Civil Democratic Islam

Partners, Resources, and Strategies

Rand Corporation In the face of Islam's own internal struggles, it is not easy to see who we should support and how. This report provides detailed descriptions of subgroups, their stands on various issues, and what those stands may mean for the West. Since the outcomes can matter greatly to international community, that community might wish to influence them by providing support to appropriate actors. The author recommends a mixed approach of providing specific types of support to those who can influence the outcomes in desirable ways.

The Trans Generation

How Trans Kids (and Their Parents) are Creating a Gender Revolution

NYU Press Winner, 2019 PROSE Award for Anthropology, Criminology and Anthropology, presented by the Association of American Publishers A groundbreaking look at the lives of transgender children and their families Some “boys” will only wear dresses; some “girls” refuse to wear dresses; in both cases, as Ann Travers shows in this fascinating account of the lives of transgender kids, these are often more than just wardrobe choices. Travers shows that from very early ages, some at two and three years old, these kids find themselves to be different from the sex category that was assigned to them at birth. How they make their voices heard—to their parents and friends, in schools, in public spaces, and through the courts—is the focus of this remarkable and groundbreaking book. Based on interviews with transgender kids, ranging in age from 4 to 20, and their parents, and over five years of research in the US and Canada, *The Trans Generation* offers a rare look into what it is like to grow up as a trans child. From daycare to birthday parties and from the playground to the school bathroom, Travers takes the reader inside the day-to-day realities of trans kids who regularly experience crisis as a result of the restrictive ways in which sex categories regulate their lives and put pressure on them to deny their internal sense of who they are in gendered terms. As a transgender activist and as an advocate for trans kids, Travers is able to document from first-hand experience the difficulties of growing up trans and the challenges that parents can face. The book shows the incredible time, energy, and love that these parents give to their children, even in the face of, at times, unsupportive communities, schools, courts, health systems, and government laws. Keeping in mind that all trans kids are among the most vulnerable to bullying, violent attacks, self-harm, and suicide, and that those who struggle with poverty, racism, lack of parental support, learning differences,

etc, are extremely at risk, Travers offers ways to support all trans kids through policy recommendations and activist interventions. Ultimately, the book is meant to open up options for kids' own gender self-determination, to question the need for the sex binary, and to highlight ways that cultural and material resources can be redistributed more equitably. The Trans Generation offers an essential and important new understanding of childhood.

Counseling the Culturally Diverse

Theory and Practice

Wiley A brand new, fully updated edition of the most widely-used, frequently-cited, and critically acclaimed multicultural text in the mental health field This fully revised, 8th edition of the market-leading textbook on multicultural counseling comprehensively covers the most recent research and theoretical formulations that introduce and analyze emerging important multicultural topical developments. It examines the concept of "cultural humility" as part of the major characteristics of cultural competence in counselor education and practice; roles of white allies in multicultural counseling and in social justice counseling; and the concept of "minority stress" and its implications in work with marginalized populations. The book also reviews and introduces the most recent research on LGBTQ issues, and looks at major research developments in the manifestation, dynamics, and impact of microaggressions. Chapters in Counseling the Culturally Diverse, 8th Edition have been rewritten so that instructors can use them sequentially or in any order that best suits their course goals. Each begins with an outline of objectives, followed by a real life counseling case vignette, narrative, or contemporary incident that introduces the major themes of the chapter. In-

depth discussions of the theory, research, and practice in multicultural counseling follow. Completely updated with all new research, critical incidents, and case examples Chapters feature an integrative section on "Implications for Clinical Practice," ending "Summary," and numerous "Reflection and Discussion Questions" Presented in a Vital Source Enhanced format that contains chapter-correlated counseling videos/analysis of cross-racial dyads to facilitate teaching and learning Supplemented with an instructor's website that offers a power point deck, exam questions, sample syllabi, and links to other learning resources Written with two new coauthors who bring fresh and first-hand innovative approaches to CCD Counseling the Culturally Diverse, 8th Edition is appropriate for scholars and practitioners who work in the mental health field related to race, ethnicity, culture, and other sociodemographic variables. It is also relevant to social workers and psychiatrists, and for graduate courses in counseling and clinical psychology related to working with culturally diverse populations.

