Global Trends 2030 Alternative Worlds [Military Bookshop](#) FULL COLOR PUBLICATION. Global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. Appropriate for anyone, from business to banks, government to start-ups, technology to teachers and more, this publication helps anticipate where the world will be socially, politically, technically and culturally over the next few decades. Global Trends 2040 A More Contested World [Cosimo Reports](#) "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the

four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading. The Fourth Industrial Revolution [Currency](#) World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress. **Global Trends 2030 Alternative Worlds : a Publication of the National Intelligence Council** [U.S. Government Printing Office](#) This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think

tanks, banks, government offices and business groups, to solicit reviews of the report. **Global Business** [Cengage Learning](#) Discover success in global business today with the most strategic approach to international business topics and unique coverage not found in other books. **GLOBAL BUSINESS, 4th Edition**, is the first global business book that answers the big question, What determines the success and failure of firms around the globe? It has also been used as a study resource guide for the NASBITE CGBP exam. **Guiding Principles on Business and Human Rights Implementing the United Nations "Protect, Respect and Remedy" Framework** [United Nations Publications](#) "This publication contains the 'Guiding Principles on Business and Human Rights: Implementing the United Nations Protect, Respect and Remedy Framework', which were developed by the Special Representative of the Secretary-General on the issue of human rights and transnational corporations and other business enterprises. The Special Representative annexed the Guiding Principles to his final report to the Human Rights Council (A/HRC/17/31), which also includes an introduction to the Guiding Principles and an overview of the process that led to their development. The Human Rights Council endorsed the Guiding Principles in its resolution 17/4 of 16 June 2011."--P. iv. **Renewable Energy for the Arctic New Perspectives** [Routledge](#) This book explores various facets of the transition to renewable energy in the Arctic region. It critically examines the adverse effects of fossil fuel extraction and use, environmental and social impacts of climate change, and the possibility of a low carbon energy system through innovation and technology. Drawing together a diverse range of contributors and considering a range of new

energy sources, this volume also looks at the scale of the transition challenges in the Arctic energy production and use, the necessary flexibility to balance energy demand and supply, the need of a more integrated energy infrastructure, and the new energy business models, health and safety, and quality standards for the region. Finally, it examines the transit and influence between Arctic and non-Arctic countries, in terms of growth, partnerships and new dynamics of a transitioning process to a sustainable energy system. Focusing on specific case studies that represent the most relevant energy projects in the region, this book will be of great interest to students and scholars of energy policy and transitions, climate change, global business and sustainable development. **Global Business Today** [McGraw Hill LLC](#) "As part of the overall revision process, changes have been made to every chapter in the book. All statistics have been updated to incorporate the most recently available data. Important current events have been incorporated into the text and discussed at length"-- **Lex Petrolea and International Investment Law** [Law and Practice in the Persian Gulf](#) [CRC Press](#) **Lex Petrolea and International Investment Law: Law and Practice in the Persian Gulf** offers readers a detailed analysis of jurisprudence on the settlement of upstream petroleum disputes between host states in the Persian Gulf and foreign investors. Dr Nima Mersadi Tabari considers the historical, political, and socio-economic roots of the existing frameworks and levels of protection offered to foreign investors. With particular focus on petroleum-related disputes, he initially delivers a comprehensive survey of the jurisprudence of international investment law and investment treaty arbitration. Following on from this, in three dedicated chapters, the author provides in-depth analysis of the legal regimes governing the matter in the major producers of the region: Saudi Arabia, Iraq, and Iran. A key resource for all professionals working on legal issues arising from foreign direct investments in natural resources, this book draws a detailed picture of the legal regime governing the upstream sector in the most important geographical region for the international oil and gas sector. **Our Common Agenda - Report of the Secretary-General** [United Nations](#) On the seventy-fifth anniversary of the United Nations, the world has faced its biggest shared test since the Second World War in the coronavirus disease (COVID-19) pandemic. Yet while our welfare, and indeed the permanence of human life, depend on us working together, international cooperation has never been harder to achieve. This report answers a call from UN Member States to provide recommendations to advance our common agenda and to respond to current and future challenges. Its proposals are grounded in a renewal of the social contract, adapted to the challenges of this century, taking into account younger and future generations, complemented by a new global deal to better protect the global commons and deliver global public goods. Through a deepening of solidarity—at the national level, between generations, and in the multilateral system—Our Common Agenda provides a path forward to a greener, safer and better future. **World Youth Report**

