## KEY=REVITALIZING - IBARRA JAZLYN

---

**Resilient Downtowns A New Approach to Revitalizing Small- and Medium-City Downtowns Routledge** Resilient Downtowns provides a guide to communities in reviving and redeveloping their core districts into resilient, thriving neighborhoods. While the National Main Street program's four-point approach of organization, promotion, economic restructuring, and design has been standard practice for cities seeking to rejuvenate their downtowns for decades there is disquiet among downtown managers and civic leaders about the versatility of the program. Resilient Downtowns provides communities with the "en-RICHED" approach, a four-step process for downtown development, which focuses on residential development, immigration strategies, civic functionality, heritage tourism, and good design practice. Examples from fourteen small cities across the US show how this process can revitalize downtowns in any city. **Vulnerable Communities Research, Policy, and Practice in Small Cities Cornell University Press** Vulnerable Communities examines the struggles of smaller cities in the United States, those with populations between 20,000 and 200,000. Like many larger metropolitan centers, these places are confronting change within a globalized economic and cultural order. Many of them have lost their identities as industrial or commercial centers and face a complex and distinctive mix of economic, social, and civic challenges. Small cities have not only fewer resources but different strengths and weaknesses, all of which differentiate their experiences from those of larger communities. Vulnerable Communities draws together scholars from a broad range of disciplines to consider the present condition and future prospects of smaller American cities. Contributors offer a mix of ground-level analyses and examinations of broader developments that have impacted economically weakened communities and provide concrete ideas for local leaders engaged in redevelopment work. The essays remind policy makers and academics alike that it is necessary to consider cultural tensions and place-specific conflicts that can derail even the most well-crafted redevelopment strategies prescribed for these communities. **Revitalizing Rural Economies A Guide for Practitioners McGill-Queen's Press - MQUP** Rural communities in Canada are facing a new reality where traditional economic bases such as agriculture, forestry, and manufacturing have eroded. The digital divide, whereby rural Canada lags in access to broadband, has created further barriers to participating in the emerging knowledge economy. Revitalizing Rural Economies offers practical tools for developers, business people, and community leaders. The result of a partnership between the Monieson Centre at Queen's School of Business and entrepreneurs, policy makers, economic development officials, and elected representatives from rural communities across southern Ontario, Revitalizing Rural Economies draws on four years of community-based research to provide strategies for economic revitalization. Integrating case studies and community development guidelines, the authors explore themes such as the building blocks for community economic development (CED), innovation, community assets, vibrant downtowns, social capital accumulation through collaboration and inclusion, and new opportunities for rural economies through creative and value-added businesses. Designed as a practical guide, this book serves as a primer to CED, while also allowing those familiar with the field to delve deeper. Case studies ground the discussion in the challenges and opportunities facing communities. The book provides ideas and resources to foster the long-term resilience of rural regions. **Business Improvement Districts Research, Theories, and Controversies Routledge** Initiated and governed by property or business owners under the authorization of state and local governments, business improvement districts (BIDs) have received a very mixed reception. To some, they are innovative examples of self-governance and public-private partnerships; to others, they are yet another example of the movement toward the privatization of what should be inherent government responsibilities. Among the first books to present a collection of scholarly work on the subject, Business Improvement Districts: Research, Theories, and Controversies brings together renowned leaders in the field to compile the highest-quality theoretical, legal, and empirical studies into one comprehensive volume. Investigating fundamental concerns at the core of the debate, as well as potential solutions, this groundbreaking resource: Tackles the need for improved problem solving and efficiency in service delivery Examines new and innovative policy tools for both the public and private sectors Evaluates whether BIDs do ignore the needs and voices of residential property owners Discusses the challenge created by social segregation in cities Addresses lack of accountability by BIDs to the public and elected representatives From different perspectives, leading practitioners and academics analyze the pros and cons of BIDs both in the United States and around the world. They look at their impact on urban planning and retail revitalization, consider their legal implications, and explore ways to measure BID performance. Filled with case studies of urban centers including San Diego, Atlanta, New York, Toronto, and Capetown, and state models such as New Jersey and Pennsylvania, this examination bring together essential information for researchers as well as those leaders and policy makers looking to adopt a BID model or improve one already in place. **Public Interest, Private Property Law and Planning Policy in Canada UBC Press** When it comes to urban planning, to what extent and under what conditions should the community's interest prevail over the rights of private property owners? Public Interest, Private Property addresses this question at a time when pollution, urban sprawl, and condo booms are forcing municipal governments to adopt prescriptive laws and regulations. Case studies focus on spheres in which public values and private property rights collide -

