. These repressive attitudes, Margulies shows us, have taken hold even as the terrorist threat has diminished significantly. Contrary to what is widely imagined, at the moment of greatest perceived threat, when the fear of another attack “hung over the country like a shroud,” favorable attitudes toward Muslims and Islam were at record highs, and the suggestion that America should torture was denounced in the public square. Only much later did it become socially acceptable to favor “enhanced interrogation” and exhibit clear anti-Muslim prejudice. Margulies accounts for this unexpected turn and explains what it means to the nation’s identity as it moves beyond 9/11. We express our values in the same language, but that language can hide profound differences and radical changes in what we actually believe. “National identity,” he writes, “is not fixed, it is made.” /div

Take Control of Your Paperless Office, 3rd Edition

alt concepts Digitize your documents while reducing incoming and outgoing paper! Updated 03/21/2017 Join Joe Kissell as he helps you clear the chaos of an office overflowing with paper. With Joe’s guidance you can develop a personal clean-up strategy and choose your Mac-compatible tools—a scanner and the software you need to perform OCR (optical character recognition)—plus devices and services for storing your digitized documents and tools to categorize, locate, and view your digital document collections. Once you have your gear in hand, Joe shows you how to convert your paper documents to digitized files and gives you ideas for how to organize your office workflow, explaining how to develop day-to-day techniques that reduce the amount of time you spend pressing buttons, launching software, and managing documents. Bonus! The book also comes with downloadable “folder action” AppleScripts that simplify the process of OCR-ing PDFs in Adobe Acrobat, ABBYY FineReader Express, PDFpen/PDFpenPro, and Readiris. Save or move a PDF in the appropriate folder, and the script does the rest! You’ll master these paper-reducing skills: • Scanning or photographing documents you find while out and about—business cards, receipts, menus, flyers, and more—so you keep only digitized versions. Joe discusses a variety of mobile scanning options, with an emphasis on using a camera-equipped iOS device, but with mention of a few options for Android smartphones. • Creating a digitized image of your signature so you can sign and share documents digitally, rather than printing them for the sole purpose of signing them with a pen. • Setting up your computer to send and receive faxes so you can avoid using a physical fax machine with paper input and output. Joe describes online fax services and using a fax modem (note that fax modem support is not available in macOS 10.12 Sierra). Joe also discusses standard techniques for reducing paper—paperless billing, online bank statements, reducing unwanted catalogs and junk mail, and more, as well as less common practices, such as paperless postal mail services and check depositing services. You’ll find answers to numerous questions, including: • What is a searchable PDF, and why is it key to a paperless office? • What differentiates document scanners from other types of scanners? • What’s a book scanner? • What if I need a mobile, portable scanner? • What does TWAIN stand for, and should my scanner support it? • Why do I need OCR software, and what features should I look for? • What scanners and OCR products does Joe recommend? • How can I automate my workflow for scanning documents? • How should I name and file my digitized documents? • What paper documents should I keep in physical form? • How do I use common tools to add a signature to a PDF? • How can I access my digital documents remotely? • How should I back up my important digital documents?

Practicing Core Reflection

Activities and Lessons for Teaching and Learning from Within

Routledge Practicing Core Reflection features 78 concrete educational activities and exercises based on research. These can be used individually and in groups to support 'teaching and learning from within.' Core Reflection is an approach focused on people's personal strengths and on using practical strategies to overcome obstacles to the enactment of these strengths. This approach has been used in many contexts all over the world and has shown great promise in helping to re-chart the course for education and to re-think its purpose in global and democratic societies. Additional tools (Cards, Figures, Tables, Forms in a printable PDF format) are provided on this website (under the eResources tab). Building on the theoretical foundations established in Korthagen, Kim, and Green’s Teaching and Learning from Within: A Core Reflection Approach to Quality and Inspiration in Education, this companion volume can be used together with it or on its own to engage educators in exploring what it means to bring out the best in oneself, in students, in colleagues, and others—a critically significant project if education is to realize new levels of possibility and potential.

Developing Thinking in Statistics

SAGE 'This book should prove to be an important addition to the relatively few publications that exist on statistical thinking. It very nicely encourages the reader to take an active learning approach through simultaneously promoting pedagogy with knowledge and skills enhancement in statistics. Understanding what the subject is for and what it can do are crucial in statistical education - by getting the reader to think statistically Mr Graham has provided us with a very readable book that helps to dispel the poor reputation that statistics has acquired over many years' - Professor Neville Davies, Director, Royal Statistical Society Centre for Statistical Education, Nottingham Trent University Statistics is a key area of the school mathematics curriculum where maths and the real world meet. Although potentially a subject where teaching can be motivating and relevant to everyday concerns, it is often seen as boring and involving largely mechanical calculations. This book will enable teachers and others interested in statistical thinking to become excited and inspired by the big ideas of statistics and, in turn, teach them enthusiastically learners. Designed to heighten awareness of statistical ideas, the book explores key themes within statistics using ideas developed by the influential team at The Open University's Centre for Mathematics Education. Themes include: · Measurement · Variation · Randomness · Uncertainty Arranged in an accessible task-based format, this is an essential text for all secondary maths teachers and students of maths education. It is a comprehensive book that will illuminate and inspire interest in the subject, based on innovative use of ICT, engaging narrative, firm research and good practice. Developing Thinking in Statistics is a set book on the Open University Course ME626 Developing Statistical Thinking, part of the Graduate Diploma in Mathematics Education.

The Scholar's Progress

Essays on Academic Life and Survival

iUniverse Combining practical advice on how to get published in journals with theoretical essays on the research economy, this book is meant for all those who wonder about their chance of surviving in academia. Written by a tenured enfant terrible who never did anything the way you're supposed to, the book makes a statement about being a scholar in contemporary academia, surviving in the social sciences, and the odd joy of getting paid for thinking and writing. Through a series of essays, the book argues for reflection in academic life, and scholarship as a lifestyle.

