School, Family, and Community Partnerships

Your Handbook for Action

Corwin Press Strengthen family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, this fourth edition of a bestseller provides tools and guidelines to use to develop more effective and equitable programs of family and community engagement. Written by a team of well-known experts, this foundational text demonstrates a proven approach to implement and sustain inclusive, goal-oriented programs. Readers will find: Many examples and vignettes Rubrics and checklists for implementation of plans CD-ROM complete with slides and notes for workshop presentations

Improving Teaching, Learning, Equity, and Success in Gateway Courses

New Directions for Higher Education

John Wiley & Sons As long as there have been U. S. colleges and universities, there have been entry courses that pose difficulties for students 1/2 courses that have served more as 1/2weeding-out 1/2 rather than 1/2gearing-up 1/2 experiences for undergraduates. This volume makes the case that the weed-out dynamic is no longer acceptable 1/2 if it ever was. Contemporary postsecondary education is characterized by vastly expanded access for historically underserved populations of students, and this new level of access is coupled with increased scrutiny of retention and graduation outcomes. Chapters in this volume define and explore issues in gateway courses and provide various examples of how to improve teaching, learning and outcomes in these foundational components of the undergraduate experience. This is the 180th volume of the Jossey-Bass quarterly report series **New Directions for Higher Education**. Addressed to presidents, vice presidents, deans, and other higher education decision makers on all kinds of campuses, it provides timely information and authoritative advice about major issues and administrative problems confronting every institution.

Handbook of Competence and Motivation, Second Edition

Theory and Application

Guilford Publications Now completely revised (over 90% new), this handbook established the concept of competence as an organizing framework for the field of achievement motivation. With an increased focus on connecting theory to application, the second edition incorporates diverse perspectives on why and how individuals are motivated to work toward competence in school, work, sports, and other settings. Leading authorities present cutting-edge findings on the psychological, sociocultural, and biological processes that shape competence motivation across development, analyzing the role of intelligence, self-regulated learning, emotions, creativity, gender and racial stereotypes, self-perceptions, achievement values, parenting practices, teacher behaviors, workplace environments, and many other factors. As a special bonus, purchasers of the second edition can download a supplemental e-book featuring several notable, highly cited chapters from the first edition. ˆ New to This Edition ˆ Most chapters are new, reflecting over a decade of theoretical and methodological developments. ˆ Each chapter now has an applied as well as conceptual focus, showcasing advances in intervention research. ˆ Additional topics: self-regulation in early childhood, self-determination theory, challenge and threat appraisals, performance incentives, achievement emotions, job burnout, gene-environment interactions, class-based models of competence, and the impact of social group membership. ˆ Supplemental e-book featuring selected chapters from the prior edition.

Visible Learning

A Synthesis of Over 800 Meta-Analyses Relating to Achievement

Routledge This unique and ground-breaking book is the result of 15 years research and synthesises over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding. The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers - an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in teaching and schools.

Special Educational Needs for Qualified and Trainee Teachers

A practical guide to the new changes

Routledge This completely revised and updated edition, previously published as **Special Educational Needs for NQTs and TAs**, addresses the latest Teachers' Standards, and their application in meeting the most recent developments and changes in the special educational needs system and the new SEN Code of Practice. Essential reading and an invaluable guide for all qualified, newly qualified and trainee teachers, this highly practical text relates to those accessing SEN training via teaching school alliances, as well as Higher Education. Full of tips and strategies on how to meet the needs of a diversity of children and young people with special educational needs, in a range of educational settings, chapters cover: the latest Teachers' Standards aligned to the most recent SEND changes the revised SEN Code of Practice, the Children and Families Act, and the Equality Act and its related Duties teaching schools, specialist leaders of education in SEN, and new training models for building teacher capacity in SEN how to meet the latest OFSTED inspection requirements for SEND what works best in the effective teaching of pupils with SEN and those eligible for the pupil premium Featuring useful checklists, templates and photocopiable, downloadable resources to support professional development in SEN, this practical resource contains a wealth of valuable advice, in addition to signposting to further information. This no-nonsense, down-to-earth authoritative text will provide essential reading for all experienced qualified, newly qualified and trainee teachers, as well as to those delivering SEND training in Higher Education, local authorities, and in teaching schools and their alliances.