expropriation law, natural resources regulation, green development, and water provision – laying the groundwork for more active debates on the issues currently shaping our cities. **Public Space as a Tool for Downtown Revitalization in Medium-sized Cities** **Roads to Prosperity Economic Development Lessons from Midsize Canadian Cities Wayne State University Press** *Roads to Prosperity: Economic Development Lessons from Midsize Canadian Cities* explores the relative prosperity of midsize Canadian urban areas (population 50,000 to 400,000) over the past two decades. Communities throughout North America have strived for decades to maintain and enhance the prosperity of their residents. In the areas that are the focus of this research, the results of these efforts have been mixed—some communities have been relatively successful while others have fallen further behind the national averages. Midsize cities often lack the resources, both internal and external, to sustain and enhance their prosperity. Policies and strategies that have been successful in larger urban areas may be less effective (or unaffordable) in smaller ones. *Roads to Prosperity* first examines the economic structure of forty-two Canadian urban regions that fall within the midsize range to determine the economic specializations that characterize these communities and to trace how these specializations have evolved over the time period between 1991 and 2011. While urban areas with an economic base of natural resource or manufacturing industries tend to retain this economic function over the years, communities that rely on the service industries have been much more likely to experience some degree of restructuring in their economies over the past twenty years. The overall trend among these communities has been for their employment profiles to become more similar and for their economic specialization to fade over time. The second part of the book looks at a number of currently popular economic development strategies as they have been applied to midsize urban areas and their success and failures. While there appears to be no single economic development strategy that will lead to greater prosperity for every community, Sands and Reese explore the various factors that help explain why some work and others don't. Those with an interest in urban planning and community development will find this monograph highly informative. **Downtowns Revitalizing the Centers of Small Urban Communities Routledge** This collection evaluates the various strategies that different cities have used when attempting to economically revitalize downtown areas. **Small Business and the City The Transformative Potential of Small Scale Entrepreneurship University of Toronto Press** In *Small Business and the City*, Rafael Gomez, Andre Isakov, and Matt Semansky highlight the power of small-scale entrepreneurship to transform local neighbourhoods and the cities they inhabit. Studying the factors which enable small businesses to survive and thrive, they highlight the success of a Canadian concept which has spread worldwide: the Business Improvement Area (BIA). BIAs allow small-scale entrepreneurs to pool their resources with like-minded businesses, becoming sources of urban rejuvenation, magnets for human talent, and incubators for local innovation in cities around the globe. *Small Business and the City* also analyses the policies necessary to support this urban vitality, describing how cities can encourage and support locally owned independent businesses. An inspiring account of the dynamism of urban life, *Small Business and the City* introduces a new "main street agenda" for the twenty-first century city. **Recast Your City How to Save Your Downtown with Small-Scale Manufacturing Island Press** In *Recast Your City: How to Save Your Downtown with Small-Scale Manufacturing*, community development expert Ilana Preuss explains how local leaders can revitalize their downtowns or neighborhood main streets by bringing in and supporting small-scale manufacturing. Small-scale manufacturing businesses help create thriving places, with local business ownership opportunities and well-paying jobs that other business types can't fulfill. Preuss draws from her experience working with local governments, large and small, from Knoxville, Tennessee, to Columbia, Missouri, to Fremont, California. She provides tools, such as her five-step method for recasting your city, that local leaders in government, business, and real estate as well as entrepreneurs and advocates in every community can use. **Regenerating America's Legacy Cities Lincoln Inst of Land Policy** This study offers a way to think about the regeneration of America's legacy cities -- older industrial cities that have experienced sustained job and population loss over the past few decades. It argues that regeneration is grounded in the cities' abilities to find new forms. These include not only new physical forms that reflect the changing economy and social fabric, but also new forms of export-oriented economic activity, new models of governance and leadership, and new ways to build stronger regional and metropolitan relationships. The report also identifies the powerful obstacles that stand in the way of fundamental change, and suggests directions by which cities can overcome those obstacles and embark on the path of regeneration. **The Living City How America's Cities Are Being Revitalized by Thinking Small in a Big Way John Wiley & Sons** *THE LIVING CITY* "An intelligent analysis. Sensible, undogmatic, even good-humored. An appealing mixture of passion and clinical dispassion." -Washington Post Book World "The best antidote I've read to the doom-and-gloom prophecies concerning the future of urban America." -Bill Moyers "This is fresh and fascinating material; it is essential for understanding not only how to avoid repeating terrible mistakes of the past, but also how to recover from them." -Jane Jacobs, author of *The Death and Life of Great American Cities* From coast to coast across America there are countless urban success stories about rejuvenated neighborhoods and resurgent business districts. Roberta Brandes Gratz defines the phenomenon as "urban husbandry"-the care, management, and preservation of the built environment nurtured by genuine participatory planning efforts of government, urban planners, and average citizens. **Geographies of Entrepreneurship Routledge** This book addresses a gap in the present literature on the role that geography plays in the distribution of entrepreneurial activity. Emerging work on entrepreneurial ecosystems suggests it is important entrepreneurship studies move beyond the mere identification of factors that impact entrepreneurial activity to consider the unique geographic contexts in which entrepreneurs operate. These contexts include a variety of interactive elements including regional characteristics, institutions, actors, and connectors. As such, this collection analyses entrepreneurial activity in regions around the globe. The contributions explore a series of diverse regions in terms of their geographic, historical, industrial, and institutional contexts. The book also explores a range of topics, such as patterns of regional/subnational variations in entrepreneurial activity, geographically mediated determinants of entrepreneurship, inter-temporal dynamics, evolution of regional systems of entrepreneurship, and the impact of entrepreneurship on regional development and regional entrepreneurship policy. This book enhances our policy and practical knowledge about the unique regional context in which entrepreneurs operate and demonstrates the important role that geography plays in the spatial distribution of entrepreneurial activity. **Learning from Bryant Park Revitalizing Cities, Towns, and Public Spaces Rutgers University Press** By the 1970s, 42nd Street in New York was widely perceived to be unsafe, a neighborhood thought to be populated largely by drug dealers, porn shops, and muggers. But in 1979, civic leaders developed a long-term vision for revitalizing one especially blighted block, Bryant Park. The reopening of the park in the 1990s helped inject new vitality into midtown Manhattan and served as a model for many other downtown revitalization projects. So what about urban policy can we learn from Bryant Park? In this new book, Andrew M. Manshel

