## **KEY=NEONATAL - ODOM WILEY**

---

---

### **TEXTBOOK OF NEONATAL RESUSCITATION**

---

New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery. New in the 7th edition! Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate Two new chapters added covering post-resuscitation care and preparing for resuscitation 140+ new full-color photographs replacing most line drawings

---

### **SKILLS FOR MIDWIFERY PRACTICE AUSTRALIA & NEW ZEALAND EDITION**

---

Elsevier Health Sciences The first edition of Skills for Midwifery Practice Australia and New Zealand edition builds of the success of the highly regarded Skills for Midwifery Practice by Ruth Johnson and Wendy Taylor, now in its fourth edition. Endorsed by the Australian College of Midwives, this text provides instruction and guidance on more than 100 clinical skills for midwifery students and midwives

who wish to perfect their practice. Each clinical skill is presented logically in a step-by-step format, providing a clear sequencing of information. Theory and evidence precedes each skill to thoroughly explain the underlying physiology of the scenarios encountered in midwifery practice. Woman-centred approach Structured to follow the logical progression from pregnancy through to labour and birth, and finally to postnatal care Australian and New Zealand guidelines, policies, standards, statistics, terminology and cultural considerations are included throughout Now includes an eBook with all print purchases

---

## **ESSENTIAL CLINICAL ANESTHESIA REVIEW**

---

### **KEYWORDS, QUESTIONS AND ANSWERS FOR THE BOARDS**

---

*Cambridge University Press* This concise, evidence-based board review book, organized according to the ABA keyword list, covers all the fundamental concepts needed to pass written and re-certification board examinations. Each chapter begins with a case scenario or clinical problem from everyday practice, followed by concise discussion and clinical review questions and answers. Discussion progresses logically from preoperative assessment and intraoperative management to postoperative pain management, enhancing the reader's knowledge and honing diagnostic and clinical management skills. New guidelines and recently developed standards of care are also covered. Serving as a companion to the popular textbook *Essential Clinical Anesthesia*, this resourceful work reflects the clinical experiences of anesthesia experts at Harvard Medical School as well as individually known national experts in the field of anesthesiology. This practical review is an invaluable resource for anesthesiologists in training and practice, whether studying for board exams or as part of continuing education and ABA recertification.

---

## **PCEP BOOK I: MATERNAL AND FETAL EVALUATION AND IMMEDIATE NEWBORN CARE**

---

*Perinatal Continuing Education* Time-saving, low-cost solutions for self-paced learning or instructor-led training! Developed for health care professionals who provide care to pregnant women and newborns, the Perinatal Continuing Education Program (PCEP) is a comprehensive, self-paced education program in four volumes. Completely updated and revised with leading-edge procedures and techniques, *Book I: Maternal and Fetal Evaluation and Immediate Newborn Care, 3rd Edition* features 8 units covering obstetric evaluation and Neonatal Resuscitation Program information and skills, as well as units on thermal care and neonatal hypoglycemia. PCEP is a proven educational tool for Improving perinatal care know-how, policies, practices and procedures Establishing organization-wide care goals and routines Teaching both practical skills and cognitive knowledge Saving time and money -- streamline the learning process Reducing care risks through staff-wide consistency of knowledge and skills competency Encouraging cooperation and communication among diverse staff Simplifying education planning and budgeting

---

## **THE S.T.A.B.L.E. PROGRAM, LEARNER MANUAL: POST-RESUSCITATION/ PRE-TRANSPORT STABILIZATION CARE OF SICK INFANTS- GUIDELINES FOR NEONATAL HEALTHCARE PRO**

---

*American Academy of Pediatrics* Student manual for The S.T.A.B.L.E. Program Learner / Provider post-resuscitation / pre-transport neonatal stabilization course

---

## **MASTERING SINGLE BEST ANSWER QUESTIONS FOR THE PART 2 MRCOG EXAMINATION**

---

---

### **AN EVIDENCE-BASED APPROACH**

---

*Cambridge University Press* This comprehensive question-and-answer resource covers all aspects of the curriculum for the Part 2 MRCOG examination. Candidates are given the opportunity to practise the Single Best Answer question style, to cover the content they will encounter in the examination and to assess their knowledge. As consultants actively engaged in the writing of the Part 2 Single Best Answers, the authors and editor have provided directly applicable questions. Candidates to review the syllabus in an organised, systematic manner, with comprehensive explanations for each answer. This title also includes new sections on ethics, training, audit and clinical governance. Mock exams are also available online to familiarise candidates with the real-life examination. The detailed answers, evidence and comprehensive list of references offer an excellent training and reading source for all candidates preparing for the Part 2 MRCOG examination.

