Key Directions in Legal Education

National and International Perspectives

Routledge **Key Directions in Legal Education** identifies and explores key contemporary and emerging themes that are significant and heavily debated within legal education from both UK and international perspectives. It provides a rich comparative dialogue and insights into the current and future directions of legal education. The book discusses in detail topics like the pressures on law schools exerted by external stakeholders, the fostering of interdisciplinary approaches and collaboration within legal education and the evolution of discourses around teaching and learning legal skills. It elaborates on the continuing development of clinical legal education as a component of the law degree and the emergence and use of innovative technologies within law teaching. The approach of pairing UK and international authors to obtain comparative insights and analysis on a range of key themes is original and provides both a genuine comparative dialogue and a clear international focus. This book will be of great interest for researchers, academics and post-graduate students in the field of law and legal pedagogy.

Elgar Encyclopedia of Law and Data Science

Edward Elgar Publishing **This Encyclopedia** brings together jurists, computer scientists, and data analysts to map the emerging field of data science and law for the first time, uncovering the challenges, opportunities, and fault lines that arise as these groups are increasingly thrown together by expanding attempts to regulate and adapt to a data-driven world. It explains the concepts and tools at the crossroads of the many disciplines involved in data science and law, bridging scientific and applied domains. Entries span algorithmic fairness, consent, data protection, ethics, healthcare, machine learning, patents, surveillance, transparency and vulnerability.

The Ethics Project in Legal Education

Routledge The contributions in this volume suggest that "the ethics project in legal education" is increasingly an international one. Even though the strength of commitment by both the profession and the legal academy to "ethics learning" within law schools varies, two fundamental questions confront all who work in this area. First, what is it that we want our students to learn (or, perhaps, in what manner do we want our students to develop) from the teaching of "legal ethics"? Second, how can we create a learning environment that will encourage the nature and quality of learning we think is important? All the contributors to this volume take a strong stand on the importance of ethical legal practice and the role of law schools in developing students' capacities in this area. They share a belief in the essential need to encourage law students to engage with the moral dimensions of legal practice. The questions that these scholars grapple with are therefore not of the "should we be teaching this?" variety, but "how might we best to go about doing this, so that our efforts within law schools really make some difference?" Each of the chapters in this volume adds uniquely to our understanding of these matters.

Emotions in the Law School

Transforming Legal Education Through the Passions

Routledge Law schools are failing both their staff and students by requiring them to prize reason and rationality and to suppress or ignore emotions. Despite innovations in terms of both content and teaching techniques, there is little evidence that emotions are effectively acknowledged or utilised within legal education. Instead law schools are clinging to an out-dated and erroneous perception of emotions as at best, irrational, and at worst dangerous. In contrast to this, educational and scientific developments have demonstrated that emotions are a fundamental, inescapable part of learning, teaching and skills development. Harnessing these emotions will therefore have a transformative effect on legal education and enable it to adapt to the needs and demands of the twenty-first century. This book provides a theoretical overview of the role played by emotions in all aspects of the life of the law school. It explores the relationship emotions have with key traditional and contemporary approaches to legal education, the ways in which emotions can be conceptualised, their interaction with the politics and policies of legal education and their role within teaching and learning. The book also considers the importance of emotional wellbeing for both law students and legal academics Overall, this book argues for a more holistic form of legal education in which emotions play a valuable (and valued) role. This requires a new vision for law schools, in which emotions are acknowledged and embedded at all levels, institutional and personal.

Research Handbook on Law and Emotion

Edward Elgar Publishing This illuminating Research Handbook analyses the role that emotions play and ought to play in legal reasoning and practice, rejecting the simplistic distinction between reason and emotion.