Youth Civic Engagement [United Nations](#) **The World Youth Report** is the flagship publication on youth issues of the Department of Economic and Social Affairs of the United Nations Secretariat. This 2015 edition intends to provide fresh perspective and innovative ideas on civic engagement and to serve as an impetus for dialogue and action. The objective of the Report is to provide a basis for policy discussions around youth civic engagement in order to ensure that young people are able to participate fully and effectively in all aspects of the societies in which they live. It comprises five chapters, with three sections respectively focusing on the economic, political and community-based engagement of youth, and a final chapter that offers key conclusions and recommendations.

The Future of Cross-border Insolvency: Overcoming Biases and Closing Gaps [Oxford University Press](#) A fresh and insightful guide to post-financial crisis cross-border insolvency, this book interrogates the current regime and sets out a pattern to improve its future. In recent decades, and especially since the global financial crisis, a number of important initiatives have focused on developing effective solutions for managing the insolvency of multinational enterprises and financial institutions. Irit Mevorach here takes stock of the varying success of previous policy, and identifies the gaps and biases that could be bridged by a new approach.

Global Innovation Index 2020: Who Will Finance Innovation? [WIPO](#) The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges - including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.

The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution [World Bank Publications](#) In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, **The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution** includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do

have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at

www.worldbank.org/globalindex. **Global Marketing Strategy An Executive Digest** [Springer Nature](#) This book has been written for experienced managers and students in postgraduate programs, such as MBA or specialized masters programs. In a systematic yet concise manner, it addresses all major issues companies face when conducting business across national and cultural boundaries, including assessing and selecting the most promising overseas markets, evaluating market entry alternatives, and examining the forces that drive adaptation versus standardization of the marketing mix. It looks at the various global marketing challenges from a strategic perspective and also addresses topics not usually found in international marketing texts, such as aligning marketing strategies with global organizational structures and managing the relationship between national subsidiaries, regional headquarters, and global headquarters, as well as corporate social responsibility challenges and pertinent future trends that are likely to affect global business. **Managing Global Business** [Bloomsbury Publishing](#) This is an exciting new introductory textbook which delivers a truly global exploration of international business. It provides an accessible and engaging overview of the key theories and models that underpin the global economy. The text gives attention to the challenges and ambitions of businesses in the developing world, including small and family-run businesses, as well as those of 'born-global' companies. **Managing Global Business** takes a practical approach to link theoretical concepts to real-world situations and offers a varied discussion into the key activities of the international manager, and a useful guide on employability opportunities. This textbook is recommended for established institutions as well as the rapidly expanding network of education centres in the developing world. It is designed as a core text for students of International Business and Business Management degrees at undergraduate and postgraduate level. **Global Implications of Modern Enterprise Information Systems: Technologies and Applications** [IGI Global](#) "This book presents useful strategies, techniques, and tools for the successful design, development, and implementation of enterprise information systems"--Provided by publisher. **Business With Purpose: Advancing Social Enterprise** [World Scientific](#) A Social Enterprise Venture (SEV) is defined as an organization, initiative or startup that has a strong social innovation characteristic focusing on a scalable and sustainable social wealth creation or sustainable living at the individual or community level. Most books that deal with SEVs, unfortunately still focus on non-

profits. Current market trends indicate non-profits need more sustainable funding mechanisms for survival. This book focuses on the growing need to build a business with purpose. With the growing role of the private sector in the development arena, as highlighted by the UN Sustainable Development Goals, all firms need to relook entrepreneurship from a 'business-with-purpose' lens. The fact that venture capitalists/private equity firms are acquiring social ventures (like Bain Capital and TOMS), or that SEVs are being divested (L'Oreal and Body Shop), reinforces the need to understand which business models work. One of the biggest barriers for growth of SEVs is scalability and internationalization. This book fills the present gap between research and practice; and the non-profits and for-profit worlds.