---

## **S.T.A.B.L.E. PROGRAM POST-RESUSCITATION PRE-TRANSPORT STABILIZATION CARE OF SICK INFANTS**

---

*Amer Academy of Pediatrics* The STABLE Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. This learner manual serves as a student handbook for either self-study or instructor-led presentations. It includes more than 220 pages, illustrated in full color.

---

## **ESSENTIAL NEONATAL MEDICINE**

---

*John Wiley & Sons* Providing a comprehensive yet concise guide for trainee doctors, neonatal nurses and midwives, Essential Neonatal Medicine continues to be an indispensable resource that combines the depth and breadth of a textbook with the efficiency of a revision guide. Extensively updated and full-colour throughout, this edition includes new chapters on neonatal transport and palliative care, as well as further content on pathophysiology and embryology, quality improvement and risk management, infection control, and non-invasive ventilation. With an improved artwork programme and a new glossary of terms, Essential Neonatal Medicine is ideal

for all trainee health professionals new to neonatology, or looking for a comprehensive aid to support them.

---

**POCKET BOOK OF HOSPITAL CARE FOR CHILDREN**

---

---

**GUIDELINES FOR THE MANAGEMENT OF COMMON CHILDHOOD ILLNESSES**

---

*World Health Organization* The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

---

**NCLEX-RN EXAM-MULTIPLE CHOICE SINGLE RESPONSE QUESTIONS WITH ANSWERS EBOOK-PDF**

---

*Chandresh Agrawal SGN.*The Ebook NCLEX-RN Exam Covers Nursing Subject Multiple Choice Single Response Questions With Answers.

---

**GET THROUGH DRCOG**

---

---

**SBAS, EMQS AND MCQS**

---

*CRC Press* The book provides advice on how to prepare for the examination and how questions should be approached to obtain the highest marks. With more than 350 questions, preparation tips and extensive answer explanations, it is the definitive resource for those attempting the DRCOG. The book is comprehensive and authoritative: written by an experienced auth

---

**BREASTFEEDING AND HUMAN LACTATION**

---

*Jones & Bartlett Learning* Breastfeeding and Human Lactation, Fifth Edition continues as the leading reference for the latest clinical techniques and research findings that direct evidence-based clinical practice for lactation consultants and specialists. Now in its Fifth Edition, it contains a clear clinical focus with more than 2,000 research studies supporting the clinical recommendations found in the text. This new edition has been thoroughly updated and revised with current research, references, and photos. To make studying and learning easier, each chapter includes key concepts, Internet resources, and evidence-based tables and boxes. Breastfeeding and Human Lactation, Fifth Edition is also an excellent resource to prepare for certification and practice as an International Board Certified

Lactation Consultant (IBCLC).

---

## **TEXTBOOK OF NEONATAL RESUSCITATION**

---

New 8th Edition! Innovative resource for interactive, simulation-based teaching and learning The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to health care professionals who care for newborns at the time of delivery. NRP Essentials and NRP Advanced The NRP, 8th edition, introduces a new educational methodology to better meet the needs of health care professionals who manage the newly born baby. New in the 8th edition Key Points at the beginning of each lesson. Quick Response (QR) codes that enable the reader to view short videos about the topics on their mobile device. Lesson Review Questions grouped together at the end of each lesson. Quality Improvement Opportunities and Frequently Asked Questions in each lesson. New sections in Lesson 10 (Special Considerations) about resuscitation of the newborn with a myelomeningocele or an abdominal wall defect. Three Supplemental Lessons (Improving Resuscitation Team Performance, Resuscitation Outside the Delivery Room, and Bringing Quality Improvement to Your Resuscitation Team) that allow NRP users to enhance their resuscitation knowledge and performance.

