THE PRINCESS AND THE GOBLIN ILLUSTRATED

"The Princess and the Goblin is a children's fantasy novel by George MacDonald. It was published in 1872 by Strahan & Co. Anne Thaxter Eaton writes in A Critical History of Children's Literature that The Princess and the Goblin and its sequel ""quietly suggest in every incident ideas of courage and honor.""[1] Jeffrey Holdaway, in the New Zealand Art Monthly, said that both books start out as ""normal fairytales but slowly become stranger"", and that they contain layers of symbolism similar to that of Lewis Carroll's work"

A MANUAL FOR WRITERS OF DISSERTATIONS

DEEP LEARNING

MIT Press An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. "Written by three experts in the field, Deep Learning is the only comprehensive book on the subject." —Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX Deep learning is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. Deep Learning can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. A website offers supplementary material for both readers and instructors.

RECITATIF

A STORY

Knopf NEW YORK TIMES BEST SELLER • A beautiful, arresting story about race and the relationships that shape us through life by the legendary Nobel Prize winner—for the first time in a beautifully produced stand-alone edition, with an introduction by Zadie Smith "A puzzle of a story, then—a game.... When [Morrison] called Recitatif an 'experiment' she meant it. The subject of the experiment is the reader." —Zadie Smith, award-winning, best-selling author of White Teeth In this 1983 short story—the only short story Morrison ever wrote—we meet Twyla and Roberta, who have known each other since they were eight years old and spent four months together as roommates in St. Bonaventure shelter. Inseparable then, they lose touch as they grow older, only later to find each other again at a diner, a grocery store, and again at a protest. Seemingly at opposite ends of every problem, and at each other's throats each time they meet, the two women still cannot deny the deep bond their shared experience has forged between them. Another work of genius by this masterly writer, Recitatif keeps Twyla's and Roberta's races ambiguous throughout the story. Morrison herself described Recitatif, a story which will keep readers thinking and discussing for years to come, as "an experiment in the removal of all racial codes from a narrative about two characters of different races for whom racial identity is crucial." We know that one is white and one is Black, but which is which? And who is right about the race of the woman the girls tormented at the orphanage? A remarkable look into what keeps us together and what keeps us apart, and how perceptions are made tangible by reality, Recitatif is a gift to readers in these changing times.

BETWEEN THE WORLD AND ME

One World #1 NEW YORK TIMES BESTSELLER • NATIONAL BOOK AWARD WINNER • NAMED ONE OF TIME'S TEN BEST NONFICTION BOOKS OF THE DECADE • PULITZER PRIZE FINALIST • NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST • ONE OF OPRAH'S "BOOKS THAT HELP ME THROUGH" • NOW AN HBO ORIGINAL SPECIAL EVENT Hailed by Toni Morrison as "required reading," a bold and personal literary exploration of America's racial history by "the most important essayist in a generation and a writer who changed the national political conversation about race" (Rolling Stone) NAMED ONE OF THE MOST INFLUENTIAL BOOKS OF THE DECADE BY CNN • NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY The New York Times Book Review • O: The Oprah Magazine • The Washington Post • People • Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

WRITING NEW MEDIA

THEORY AND APPLICATIONS FOR EXPANDING THE TEACHING OF COMPOSITION

University Press of Colorado As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements--from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing--web sites, presentation "slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of Writing New Media bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.

THE FUTURE OF THE BOOK

Univ of California Press The death of the book has been duly announced, and with it the end of brick-and-mortar libraries, traditional publishers, linear narrative, authorship, and disciplinarity, along with the emergence of a more equitable discursive order. These essays suggest that it won't be that simple. While the contributors to this volume are enthusiastic about the possibilities created by digital technologies, they also see the new media raising serious critical issues that force us to reexamine basic notions about rhetoric, reading, and the nature of discourse itself.