Assessing Accomplished Teaching

Advanced-Level Certification Programs

National Academies Press The mission of the National Board for Professional Teaching Standards (NBPTS) is to establish "high and rigorous standards for what teachers should know and be able to do, to certify teachers who meet those standards, and to advance other education reforms for the purpose of improving student learning in American schools." In response to a request from the U.S. Congress, the National Research Council developed a framework for evaluating programs that award advanced-level teacher certification and applied that framework in an evaluation of the impacts of the NBPTS. Specifically, this book addresses the impacts on students, teachers, and the educational system in this country. **Assessing Accomplished Teaching** finds that teachers who earn board certification are more effective at improving their students' achievement than other teachers, but school systems vary greatly in the extent to which they recognize and make use of board-certified teachers. Many of the questions on the evaluation framework could not be answered because the data have not been collected, and the report makes recommendations for the kinds of research that are needed to fully evaluate the impacts of board certification by the NBPTS.

The British Study Edition of the Urantia Papers Book [eReader PDF]

[Tigran Aivazian](#) The British Study Edition of the Urantia Papers is based on the standard SRT text, but uses the metric system and adds a critical apparatus of textual variants and study notes.

Foundations of Education

[SAGE Publications](#) Foundations of Education makes core topics in education accessible and personally meaningful to students pursuing a career within the education profession. The Third Edition offers readers the breadth of coverage, scholarly depth, and conceptual analysis of contemporary issues that will help them gain a realistic and insightful perspective of the field.

Economics of Education

[Elsevier](#) A collection of short, stand-alone chapters divided into five sections including overview of the field; private and social returns to human capital investments; production, costs and financing of education; teachers and teacher labor markets; and education markets, choice and incentives. The collection provides international perspectives that describe the origins of these subjects, their major issues and proponents, their landmark studies, and opportunities for future research. The 70 contributors are each well-regarded economists whose research has advanced the topic on which they write, and this book fulfills an undersupplied niche for a text in the economics of education. The chapters come from the acclaimed International Encyclopedia of Education, 3e (2010), edited by Eva Baker, Barry McGaw, and Penelope Peterson. The Encyclopedia contains over 1,350 articles in 24 sections that stretch from educational philosophies and technologies to measurement, leadership, and national systems of education. This single volume textbook presents a cohesive view of this increasingly important area of economics Superb contributions from well-regarded economist convey unique and useful perspectives Chapters contain an extensive bibliography and further readings to enable interested researchers to extend their knowledge into each specific topic

The Framework for Success in Postsecondary Writing

Scholarship and Applications

[Parlor Press LLC](#) Illustrates the widespread applications of the Framework for Success in Postsecondary Writing, especially the eight habits of mind, in helping students to be successful not only in postsecondary writing courses but also in four arenas of life: academic, professional, civic, and personal.

The First Sourcebook on Nordic Research in Mathematics Education

Norway, Sweden, Iceland, Denmark and contributions from Finland

[IAP](#) The First Sourcebook on Nordic Research in Mathematics Education: Norway, Sweden, Iceland, Denmark and contributions from Finland provides the first comprehensive and unified treatment of historical and contemporary research trends in mathematics education in the Nordic world. The book is organized in sections co-ordinated by active researchers in mathematics education in Norway, Sweden, Iceland, Denmark, and Finland. The purpose of this sourcebook is to synthesize and survey the established body of research in these countries with findings that have influenced ongoing research agendas, informed practice, framed curricula and policy. The sections for each country also include historical articles in addition to exemplary examples of recently conducted research oriented towards the future. The book will serve as a standard reference for mathematics education researchers, policy makers, practitioners and students both in and outside the Nordic countries.

