### A BOOK-LOVER'S HOLIDAYS IN THE OPEN

---

Binker North A Book-Lover's Holidays in the Open is a classic literary work by Teddy Roosevelt which describes the US president's adventures in the great American outdoors. The man should have youth and strength who seeks adventure in the wide, waste spaces of the earth, in the marshes, and among the vast mountain masses, in the northern forests, amid the steaming jungles of the tropics, or on the deserts of sand or of snow. He must long greatly for the lonely winds that blow across the wilderness, and for sunrise and sunset over the rim of the empty world. His heart must thrill for the saddle and not for the hearthstone. He must be helmsman and chief, the cragsman, the rifleman, the boat steerer. He must be the wielder of axe and of paddle, the rider of fiery horses, the master of the craft that leaps through white water. His eye must be true and quick, his hand steady and strong. His heart must never fail nor his head grow bewildered, whether he face brute and human foes, or the frowning strength of hostile nature, or the awful fear that grips those who are lost in trackless lands.

### THE ASCENT OF HUMANITY

---

### CIVILIZATION AND THE HUMAN SENSE OF SELF

---

North Atlantic Books Charles Eisenstein explores the history and potential future of civilization, tracing the converging crises of our age to the illusion of the separate self. In this limited hardcover edition of Eisenstein's landmark book, he argues that our disconnection from one another and the natural world has mislaid the foundations of science, religion, money, technology, economics, medicine, and education as we know them. It has fired our near-pathological pursuit of technological Utopias even as we push ourselves and our planet to the brink of collapse. Fortunately, an Age of Reunion is emerging out of the birth pangs of an earth in crisis. Our journey of separation hasn't been a terrible mistake but an evolutionary process and an adventure in self-discovery. Even in our darkest hour, Eisenstein sees the possibility of a more beautiful world--not through the extension of millennia-old methods of management and control but by fundamentally reimagining ourselves and our systems. We must shift away from our Babelian efforts to build ever-higher towers to heaven and instead turn our attention to creating a new kind of civilization--one designed for beauty rather than height. Breathtaking in its scope and intelligence, *The Ascent of Humanity* is a landmark book showing what it truly means to be human. "A tour-de-force filled with astounding insight, wit, wisdom and heart." --Christopher Uhl, author of *Developing Ecological Consciousness: Paths to a Sustainable Future* "Quite marvelous, a hugely important work. This book is truly needed in this time of deepening crisis." --John Zerzan, author of *Future Primitive and Elements of Refusal*

### EVERYONE EATS

---

### UNDERSTANDING FOOD AND CULTURE, SECOND EDITION

---

NYU Press Everyone eats, but rarely do we investigate why we eat what we eat. Why do we love spices, sweets, coffee? How did rice become such a staple food throughout so much of eastern Asia? *Everyone Eats* examines the social and cultural reasons for our food choices and provides an explanation of the nutritional reasons for why humans eat what they do, resulting in a unique cultural and biological approach to the topic. E. N. Anderson explains the economics of food in the globalization era; food's relationship to religion, medicine, and ethnicity; and offers suggestions on how to end hunger, starvation, and malnutrition. This thoroughly updated Second Edition incorporates the latest food scholarship, most notably recognizing the impact of sustainable eating advocacy and the state of food security in the world today. Anderson also brings more insight than ever before into the historical and scientific underpinnings of our food customs, fleshing this out with fifteen new and original photographs from his own extensive fieldwork. A perennial classic in the anthropology of food, *Everyone Eats* feeds our need to understand human ecology by explaining the ways that cultures and political systems structure the edible environment.

### GUNS, GERMS, AND STEEL: THE FATES OF HUMAN SOCIETIES (20TH ANNIVERSARY EDITION)

---

W. W. Norton & Company "Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, *New York Review of Books*) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

### DIVERSIFICATION OF MEXICAN SPANISH

---

### A TRIDIMENSIONAL STUDY IN NEW WORLD SOCIOLINGUISTICS

---

Walter de Gruyter GmbH & Co KG This book offers a diversification model of transplanted languages that facilitates the exploration of external factors and internal changes. The general context is the New World and the variety that unfolded in the Central Highlands and the Gulf of Mexico, herein identified as Mexican Colonial Spanish (MCS). Linguistic corpora provide the evidence of (re)transmission, diffusion, metalinguistic awareness, and select focused variants. The tridimensional approach highlights language data from authentic colonial documents which are connected to socio-historical reliefs at particular periods or junctions, which explain language variation and the dynamic outcome leading to change. From the Second Letter of Hernán Cortés (Seville 1522) to the decades preceding Mexican Independence (1800-1821) this book examines the variants transplanted from the peninsular tree into Mesoamerican lands: leveling of sibilants of late medieval Spanish, direct object (masc. sing.) pronouns LO and LE, pronouns of address (vos, tu, vuestra merced plus plurals), imperfect subjunctive endings in -SE and -RA), and Amerindian loans. Qualitative and quantitative analyses of variants derived from the peninsular tree show a gradual process of attrition and recovery due to their saliency in the new soil, where they were identified with ways of speaking and behaving like Spanish speakers from the metropolis. The variants analyzed in MCS may appear in other regions of the Spanish-speaking New World, where change may have proceeded at varying or similar rates. Additional variants are classified as optimal residual (e.g. dizque) and popular residual (e.g. vide). Both types are derived from the medieval peninsular tree, but the former are vital across regions and social strata while the latter may be restricted to isolated and / or marginal speech communities. Each of the ten chapters probes into the pertinent variants of MCS and the stage of development by century. Qualitative and quantitative analyses reveal the trails followed by each select variant from the years of the Second Letter (1520-1522) of Hernán Cortés to the end of the colonial period. The tridimensional historical sociolinguistic model offers explanations that shed light on the multiple causes of change and the outcome that eventually differentiated peninsular Spanish tree from New World Spanish. Focused-attrition variants were selected because in the process of transplantation, speakers assigned them a social meaning that eventually differentiated the European from the Latin American variety. The core chapters include narratives of both major historical events (e.g. the conquest of Mexico) and tales related to major language change and identity change (e.g. the socio-political and cultural struggles of Spanish speakers born in the New World). The core chapters also describe the strategies used by prevailing Spanish speakers to gain new speakers among the indigenous and Afro-Hispanic populations such as the appropriation of public posts where the need arose to file documents in both Spanish and Nahuatl, forced and free labor in agriculture, construction, and the textile industry. The examples of optimal and popular residual variants illustrate the trends unfolded during three centuries of colonial life. Many of them have passed the test of time and have survived in the present Mexican territory; others are also vital in the U.S. Southwestern states that once belonged to Mexico. The reader may also identify those that are used beyond the area of Mexican influence. Residual variants of New World Spanish not only corroborate the homogeneity of Spanish in the colonies of the Western Hemisphere but the speech patterns that were unwrapped by the speakers since the beginning of colonial times: popular and cultured Spanish point to diglossia in monolingual and multilingual communities. After one hundred years of study in linguistics, this book contributes to the advancement of newer conceptualization of diachrony, which is concerned with the development and evolution through history. The additional sociolinguistic dimension offers views of social significant and its thrilling links to social movements that provoked a radical change of identity. The amplitude of the diversification model is convenient to test it in varied contexts where transplantation occurred.