draws from both urbanist theory and his first-hand experiences as a urban public space developer and manager who worked on Bryant Park and later applied its strategies to an equally successful redevelopment project in a very different New York neighborhood: Jamaica, Queens. He candidly describes what does (and doesn't) work when coordinating urban redevelopment projects, giving special attention to each of the many details that must be carefully observed and balanced, from encouraging economic development to fostering creative communities to delivering appropriate services to the homeless. Learning from Bryant Park is thus essential reading for anyone who cares about giving new energy to downtowns and public spaces. **Cities and the Politics of Difference**

**Multiculturalism and Diversity in Urban Planning University of Toronto Press** Demographic change and a growing sensitivity to the diversity of urban communities have increasingly led planners to recognize the necessity of planning for diversity. Edited by Michael A. Burayidi, *Cities and the Politics of Difference* offers a guide for making diversity a cornerstone of planning practice. The essays in this collection cover the practical and theoretical issues that surround this transformation, discussing ways of planning for inclusive and multicultural cities, enhancing the cultural competence of planners, and expanding the boundaries of planning for multiculturalism to include dimensions of diversity other than ethnicity and religion - including sexual and gender minorities and Indigenous communities. The advice of the contributors on how planners should integrate considerations of diversity in all its forms and guises into practice and theory will be valuable to scholars and practitioners at all levels of government. **Revitalizing Main**