Distance Education for Teacher Training

Vocabulary for Achievement

Sixth Course

Current Achievements, Challenges and Digital Chances of Knowledge Based Economy

[Springer Nature](#) This book is based on research from Russia, Hungary, Bulgaria, Great Britain, Switzerland and the Czech Republic on issues related to knowledge-based economy development. The idea for this book was developed during three international conferences on digitalization: VI, VII and VIII International Scientific Weeks, organized by Samara State University of Economics (Samara, Russia) in 2018-2020. It is an initiative by the scientific and business organizations in the Samara Region and their Russian and international partners to analyze the current digitalization of social-economic systems, the problems and perspectives of this process, and its role in the creation and development of a new type of economy and new quality of human capital. All the contributions focus on the search for effective ways of adapting to the new digital reality and are based analyses of international statistics, and data from specific companies, educational institutions and governmental development programs. The book explores a variety of topics, including • Knowledge and Information as Basic Values of a New Economic Paradigm; • Information Technologies for Ensuring Sustainable Development of Organizations; • Augmented Reality, Artificial Intelligence and Big Data in Education and Business; • Digital Platforms and the Sharing Economy; • Potential of Digital Footprints in Economies and Education; • Sociocultural Consequences of Digitalization.

Teaching As Leadership

The Highly Effective Teacher's Guide to Closing the Achievement Gap

[John Wiley & Sons](#) A road map for teachers who strive to be highly effective leaders in our nation's classrooms Teach For America has fought the daunting battle of educational equity for the last twenty years. Based on evidence from classrooms across the country, they've discovered much about effective teaching practice, and distilled these findings into the six principles presented in this book. The Teaching As Leadership framework inspires teachers to: Set Big Goals; Invest Students and Their Families; Plan Purposefully; Execute Effectively; Continuously Increase Effectiveness; Work Relentlessly. The results are better educational outcomes for our nation's children, particularly those who live in low-income communities. Inspires educators to be leaders in their classrooms and schools Demystifies what it means to be an effective teacher, describes key elements of practice and provides a clear vision of success Addresses the challenges every teacher, in every classroom, faces on a daily basis An accompanying website includes a wealth of tools, videos, sample lessons, discussion boards, and case studies.

Teaching and Learning Secondary School Mathematics Canadian Perspectives in an International Context

Springer This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally, as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics, as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another, and this volume takes the stance that the development of a united vision, supported by both research and professional dialog, provides the first step.

Teaching the Discipline of History in an Age of Standards

Springer This book discusses the discipline standards of History in Australian universities in order to help historians understand the Threshold Learning Outcomes and to assist in their practical application. It is divided into two sections: The first offers a scholarly exploration of contemporary issues in history teaching, while the second section discusses each of the Threshold Learning Outcomes and provides real-world examples of quality pedagogical practice. Although the book focuses on the discipline of history in Australia, other subjects and other countries are facing the same dilemmas. As such, it includes chapters that address the international context and bring an international perspective to the engagement with discipline standards. The innovation and leadership of this scholarly community represents a new stage in the transformation and renewal of history teaching.

TALIS 2018 Results (Volume I) Teachers and School Leaders as Lifelong Learners

Teachers and School Leaders as Lifelong Learners

OECD Publishing The OECD Teaching and Learning International Survey (TALIS) is the largest international survey asking teachers and school leaders about their working conditions and learning environments, and provides a barometer of the profession every five years. Results from the 2018 cycle explore and examine the various dimensions of teacher and school leader professionalism across education systems.

Teachers, Teaching, and Reform

Perspectives on Efforts to Improve Educational Outcomes

Routledge Comprised of contributions from distinguished education scholars, Teachers, Teaching, and Reform takes a critical look at evidence about systemic efforts to identify excellent teachers and promote excellent teaching practices. Organized to include diverse and often contrasting perspectives on the topic, this book provides insight into some of the most vexing historical issues affecting the policies that shape current reform initiatives focused on teachers, teaching, and educational outcomes. Educational scholars, policy makers, instructors, and graduate students will come away with a keen understanding of different perspectives about the assessment of teachers, teaching, and teacher education programs, as well as strategies for improving educational outcomes for students.