Radicalisation, Extremism and Social Work Practice

Minority Muslim Youth in the West

Routledge Radicalisation, Extremism and Social Work Practice is the first book to explore cultural identity, acculturation and perceived discrimination of Muslim youth across Western countries in relation to social work, as well as the radicalisation and extremist views and actions of a small number of Muslim youth. It draws on relevant theoretical frameworks and research to examine the different approaches taken in social work practice. Some countries consider multi-agency approaches, particularly how public health practice can inform interventions and strategies. Others take a public health approach, looking for risk factors and seeking protective factors to develop suitable interventions within the communities through public engagement and partnership. As well as examining and discussing the above approaches, this book critically examines government and community-based approaches to radicalisation and extremism, and strategies for combating these. This volume will be a valuable resource for social work students, including other disciplines such as psychology, public health, psychiatry, sociology, political science and community development. It will also be of interest to policy makers, practitioners and researchers.

Islamic Feminisms

Rights and Interpretations Across Generations in Iran

Routledge This book explores the contentious topic of women's rights in Muslim-majority countries, with a specific focus on Iran and the Iranian women's movement from 1906 to the present. The work contextualizes the authorial self through the use of personal narrative and interviews. A new critique of Islamic law is produced through an in-depth study of the Iranian Constitution, civil and criminal codes. The work presents a novel reconceptualization of the term "Islamic feminism" by revisiting the arguments of various scholars and through analysis of interviews with Iranian women's rights activists. It is contended that the feminist movements can play a critical role in Islamic law reform and consequently the eventual implementation of international human rights law in Muslim-majority countries. What emerges from this study is not only a feminist critique of two major regimes of law, but also the identification of possibilities for reform in the future. The study transitions from the Iranian national context to the international by way of a comparative legal study of international human rights laws and Islamic laws. The book will appeal both to academics and human rights practitioners.

The Third Wave

Democratization in the Late 20th Century

University of Oklahoma Press Between 1974 and 1990 more than thirty countries in southern Europe, Latin America, East Asia, and Eastern Europe shifted from authoritarian to democratic systems of government. This global democratic revolution is probably the most important political trend in the late twentieth century. In *The Third Wave*, Samuel P. Huntington analyzes the causes and nature of these democratic transitions, evaluates the prospects for stability of the new democracies, and explores the possibility of more countries becoming democratic. The recent transitions, he argues, are the third major wave of democratization in the modern world. Each of the two previous waves was followed by a reverse wave in which some countries shifted back to authoritarian government. Using concrete examples,

empirical evidence, and insightful analysis, Huntington provides neither a theory nor a history of the third wave, but an explanation of why and how it occurred. Factors responsible for the democratic trend include the legitimacy dilemmas of authoritarian regimes; economic and social development; the changed role of the Catholic Church; the impact of the United States, the European Community, and the Soviet Union; and the "snowballing" phenomenon: change in one country stimulating change in others. Five key elite groups within and outside the nondemocratic regime played roles in shaping the various ways democratization occurred. Compromise was key to all democratizations, and elections and nonviolent tactics also were central. New democracies must deal with the "torturer problem" and the "praetorian problem" and attempt to develop democratic values and processes. Disillusionment with democracy, Huntington argues, is necessary to consolidating democracy. He concludes the book with an analysis of the political, economic, and cultural factors that will decide whether or not the third wave continues. Several "Guidelines for Democratizers" offer specific, practical suggestions for initiating and carrying out reform. Huntington's emphasis on practical application makes this book a valuable tool for anyone engaged in the democratization process. At this volatile time in history, Huntington's assessment of the processes of democratization is indispensable to understanding the future of democracy in the world.

Observing the Observer

The State of Islamic Studies in American Universities

International Institute of Islamic Thought (IIIT) THE collection of papers in this volume documents the study of Islam in American Universities. Over the last few decades the United States has seen significant growth in the study of Islam and Islamic societies in institutions of higher learning fueled primarily by events including economic relations of the U.S. with Muslim countries, migration of Muslims into the country, conversion of Americans to Islam, U.S. interests in Arab oil resources, involvement of Muslims in the American public square, and the tragic events of 9/11. Although there is increasing recognition that the study of Islam and the role of Muslims is strategically essential in a climate of global integration, multiculturalism, and political turmoil, nevertheless, the state of Islamic Studies in America is far from satisfactory. The issue needs to be addressed, particularly as the need for intelligent debate and understanding is continuously stifled by what some have termed an "Islam industry" run primarily by fly-by journalists, think tank

pundits, and cut-and-paste “experts.”