---

## **CERTIFICATION AND CORE REVIEW FOR NEONATAL INTENSIVE CARE NURSING**

---

Saunders This new edition helps readers to assess and build their knowledge of the information covered in 'Core Curriculum for Neonatal Intensive Care Nursing'. It includes 600 multiple choice study questions to aid learning.

---

## **PHYSICAL ASSESSMENT OF THE NEWBORN**

---

---

### **A COMPREHENSIVE APPROACH TO THE ART OF PHYSICAL EXAMINATION, FIFTH EDITION**

---

Springer Publishing Company Physical Assessment of the Newborn, 5th Edition, is a comprehensive text with a wealth of detailed information on the assessment of the newborn. This valuable and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data. Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to extremely preterm infants. Numerous tables, figures, illustrations, and photos, many of

them in full color, are a major strength that enhances the book's usefulness as a clinical resource. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care. **KEY FEATURES:** An authoritative and renowned text that comprehensively addresses all key aspects of newborn assessment Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral clues, and signs of pain, facilitating individualized care. Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is amplified by numerous photos and illustrations, many in full color Includes Power Point slides and an Image Bank

---

### **WORKBOOK IN PRACTICAL NEONATOLOGY**

---

*W B Saunders Company* The workbook is a mixture of anatomy, physiology, pathology, pharmacology, radiology, and research. It is full of information for those who take care of neonates. The New England Journal of Medicine gave the book a favorable review. It is completely revised to incorporate advances in neonatal care. The 3rd Edition presents an interactive approach to neonatal evaluation and management of the most common problems in infants. Each chapter features case histories that require the reader to make diagnostic decisions and to explain scientific concepts as they apply to each clinical problem.

---

### **CORE CURRICULUM FOR NEONATAL INTENSIVE CARE NURSING E-BOOK**

---

*Elsevier Health Sciences* Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. Coverage of key content on the neonatal intensive care nursing certification exam prepares you for test success. Information on families, ethics, legal issues, research, case management, and the transition to home emphasizes the importance of total care of the neonatal patient and family. New and updated content on late preterm infants, neurologic disorders, and ventilatory strategies provide the latest information from the field for more effective patient outcomes.

---

### **CERTIFICATION AND CORE REVIEW FOR NEONATAL INTENSIVE CARE NURSING - E-BOOK**

---

*Elsevier Health Sciences* Get ready for your neonatal intensive care nursing certification exam with the only review developed in

collaboration with three leading nursing organizations! From AACN, AWHONN, and NANN, Certification and Core Review for Neonatal Intensive Care Nursing, 5th Edition prepares you for your examination with hundreds of high-quality study questions and realistic test simulation. Based on the latest test plans of the AACN's CCRN®-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the changes to the Core Curriculum and reflect the latest evidence, essential knowledge, and best practices. New to this edition are three new chapters and 225 completely new review questions. This powerful study tool offers unparalleled preparation for your certification exam! Endorsed by the three most authoritative associations in neonatal intensive care nursing: the American Association of Critical-Care Nurses (AACN); the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN); and the National Association of Neonatal Nurses (NANN). Realistic exam practice is offered through 675 total questions that mirror the certification exam content, the multiple-choice question format, and the distribution of content. Answers are provided for each question, accompanied by rationales and references, to enhance your understanding of the material. Online flexibility allows you to organize review questions and test format by your preferred examination, either the AACN or NCC. Online exam simulation — included free with each new copy of the book — mirrors the test-taking experience with an interactive, timed format. Customized study lets you choose whether to work through online questions in Study Mode or Examination Mode. Online remediation includes rationales for both correct and incorrect answers, and in-book remediation provides rationales for correct answers. A compact, portable size makes the book easier to study anytime, anywhere. 225 NEW review questions include 75 in the book and 150 additional online questions on the Evolve companion website. Thoroughly UPDATED review content reflects AACN's latest CCRN®-Neonatal exam and the NCC's latest Neonatal Intensive Care Nursing (RNC-NIC) exam, information in Core Curriculum for Neonatal Intensive Care Nursing, 5th Edition, and the newest evidence-based guidelines for neonatal critical care. NEW! Three new chapters include Grieving Process, Quality Improvement, and Facilitation of Learning. NEW focus on culturally sensitive care is included in an expanded Family Integration and Culturally Sensitive Care chapter. UPDATED rationales in the Answer Key are referenced to the most recent literature and evidence-based guidelines. Compatibility with iPads, iPhones, and other mobile devices allows online exam practice that is easy and convenient.