Legal Education in the Global Context

Opportunities and Challenges

Ashgate Publishing, Ltd. This book discusses the opportunities and challenges facing legal education in the era of globalization. It identifies the knowledge and skills that law students will require in order to prepare for the practice of tomorrow, and explores pedagogical shifts legal education needs to make inside and outside of the classroom. With contributions from leading experts on legal education from various jurisdictions across the globe, the work combines theoretical depth with practical insights. Seeking to understand the changing landscape of legal education in the era of globalization, the contributions find that law schools can, and must, adopt educational strategies that at least present students with different understandings of what studying and practicing law is meant to be about. They find that law schools need to offer their students choices, a vision of practice that is not driven entirely by the demands of the marketplace or the needs of major international law firms. Bridging the gap between theory and practice, this book makes a significant contribution to the impact of globalization on legal education, and how students and law schools

need to adapt for the future. It will be of great interest to academics and students of comparative legal studies and legal education, as well as policy-makers and practitioners.

Re-thinking Legal Education under the Civil and Common Law

A Road Map for Constructive Change

Routledge **Whilst educational theory has developed significantly in recent years, much of the law curriculum remains content-driven and delivered traditionally, predominantly through lecture format. Students are, in the main, treated as empty vessels to be filled by the eminent academics of the day. Re-thinking Legal Education under the Common and Civil Law draws on the experience of teachers, practitioners and students across the world who are committed to**

developing a more effective learning process. Little attention has, historically, been paid to the importance of the application of theory, the role of reflective learning, the understanding and acquisition of lawyering skills and the development of professional responsibility and wider ethical values. With contributions from across the global north and south, this book examines the history of educating our lawyers, the influences and constraints that may shape the curriculum, the means of delivering it and the models that could be used to tackle current shortcomings. The whole is intended to represent what might be desirable and possible if we are to produce lawyers that are fit for purpose in the 21st century, be that in either in civil or common law jurisdictions. This book will be of direct assistance to those who wish to understand the theory and practice of legal pedagogy in an experiential context. It will be essential reading for academics, researchers and teachers in the fields of law and education, particularly those concerned with curriculum design and developing interactive teaching methods. It is likely to be of interest to law students too - particularly those who value a more direct engagement in their learning.

Better Law for a Better World

New Approaches to Law Practice and Education

Routledge How as a society can we find ways of ensuring the people who are the most vulnerable or have little voice can avail themselves of the protection in law to improve their social, cultural, health and economic outcomes as befits civilised society? *Better Law for a Better World* answers this question by looking at innovative practices and developments emerging within law practice and education and shares the skills and techniques that could lead to confidence in the law and its ability to respond. Using recent research from Australia, practice initiatives and information, the book breaks down ways for law students, legal educators and law practitioners (including judicial officers, law administrators, legislators and policy makers) to enhance access to justice and improve outcomes through new approaches to lawyering. These can include: Multi-Disciplinary Practice (including health justice partnerships); integrated justice practice; restorative practice; empowerment modes (community & professional development and policy skills); client-centred approaches and collaborative interdisciplinary practice informed by practical experience. The book contains critical information on what such practice might look like and the elements that will be required in the development of the essential skills and criteria for such practice. It seeks to open up a dialogue about how we can

make the law better. This includes making the community more central to the operation of the law and improving client-centred practice so that the Rule of Law can deliver on its claims to serve, protect and ensure equality before the law. It explores practical ways that emerging lawyers can be trained differently to ensure improved communication, collaboration, problem solving, partnership and interpersonal skills. The book explores the challenges of such work. It also gives suggestions on how to reduce professional barriers and variations in practice to effectively, humanely and efficiently make a difference in people's lives. The book builds essential skills and new approaches to lawyering for law students, legal educators, new lawyers and seasoned lawyers, judicial members and law administrators to equip them to better respond to community need. It looks at the law in context by also exploring the role of the law in improving the social determinants of health and socially just outcomes.