The Cultural Context of Aging: Worldwide Perspectives, 4th Edition [ABC-CLIO](#) From the laughing clubs of India and robotic granny minders of Japan to the "Flexsecurity" system of Denmark and the elderscapes of Florida, experts in this collection bring readers cutting-edge and future-focused approaches to our aging population worldwide. In this fourth edition of an award-winning text on the consequences of global aging, a team of expert anthropologists and other social scientists presents the issues and possible solutions as our population over age 60 rises to double that of the year 2000. Chapters describe how the consequences of global aging will influence life in the 21st century in relation to biological limits on the human life span, cultural construction of the life cycle, generational exchange and kinship, makeup of households and community, and attitudes toward disability and death. This completely revised edition includes 20 new chapters covering China, Japan, Denmark, India, West and East Africa, Indonesia, Mexico, Peru, indigenous Amazonia, rural Italy, and the ethnic landscape of the United States. A popular feature is an integrated set of web book chapters listed in the contents, discussed in chapter introductions, and available on the book's website. Takes a qualitative, case study approach, with most chapters informed by original, ongoing field research around the world Draws its reputation from use in courses from anthropology, sociology, and psychology to social work, nursing, and public health at 60 universities Discusses and points readers to related web book chapters, available on the book's website Provides access to valuable web support offering literature updates, educational activities, videos, and more

Global Economic Prospects, June 2021 [World Bank Publications](#) The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

World Economic Situation and Prospects 2020 [United Nations](#) This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

Multicultural Governance in a Mobile World [Edinburgh University Press](#) Reveals Virginia Woolf's interest in Christianity, its ideas and cultural artefacts

Strengthening Forensic Science in the United States A Path Forward [National Academies Press](#) Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science

community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. **Strengthening Forensic Science in the United States** gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Corporate Responsibility and Sustainable Development Exploring the nexus of private and public interests [Routledge](#) Corporate responsibility and sustainable development are two concepts that may be able to reconcile many of the big challenges facing the world; challenges such as tensions between respect for the natural environment, social justice, and economic development; the long view versus short-term imperatives and the competing priorities between developed and developing economies. This book explores the gaps and overlaps between corporate responsibility and sustainable development. These concerns overlap because they implicate corporate practices, state development policy challenges, the concerns and priorities of non-governmental organisations, and the potential for innovative forms of organisation to address these challenges. This collection examines these questions in terms of tensions and interdependencies, between competing claims to resources, rights and responsibilities, strategy and governance, between public and private interest, and the implications for equity and the common good over the long term. This is a valuable resource for researchers, lecturers, practitioners, postgraduate and final year undergraduates in business strategy, international business and international management, public sector policy and management, international development, political economy. It is also suitable for more specialist courses on sustainability, corporate responsibility, governance and international development.

Rare Earths Industry Technological, Economic, and Environmental Implications [Elsevier](#) Rare Earths elements are composed of 15 chemical elements in the periodic table. Scandium and yttrium have similar properties, with mineral assemblages, and are therefore referred alike in the literature. Although abundant in the planet surface, the Rare Earths are not found in concentrated forms, thus making them economically valued as they are so challenging to obtain. **Rare Earths Industry: Technological, Economic and Environmental Implications** provides an interdisciplinary orientation to the topic of Rare Earths with a focus on technical, scientific, academic, economic, and environmental issues. Part I of book deals with the Rare Earths Reserves and Mining, Part II focuses on Rare Earths Processes and High-Tech Product Development, and Part III deals with Rare Earths Recycling Opportunities and Challenges. The chapters provide updated information and priceless analysis of the theme,

and they seek to present the latest techniques, approaches, processes and technologies that can reduce the costs of compliance with environmental concerns in a way it is possible to anticipate and mitigate emerging problems. Discusses the influence of policy on Rare Earth Elements to help raise interest in developing strategies for management resource development and exploitation Global contributions will address solutions in countries that are high RE producers, including China, Brazil, Australia, and South China End of chapter critical summaries outline the technological, economic and environmental implications of rare earths reserves, exploration and market Provides a concise, but meaningful, geopolitical analysis of the current worldwide scenario and importance of rare earths exploration for governments, corporate groups, and local stakeholders