---

## SKILLS FOR MIDWIFERY PRACTICE

---

*Elsevier Health Sciences* This title is now out of print. A new version with e-book is available under ISBN 9780702044809. This highly acclaimed step-by-step guide provides the relevant physiology, available evidence and rationale for each clinical skill. In a highly readable format, 'Skills for Midwifery Practice' offers self-assessment and short summaries, as well as detailed instruction on achieving a range of clinical skills. Tells you everything you need to know about: Abdominal examination Assessment of maternal and neonatal vital signs Infection control Hygiene needs Elimination management Drug administration Intrapartum and other related childbearing

skills Assessment of the baby Infant nutrition Phlebotomy and intravenous therapy Moving and handling Perioperative skills Wound management Restricted mobility management Cardiopulmonary resuscitation for the woman and baby An essential midwifery textbook that covers the fundamental practical tasks required of the student Clear layout ensures easy access to information Highly illustrated to aid understanding Designed to improve competency when delivering basic skills Expanded chapter on the skills used during the first stage of labour Application of national guideline for the management of care Postnatal examination Discussion of the use of infrared touch/non-touch thermometry techniques Specific information on locating pulse sites More on SATS monitoring Increased information on the skills for the second stage of labour, infant feeding and daily examination of the baby Greater reference to infection control protocols and the reduction of hospital-acquired infections.

---

## **ESSENTIAL NURSING CARE FOR CHILDREN AND YOUNG PEOPLE**

---

### **THEORY, POLICY AND PRACTICE**

---

*Routledge Essential Nursing Care for Children and Young People* is the definitive guide for all nursing and healthcare students and professionals caring for children and young people. Designed to meet the 2010 NMC competency standards for pre-registration nurses, the textbook supports you through the process of caring for children and young people with varied needs and conditions across all healthcare settings. A practical, patient-centred approach is taken throughout, with the 'voices' of children, their families and their carers used to tie theoretical knowledge to the real experience of providing care. The inclusion of the latest research and health and social care policies ensures that you are fully in line with the latest clinical practice, whilst the book's activities and exercises allow you to regularly check your understanding and develop confidence during your journey from student to nursing professional. Main features: Course-Focused Approach - pedagogy and content designed specifically for all three years of the child nursing degree programme. Contemporary Content - research note features and policy integrated throughout to give you instant access to the latest evidence-based practice. Illustrated Throughout - this highly accessible text regularly uses pictures and diagrams to highlight key issues. Voices - include authentic experiences of children, young people, parents, carers and professionals to help develop a patient-focused attitude to care. Pertinent A&P - includes coverage of all relevant anatomy and physiology for child and young person nursing courses. Practice Guidelines - provide practical guidance on everyday procedures for your quick reference. Activities and Answers - allow you to check your knowledge and build confidence. Specialist Authors - each chapter is written by leading experts in each area. *Essential Nursing Care for Children and Young People* is the ideal main textbook for all undergraduate child and young person nursing students, as well as professionals wanting to ensure they are using the latest practice. This text is also relevant to any student or professional involved in the health and social care of children and young adults.

**WHO TECHNICAL SPECIFICATIONS FOR NEONATAL RESUSCITATION DEVICES**

---

---

**MATERNAL CHILD NURSING CARE IN CANADA - E-BOOK**

---

*Elsevier Health Sciences* Featuring the most accurate, current, and clinically relevant information available, *Maternal Child Nursing Care in Canada, 2nd Edition*, combines essential maternity and pediatric nursing information in one text. The promotion of wellness and the care for women experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health problems including physiological dysfunctions and children with special needs and illnesses are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Nursing Alerts point students to critical information that must be considered in providing care. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop analytical skills and apply knowledge in various settings. Emergency boxes guide you through step-by-step emergency procedures. Family-Centred Teaching boxes highlight the needs or concerns of families that you should consider to provide family-centred care. NEW! Content updates throughout the text give you the latest information on topics such as perinatal standards, mental health issues during pregnancy, developmental and neurological issues in pediatrics, new guidelines including SOGC, and CAPWHN, NEW! Increased coverage on health care in the LGBTQ community and First Nations, Metis, and Inuit population NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

---

**GUIDELINES FOR PERINATAL CARE**

---

This guide has been developed jointly by the American Academy of Pediatrics and the American College of Obstetricians and Gynecologists, and is designed for use by all personnel involved in the care of pregnant women, their foetuses, and their neonates.