**Street A Practitioner's Guide to Comprehensive Commercial District Revitalization Sports Finance and Management**

**Real Estate, Media, and the New Business of Sport, Second Edition Taylor & Francis** As the sport business continues to evolve, so too, does Sport Finance and Management. The first version of this book took an in-depth look at changes in the sport industry, including interconnecting financial issues between teams and their associated businesses, the nature of fan loyalty influences, and the impact of sponsorship on team revenues. This second edition updates each of these elements, introduces relevant case study examples in new chapters, and examines the impact of changes in facility design, media opportunities, and league and conference policies on the economic success of teams, the salaries earned by professional players, and the finances of collegiate athletics. **The New Urban Frontier Gentrification and the Revanchist City Routledge**

Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they do anything about it? This book challenges conventional wisdom, which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author explores the interconnections of urban policy, patterns of investment, eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge. **Ten Principles for Rebuilding**

**Neighborhood Retail Revitalization of Historic Inner-city Areas in Asia The Potential for Urban Renewal in Ha Noi, Jakarta, and Manila Urban Research Monitor Edgeless Cities Exploring the Elusive Metropolis Brookings Institution**

**Press** Edgeless cities are a sprawling form of development that accounts for the bulk of office space found outside of downtowns. Every major metropolitan area has them: vast swaths of isolated buildings that are neither pedestrian friendly, nor easily accessible by public transit, and do not lend themselves to mixed use. While critics of urban sprawl tend to focus on the social impact of "edge cities"—developments that combine large-scale office parks with major retail and housing—edgeless cities, despite their ubiquity, are difficult to define or even locate. While they stay under the radar of critics, they represent a significant departure in the way American cities are built and are very likely the harbingers of a suburban future almost no one has anticipated. *Edgeless Cities* explores America's new metropolitan form by examining the growth and spatial structure of suburban office space across the nation. Inspired by Myron Orfield's groundbreaking *Metropolitica* (Brookings, 1997), Robert Lang uses data, illustrations, maps, and photos to delineate between two types of suburban office development—bounded and edgeless. The book covers the evolving geography of rental office space in thirteen of the country's largest markets, which together contain more than 2.6 billion square feet of office space and 26,000 buildings: Atlanta, Boston, Chicago, Dallas, Denver, Detroit, Houston, Los Angeles, Miami, New York, Philadelphia, San Francisco, and Washington. Lang discusses how edgeless cities differ from traditional office areas. He also provides an overview of national, regional, and metropolitan office markets, covers ways to map and measure them, and discusses the challenges urban policymakers and practitioners will face as this new suburban form continues to spread. Until now, edgeless cities have been the unstudied phenomena of the new metropolis. Lang's conceptual approach reframes the current thinking on suburban sprawl and provides a valuable resource for future policy discussions surrounding smart growth issues. **A Research Agenda for Shrinking Cities Edward Elgar**

**Publishing** This prescient book presents the intellectual terrain of shrinking cities while exploring the key research questions in each of the field's sub-domains and reviewing the range of methodologies within these topics. **Revitalizing American Cities University of Pennsylvania Press** *Revitalizing American Cities* explores the historical, regional, and political factors that have allowed some small industrial cities to regain their footing in a changing economy, and considers strategies cities can use for successful rebuilding. **Walkable City How Downtown Can Save America, One Step at a Time Farrar, Straus and Giroux**

Jeff Speck has dedicated his career to determining what makes cities thrive. And he has boiled it down to one key factor: walkability. The very idea of a modern metropolis evokes visions of bustling sidewalks, vital mass transit, and a vibrant, pedestrian-friendly urban core. But in the typical American city, the car is still king, and downtown is a place that's easy to drive to but often not worth arriving at. Making walkability happen is relatively easy and cheap; seeing exactly what needs to be done is the trick. In this essential new book, Speck reveals the invisible workings of the city, how simple decisions have cascading effects, and how we can all make the right choices for our communities. Bursting with sharp observations and real-world examples, giving key insight into what urban planners actually do and how places can and do change, *Walkable City* lays out a practical, necessary, and eminently achievable vision of how to make our normal American cities great again. **Strong Towns A Bottom-Up Revolution to Rebuild American Prosperity John Wiley & Sons** A new way forward for sustainable quality of life in cities of all sizes *Strong Towns: A Bottom-Up Revolution to Build American Prosperity* is a book of forward-thinking ideas that breaks with modern wisdom to present a new vision of urban development in the United States. Presenting the foundational ideas of the Strong Towns movement he co-founded, Charles Marohn explains why cities of