What if everything you knew about education was wrong?

Crown House Publishing If you feel a bit cross at the presumption of some oik daring to suggest everything you know about education might be wrong, please take it with a pinch of salt. What if everything you knew about education was wrong? is just a title. Of course, you probably think a great many things that aren't wrong. The aim of the book is to help you 'murder your darlings'. David Didau will question your most deeply held assumptions about teaching and learning, expose them to the fiery eye of reason and see if they can still walk in a straight line after the experience. It seems reasonable to suggest that only if a theory or approach can withstand the fiercest scrutiny should it be encouraged in classrooms. David makes no apologies for this; why wouldn't you be sceptical of what you're told and what you think you know? As educated professionals, we ought to strive to assemble a more accurate, informed or at least considered understanding of the world around us. Here, David shares with you some tools to help you question your assumptions and assist you in picking through what you believe. He will stew findings from the shiny white laboratories of cognitive psychology, stir in a generous dash of classroom research and serve up a side order of experience and observation. Whether you spit it out or lap it up matters not. If you come out the other end having vigorously and violently disagreed with him, you'll at least have had to think hard about what you believe. The book draws on research from the field of cognitive science to expertly analyse some of the unexamined meta-beliefs in education. In Part 1; 'Why we're wrong', David dismantles what we think we know; examining cognitive traps and biases, assumptions, gut feelings and the problem of evidence. Part 2 delves deeper - 'Through the threshold' - looking at progress, liminality and threshold concepts, the science of learning, and the difference between novices and experts. In Part 3, David asks us the question 'What could we do differently?' and offers some considered insights into spacing and interleaving, the testing effect, the generation effect, reducing feedback and why difficult is desirable. While Part 4 challenges us to consider 'What else might we be getting wrong?': cogitating formative assessment, lesson observation, grit and growth, differentiation, praise, motivation and creativity.

When All Hell Breaks Loose

Stuff You Need to Survive When Disaster Strikes

Gibbs Smith A survival expert's guide for every family to prepare and educate themselves about the skills and mentality necessary to survive a disaster anywhere. This is not your father's scout manual or a sterile FEMA handout. Entertaining and informative, *When All Hell Breaks Loose* describes how to maximize a survival mindset necessary for self-reliance. According to the book, living through an emergency scenario is 90 percent psychology, and 10 percent methodology and gear. Relevant quotes and tips are placed throughout the pages to help readers remember important survival strategies while under stress and anxiety. Lundin also addresses basic first aid and hygiene skills and makes recommendations for survival kit items for the home, office, and car. Watch naturalist Cody Lundin in *Dual Survival* on The Discovery Channel as he uses many of the same skills and techniques taught in his books. *When All Hell Breaks Loose* provides solutions on how to survive a catastrophe. Lundin addresses topics such as: · Potable drinking water · Storing super-nutritious foods · Heating or cooling without conventional power · How to create alternative lighting options · Building a makeshift toilet & composting the results · Catching rodents for food · Safely disposing of a corpse "The essential survival guide for the twenty-first century."—Jim Mulvaney, Pulitzer Prize-winning journalist

The Security Leader's Communication Playbook

Bridging the Gap between Security and the Business

CRC Press This book is for cybersecurity leaders across all industries and organizations. It is intended to bridge the gap between the data center and the board room. This book examines the multitude of communication challenges that CISOs are faced with every day and provides practical tools to identify your audience, tailor your message and master the art of communicating. Poor communication is one of the top reasons that CISOs fail in their roles. By taking the step to work on your communication and soft skills (the two go hand-in-hand), you will hopefully never join their ranks. This is not a "communication theory" book. It provides just enough practical skills and techniques for security leaders to get the job done. Learn fundamental communication skills and how to apply them to day-to-day challenges like communicating with your peers, your team, business leaders and the board of directors. Learn how to produce meaningful metrics and communicate before, during and after an incident. Regardless of your role in Tech, you will find something of value somewhere along the way in this book.

Independent Thinking on MFL

How to make modern foreign language teaching exciting, inclusive and relevant (Independent Thinking On... series)

Crown House Publishing Ltd Crista Hazell's Independent Thinking on MFL: How to make modern foreign language teaching exciting, inclusive and relevant takes teachers on a tour of how to get the teaching of a new language right. Foreword by Ian Gilbert. Learning a new language has the power to transform a life, as well as help break down the barriers that seem to be re-emerging between nations, cultures and people. In the UK, MFL teaching has always had to battle with the 'everyone speaks English' argument, not to mention that, for so many, all that remains of their years learning a foreign language is *bitte*, *por favor* or *s'il vous plait*. But with teachers like Independent Thinking Associate Crista Hazell at the front of the class, things can be very different. Drawing on her many years of experience as an MFL teacher and head of department, Crista shares tips, techniques and inspirational ideas geared to help teachers build confidence, increase enjoyment and improve outcomes as they take their MFL teaching to a whole new level. Crista provides a range of strategies from how to hook students in the minute they enter the classroom to ensuring that the vocabulary sticks designed to help learners develop confidence, take risks and enjoy the challenge that learning a new language brings. She also offers ideas and advice on how to make learning new vocabulary and grammar a great deal more effective and empowers teachers to open up the benefits and enjoyment of learning a language to all students, not just those in the top sets. Ultimately, however, her book sets out to help teachers create engaging, relevant and memorable learning experiences in the MFL classroom and encourage their learners to become lifelong and passionate linguists. For MFL teachers and heads of languages departments in primary schools, secondary schools and colleges.