---

## **OXYGEN THERAPY FOR CHILDREN**

---

"Hypoxaemia is a major contributor to child deaths that occur worldwide each year; for a child with pneumonia hypoxaemia increases the risk of death by up to 5 times. Despite its importance in virtually all types of acute severe illness, hypoxaemia is often not well recognized or well managed more so in settings where resources are limited. Oxygen therapy remains an inaccessible luxury for a large proportion of severely ill children admitted to hospitals in developing countries. This is particularly true for patients in small district hospitals, where, even if some facility for delivering oxygen is available, supplies are often unreliable and the benefits of treatment may be diminished by poorly maintained, inappropriate equipment or poorly trained staff with inadequate guidelines. Increasing awareness of these problems is likely to have considerable clinical and public health benefits in the care of severely ill children. Health workers should be able to know the clinical signs that suggest the presence of hypoxaemia and have more reliable means of detection of hypoxaemia. This be achieved through more widespread use of pulse oximetry, which is a non-invasive measure of arterial oxygen saturation. At the same time oxygen therapy must be more widely available; in many remote settings, this can be achieved by use of oxygen concentrators, which can run on regular or alternative sources of power. Having effective systems for the detection and management of hypoxaemia are vital in reducing mortality from pneumonia and other severe acute illnesses. Oxygen therapy is essential to counter hypoxaemia and many a times is the difference between life and death. This manual focuses on the availability and clinical use of oxygen therapy in children in health facilities by providing the practical aspects for health workers, biomedical engineers, and administrators. It addresses the need for appropriate detection of hypoxaemia, use of pulse oximetry, clinical use of oxygen and delivery systems and monitoring of patients on oxygen therapy. In addition, the manual addresses practical use of pulse oximetry, and oxygen concentrators and cylinders in an effort to improve oxygen systems worldwide."--Publisher's description

---

## **NEONATAL INTENSIVE CARE NURSING**

---

*Routledge* Thoroughly revised and updated, this new edition of Neonatal Intensive Care Nursing is a comprehensive, evidence-based text for nurses and midwives caring for sick newborn babies. Written by and for nurses, it concentrates on the common problems occurring within the neonatal intensive care unit. This user-friendly text will enable nurses to recognise, rationalise and remedy these problems using both a multi-systems and an evidence-based approach. Individual chapters include: Professional Development • Developmentally-focused Nursing Care • Resuscitation of the Newborn • Management of Thermal Stability • Management of Respiratory Disorders • Cardiovascular Management • Brain Injury in the Preterm Infant • Haematological Problems • Pain Management • Fluid and Electrolyte Balance • Nutritional management • Neonatal Infection • Diagnostic and Therapeutic Procedures

• Neonatal Anaesthesia • Surgical Aspects of Neonatal Intensive Care • Neonatal Transport • Family Support • Ethics and Neonatal Nursing • Medication in the Newborn • Death and Dying in the Neonatal Unit It is essential reading for experienced nurses and midwives caring for sick newborn babies within the neonatal intensive care unit, for nurses undertaking qualifications in the specialism of neonatal nursing and for pre-registration students undertaking relevant modules or placements.