Achievement Emotions in University Teaching and Learning, Students' Stress and Well-being

Frontiers Media SA

Great Source Vocabulary for Achievement

Student Edition Grade 6

Great Source Education Group Incorporated - Updated word lists to reflect current word usage and frequency- More reproducible tests and new sentence completion exercises to prepare students for the revised SAT - Context sentences for related forms of vocabulary words- New reading passages and activities to improve comprehension and apply lessons- Expanded teacher and student notes that make implementation easy

Evaluating What Good Teachers Do

Eight Research-Based Standards for Assessing Teacher Excellence

Routledge This book is based on author James H. Stronge's 20-plus years of consulting with school districts and other educational organizations in designing, piloting, and training educators in the use of teacher-performance evaluation systems. Its primary purpose is to help both teachers and their evaluators collect more comprehensive and accurate assessment data for judging teacher effectiveness. The author provides field-tested teacher-evaluation systems based on performance standards which include data collection tools and performance appraisal rubrics.

Early Warning Systems and Targeted Interventions for Student Success in Online Courses

IGI Global Online learning has increasingly been viewed as a possible way to remove barriers associated with traditional face-to-face teaching, such as overcrowded classrooms and shortage of certified teachers. While online learning has been recognized as a possible approach to deliver more desirable learning outcomes, close to half of online students drop out as a result of student-related, course-related, and out-of-school-related factors (e.g., poor self-regulation; ineffective teacher-student, student-student, and platform-student interactions; low household income). Many educators have expressed concern over students who unexpectedly begin to struggle and appear to fall off track without apparent reason. A well-implemented early warning system, therefore, can help educators identify students at risk of dropping out and assign and monitor interventions to keep them on track for graduation. Despite the popularity of early warning systems, research on their design and implementation is sparse. Early Warning Systems and Targeted Interventions for Student Success in Online Courses is a cutting-edge research publication that examines current theoretical frameworks, research projects, and empirical studies related to the design, implementation, and evaluation of early warning systems and targeted interventions and discusses their implications for policy and practice. Moreover, this book will review common challenges of early warning systems and dashboard design and will explore design principles and data visualization tools to make data more understandable and, therefore, more actionable. Highlighting a range of topics such as curriculum design, game-based learning, and learning support, it is ideal for academicians, policymakers, administrators, researchers, education professionals, instructional designers, data analysts, and students.

Success International English Skills for Cambridge IGCSE® Teacher's Book with Audio CD

Cambridge University Press The Success International series offers a practical approach to language learning and support. Success International English Skills for Cambridge IGCSE® Teacher's Book offers teachers tips and advice for preparation for the Cambridge IGCSE® in English as a Second Language. The series has been fully updated in line with the revised syllabus updates, including a new text design, making the course appealing and exciting. The series provides stimulating topics, international perspectives and relevant examples to encourage students to explore and improve their use of English. Answers to both the Student's Book and the Workbook are available in the Teacher's Book. Audio CD for listening activities included in Teacher's Book.

How People Learn

Brain, Mind, Experience, and School: Expanded Edition

[National Academies Press](#) First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Exploring the Mathematical Education of Teachers Using TEDS-M Data

[Springer](#) This book uses the publicly available TEDS-M data to answer such questions as: How does teacher education contribute to the learning outcomes of future teachers? Are there programs that are more successful than others in helping teachers learn to teach mathematics? How does the local and national policy environment contribute to teacher education outcomes? It invites readers to explore these questions across a large number of international settings. The importance of preparing future mathematics teachers has become a priority across many nations. Across the globe nations have allocated resources and expertise to this endeavour. Yet in spite of the importance accorded to teacher education not much is known about different approaches to preparing knowledgeable teachers and whether these approaches do in fact achieve their purpose. The Mathematics Teacher Education and Development Study (TEDS-M) is the first, and to date the only, cross-national study using scientific and representative samples to provide empirical data on the knowledge that future mathematics teachers of primary and secondary school acquire in their teacher education programs. The study addresses the central importance of teacher knowledge in learning to teach mathematics by examining variation in the nature and influence of teacher education programs within and across countries. The study collected data on teacher education programs structure, curriculum and opportunities to learn, on teacher educators' characteristics and beliefs, and on future mathematics teachers' individual characteristics, beliefs, and mathematics and pedagogical knowledge across 17 countries providing a unique opportunity to explore enduring questions in the field.

