STRENGTHENING FORENSIC SCIENCE IN THE UNITED STATES

A PATH FORWARD

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

MANAGERIAL ACCOUNTANT'S COMPASS

RESEARCH GENESIS AND DEVELOPMENT

Routledge This is the first detailed view of the managerial accountant's role and responsibilities in organization setting. Its aim is to foster role development: the opportunity to work at an advanced level of practice. Accounting studies develop technical skills associated with topics, and, responding to defined scenarios but provide very little guidance on what to recognizing and approaching the broad problems or challenges under conditions of uncertainty. It is a double first because it provides the managerial accountant's compass as a general purpose analytical framework for managerial accounting

independent of any selected theory and method. The metaphor of a compass creates a mental schema for its four points named (1) goals and principles, (2) boundaries and constraints, (3) methods and models, and, (4) collegial relationships. Dynastic Chinese and some other Central Asian cultures, view the center as a fifth principal direction, giving a total of five points. The center represents a high standard ethical conduct and self-care, or moral compass. Managerial Accountant's Compass offers an integrated and systematic guide to approaching situations that are constantly changing. It gives a protective starting pattern which produces new meanings and awareness of the ambiguity and uncertainty for each situation. Ultimately the managerial accountant's compass can help you make more effective sense of yourself, your expertise and your practice in the organization where you work, which should open career opportunities.

A GUIDE TO BECOMING A SCHOLARLY PRACTITIONER IN STUDENT AFFAIRS

Stylus Publishing, LLC *Student affairs professionals are increasingly being called upon to become scholar practitioners, to reflect on and share their experiences to further the knowledge of the field, and to disseminate practices to promote student learning and development. This book offers practical guidance to anyone in the field interested in presenting at conferences or publishing in scholarly and professional journals, and sets the work of scholarly practice in the context of its vital role of influencing and shaping the future of student affairs, and in promoting continuous learning. The authors demystify the processes of producing research and scholarly work; address motivation and barriers such as time-constraints or confidence; and provide advice on developing ideas, writing, getting feedback, staying on task, identifying the appropriate outlets and venues for ideas, submitting proposals, as well as on speaking and presentation skills. It also directs readers to books and online resources and presents the reflections of senior student affairs officers on scholarship in the profession. As the authors state, student affairs professionals are often in the best position to test the myths about what really works for college students to have access, persist, and graduate. Through their daily interactions with students they develop the grounding for theories and strategies to improve the college experience, none of which can be advanced without scholarship, without presenting and writing, and the debate that they stimulate. This book is intended for student affairs professionals at all levels. It sets the context for those starting their careers as they navigate and understand their new roles; aims to inspire mid-level professionals to present or write about their experiences and contributions; and offers senior administrators strategies to pursue their own scholarship while creating a supportive environment for their staff to do so, and develop their agency and professional growth in the process.*

POSITIVE LEADERSHIP FOR FLOURISHING SCHOOLS

IAP Most educators will agree that they would love to see each student and staff member in schools flourish. Furthermore, it would be great to see entire communities experience the transformative power of circumstances that feature happy and vibrant learning. However, what does it mean to experience flourishing in schools? What is the role of positive leadership in this process? What can we learn from inquiring into the positive emotional and social aspects of the work of school leaders? Building on our research on flourishing in schools, this book highlights the stories and perspectives of educators and school leaders at all levels of the school system and demonstrate the intricacies of how positive leadership contributes to well-being in schools and encourages flourishing in these schools. This book aligns with a growing shift in psychology and organizational studies to frame research using phenomena and constructs such as resilience, compassion, hope, efficacy, self-determination and meaningfulness at work and in other areas of life. Research findings from the disciplines of both positive psychology and positive organization studies bring these positive research intelligences into the field of education to study what works in school leadership practices, what goes well, what supports growth, and what brings vitality to people in school organizations. Research in positive psychology contends that attending to the strengths, positive outlooks, habits and mental models, as opposed to a deficit-oriented perspective, is beneficial to increasing subjective wellbeing, by increasing resilience, vitality, and happiness and decreasing stress, anxiety, and depression. How we imagine leading, teaching and learning in schools are implicated in these understandings and help us to contemplate the benefits of focus positive leadership in school organizations. Powerful insights into human inquiry and positive psychology are gained through qualitative study and most of the chapters of this book are grounded in such research. Importantly, chapters in this book provide a varied repertoire of answers to the question that underpins this shift in research toward a positive organizational perspective: How does positive leadership leverage what works well to instill in each community member a sense of their value and capacity to contribute, encourage wellbeing for all and create school contexts of flourishing? This edited collection provides many examples, invitations, and inspiration for readers to notice in their own contexts in ways that encourage them to shift and grow through moving toward appreciative, strengths-based, positive approaches to teaching, learning, and, especially, leading in all school contexts.

ETHICAL DILEMMAS IN DANCE EDUCATION

CASE STUDIES ON HUMANIZING DANCE PEDAGOGY

McFarland Winner, Susan W. Stinson Book Award for Dance Education—University of North Carolina Greensboro Winner, Ruth Lovell Murray Book Award—National Dance Education Organization “Original and groundbreaking.... This is a pivotal text to propel dance education beyond the status quo tenants of ‘best practices.’...This text may well be the driver moving personal, value-based pedagogies beyond methods-based instruction.