---

## **NEONATAL CARE FOR NURSES AND MIDWIVES**

---

### **PRINCIPLES FOR PRACTICE 2ND EDITION**

---

*Elsevier Health Sciences* Written by neonatal nurses and midwives for nurses and midwives, the 2nd edition highlights the collaborative nature of neonatal care and the provision of individualised, developmentally and culturally appropriate, family-centred care. Spanning all neonatal care levels and considerations, across special care baby units (SCBU) and neonatal intensive care units (NICU), the text comprehensively addresses newborn screening, resuscitation, interdisciplinary teamwork, retrievals and transport; stabilisation of the high-risk newborn; legal and ethical issues; care of the normal newborn and end-of-life care in the neonatal unit. With an increased focus on the role of the midwife within the neonatal environment, the text is ideally suited to undergraduate nursing and midwifery students and as an introductory text for postgraduate neonatal intensive care specialisation. Key learning objectives emphasised Aligned to the Council of International Neonatal Nursing (COINN) Competency framework Nursing and midwifery-focused case studies provide the vital link between theory and practice Clinical practice and reflection boxes provide additional insights and knowledge Glossary demystifies complex neonatal concepts Test bank questions and journal articles allow the reader to test their knowledge An eBook included in all print purchases Additional resources on Evolve: eBook on VitalSource Instructor resources: Test bank Additional case studies Journal articles with questions Answer guide for test bank, case studies and journal articles & questions Weblinks Image bank Student resources: Test bank Additional case studies Journal articles with questions Weblinks Image bank Increased focus on international data, evidence-based research and exemplars for the principles of best practice New chapters Care of the normal newborn Care of the neonate with congenital abnormality Extensively revised content on neonatal nutrition and fluid management

---

## **NEONATAL ANESTHESIA**

---

*Davies Incorporated*

---

## **WORKBOOK IN PRACTICAL NEONATOLOGY**

---

*Elsevier* Using a highly effective, case-based approach, *Workbook in Practical Neonatology* puts neonatal evaluation, diagnosis, and treatment in a clinical context and tests your knowledge with questions and answers for each topic. You'll find authoritative guidance on the problems you're most likely to see in practice, including issues regarding resuscitation, mechanical ventilation, anemia, fluid therapy, and bronchopulmonary dysplasia. The 6th Edition has been extensively revised, with new authors, rewritten content, improved figures and tables, and many new cases throughout. Organizes chapters around case studies, followed by questions and answers that require you to make diagnostic decisions and help you understand how scientific concepts apply to each clinical problem. Guides you step-by-step through patient care with abundant diagnostic algorithms, illustrations, and decision trees. Features eleven chapters rewritten by new authors, new tables and algorithms, new cases, and updated discussions of existing cases. Provides online access to echocardiograph and fluoroscopic video clips that show you what to expect and how to proceed. An excellent learning tool and everyday reference for practicing neonatologists, as well as students, trainees, nurses, and other clinicians. Expert Consult eBook version included with purchase. This enhanced eBook experience allows you to search all of the text, figures, and references from the book on a variety of devices.

---

## **CLOHERTY AND STARK'S MANUAL OF NEONATAL CARE**

---

*Lippincott Williams & Wilkins* Concise and easy to read, this popular manual has provided a practical approach to the diagnosis and medical management of problems in the newborn through seven outstanding editions. The Eighth Edition of Cloherty and Stark's *Manual of Neonatal Care* maintains that tradition of excellence, offering NICU physicians, neonatal-perinatal fellows, residents, and neonatal nurse practitioners quick access to key clinical information, fully updated to reflect recent advances in the field. Written in an easy-access outline format, this extensively revised edition covers current, practical approaches to the evaluation and management of routine and complex conditions encountered in the fetus and the newborn.