Global Renewables Outlook: Energy Transformation 2050 [International Renewable Energy Agency \(IRENA\)](#) This outlook highlights climate-safe investment options until 2050, policies for transition and specific regional challenges. It also explores options to eventually cut emissions to zero.

Nigeria-India Relations in a Changing World [Rowman & Littlefield](#) This book examines the contextual, theoretical, and historical foundations of Nigeria-India relations. The author also analyzes Nigerian and Indian economic relations and contemporary dynamics in strategic engagement between the two countries.

The Impact of Big Business [Black Rabbit Books](#) Debates various topics involving big business, including "Are oil companies too powerful?", "Should pharmaceutical patents still apply in developing countries?", and "Should big business be allowed into schools?"

Global Business Driven HR Transformation: The Journey Continues (Print Edition) [Lulu.com](#)

State of The Global Workplace [Gallup Press](#) Only 15% of employees worldwide are engaged at work. This represents a major barrier to productivity for organizations everywhere - and suggests a staggering waste of human potential. Why is this engagement number so low? There are many reasons — but resistance to rapid change is a big one, Gallup's research and experience have discovered. In particular, organizations have been slow to adapt to breakneck changes produced by information technology, globalization of markets for products and labor, the rise of the gig economy, and younger workers' unique demands. Gallup's 2017 State of the Global Workplace offers analytics and advice for organizational leaders in countries and regions around the globe who are trying to manage amid this rapid change. Grounded in decades of Gallup research and consulting worldwide -- and millions of interviews -- the report advises that leaders improve productivity by becoming far more employee-centered; build strengths-based organizations to unleash workers' potential; and hire great managers to implement the positive change their organizations need not only to survive - but to thrive.

The Economics of Ecosystems and Biodiversity in Business and Enterprise [Routledge](#) This book is a product of the TEEB study (The Economics of Ecosystems and Biodiversity). It provides important evidence of growing corporate concern about biodiversity loss and offers examples of how leading companies are

taking action to conserve biodiversity and to restore ecosystems. This book reviews indicators and drivers of biodiversity loss and ecosystem decline, and shows how these present both risks and opportunities to all businesses. It examines the changing preferences of consumers for nature-friendly products and services, and offers examples of how companies are responding. The book also describes recent initiatives to enable businesses to measure, value and report their impacts and dependencies on biodiversity and ecosystem services. The authors review a range of practical tools to manage biodiversity risks in business, with examples of how companies are using these tools to reduce costs, protect their brands and deliver real business value. The book also explores the emergence of new business models that deliver biodiversity benefits and ecosystem services on a commercial basis, the policy enabling frameworks needed to stimulate investment and entrepreneurship to realize such opportunities, and the obstacles that must be overcome. The book further examines how businesses can align their actions in relation to biodiversity and ecosystem services with other corporate responsibility initiatives, including community engagement and poverty reduction. Finally, the book concludes with a summary and recommendations for action.

Faculty Mobility China and the World [Taylor & Francis](#) Adopting curriculum vitae (CV) analysis method, this book collects CVs of university faculty from 109 universities of "The Double First Class University Plan" in China, and systematically analyses the mobility pattern of faculty in China for the first time. Examining the overall mobility frequency of Chinese faculty and its growing rate, the authors predict that after the epidemic, with the growing number of returned overseas talents, there may be a third wave of faculty mobility. They demonstrate that East Asia, the United States and Europe are the main channels for the inward talent mobility to China, and there are significant differences in China's faculty mobility among different regions, disciplines and genders, which deserves further investigation. Furthermore, they argue the influencing factors of faculty mobility between China and foreign countries are highly different too. Scholars and students of Chinese higher education, international and comparative education may find this book helpful, and benefit from the analysis framework of Push and Pull Theory as long as CV analysis method.

