Leaving Your Leadership Legacy Creating a Timeless and Enduring Culture of Clarity, Connectivity, and Consistency

Createspace Independent Publishing Platform The authors of this book explain the differences between managing by the 3-Ps (Proximity, Position, and Persuasion) and the 3-Cs (Clarity, Consistency, and Connectivity). Leaders who employ the 3-Ps manage with a focus on the individual. Leaders who use the 3-Cs, however, manage by weaving personal leadership techniques with a process of managing the business or organization that has proven extremely effective during the decade since it was introduced. It's a way to lead a company or organization that leaves a legacy of sustained growth and success for those who come after the leader to latch onto and continue. The book is written as a business novel. What is learned on the protagonist's journey is expanded upon in a lesson at the conclusion of each chapter. Readers are then invited to assess their own legacy potential by completing a self-assessment. The management process this book contains is now being employed successfully not only by small and medium size businesses, but also by Fortune 500 companies, successful municipalities, and the United States Army.

The Homology of Iterated Loop Spaces

Springer

A Practical Guide to the Evaluation of Child Physical Abuse and Neglect

Springer The impact of child maltreatment on victims, families, and society—from immediate medical care and legal services to long-term mental health care and law enforcement—cannot be understated. And it remains a severe problem in spite of increasing public awareness and stricter laws. To keep up with growing body of professionals staying informed on this subject, the third edition of *A Practical Guide to the Evaluation of Child Physical Abuse and Neglect* assists the reader in recognizing abuse/neglect (exclusive of sexual abuse) in children and youth, and determining its extent. Illustrated with clinical photographs, the Guide details systematic evaluation procedures, explains the tasks of an evaluation team, and expands and updates the knowledge base in these and other major areas: Specific injuries, including burns, bruises, fractures, and head and abdominal injuries Malnourishment and other forms of neglect Medical child abuse (previously known as Munchausen Syndrome by Proxy) Maltreatment of children with special health care needs Domestic partner violence Prevention strategies, psychosocial assessment, collaborations with law enforcement and the courts, and more The new edition of *A Practical Guide to the Evaluation of Child Physical Abuse and Neglect* offers expert information useful to practitioners across professional domains: public health professionals in maternal and child health and school settings; physicians and nurses; clinical social workers, child psychologists, and school psychologists; and attorneys and law enforcement personnel.

The Political Theory of Montesquieu

Cambridge University Press This volume makes available in an English translation the most significant part of Montesquieu's political, social and legal theory. About two-thirds of the volume has been translated from the *Spirit of the Laws*, not redone in English since the eighteenth century. That version was notoriously inadequate: Montesquieu's key terms were not rendered consistently; often his meaning was distorted by giving the nearest English eighteenth-century legal or institutional equivalent. Finally, English usage has changed so much that the eighteenth-century translation makes Montesquieu seem both quaint and obscure. This volume also

includes substantial selections from the Persian Letters and the Considerations on the Causes of the Romans; Greatness and Decline. Although adequate translations of these works exist, it seemed advisable to maintain intellectual and stylistic consistency by providing English versions on the same principles as the Spirit of the Laws.

Aerodynamic Data of Space Vehicles

Springer Science & Business Media The capacity and quality of the atmospheric flight performance of space flight vehicles is characterized by their aerodynamic data bases. A complete aerodynamic data base would encompass the coefficients of the static longitudinal and lateral motions and the related dynamic coefficients. In this book the aerodynamics of 27 vehicles are considered. Only a few of them did really fly. Therefore the aerodynamic data bases are often not complete, in particular when the projects or programs were more or less abruptly stopped, often due to political decisions. Configurational design studies or the development of demonstrators usually happen with reduced or incomplete aerodynamic data sets. Therefore some data sets base just on the application of one of the following tools: semi-empirical design methods, wind tunnel tests, numerical simulations. In so far a high percentage of the data presented is incomplete and would have to be verified. Flight mechanics needs the aerodynamic coefficients as function of a lot of variables. The allocation of the aerodynamic coefficients for a particular flight operation at a specific trajectory point is conducted by an aerodynamic model. The establishment of such models is described in this book. This book is written for graduate and doctoral students to give them insight into the aerodynamics of the various flight configurations. Further for design and development engineers in industry and at research institutes (including universities) searching for an appropriate vehicle shape, as well as for non-specialists, who may be interested in this subject. The book will be helpful, too, in the case that system studies require in their concept phases the selection of suitable vehicle shapes.

Globalization, Deglobalization, and New Paradigms in Business

Springer Nature This book analyzes the changing dynamics of competition and the emergence of deglobalization trends and processes. The authors begin by explaining the role of technology on globalization and its impact on competitive strategy. Then, they present a theoretical framework that outlines the connection between globalization and modern society. The book also delves into the shift toward deglobalization and addresses how the onset of the COVID-10 pandemic has accelerated the process. Concluding with a discussion of how the 4th Industrial Revolution has resulted in new paradigms for business, this book will fill a gap through its investigation of an emerging concept for scholars in international business.

The State of Knowledge on Medical Assistance in Dying for Mature Minors

Council of Canadian Academies In December 2016, the CCA was asked by then Minister of Health Jane Philpott and Minister of Justice and Attorney General of Canada Jody Wilson-Raybould to undertake independent reviews related to medical assistance in dying (MAID). Specifically, the CCA was tasked with examining three particularly complex types of requests for MAID that were identified for further review and study in the legislation passed by Parliament in 2016: requests by mature minors, advance requests, and requests where a mental disorder is the sole underlying medical condition. On December 12, 2018 the CCA released the three final reports of the Expert Panel, one on each type of request: The State of Knowledge on Medical Assistance in Dying for Mature Minors; The State of Knowledge on Advance Requests for Medical Assistance in Dying; and The State of Knowledge on Medical Assistance in Dying Where a Mental Disorder is the Sole Underlying Medical Condition.