all sizes continue to struggle to meet their basic needs, and reveals the new paradigm that can solve this longstanding problem. Inside, you'll learn why inducing growth and development has been the conventional response to urban financial struggles—and why it just doesn't work. New development and high-risk investing don't generate enough wealth to support itself, and cities continue to struggle. Read this book to find out how cities large and small can focus on bottom-up investments to minimize risk and maximize their ability to strengthen the community financially and improve citizens' quality of life. Develop in-depth knowledge of the underlying logic behind the "traditional" search for never-ending urban growth. Learn practical solutions for ameliorating financial struggles through low-risk investment and a grassroots focus. Gain insights and tools that can stop the vicious cycle of budget shortfalls and unexpected downturns. Become a part of the Strong Towns revolution by shifting the focus away from top-down growth toward rebuilding American prosperity. Strong Towns acknowledges that there is a problem with the American approach to growth and shows community leaders a new way forward. The Strong Towns response is a revolution in how we assemble the places we live.

**Cities Back from the Edge New Life for Downtown John Wiley & Sons** "A love song for the city . . . [this] volume, attractively packaged and richly illustrated, is really a cookbook for downtown revitalization." --Wall Street Journal In this pioneering book on successful urban recovery, two urban experts draw on their firsthand observations of downtown change across the country to identify a flexible, effective approach to urban rejuvenation. From transportation planning and sprawl containment to the threat of superstore retailers, they address a host of key issues facing our cities today. Roberta Brandes Gratz (New York, NY), an award-winning journalist and urban critic, is author of the urban design classic *The Living City*. A former staff reporter for the *New York Post*, Gratz has written for the *New York Times Magazine* and other publications. Norman Mintz (New York, NY) has played a leading role in the field of downtown revitalization for more than twenty-five years. He is Design Director at the 34th Street Partnership in New York City and a consultant on downtown revitalization across the country.

**Imagine Boston 2030** Today, Boston is in a uniquely powerful position to make our city more affordable, equitable, connected, and resilient. We will seize this moment to guide our growth to support our dynamic economy, connect more residents to opportunity, create vibrant neighborhoods, and continue our legacy as a thriving waterfront city. Mayor Martin J. Walsh's *Imagine Boston 2030* is the first citywide plan in more than 50 years. This vision was shaped by more than 15,000 Boston voices.

**Rebel Cities: From the Right to the City to the Urban Revolution Verso Books** Explores cities as the origin of revolutionary politics, where social and political issues are always at the surface, using examples from such cities as New York City and Mumbai to examine how they can be better ecologically reorganized.

**The Sioux Chef's Indigenous Kitchen U of Minnesota Press** 2018 James Beard Award Winner: Best American Cookbook Named one of the Best Cookbooks of 2017 by NPR, *The Village Voice*, *Smithsonian Magazine*, *UPROXX*, *New York Magazine*, *San Francisco Chronicle*, *Mpls. St. Paul Magazine* and others Here is real food—our indigenous American fruits and vegetables, the wild and foraged ingredients, game and fish. Locally sourced, seasonal, "clean" ingredients and nose-to-tail cooking are nothing new to Sean Sherman, the Oglala Lakota chef and founder of *The Sioux Chef*. In his breakout book, *The Sioux Chef's Indigenous Kitchen*, Sherman shares his approach to creating boldly seasoned foods that are vibrant, healthful, at once elegant and easy. Sherman dispels outdated notions of Native American fare—no fry bread or Indian tacos here—and no European staples such as wheat flour, dairy products, sugar, and domestic pork and beef. *The Sioux Chef's* healthful plates embrace venison and rabbit, river and lake trout, duck and quail, wild turkey, blueberries, sage, sumac, timsula or wild turnip, plums, purslane, and abundant wildflowers. Contemporary and authentic, his dishes feature cedar braised bison, griddled wild rice cakes, amaranth crackers with smoked white bean paste, three sisters salad, deviled duck eggs, smoked turkey soup, dried meats, roasted corn sorbet, and hazelnut-maple bites. *The Sioux Chef's Indigenous Kitchen* is a rich education and a delectable introduction to modern indigenous cuisine of the Dakota and Minnesota territories, with a vision and approach to food that travels well beyond those borders.