The Philosophy of the Teachings of Islam

Islam International "Originally written for the Conference of Great Religions held at Lahore on December 26-29, 1896, the Philosophy of the Teachings of Islam has since served as an introduction to Islam for seekers after the truth and religious knowledge in different parts of the world. The present issue includes several "lost" pages not included in the essay that was read out at Lahore. It deals with the following five broad themes, set by the moderators of the Conference: 1. The physical, moral and spiritual states of man 2. The state of man after death 3. The object of man's life and the means to its attainment 4. The operation of the practical ordinances of the Law in this life and the next 5. Sources of Divine knowledge."--Publisher's description.

Politics of Piety

The Islamic Revival and the Feminist Subject

Princeton University Press Politics of Piety is a groundbreaking analysis of Islamist cultural politics through the ethnography of a thriving, grassroots women's piety movement in the mosques of Cairo, Egypt. Unlike those organized Islamist activities that seek to seize or transform the state, this is a moral reform movement whose orthodox practices are commonly viewed as inconsequential to Egypt's political landscape. Saba Mahmood's compelling exposition of these practices challenges this assumption by showing how the ethical and the political are indelibly linked within the context of such movements. Not only is this book a sensitive ethnography of a critical but largely ignored dimension of

the Islamic revival, it is also an unflinching critique of the secular-liberal assumptions by which some people hold such movements to account. The book addresses three central questions: How do movements of moral reform help us rethink the normative liberal account of politics? How does the adherence of women to the patriarchal norms at the core of such movements parochialize key assumptions within feminist theory about freedom, agency, authority, and the human subject? How does a consideration of debates about embodied religious rituals among Islamists and their secular critics help us understand the conceptual relationship between bodily form and political imaginaries? *Politics of Piety* is essential reading for anyone interested in issues at the nexus of ethics and politics, embodiment and gender, and liberalism and postcolonialism. In a substantial new preface, Mahmood addresses the controversy sparked by the original publication of her book and the scholarly discussions that have ensued.

Orientalism

Vintage More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written about our divided world.

The Homeschool Choice

Parents and the Privatization of Education

NYU Press The surprising reasons parents are opting out of the public school system and homeschooling their kids
Homeschooling has skyrocketed in popularity in the United States: in 2019, a record-breaking 2.5 million children were being homeschooled. In *The Homeschool Choice*, Kate Henley Averett provides insight into this fascinating phenomenon, exploring the perspectives of parents who have chosen to homeschool their children. Drawing on in-

depth interviews, Averett examines the reasons why these parents choose to homeschool, from those who disagree with sex education and LGBT content in schools, to others who want to protect their children's sexual and gender identities. With eye-opening detail, she shows us how homeschooling is a trend being chosen by an increasingly diverse subset of American families, at times in order to empower—or constrain—children's gender and sexuality. Ultimately, Averett explores how homeschooling, as a growing practice, has changed the roles that families, schools, and the state play in children's lives. As teachers, parents, and policymakers debate the future of public education, *The Homeschool Choice* sheds light on the ongoing struggle over school choice.

When Professionals Weep

Emotional and Countertransference Responses in Palliative and End-of-Life Care

Routledge When Professionals Weep speaks to the humbling and often transformational moments that clinicians experience in their careers as caregivers and healers—moments when it is often hard to separate the influence of our own emotional responses and worldviews from the patient's or family's. When Professionals Weep addresses these poignant moments—when the professional's personal experiences with trauma, illness, death, and loss can subtly, often stealthily, surface and affect the helping process. This edition, like the first, both validates clinicians' experiences and also helps them process and productively address compassion fatigue, burnout, and secondary traumatic stress. New material in the second edition includes increased emphasis on the burgeoning fields of hospice and palliative care, organizational countertransference, mindfulness, and compassionate practice. It includes thought-provoking cases, self-assessments, and exercises that can be used on an individual, dyadic, or group basis. This volume is an invaluable handbook for practitioners in the fields of medicine, mental health, social work, nursing, chaplaincy, the allied health sciences, psychology, and psychiatry.

The Death of Expertise

Oxford University Press People are now exposed to more information than ever before, provided both by technology and by increasing access to every level of education. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. As Tom Nichols shows in *The Death of Expertise*, this rejection of experts has occurred for many reasons, including the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. Nichols has deeper concerns than the current rejection of expertise and learning, noting that when ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy-or in the worst case, a combination of both. *The Death of Expertise* is not only an exploration of a dangerous phenomenon but also a warning about the stability and survival of modern democracy in the Information Age.

