Kimes and Wagner (2001) defined the general strategy of revenue management as the practice used by service firms with fixed capacity to match the supply of a perishable commodity with forecasted demand via strategies that manipulate price and time of consumption. Furthermore, revenue management and pricing programs have commonly been praised to have the potential to increase revenues by 3 to 8 % which can in turn result in 50 to 100 % profit improvements. This thesis proposes a departmental and functional integration of various activities to arrive at an integrated revenue management approach that is viewed as the necessary reaction to changing market environment conditions. Information and communication technologies (ICTs) have been changing the tourism industry structure globally, while developing many new opportunities and threats. In this new environment, revenue management becomes as important and challenging as never before and to operate effectively, skills are required to combine several knowledge areas steadily and creatively to make profit from the process. Consequently, it is proposed that particularly due to the modern tourism environment, companies have to make use of strategic integrated revenue management to offset the threats and take advantage of opportunities that the modern tourism environment represents. An integrated approach to revenue management spans the disciplines of yield management, pricing, marketing, sales and e-commerce distribution and seeks to identify linkages to effectively and efficiently coordinate activities in the different areas to arrive at total profit optimization. The thesis is designed to illustrate how Revenue Management Integration (RMI) could be achieved, and the research part aims to assess whether hotel chains that embrace a higher degree of Revenue Management Integration operate at higher profitability. 1.1. Research Questions This thesis is designed to evaluate whether an integrated revenue management process provides benefits in terms of financial performance to tourism companies selling perishable inventory such as hotel chains, in particular in a changed and more competitive tourism environment. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people' (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. College is far too expensive for many people today, and the confusing mix of federal, state, institutional, and private financial aid leaves countless students without the resources they need to pay for it. In Paying the Price, education scholar Sara Goldrick-Rab reveals the devastating effect of these shortfalls. Goldrick-Rab examines a study of 3,000 students who used the support of federal aid and Pell Grants to enroll in public colleges and universities in Wisconsin in 2008. Half the students in the study left college without a degree, while less than 20 percent finished within five years. The cause of their problems, time and again, was lack of money. Unable to afford tuition, books, and living expenses, they worked too many hours at outside jobs, dropped classes, took time off to save money, and even went without adequate food or housing. In many heartbreaking cases, they simply left school—not with a degree, but with crippling debt. Goldrick-Rab combines that data with devastating stories of six individual students, whose struggles make clear the human and financial costs of our convoluted financial aid policies. In the final section of the book, Goldrick-Rab offers a range of possible solutions, from technical improvements to the financial aid application process, to a bold, public sector-focused "first degree free" program. "Honestly one of the most exciting books I've read, because [Goldrick-Rab has] solutions. It's a manual that I'd recommend to anyone out there, if you're a parent, if you're a teacher, if you're a student."—Trevor Noah, The Daily Show **Blockchain 3.0 for Sustainable Development** Walter de Gruyter GmbH & Co KG This book will focus on the use of Blockchain 3.0 for sustainable development.
