Strengthening Forensic Science in the United States

A Path Forward

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Biblical Eschatology, Second Edition

Wipf and Stock Publishers *Biblical Eschatology* provides what is not found in any other single volume on eschatology: it analyzes all the major eschatological passages (including the Olivet Discourse and the book of Revelation), issues (including the second coming of Christ, the millennium, the rapture, and Antichrist), and positions (including all the major views of the millennium) in a clear, but not superficial, way. The book concludes with a chapter showing how eschatology is relevant for our lives. *Biblical Eschatology* makes understanding eschatology easier by including chapters on how to interpret prophecy and apocalyptic literature, by showing the history of eschatological thought, and by placing eschatology in the context of the Bible's overall story line and structure. Clarity and understanding are enhanced by the use of comparative tables and appendices. Subject and Scripture indexes are included. The book interacts with the best of Evangelical and Reformed scholarship, and the extensive bibliography (which includes the web addresses of many online resources) provides an excellent source for the reader's further study. This is a perfect resource for intelligent Christians, including pastors, students, and teachers, who desire to understand eschatology and to see how it fits together with the rest of the Bible.

Making Eye Health a Population Health Imperative

Vision for Tomorrow

National Academies Press The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. *Making Eye Health a Population Health Imperative: Vision for Tomorrow* proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous

public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

The Long Game

China's Grand Strategy to Displace American Order

Oxford University Press For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

Parents' first duty is to their children—to their intellect, their character, their souls. The facts on the ground point to one conclusion: get out now.*

Shalom and the Community of Creation

An Indigenous Vision

Wm. B. Eerdmans Publishing Materialism. Greed. Loneliness. A manic pace. Abuse of the natural world. Inequality. Injustice. War. The endemic problems facing America today are staggering. We need change and restoration. But where to begin? In *Shalom and the Community of Creation* Randy Woodley offers an answer: learn more about the Native American 'Harmony Way,' a concept that closely parallels biblical shalom. Doing so can bring reconciliation between Euro-Westerners and indigenous peoples, a new connectedness with the Creator and creation, an end to imperial warfare, the ability to live in the moment, justice, restoration -- and a more biblically authentic spirituality. Rooted in redemptive correction, this book calls for true partnership through the co-creation of new theological systems that foster wholeness and peace.

The Constitution of Knowledge

A Defense of Truth

Brookings Institution Press Arming Americans to defend the truth from today's war on facts Disinformation. Trolling. Conspiracies. Social media pile-ons. Campus intolerance. On the surface, these recent additions to our daily vocabulary appear to have little in common. But together, they are driving an epistemic crisis: a multi-front challenge to America's ability to distinguish fact from fiction and elevate truth above falsehood. In 2016 Russian trolls and bots nearly drowned the truth in a flood of fake news and conspiracy theories, and Donald Trump and his troll armies continued to do the same. Social media companies struggled to keep up with a flood of falsehoods, and too often didn't even seem to try. Experts and some public officials began wondering if society was losing its grip on truth itself. Meanwhile, another new phenomenon appeared: "cancel culture." At the push of a button, those armed with a cellphone could gang up by the thousands on anyone who ran afoul of their sanctimony. In this pathbreaking book, Jonathan Rauch reaches back to the parallel eighteenth-century developments of liberal democracy and science to explain what he calls the "Constitution of Knowledge"—our social system for turning disagreement into truth. By explicating the Constitution of Knowledge and probing the war on reality, Rauch arms defenders of truth with a clearer understanding of what they must protect, why they must do—and how they can do it. His book is a sweeping and readable description of how every American can help defend objective truth and free inquiry from threats as far away as Russia and as close as the cellphone.

The Leader in Me

How Schools and Parents Around the World are Inspiring Greatness, One Child at a Time

Simon and Schuster Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? *The Leader in Me* is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B. Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught *The 7 Habits of Highly Effective People* to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Health Professions Education

A Bridge to Quality

National Academies Press The Institute of Medicine study *Crossing the Quality Chasm* (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. *Health Professions Education: A Bridge to Quality* is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.

Politics and Leadership in the Age of Disruption

Signal "In this brilliant and timely new book, Stephen Harper, the 22nd prime minister of Canada, rallies his fellow conservatives at home, in the United States, and around the world to understand and adapt to the often contradictory movements of globalization and populism. The world is in flux. Disruptive technologies, ideas, and politicians are challenging how we thought about the economy, society, and politics. How we respond matters greatly. We must get it right for our long-term stability, social cohesion, and prosperity. Some voices propose that we look the other way and double down on the status quo. Others propose radical change to public policy, governance, and our societies. Neither effectively responds to the growing concerns expressed by working-class people across the developed world. In this new book, former Canadian Prime Minister Stephen Harper sets out a positive and thoughtful alternative. He argues that we must apply old thinking to new challenges or, as Ronald Reagan once put it, "go back to the past way of facing the future." One might call it applied conservatism. Drawing on his training as an economist and his experiences as a global leader for nearly a decade, Harper analyzes how economic, social, and political trends--including globalized movements of capital, goods and services, and labour--have affected working-class citizens. The story is mixed. There has been some good and some bad. Donald Trump's surprising election and rising populist movements across the globe signal that policymakers must better respond to the negative consequences of these powerful forces. Harper sets out a vision of populist conservatism as the best framework for such a historically-rooted yet forward-looking agenda. He calls on conservatives in particular and policymakers in general to eschew ideology and instead draw on the ideas and institutions that have worked in past and can be refined and reformed for the future. His prescriptions cover trade, markets, immigration, business practices, the role of the nation state, and so on. The book sets out concrete steps for business and political leaders to take in order to address working-class to interests, aspirations, and concerns, and ultimately ensure that our economies and societies remain strong and dynamic in the age of disruption."--