Student Success in College: Doing What Works!

[Cengage Learning](#) Learn more about your personal identity and strengths, determine your goals and build your career and academic skills with Harrington's **STUDENT SUCCESS IN COLLEGE: DOING WHAT WORKS!**, 4E. This updated edition explores the keys to academic and career success, beginning with brief, research-driven self-assessments that give you a better understanding of your own unique capabilities. Current content incorporates the latest research in the field with an emphasis on career skills. You explore career options and learn how to create and strengthen your own professional network so that you are well positioned for career success. You also sharpen proven academic skills as you work with high-level academic sources to increase your information literacy and critical-thinking. This edition focuses on the skills that are proven in current research to help you achieve success. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Teaching in the Middle and Secondary Schools: Pearson New International Edition PDF eBook

[Pearson Higher Ed](#) The full text downloaded to your computer With eBooks you can: search for key concepts, words and phrases make highlights and notes as you study share your notes with friends eBooks are downloaded to your computer and accessible either offline through the Bookshelf (available as a free download), available online and also via the iPad and Android apps. Upon purchase, you will receive via email the code and instructions on how to access this product. Time limit The eBooks products do not have an expiry date. You will continue to access your digital ebook products whilst you have your Bookshelf installed. Now in its 10th Edition, *Teaching in the Middle and Secondary Schools* remains an influential text for pre-service teachers studying middle and secondary school teaching methods. Written by an expert on multicultural education, diversity and cultural differences among students are thematically integrated throughout this text and applied to all areas of study. Containing activities that focus on student-centered learning, real life scenarios that apply critical teaching skills, and in-chapter exercises and end-of-chapter activities, this text is both practical and applicable as a valuable instructional text and future resource for professionals. The new tenth edition is tech savvy and updated, including a greater focus on middle school teaching methods and curriculum, twenty-first century skills, and analysis of student assessment and achievement.

Utilizing Learning Analytics to Support Study Success

[Springer](#) Students often enter higher education academically unprepared and with unrealistic perceptions and expectations of university life, which are critical factors that influence students' decisions to leave their institutions prior to degree completion. Advances in educational technology and the current availability of vast amounts of educational data make it possible to represent how students interact with higher education resources, as well as provide insights into students' learning behavior and processes. This volume offers new research in such learning analytics and demonstrates how they support students at institutions of higher education by offering personalized and adaptive support of their learning journey. It focuses on four major areas of discussion: · Theoretical perspectives linking learning analytics and study success. · Technological innovations for supporting student learning. · Issues and challenges for implementing learning analytics at higher education institutions. · Case studies showcasing successfully implemented learning analytics strategies at higher education institutions. *Utilizing Learning Analytics to Support Study Success* ably exemplifies how educational data and innovative digital technologies contribute to successful learning and teaching scenarios and provides critical insight to researchers, graduate students, teachers, and administrators in the general areas of education, educational psychology, academic and organizational development, and instructional technology.

Writing Literature Reviews

A Guide for Students of the Social and Behavioral Sciences

[Routledge](#) This useful guide educates students in the preparation of literature reviews for term projects, theses, and dissertations. The authors provide numerous examples from published reviews that illustrate the guidelines discussed throughout the book. New to the seventh edition: Each chapter breaks down the larger holistic review of literature exercise into a series of smaller, manageable steps Practical instructions for navigating today's digital libraries Comprehensive discussions about digital tools, including bibliographic and plagiarism detection software Chapter activities that reflect the book's updated content New model literature reviews Online resources designed to help instructors plan and teach their courses (www.routledge.com/9780415315746).

Understanding by Design

[ASCD](#) Presents a multifaceted model of understanding, which is based on the premise that people can demonstrate understanding in a variety of ways.