**Planning in the USA Policies, Issues and Processes Routledge** *Planning in the USA* is a comprehensive introduction to the policies, theory and practice of planning. Outlining land use, urban planning and environmental protection policies, this fully illustrated book explains the nature of the planning process and the way in which policy issues are identified, defined and approached. Offering a detailed account of urbanization in the USA, Barry Cullingworth reveals the problematic nature and limitations of the planning process, the fallibility of experts, and difficulties facing policy-makers in their search for solutions. Coverage includes: \* Land Use Regulation \* Transport, Housing and Community Development \* Public Attitudes to Planning \* Property Rights \* Environmental Planning and Policies \* Growth Management \* Planning and Governance Barry Cullingworth's *Planning in the USA* is an essential book for students and planners and all who are concerned with the nature of contemporary urban and environmental problems.

**Regenerating Urban Land A Practitioner's Guide to Leveraging Private Investment World Bank Publications** *Regenerating Urban Land* draws on the experience of eight case studies from around the world. The case studies outline various policy and financial instruments to attract private sector investment in urban regeneration of underutilized and unutilized areas and the requisite infrastructure improvements. In particular, each case study details the project cycle, from the scoping phase and determination of the initial amount of public sector investment, to implementation and subsequent leveraged private-sector funds. This manual analyzes rates of return on the investments and long-term financial sustainability. *Regenerating Urban Land* guides local governments to systematically identify the sequence of steps and tasks needed to develop a regeneration policy framework, with the participation of the private sector. The manual also formulates specific policies and instruments for expanding private sector participation; structuring effective administrative and legal frameworks; utilizing land readjustment/assembly methods; determining duration of contracts, adequate phasing, and timeline; and balancing the distribution of risk and sustainability measures.

**Our Towns A 100,000-Mile Journey into the Heart of America Vintage** NATIONAL BEST SELLER • The basis for the HBO documentary now streaming on HBO Max For five years, James and Deborah Fallows have travelled across America in a single-engine prop airplane. Visiting dozens of towns, the America they saw is acutely conscious of its problems—from economic dislocation to the opioid scourge—but it is also crafting solutions, with a practical-minded determination at dramatic odds with the bitter paralysis of national politics. At times of dysfunction on a national level, reform possibilities have often arisen from the local level. The Fallows describe America in the middle of one of these creative waves. Their view of the country is as complex and contradictory as America itself, but it also reflects the energy, the generosity and compassion, the dreams, and the determination of many who are in the midst of making things better. *Our Towns* is the story of their journey—and an account of a country busy remaking itself.

**Urban Tourism and Urban Change Cities in a Global Economy Routledge** *Urban Tourism and Urban Change: Cities in a Global Economy* provides both a sociological / cultural analysis of change that has taken place in many of the world's cities. This focused treatment of urban

