Food Research

Nutritional Anthropology and Archaeological Methods

Berghahn Books *Biocultural and archaeological research on food, past and present, often relies on very specific, precise, methods for data collection and analysis. These are presented here in a broad-based review. Individual chapters provide opportunities to think through the adoption of methods by reviewing the history of their use along with a discussion of research conducted using those methods. A case study from the author's own work is included in each chapter to illustrate why the methods were adopted in that particular case along with abundant additional resources to further develop and explore those methods.*

Food Culture

Anthropology, Linguistics and Food Studies

Berghahn Books *This volume offers a comprehensive guide to methods used in the sociocultural, linguistic and historical research of food use. This volume is unique in offering food-related research methods from multiple academic disciplines, and includes methods that bridge disciplines to provide a thorough review of best practices. In each chapter, a case study from the author's own work is to illustrate why the methods were adopted in that particular case along with abundant additional resources to further develop and explore the methods.*

Food Health

Nutrition, Technology, and Public Health

Berghahn Books *Nutritional Anthropology and public health research and programming have employed similar methodologies for decades; many anthropologists are public health practitioners while many public health practitioners have been trained as medical or biological anthropologists. Recognizing such professional connections, this volume provides in-depth analysis and comprehensive review of methods necessary to design, plan, implement and analyze public health programming using anthropological best practices. To illustrates the rationale for use of particular methods, each chapter elaborates a case study from the author's own work, showing why particular methods were adopted in each case.*

Health Claims and Food Labelling

Royal Society of Chemistry Providing an introduction to the use of nutrition and health claims, this book explores these claims around the world and the impact of the different legislations on consumers as well as likely developments in the future. As nations tackle the food and health issues of the 21st century, this book will provide a single source drawing together all of these topics. In recent years, nutrition and health claims displayed on food packaging have become more regulated with the dual aims of protecting consumers from false claims and promoting consumption of foods with proven health benefits. Edited by Siân Astley, with contributions from renowned experts, chapters describe the legislation underpinning nutrition and health claims globally, explain the permitted use of claims globally in theory and practice and explore differences between the various legislative frameworks. This book will be of interest to those involved in food health and dietary impact research, as well as food manufacturers, legal and healthcare students with an interest in food, nutrition, bioactive compounds and human health.

Safety and Health at Work, ILO-CIS Bulletin

Impact Evaluation in Practice, Second Edition

World Bank Publications The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

The United Nations World Water Development Report

Valuing Water

UNESCO Publishing Water is a finite and non-substitutable resource. As the foundation of life, societies and economies, it carries multiple values and benefits. But unlike most other natural resources, it has proven extremely difficult to determine its true 'value'. The 2021 edition of the United Nations World Water Development Report, titled "Valuing Water" assesses the current status of and challenges to the valuation of water across different sectors and perspectives and identifies ways in which valuation can be promoted as a tool to help improve its management and achieve global sustainable development.

Food Gardens for a Changing World

CABI Food gardening is becoming increasingly popular, as people look for new ways to live more sustainably and minimize harm to the environment. This book addresses the 21st century trends which bring new challenges to food gardening - anthropogenic climate change, environmental degradation, natural resource scarcity, and social inequity - and explains the basic biological, ecological and social concepts needed to understand and respond to them. Examples throughout the text demonstrate how to successfully use these concepts, while supporting gardeners' values, and their goals for themselves, their communities and the world.
