DO ARCHIVES HAVE VALUE?

Facet Publishing This book will explore ways of establishing value in the archives by using a variety of methodologies and exploring a range of contexts. In the United Kingdom DCMS uses various valuation matrices to allocate resources, whilst other organizations both internationally and domestically (such as local authorities and universities) are following suit. In some contexts in the UK, other developed countries, and particularly developing countries, archives have an evidential value to redress grievances and to assist in the fight against fraud and corruption. The retention of records for evidential value demands the retention of case papers relating to individuals that until now have not normally been retained. As more and more record keeping becomes digital, costs of preservation will inevitably increase which makes developing methodologies to justify additional costs urgent, particularly in poorly resourced developing countries which have been encouraged to go digital by aid agencies and donor countries. This book will be useful reading for professional archivists and students on archival studies courses. In the wider world of cultural heritage valuation is of increasing importance in justifying services and bidding for scant resources. As a result, Do Archives Have Value? will also be of interest to senior management with oversight of libraries and museums, owners of collections and external funders.

TEACHERS AS COURSE DEVELOPERS

Cambridge University Press This is a book about how language teachers themselves rather than curriculum specialists develop and implement their own courses. The paperback edition illuminates the process of course development through the narratives of six ELT teachers who have designed courses in widely varying contexts worldwide. Graves provides a framework for course design and examines how these six teachers have utilized or departed from the framework in meeting the challenges of their particular situations. Each narrative is followed by an analysis and a set of tasks that direct the reader's attention to a particular aspect of the framework.

TEACHERS OF MATHEMATICS

SOME ASPECTS OF PROFESSIONAL LIFE

SAGE The professional life of mathematics teachers consists not only of work in classrooms, but also of the varied activities which support that work. This book describes and comments on many of those activities - induction, in-service courses, school-focused in-service training, links with industry and work in teachers' centres. It is compiled of contributions from many primary and secondary teachers, who speak about their in-service training needs and activities with a vivid clarity which will strike chords with teachers, employers and in-service providers alike. The various chapters consider teachers as individuals, and maths teaching in primary and secondary schools. The book looks at the role of the local education authority in providing in-service training, and other courses provided by colleges and universities. A variety of types of professional development are considered, as well as trends and priorities in mathematics teaching.

TAX REFORM IN INDONESIA

"This book is a humble attempt to review the major taxes in Indonesia, pointing out major problems which need to be addressed to make the tax system efficient and meet the goals of fiscal policy. In Chapter one, we have reproduced the publication: Indonesian Pocket Tax Book, 1902 by Drs Hadi Sutanto and Rekan, published by PricewaterhouseCoopers. We acknowledge with thanks permission from the authors and publishers to reproduce this highly educational and updated publication. On the basis of this tax review, we have examined the tax system, as a whole from the points of view of various principles of taxation. Based on this analysis, we have built a case for comprehensive tax reforms in chapter two. In Chapter three, we have analyzed problems in the income tax and pointed out need for enlarging tax base through appropriate policies. Similarly, in Chapter four we have examined the Value Added Tax with a view to make it more revenue productive and efficient. In Appendix one, we have described the Value Added Tax in Canada, which is generally hailed in the literature as the model for federal structures like Indonesia."--P. [vi].