tourism examines the implications of these changes for urban management and planning sense, for success and failure in metropolitan change. Uniquely suited for teaching purposes, Costas Spirou integrates numerous case studies of cities to illuminate the significant impact and promise of tourism on urban image and economic development. **Small Town Rules How Big Brands and Small Businesses Can Prosper in a Connected Economy Que Publishing** Teaches large businesses to use word-of-mouth and reputation-building to gain a loyal customer base in the way small businesses do. **The Economics of Uniqueness Investing in Historic City Cores and Cultural Heritage Assets for Sustainable Development World Bank Publications** In a world where half of the population lives in cities and more than 90 percent of urban growth is occurring in the developing world, cities struggle to modernize without completely losing their unique character, which is embodied by their historic cores and cultural heritage assets. As countries develop, cultural heritage can provide a crucial element of continuity and stability: the past can become a foundation for the future. This book collects innovative research papers authored by leading scholars and practitioners in heritage economics, and presents the most current knowledge on how heritage assets can serve as drivers of local economic development. What this book tries to suggest is a workable approach to explicitly take into account the cultural dimensions of urban regeneration in agglomerations that have a history and possess a unique character, going beyond an approach based solely on major cultural heritage assets or landmarks. The knowledge disseminated through this book will help stakeholders involved in preparation, implementation, and supervision of development investments to better assess the values of cultural heritage assets and incorporate them in urban development policies. **The Foreign-born Population of the United States, 1850 to 2000 Nova Publishers** Immigration has always been a source of debate for the American public. During the early part of the 20th century Americans had concerns about the effects of European immigrants. Today similar concerns are being raised about Latin American immigrants. This book presents selected decennial census data on the foreign-born population of the United States from 1850 to 2000. This book provides the background knowledge necessary to examine the tables in a detailed and informed manner. The tables provide statistics that reveal all the trends in immigration during the last century of America's history. It is fully indexed. **Downtown America A History of the Place and the People Who Made It University of Chicago Press** Downtown America was once the vibrant urban center romanticized in the Petula Clark song—a place where the lights were brighter, where people went to spend their money and forget their worries. But in the second half of the twentieth century, "downtown" became a shadow of its former self, succumbing to economic competition and commercial decline. And the death of Main Streets across the country came to be seen as sadly inexorable, like the passing of an aged loved one. Downtown America cuts beneath the archetypal story of downtown's rise and fall and offers a dynamic new story of urban development in the United States. Moving beyond conventional narratives, Alison Isenberg shows that downtown's trajectory was not dictated by inevitable free market forces or natural life-and-death cycles. Instead, it was the product of human actors—the contested creation of retailers, developers, government leaders, architects, and planners, as well as political activists, consumers, civic clubs, real estate appraisers, even postcard artists. Throughout the twentieth century, conflicts over downtown's mundane conditions—what it should look like and who should walk its streets—pointed to fundamental disagreements over American values. Isenberg reveals how the innovative efforts of these participants infused Main Street with its resonant symbolism, while still accounting for pervasive uncertainty and fears of decline. Readers of this work will find anything but a story of inevitability. Even some of the downtown's darkest moments—the Great Depression's collapse in land values, the rioting and looting of the 1960s, or abandonment and vacancy during the 1970s—illuminate how core cultural values have animated and intertwined with economic investment to reinvent the physical form and social experiences of urban commerce. Downtown America—its empty stores, revitalized marketplaces, and romanticized past—will never look quite the same again. A book that does away with our most clichéd approaches to urban studies, Downtown America will appeal to readers interested in the history of the United States and the mythology surrounding its most cherished institutions. A Choice Outstanding Academic Title. Winner of the 2005 Ellis W. Hawley Prize from the Organization of American Historians. Winner of the 2005 Lewis Mumford Prize for Best Book in American Planning History. Winner of the 2005 Historic Preservation Book Prize from the University of Mary Washington Center for Historic Preservation. Named 2005 Honor Book from the New Jersey Council for the Humanities. **Ten Principles for Developing Successful Town Centers City Design, Planning & Policy Innovations The Case of Hermosillo Inter-American Development Bank** This publication summarizes the outcomes and lessons learned from the Fall 2017 course titled "Emergent Urbanism: Planning and Design Visions for the City of Hermosillo, Mexico" (ADV-9146). Taught by professors Diane Davis and Felipe Vera, this course asked a group of 12 students to design a set of projects that could lay the groundwork for a sustainable future for the city of Hermosillo—an emerging city located in northwest Mexico and the capital of the state of Sonora. Part of a larger initiative funded by the Inter-American Development Bank and the North-American Development Bank in partnership with Harvard University, ideas developed for this class were the product of collaboration between faculty and students at the Graduate School of Design, the Kennedy School's Center for International Development and the T.H. Chan School of Public Health.