## **FAST FACTS FOR THE ER NURSE, FOURTH EDITION**

---

---

### **GUIDE TO A SUCCESSFUL EMERGENCY DEPARTMENT ORIENTATION**

---

---

*Springer Publishing Company* This bestselling resource has successfully prepared thousands of ER nurses to provide safe, effective, and high-quality care to their patients. This new edition is updated with guidelines from the American Heart Association, Neonatal Resuscitation Program, American Stroke Association, Emergency Nursing Pediatric Course, and Trauma Nurse Core Course. This guide presents the most current information on medications, street drugs, the opioid crisis, and intraosseous access. Chapters are replete with new case studies, updated photos, and time-tested tips. This Fast Facts guide is written in bullet-point format and is alphabetically organized by disease and disorder within each body system to emphasize easy access and at-a-glance viewing. All chapters list relevant materials, equipment and drugs; and each diagnosis includes its definition, causes, signs and symptoms, and interventions. Helpful appendices display common abbreviations and lab values, EKG rhythms, frequently used medications, and updated alphabetized skills checklists for self-examination. New to the Fourth Edition: New content on administering Alteplase, coronaviruses, decompression sickness, high altitude illness, human trafficking, influenza, lightning injuries, osteomyelitis, parasitic and insect infestations, post-birth warning signs, post-cardiac arrest care, rhabdomyolysis, status asthmaticus, and triage legal issues. Updates on infectious disease emergencies, disaster response emergencies, environmental emergencies, and OB/GYN emergencies New information on fluid and electrolyte imbalance Shock and Multisystem Trauma divided into two expanded chapters Updated with useful tricks of the trade and 'survival tips' New knowledge on street drugs including vaping, concentrated marijuana, and the opioid crisis Key Features: Educates new ER nurses and their preceptors on the most common injuries and illnesses they will encounter Comes in handy pocket size for reference on the go Provides easy referral to equipment, medications, procedures, and specialty care Delivers hands-on teaching strategies for instructors

---

## **EXAMINATION OF THE NEWBORN**

---

---

### **A PRACTICAL GUIDE**

---

---

*Routledge* Newborn babies are examined within the first 6 to 72 hours after their birth to rule out major congenital abnormalities and reassure the parents that their baby is healthy. This practical text is a step-by-step guide for all practitioners who undertake this clinical examination. It is particularly valuable for midwives and nurses taking Examination of the Newborn modules as well as a useful reference work for those already performing this role. It provides midwives and other practitioners with a comprehensive guide to the

holistic examination of the newborn infant. Examination of the Newborn encourages the reader to view each mother and baby as unique, taking into account their experiences preconceptually, antenatally and through childbirth. The text covers: role of the first examination as a screening tool normal fetal development parents' concerns and how to respond to them the impact of antenatal diagnostic screening the events of labour and birth the clinical examination of the neonate the identification and management of congenital abnormalities accountability and legal issues. This new edition is thoroughly revised throughout to meet current Nursing and Midwifery Council (NMC) and National Screening Committee standards. It includes a new chapter on the context and effectiveness of the examination and increased coverage of the impact of intrapartum management on the newborn, including fetal monitoring, place of birth, mode of birth and pain relief. Case scenarios, model answers, questions and further reading help the reader to apply the content to their own practice.

---

### **CORE CURRICULUM FOR NEONATAL INTENSIVE CARE NURSING - E-BOOK**

---

*Elsevier Health Sciences* Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three most authoritative associations in neonatal intensive care nursing - AWHONN, AACN, and NANN. Information on families, ethics, legal issues, research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shift work and fatigue. NEW! Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and

preterm infants, distinguishes clinical symptoms and therapies associated with TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU.

---

### **ESSENTIALS OF NEONATAL VENTILATION, 1ST EDITION, E-BOOK**

---

*Elsevier Health Sciences* This book is an outstanding attempt to standardize bedside neonatal respiratory care by the most researched authentic experts in the world. This involves more than sixty authors from the United States, the United Kingdom, Canada, Australia, Spain, Italy, Germany, India, UAE, and China. The latest in the arena of neonatal ventilation which holds future promise has been incorporated in this book. The experts take you through a real-time progression of bedside ventilation practices, with the focus on pulmonary and neurological morbidity. The e-book has links to videos of critical chapters and lecture PPTs to give the intensivist a 360-degree understanding of the complexities of neonatal ventilation. First comprehensive bedside management book of a baby on assisted ventilation. Latest evidence-based practices on noninvasive ventilation with protocols. A bedside guide for neonatologists, fellows, residents, postgraduates, medical students, nurse practitioners, and respiratory therapists. Management of assisted ventilation including high-frequency ventilation and NAVA. Analysis and algorithmic approach to cardiac hemodynamics in respiratory distress. Protocolized approaches to critical respiratory diseases of the newborn. Ancillary services explained in detail like targeted ECHO, NIRS, and Graphics by experts. Videos and lecture presentations by experts on SLI, CPAP, SNIPPV, NAVA, ECHO, and Graphics.