Impacts of the Knowledge Society on Economic and Social Growth in Africa

IGI Global In a world that is essentially digitizing, some have argued that the idea of the knowledge society holds the greatest promise for Africa's rapid socio-economic transformation. *Impacts of the Knowledge Society on Economic and Social Growth in Africa* aims to catalyze thinking and provide relevant information on the complex ways in which the information age is shaping Africa and the implications that this will have for the continent and the world. This premier reference volume will provide policy analysts, policymakers, academics, and researchers with fresh insights into the key empirical and theoretical matters framing Africa's ongoing digitization.

Misconceptions on Human Rights in Islam

The MIRAGE

ZAWYAT ALMAARFEH The Mirage is an expression of His Excellency Dr. Jamal Sanad Al-Suwaidi's perspective that the struggle in which many Arab and Muslim countries are currently engaged against extremist groups and organizations is not limited to the realm of military and security operations; it is also an extended war of an essentially intellectual nature that requires long-term planning, which is no less important - indeed, perhaps even more so - than planning in military and security terms. Academic scholarship plays a vital role in protecting the security of nations and societies via rigorous analysis of challenges and threats and the subsequent presentation of appropriate solutions. The role of scholars in times of historic conflict is to be at the forefront of the defenders of human and civilizational values against extremists and radical militants. It is to this end that the author has written this book. The book examines this phenomenon from multiple research angles: intellectual, political, ideological, cultural and social, exploring political religious thought in its various manifestations, and explaining the intellectual and organizational disparities between relevant groups. The book tracks the history of this phenomenon, tracing it to its peak in the early 2010s, revealing the intellectual and ideological characteristics of these groups for interested researchers, decision makers and the public in an effort to deconstruct the various obstacles they pose to civilizational progress and development in Arab and Muslim countries. Every chapter reflects the author's conviction that political religious groups represent neither the true face of Islam nor its moderate values, and that yielding to the claims of these groups is a serious affront to religion and its essential values of moderation and tolerance. The Mirage also employs an insightful research vision in its approach to political religious groups and their various practices and manifestations. It tracks their historical evolution and studies particular examples from their inception up until the recent failure of the Muslim Brotherhood-inspired governments that took power in certain Arab and Muslim countries, identifying the causes of their failure,

exposing the fallacy of an 80-year legacy of pretentious slogans that attracted such veneration among these groups and their sympathizers — not least among the Muslim Brotherhood itself. Readers will recognize that various elements of current realities in Arab and Muslim countries show similarities with the backwardness of certain aspects of the European Middle Ages — particularly in terms of the ideologies and practices of political religious groups in the Arab and Muslim worlds in the modern era, and specifically their intellectual and political structures, the relationship between religion and politics, the role of clergy, as well as the prevailing philosophies in Europe and the Arab and Muslim worlds. This gives rise to several questions: are the Arab and Muslim worlds today fighting a similar battle to that experienced by the Europeans around five centuries ago? Does this mean that five centuries separate European and Islamic civilizations? And if so is there any way to overcome such a schism? Are backwardness and modernity inevitably sequential, whereby one becomes a prerequisite to the other? Why is modernity viewed as the antithesis of religiosity—an implicit rejection of religion and its teachings? Why do some groups in the Arab and Muslim societies think that talk about religion ends where talk about progress and development begins? Why have referential concepts disappeared and given way to destructive ideas like those espoused by political religious groups?

COVID-19 and Social Sciences

The COVID-19 pandemic is having profound effects on all dimensions of life: individual, social, cultural, and public and economic health, among others. The contribution of social sciences is very relevant in understanding this disease and pandemic as well as its effects. It is also relevant for taking measures, such as, for example, compliance with physical distance, mask-wearing, no gatherings, and information to the population in a more efficient way. This book discusses topics such as COVID-19 in a risk society and its implications; the situation of patients with diabetes in a lockdown context; the technological, pedagogical, and social challenges posed by remote teaching; and, finally, the explanation of potential contributions of several specific social sciences that can shape both the taking of measures and their fulfilment in the desired direction. The book concludes with an analysis of the underlying social, psychological, and philosophical issues that are pandemic-related and that may have a considerable impact on societies and individuals, also highlighting the situation of the most disadvantaged groups, given that pandemics tend to accentuate social inequalities.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

