## Behavioral Finance: The Second Generation

[CFA Institute Research Foundation](#) Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a

composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. Atlas Shrugged, a modern classic and Rand's most extensive statement of Objectivism—her groundbreaking philosophy—offers the reader the spectacle of human greatness, depicted with all the poetry and power of one of the twentieth century's leading artists.

### The Leader in Me

## How Schools and Parents Around the World are Inspiring Greatness, One Child at a Time

Simon and Schuster Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

## The Flat Earth as Key to Decrypt the Book of Enoch

Lulu.com Shortly after accepting the flat earth as a model for the world, I decided to revisit the Book of the Courses of the Heavenly Luminaries to see if my new understanding would somehow mirror what Enoch was sharing as a motion for the sun and moon. As I began to read chapters 71-82, I found to my utter amazement that I was able to grasp those passages. I knew then that the vision that the angel Uriel had shown to Enoch could only be deciphered if one were to imagine Enoch's description of the revolution of the sun and the moon. As seen from above the flat circular plane of the earth as described by Isaiah; and that Enoch must have been taken up to perhaps where Polaris is, centered directly above the North Pole, and while looking down at the backdrop of the earth, was instructed on the motions of both the sun and moon. Without such conception, it is in my opinion impossible to apply these descriptions to the model of the earth as a spherical planet.

## The Manual of Strategic Planning for Cultural Organizations

### A Guide for Museums, Performing Arts, Science Centers, Public Gardens, Heritage Sites, Libraries, Archives and Zoos

Rowman & Littlefield The Manual of Strategic Planning for Cultural Organizations adopts a holistic approach to the creative world of cultural institutions. By encompassing museums, art galleries, gardens, zoos, science centers, historic sites, cultural centers, festivals, and performing arts, this book responds to the reality that boundaries are being blurred among institutional types—with many gardens incorporating exhibitions, many museums part of multidisciplinary cultural centers and festivals. As cultural leaders transform the arts in the twenty-first century, this “whole career” manual will prepare readers for every stage. Three key areas covered are: Leadership change. This chapter explains the role of strategic planning when an institution is going through the process of hiring a new director. A question we are frequently asked is “Should the strategic plan precede the search process or should it wait until the new director takes up the position?” Institutional change. Increasingly, cultural organizations are going through major change: from public-sector agencies to nonprofit corporations; from private ownership to non-profit status; from nonprofit status to a foundation, and many other variations. This book addresses the role of strategic planning during these transitions. Staff empowerment. This manual addresses the opportunities for staff at all levels to grow by participating in strategic planning. This edition focuses on how to engage and empower staff. A Guide for Museums, Performing Arts, Science Centers, Public Gardens, Heritage Sites, Libraries, Archives, and Zoos is a game-changing book with broad reach into the cultural sector, while still serving the museum community.
