COMPARATIVE SOCIOLOGY OF EXAMINATIONS

Routledge *Contemporary societies are constructed, constricted, and constrained by various series of examinations. Governments of both Western and non-Western countries tend to conduct detailed, multi-layered and continuous systems of tests or examinations. International tests, such as PISA and TIMSS, have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries. Examinations therefore provide a methodological pivot for comparing a range of societies. They enable us to contrast the West and the East; the North and the South; tribal and mass society; ancient and postmodern civilization; and so on. Comparing parallel societies from across Asia, the Middle East, Europe, and North America, this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations. It uses ethnographies, interviews, questionnaires, documents, statistics, and big-data analyses to make comparisons on broad scales of time and space. In so doing, it suggests hypotheses encompassing different kinds of societies in human history, including those in the Axial Age and the Modern Ages.*

Corporate influence on the state legislature and other leaders resulted in numerous ethics violations. Scandal erupted at the prestigious University of Virginia when the school ousted its president amid political drama and intrigue. Author Jeff Thomas reveals the intersection of money, power and politics and the corrosive effect on government in a new era.

LEADERSHIP COMMITMENTS TO IMPROVE VALUE IN HEALTH CARE

FINDING COMMON GROUND: WORKSHOP SUMMARY

National Academies Press This volume reports on discussions among multiple stakeholders about ways they might help transform health care in the United States. The U.S. healthcare system consists of a complex network of decentralized and loosely associated organizations, services, relationships, and participants. Each of the healthcare system's component sectors--patients, healthcare professionals, healthcare delivery organizations, healthcare product developers, clinical investigators and evaluators, regulators, insurers, employers and employees, and individuals involved in information technology--conducts activities that support a common goal: to improve patient health and wellbeing. Implicit in this goal is the commitment of each stakeholder group to contribute to the evidence base for health care, that is, to assist with the development and application of information about the efficacy, safety, effectiveness, value, and appropriateness of the health care delivered.