Fanon, Education, Action

Child as Method

Routledge Bridging childhood studies, pedagogy and educational theory, critical psychology, and postcolonial studies, this unique book reads the role and functions of ‘the child’ and childhood as both cultural motif and as embodied life condition through the work of Frantz Fanon. Based on innovative readings of Fanon and postcolonial cultural studies, the book offers new insights for critical pedagogical and transformative practice in forging crucial links not only between the political and the psychological, but between distress, therapy, and (personal and political) learning and transformation. Structured around four indicative and distinct forms of ‘child’ read from Fanon’s texts (Idiotic, Traumatogenic, Therapeutic, Extemic), the author discusses both educational and therapeutic practices. The pedagogical links the political with the personal, and Fanon’s revolutionary psychoaffective account offers vital resources to inform these. Finally the book presents ‘child as method’ as a new analytical approach by which to read the geopolitical, which shows childhood, education, and critical psychological studies to be key to these at the level of theory, method, and practice. By interrogating contemporary modalities of childhood as modern economic and political tropes, the author offers conceptual and methodological resources for practically engaging with and transforming these. This book will be vital and fascinating reading for students and scholars in psychology, psychoanalysis, education and childhood studies, gender studies, postcolonial studies, and mental health.

Backlash 9/11

Middle Eastern and Muslim Americans Respond

Univ of California Press For most Americans, September 11, 2001, symbolized the moment when their security was altered. For Middle Eastern and Muslim Americans, 9/11 also ushered in a backlash in the form of hate crimes, discrimination, and a string of devastating government initiatives. This book provides the first comprehensive analysis of the impact of the post-9/11 events on Middle Eastern and Muslim Americans as well as their organized response. Through fieldwork and interviews with community leaders, Anny Bakalian and Mehdi Bozorgmehr show how ethnic organizations mobilized to demonstrate their commitment to the United States while defending their rights and distancing themselves from the terrorists.

Rethinking Church-State Relations in the United States, France, and Israel

Springer In this dynamic and wide-ranging collection of essays, prominent scholars examine the condition of church-state relations in the United States, France, and Israel. Their analyses are rooted in a wide variety of disciplines, ranging from ethnography and demography to political science, gender studies, theology, and the law.

Criminal Justice Theory

An Introduction

Routledge Criminal Justice Theory examines the theoretical foundations of criminal justice in the modern era, whilst also considering legal philosophy and ethics, explaining criminal behaviour, and discussing policing, the court process, and penology in the context of contemporary socio-economic debates. Throughout the book, a realist theoretical thread acts as a guide interlinking concepts of social progress, conflict, and cerebral models of criminal justice, whilst also recognizing our collusion in the creation of an increasingly pervasive culture of socio-control which now characterizes contemporary society. The complex theoretical issues tackled in this book are addressed in an accessible style, making this a relevant and comprehensive introduction to criminal justice theory for students on a wide range of undergraduate criminal justice modules. It is also a helpful guide for those commencing postgraduate studies in the disciplines of criminal justice, criminology, and law.

The Ecology of Oil

Environment, Labor, and the Mexican Revolution, 1900-1938

Cambridge University Press An exploration of the social and environmental consequences of oil extraction in the tropical rainforest. Using northern Veracruz as a case study, the author argues that oil production generated major historical and environmental transformations in land tenure systems and uses, and social organisation. Such changes, furthermore, entailed effects, including the marginalisation of indigenes, environmental destruction, and tense labour relations. In the context of the Mexican Revolution (1910-1920), however, the results of oil development did not go unchallenged. Mexican oil workers responded to their experience by forging a politicised culture and a radical left militancy that turned 'oil country' into one of the most significant sites of class conflict in revolutionary Mexico. Ultimately, the book argues, Mexican oil workers deserve their share of credit for the 1938 decree nationalising the foreign oil industry - heretofore reserved for President Lazaro Cardenas - and thus changing the course of Mexican history.

Religion and Civil Society

Rethinking Public Religion in the Contemporary World

Routledge This book presents the first full-length study of the relationship between religion and the controversial concept of civil society. Across the world in the last two decades of the twentieth century religions re-entered public space as influential discursive and symbolic systems apparently beyond the control of either traditional religious authorising institutions or states. This differentiation of religion from traditional institutions and entry into secular public spheres carries both dangers and possible benefits for democracy. Offering a fresh interdisciplinary approach to understanding religion in contemporary societies, this book provides an invaluable resource for students and researchers in religious studies, sociology, politics and political philosophy, theology, international relations and legal studies. Part one presents a critical introduction to the interaction between religion, modernization and postmodernization in Western and non-Western settings (America, Europe, the Middle East and India), focussing on discourses of human rights, civil society and the public sphere, and the controversial question of their cross-cultural application. Part two examines religion and civil society through case studies of Egypt, Bosnia and Muslim minorities in Britain, and compares Poland as an example of a Christian majority society that has experienced the public reassertion of religion.
