DESIGNING WITH CREO PARAMETRIC 2.0

SDC Publications **Designing with Creo Parametric 2.0** provides the high school student, college student, or practicing engineer with a basic introduction to engineering design while learning the 3D modeling Computer-Aided Design software called Creo Parametric from PTC. The topics are presented in tutorial format with exercises at the end of each chapter to reinforce the concepts covered. It is richly illustrated with computer screen shots throughout. Above all, this text is designed to help the reader expand their creative talents and communicate their ideas through the graphics language. Because it is easier to learn new information if you have a reason for learning it, this textbook discusses design intent while you are learning Creo Parametric. At the same time, it shows how knowledge covered in basic engineering courses such as statics, dynamics, strength of materials, and design of

mechanical components can be applied to design. You do not need an engineering degree nor be working toward a degree in engineering to use this textbook. Although FEA (Finite Element Analysis) is used in this textbook, its theory is not covered. The first two chapters of this book describe the design process. The meat of this text, learning the basic Creo Parametric software, is found in Chapters 3 through 6. Chapters 7, 8, and 12 deal with dimensioning and tolerancing an engineering part. Chapters 9 and 10 deal with assemblies and assembly drawings. Chapter 11 deals with family tables used when similar parts are to be designed or used. Chapter 13 is an introduction to Creo Simulate and FEA.

CREATING EFFECTIVE LEARNING ENVIRONMENTS

Thomas Nelson Publishers **Creating Effective Learning Environments** takes curriculum development to another level: it fills the gap between theory and practice. This text helps readers see the curriculum from a child's perspective and understand how that perspective is linked to learning and theory. It is the author's view that the centre of any curriculum is the child; this text begins not with general theories or applications that are suitable for many, but with each individual child. The theory and methodology of this text are integrated around the actual experiences of children, presented in a logical flow, and embracing current philosophies about integration, play, bias, and learning practices.

A PROFOUND MIND

CULTIVATING WISDOM IN EVERYDAY LIFE

Harmony For the first time for general readers, the Dalai Lama presents a comprehensive overview of the most important teaching of Buddhism. Perhaps the main difference between Buddhism and other religions is its understanding of our core identity. The existence of the soul or self, which is central in different ways to Hinduism, Judaism, Christianity, and Islam, is actually denied in Buddhism. Even further, belief in a “self” is seen as the main source of our difficulties in life. Yet a true understanding of this teaching does not lead one to a despairing, cynical worldview with a sense that life has no meaning—Far from it, a genuine understanding leads to authentic happiness for an individual and the greatest source of compassion for others. In 2003 and in 2007, the Dalai Lama was invited to New York to give a series of talks on the essential Buddhist view of selflessness. This new book, the result of those talks, is now offered to help broaden awareness of this essential doctrine and its usefulness in living a more meaningful and happy life. While the Dalai Lama offers a full presentation of his teachings on these key philosophical points for contemplation, he also shows readers how to bring these teachings actively into their own lives with recommendations for a personal practice. It is only by actually living these teachings that we allow them to bring about a genuine transformation in our perception of ourselves and our lives. A Profound Mind offers important wisdom for those committed to bringing about change in the world through developing their own spiritual capabilities, whether they are Buddhists or not.

MAGICAL CAPITALISM

ENCHANTMENT, SPELLS, AND OCCULT PRACTICES IN CONTEMPORARY ECONOMIES

Springer This volume of essays examines the ways in which magical practices are found in different aspects of contemporary capitalist societies. From contract law to science, by way of finance, business, marketing, advertising, cultural production, and the political economy in general, each chapter argues that the kind of magic studied by anthropologists in less developed societies - shamanism, sorcery, enchantment, the occult - is not only alive and well, but flourishing in the midst of so-called 'modernity'. Modern day magicians range from fashion designers and architects to Donald Trump and George Soros. Magical rites take place in the form of political summits, the transformation of products into brands through advertising campaigns, and the biannual fashion collections shown in New York, London, Milan and Paris. Magical language, in the form of magical spells, is used by everyone, from media to marketers and all others devoted to the art of 'spin'. While magic may appear to be opposed to systems of rational economic thought, Moeran and Malefyt highlight the ways it may in fact be an accomplice to it.

NEXT EXTINCT MAMMAL

Poetry. Latino/Latina Studies. LGBT Studies. "Like Whitman, Quesada is a poet of motion—journeying to the center of the US, where the traditions and innovations of first-generation Americans traverse the meditative starbursts of hills; ford rivers; cross prairies; and seek out 'the alpenglow of tomorrow and tomorrow.' From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one family's history: from the courtship of his parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.