The Federal Reserve System Purposes and Functions Provides an in-depth overview of the Federal Reserve System, including information about monetary policy and the economy, the Federal Reserve in the international sphere, supervision and regulation, consumer and community affairs and services offered by Reserve Banks. Contains several appendixes, including a brief explanation of Federal Reserve regulations, a glossary of terms, and a list of additional publications.

Business and Security Sector Reform The Case for Corporate Security Responsibility [Ubiquity Press](#) Challenges to security and human rights involving extractive and other industries gave rise to an evolving framework of policy, standards and good practice generally known as business and human rights (BHR). Problems with

inefficient and unaccountable security institutions are addressed by security sector reform (SSR). From an empirical perspective - the view from the often mutual operating grounds of BHR and SSR - both approaches share many challenges, as well as end goals. It is thus striking that only on rare occasions are challenges in governance of the security sector addressed upfront as problems of poor resource governance, and vice versa. This paper describes the grounds where SSR and BHR coincide in principles, actors and activities, and which synergies can be built on that base. It makes the business case for SSR, and the SSR case for business. The paper assesses how SSR can channel resources and know-how from business to address critical challenges related to ownership, capacity and sustainability of reform processes. Opportunities for bridging BHR and SSR are drawn from a broad range of policy and guidance, and by looking at lessons from case studies on Guinea, Colombia and Papua New Guinea. SSR and BHR should not collide; ideally, they should cohere. A variety of multistakeholder initiatives open new opportunities to bring this about, with particular relevance to SSR in extractive environments. The overall conclusion, supported by practical propositions for implementation, is that the existing policies and standards in SSR and BHR already allow, and call for, a less rigid approach to the challenges addressed in both fields.

The Greenhouse Gas Protocol A Corporate Accounting and Reporting Standard [World Resources Inst](#) **The GHG Protocol Corporate Accounting and Reporting Standard helps companies and other organizations to identify, calculate, and report GHG emissions. It is designed to set the standard for accurate, complete, consistent, relevant and transparent accounting and reporting of GHG emissions.**

Self-Initiated Expatriates in Context Recognizing Space, Time, and Institutions [Routledge](#) **This edited volume builds on the previously published *Self-Initiated Expatriation: Individual, Organizational, and National Perspectives*, which served to give in-depth insights into the concept and the processes of self-initiated expatriation and presented different groups undertaking self-initiated foreign career moves. While more than a hundred articles on self-initiated expatriation (SIE) have been published in the meanwhile, an examination of the research questions and samples of SIEs in published SIE research shows that the role of context and its impact on SIEs' career-related decisions and behaviors has not been explored sufficiently. This raises the question in how far existing research results are comparable. The aim of this follow-up volume is to deepen the understanding of SIEs' careers, focusing on the contextual influences of space, time, and institutions on the heterogeneous SIE population. More specifically, the editors aim to shed light on spatial conditions in terms of the home and host country conditions on the self-initiated expatriation experience and examine developments over time in terms of temporality of conditions and SIEs' life-course. Moreover, the influence of the institutional context in terms of occupational, organisational, and societal specificities will be analysed. All chapters are based on strong theoretical foundations that serve to conceptualise**

"context" and are written by both established and emerging global academics and researchers. **Self-Initiated Expatriates in Context** contributes to conceptual clarity in the burgeoning field of SIE research by drawing attention to the importance of exploring context and, thus, boundary conditions to careers. It offers specific guidance for an improvement of future SIE-related research in order to enhance the validity of future empirical studies as well as for an improvement of managerial practice. It will be of interest to researchers, academics, practitioners, and students in the fields of international business, human resource management, organisational studies, and strategic management. **World Development Report 1978** [World Bank Publications](#) This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects. **Environmental, Social, and Governance Perspectives on Economic Development in Asia** [Emerald Group Publishing](#) This new volume of the **International Symposia in Economic Theory and Econometrics** explores the latest economic and financial developments in Asia.