Online Teaching at Its Best

Merging Instructional Design with Teaching and Learning Research

[John Wiley & Sons](#) Bring pedagogy and cognitive science to online learning environments *Online Teaching at Its Best: Merging Instructional Design with Teaching and Learning Research*, 2nd Edition, is the scholarly resource for online learning that faculty, instructional designers, and administrators have raved about. This book addresses course design, teaching, and student motivation across the continuum of online teaching modes—remote, hybrid, hyflex, and fully online—integrating these with pedagogical and cognitive science, and grounding its recommendations in the latest research. The book will help you design or redesign your courses to ensure strong course alignment and effective student learning in any of these teaching modes. Its emphasis on evidence-based practices makes this one of the most scholarly books of its kind on the market today. This new edition features significant new content including more active learning formats for small groups across the online teaching continuum, strategies and tools for scripting and recording effective micro-lectures, ways to integrate quiz items within micro-lectures, more conferencing software and techniques to add interactivity, and a guide for rapid transition from face-to-face

to online teaching. You'll also find updated examples, references, and quotes to reflect more evolved technology. Adopt new pedagogical techniques designed specifically for remote, hybrid, hybrid, and fully online learning environments. Ensure strong course alignment and effective student learning for all these modes of instruction. Increase student retention, build necessary support structures, and train faculty more effectively. Integrate research-based course design and cognitive psychology into graduate or undergraduate programs. Distance is no barrier to a great education. *Online Teaching at Its Best* provides practical, real-world advice grounded in educational and psychological science to help online instructors, instructional designers, and administrators deliver an exceptional learning experience even under emergency conditions.

What Can PISA 2012 Data Tell Us?

Performance and Challenges in Five Participating Southeast Asian Countries

Springer This is the first book regarding the issues of PISA that has been published with respect to the Southeast Asian region. It is hoped that the content of this book can benefit and provide greater understanding for readers of several important aspects: (a) country performance in PISA 2012 for each participating Southeast Asian country, (b) the need for international comparative studies from the perspective at all levels of the teaching and learning process, (c) equity and quality of education, (d) how PISA impacts on policy making, and (e) the initiatives and future directions, and challenges to improve PISA performance in the future cycles of the PISA Studies. The major issues raised in this book warrant investigation and reporting to all countries of the World, including not only those countries that were engaged in PISA 2012, but also to the approximately 200 countries that are currently in the United Nations Organisation. In these regards, the readership of this book could be extended to the educators, officers from the ministries of education, researchers, policy makers, practising teachers, lecturers in universities and teacher training institutions, postgraduate students, as well as both primary and secondary school principals and teachers.

Teaching in Lifelong Learning 3e A guide to theory and practice

McGraw-Hill Education (UK) Addressing the Professional Standards for Teachers and Trainers, this bestselling textbook helpfully balances theory and practice, introducing key theories and concepts relating to learning and assessment as well as providing practical advice on teaching. Extensively revised and updated to reflect the current educational policy environment, this textbook for teaching provides thorough and extensive coverage of the topics for higher-level awards in Education and Training. The textbook provides a logical progression through the essential aspects of teaching, such as planning and assessment; it considers key related areas including teacher professionalism, equality and diversity, and mentoring and coaching; and it presents this invaluable guidance in an accessible and readable format. In outlining the challenges, opportunities, and debates in and around lifelong learning, the editors and contributing authors draw on their extensive teaching experience, as well as offering an evidence-based approach with a wide range of research. *Teaching in Lifelong Learning: A Guide to Theory and Practice* is core reading for those teaching or preparing to teach in further, higher and community education as well as in public sector contexts and in private training organisations, including those studying for CertEd/PGCE and related awards, such as the Level 4 Certificate and Level 5 Diploma in Education and Training. 'Teacher education in FE continues to be an important and unresolved issue, and this book is a great asset in supporting individuals in understanding and developing their practices. With a focus on developing critical, inquiring practitioners, the text reads like an experienced mentor sharing pointers, questions, and useful readings over a collegial cup of coffee'. Dr Tim Herrick, Senior University Teacher, University of Sheffield, UK
