The Law and Economics of Enforcing European
Consumer Law

A Comparative Analysis of Package Travel and

Misleading Advertising

Routledge In the internet age, the need for effective consumer law enforcement has arguably never been greater. This timely book is a comparative law and economic analysis of the changing landscape of EU consumer law enforcement policy. EU member states are moving away from purely public or private law enforcement and now appear to be moving towards a more mixed approach, not least due to European legislation. This book reflects on the need for and creation of efficient enforcement designs. It examines the various economic factors according to which the efficiency of different enforcement mechanisms can be assessed. Hypothetical case scenarios within package travel and misleading advertising, dealing with substantial individual harm and trifling and widespread harm are used to illustrate various consumer law problems. Design suggestions on how to optimally mix enforcement mechanisms for these case scenarios are developed. The findings are then used as a benchmark to assess real life situations in countries with different enforcement traditions - the Netherlands, Sweden and England. The book is of value to both researchers and policy-makers working in the area of consumer protection.

Hard Questions on Global Educational Change

Policies, Practices, and the Future of Education

Teachers College Press **This new book, from internationally renowned education scholar Pasi Sahlberg and his colleagues, focuses on some of the most controversial issues in contemporary education reform around the world. The authors devote a chapter to each of these “hard questions”: Does parental choice improve education systems? Is there a future for teacher unions? What is the right answer to the standardized testing question? Can schools prepare children for the 21st-century workplace? Will technology save schools? Can anyone be a teacher? Should higher education be for the public good? What knowledge and skills should an educator have? Each educational change question sheds much-needed light on today’s large-scale education policies and related reforms around the world. The authors focus on what makes each question globally significant, what we know from international research, and what can be inferred from benchmark evidence. The final chapter offers a model for policymakers with implications for teaching, learning, and schooling overall. “This is an impressive and engaging book. If you care about the impacts of technology, testing, and teacher education designs, then this book will stretch your thinking and challenge your assumptions.” —Andy Hargreaves, Boston College “Fascinating case studies open up our imaginations and provide clues for the most sustainable pathways forward for educators in the years to come.” —Dennis Shirley, Boston College “Features enlightening chapters with an international perspective for educators and teacher educators alike.
