---

### **MEASURING AND MANDATING AMERICAN EDUCATION**

---

*Peter Lang* American schools are often the victims of numbers games because its education is in the hands of politicians, the populace, and pundits. How Americans view numbers, science, and research profoundly impacts the ability of politicians to manipulate our schools from pre-K through graduate education. Even in classrooms, teachers are routinely implementing flawed assessment strategies based on misguided assumptions about numbers and commonly held statistical truths. American educators need to step out from under the restrictive mandates of politicians and their growing mania for measuring students - they need to leave the numbers games behind and take control of their profession.

### **ALLOCATING FEDERAL FUNDS FOR STATE PROGRAMS FOR ENGLISH LANGUAGE LEARNERS**

---

*National Academies Press* As the United States continues to be a nation of immigrants and their children, the nation's school systems face increased enrollments of students whose primary language is not English. With the 2001 reauthorization of the Elementary and Secondary Education Act (ESEA) in the No Child Left Behind Act (NCLB), the allocation of federal funds for programs to assist these students to be proficient in English became formula-based: 80 percent on the basis of the population of children with limited English proficiency<sup>1</sup> and 20 percent on the basis of the population of recently immigrated children and youth. Title III of NCLB directs the U.S. Department of Education to

allocate funds on the basis of the more accurate of two allowable data sources: the number of students reported to the federal government by each state education agency or data from the American Community Survey (ACS). The department determined that the ACS estimates are more accurate, and since 2005, those data have been basis for the federal distribution of Title III funds. Subsequently, analyses of the two data sources have raised concerns about that decision, especially because the two allowable data sources would allocate quite different amounts to the states. In addition, while shortcomings were noted in the data provided by the states, the ACS estimates were shown to fluctuate between years, causing concern among the states about the unpredictability and unevenness of program funding. In this context, the U.S. Department of Education commissioned the National Research Council to address the accuracy of the estimates from the two data sources and the factors that influence the estimates. The resulting book also considers means of increasing the accuracy of the data sources or alternative data sources that could be used for allocation purposes.

## **SAT WARS**

---

### **THE CASE FOR TEST-OPTIONAL COLLEGE ADMISSIONS**

---

*Teachers College Press* What can a college admissions officer safely predict about the future of a 17-year-old? Are the best and the brightest students the ones who can check off the most correct boxes on a multiple-choice exam? Or are there better ways of measuring ability and promise? In this penetrating and revealing look at high-stakes standardized admissions tests, Joseph Soares demonstrates the far-reaching and mostly negative impact of the tests on American life and calls for nothing less than a national policy change. *SAT Wars* presents a roadmap for rethinking college admissions that moves us past the statistically weak and socially divisive SAT/ACT. The author advocates for evaluation tools with a greater focus on what youth actually accomplish in high school as a more reliable indicator of qualities that really matter in one's life and to one's ability to contribute to society. This up-to-date book features contributions by well-known experts, including a piece from Daniel Golden, who won a Pulitzer Prize for his reporting in the *Wall Street Journal* on admissions, and a chapter on alternative tests from Robert Sternberg, who is the world's most-cited living authority on educational research. As we continue to debate the use and misuse of standardized testing, *SAT Wars* will be important reading for a wide audience, including college administrators and faculty, high school guidance counselors, education journalists, and parents.

**THE SAGE HANDBOOK OF WRITING DEVELOPMENT**

---

*SAGE* Writing development is currently the focus of substantial international debate because it is the aspect of literacy education that has been least responsive to central government and state reforms. Teaching approaches in writing have been slower to change than those in teaching reading and pupil attainment in writing has increased at a much more modest rate than pupil attainment in reading. This handbook critically examines research and theoretical issues that impact on writing development from the early years through to adulthood. It provides those researching or

teaching literacy with one of the most academically authoritative and comprehensive works in the field. With expert contributors from across the world, the book represents a detailed and valuable overview of a complex area of study.

The chapters are focused on student accessibility and include practical applications of key concepts. Features and benefits: Covers a range of assessment concepts, including - Formative (uses feedback from learning to adapt teaching) -Summative (i.e. tests, quizzes) - Authentic (focuses on complex/deeper tasks) -Standardized (STAR, SAT) Includes coverage of assessment for English language learners and children with special needs -- topics that are not provided enough coverage in other books (including Wortham, McAfee, Puckett and Mindes). Wright's writing style grabs and engages the reader in the topic. Two of our reviewers who use Wortham specifically cited Wright's writing style as a reason they would adopt our book. A McAfee reviewer is likely to switch for the same reason.

## **ANTOINE OF OREGON : A STORY OF THE OREGON TRAIL**

---

**JAMES OTIS KALER Antoine of Oregon : A Story of the Oregon Trail** The author of this series of stories for children has endeavored simply to show why and how the descendants of the early colonists fought their way through the wilderness in search of new homes. The several narratives deal with the struggles of those adventurous people who forced their way westward, ever westward, whether in hope of gain or in answer to "the call of the wild," and who, in so doing, wrote their names with their blood across this country of ours from the Ohio to the Columbia. To excite in the hearts of the young people of this land a desire to know more regarding the building up of this great nation, and at the same time to entertain in such a manner as may stimulate to noble deeds, is the real aim of these stories. In them there is nothing of romance, but only a careful, truthful record of the part played by children in the great battles with those forces, human as well as natural, which, for so long a time, held a vast 4 portion of this broad land against the advance of home seekers. With the knowledge of what has been done by our own people in our own land, surely there

**is no reason why one should resort to fiction in order to depict scenes of heroism, daring, and sublime disregard of suffering in nearly every form.**