Legal Culture in the United States: An Introduction

Routledge For law students and lawyers to successfully understand and practice law in the U.S., recognition of the wider context and culture which informs the law is essential. Simply learning the legal rules and procedures in isolation is not enough without an appreciation of the culture that produced them. This book provides the reader with an understandable introduction to the ways in which U.S. law reflects its culture and each chapter begins with questions to guide the reader, and concludes with questions for review, challenge and further understanding. Kirk W. Junker explores cultural differences, employing history, social theory, philosophy, and language as "reference frames," which are then applied to the rules and procedures of the U.S. legal system in the book's final chapter. Through these cultural reference frames readers are provided with a set of interpretive tools to inform their understanding of the substance and institutions of the law. With a deeper understanding of this cultural context, international students will be empowered to more quickly adapt to their studies; more comprehensively understand the role of the attorney in the U.S. system; draw comparisons with their own domestic legal systems, and ultimately become more successful in their legal careers both in the U.S. and abroad.

Credit Method Compatibility and Constraints under EU Law

An Analysis of the Case Law of the CJEU

Kluwer Law International B.V. **As European Union (EU) Member States seek to counteract base erosion and profit shifting (BEPS) practices while avoiding new obstacles to the EU's internal market such as double taxation, the credit method,**

also known as the foreign tax credit, is one of the essential tools in this balancing act, yet it is one that has given rise to various EU law challenges and questions. This invaluable book - the first in-depth study of the EU law constraints on designing the credit method - delineates the EU law boundaries within which the Member States must operate when they implement this method of tax relief. For the first time, the Court of Justice of the European Union (CJEU) cases that may affect, directly or indirectly, the credit method and its main components are systematically identified and analysed in order to extract the legal findings and principles that define the contours within which the Member States can manoeuvre when considering EU-compatible approaches to the credit method. To this end, among others, this book offers: an extensive study of the historical legal developments of the credit method; an overview of the key design features of the credit method, considering the optional, variable components, such as the credit limitation (maximum creditable amount), that tailor it to different legal and policy considerations; an analysis of the legal constraints on the key features of the credit method flowing from CJEU case law on the fundamental freedoms, considering the impact of landmark cases and concepts (e.g., Schumacker, neutralization); the EU law implications based on the type of credit method (direct, indirect, imputation) and the feature of the credit method (e.g., credit limitation, credit carryforward); and examples to clearly and concisely illustrate the basic operation of the credit method and some of the main calculation and EU law issues. The author's doctoral dissertation, on which the book is based, was awarded the Wolfgang Gassner Science Prize 2020 and the European Doctoral Tax Thesis Award 2020. As a timely, comprehensive and practical study of the relationship between the credit method and EU law, this book will be welcomed by lawyers and other professionals working with taxation matters, as well as by tax policymakers and academics in the fields of international and European tax law.

Mislabeled as Disabled

The Educational Abuse of Struggling Learners and How WE Can Fight It

Radius Book Group This book, described by reviewers as “shocking” and “a masterpiece,” exposes the tragic tale of the millions of schoolchildren who are never taught basic skills in reading, writing, and math. With heart-wrenching stories of individual children from his own experience as an advocate and ground-breaking policy researcher, Kalman “Buzzy” Hettleman documents what can only be labeled educational abuse. It may be unintentional, but it is gross negligence because we know how to prevent it, yet fail to do it. Many of the victims are “Mislabeled as Disabled.” Denied proper instruction, they fall behind in regular general education, overwhelm teachers, and hold back classmates. Out of desperation, school systems unlawfully “dump” such “Mislabeled as Disabled” students in special education, even though they do not have a true medical disability. Yet, unlike students with severe limitations who are “Truly Disabled,” the special education they receive is hardly special at all. They fall farther behind and suffer stigma and segregation. Moreover, school systems cover up this educational malpractice with misleading progress reports and data. The fact that a disproportionate number of “Mislabeled as Disabled” students are from poor and minority families is no excuse. Hettleman not only cites in detail the better instruction that will enable them to succeed; he spells out the kind of legislative and judicial civil right to learn to read that is required for reform. Hettleman also perceptively reveals how teachers, like children, are victimized by educational abuse. Dedicated frontline teachers are

denied the instructional tools—the training, class sizes, and curricula—with which they can get the job done right. He concludes with a call to action by all of us. Parents, educators, policymakers, and entire communities should read this book, become enraged, and then take up the struggle for reform.
