The state of the world's children. 1998 UNICEF Sustainability Through the Lens of Environmental Sociology Mdpi AG Our planet is undergoing radical environmental and social changes. Sustainability has now been put into question by, for example, our consumption patterns, loss of biodiversity, depletion of resources, and exploitative power relations. With apparent ecological and social limits to globalization and development, current levels of consumption are unsustainable, inequitable, and inaccessible to the majority of humans. Understanding and attaining sustainability is a crucial matter at a time when our planet is in peril--environmentally, economically, socially, and politically. Since its official inception in the 1970s, environmental sociology has provided a powerful lens to understanding the challenges, possibilities and modes of sustainability. Most chapters in this book were published as peer-reviewed articles in Sustainability in its special issue "Sustainability through the Lens of Environmental Sociology," providing an environmental sociology approach to understanding and achieving the widely used notion of "sustainability." This edited collection covers, among other topics, the inherent discursive formations of environmental sociology, conceptual tools and paradoxes, competing theories and practices, and their complex implications on our society at large. Chapters in this book specifically focus on how sustainable development has been understood through different theoretical lenses in environmental sociology, such as ecological modernization, policy/reformist sustainable

development, and critical structural approaches (such as the treadmill of production, ecological Marxism, metabolic rift theory, etc.); and how sustainable development has been practiced in, or by, various stakeholders, such as states, corporations, and local communities, for various ends, through the use of specific case studies, showing, for example, the discursive shifts, dynamic formations, and diverse contours of sustainable development. The range of relevant topics includes: - Environmental sociology as a field of inquiry for sustainability - Historical context of sustainable development in environmental sociology - Nature-society relationship in environmental sociology - Theories/approaches to sustainability discourse in environmental sociology - Environmentalism/environmental movements for sustainability - Empirical cases (such as climate change, biodiversity, food, certification, etc.) through the lens of environmental sociology

Forms of Curriculum Inquiry State University of New York Press This book presents an overview of seventeen forms of inquiry used in curriculum research in education. Conventional disciplinary forms of inquiry, such as philosophical, historical, and scientific, are described, as well as more recently acknowledged forms such as ethnographic, aesthetic, narrative, phenomenological, and hermeneutic. Interdisciplinary forms such as theoretical, normative, critical, deliberative, and action research are also included. These forms of inquiry are distinguished from one another in terms of purposes, types of research questions addressed, and the processes and logic of procedure employed in arriving at knowledge claims.

The State of the World's Children 2019 Children, Food and Nutrition - Growing Well in a Changing World UN This report examines nutrition, providing a fresh perspective on a rapidly evolving challenge. Despite progress in the past two decades, around 200 million under-fives suffer from undernutrition. Adding to this toll is rising obesity, which affects 38 million children. All these forms of malnutrition threaten children's development, while obesity is creating a lifelong legacy of disease. At the heart of this evolving challenge is a global shift towards modern diets that do not meet children's nutritional requirements. The report provides unique data and analysis of malnutrition in the 21st century and outlines recommendations to put children's needs at the heart of global and national food systems.

Greenhouse Gas Emissions and Terrestrial Ecosystems Frontiers Media SA Human Resource Development in South Korea Theory and Cases Springer Nature Winner of the 2020 R. Wayne Pace HRD Book of the Year Award, this edited book covers major trends, notable distinctions, and the challenges and needs for preparing future HRD activities in South Korea. It consists of three major sections: national and social issues of HRD, sector perspectives on HRD, and contemporary issues and trends. To cover contemporary trends and future issues, authors examine topics in diverse areas, such as the application of data analytics for HRD, action learning trends, and psychological and work climate issues affecting performance. Through theory and cases, this book will show how HRD can be successful at the organizational, industrial, and societal levels as well as the

future needs required to further advance HRD in the nation. International Comparisons of Educational Attainment Water in Asian Cities Utilities' Performance and Civil Society Views Recognizing that safe and adequate water supplies are an essential component of fighting poverty and disease, the ADB Water for All Publication series focuses on understanding the water issues facing poor people in developing countries in Asia and the Pacific region. This document summarizes both a comprehensive study on water in 18 Asian cities and a regional workshop held to present the findings of the study to representatives of civil society and the media and examine the role these groups play in finding solutions to improve access and quality of water for the urban poor. How Big is the Brain Drain? International Monetary Fund The brain drain from developing countries has been lamented for many years, but knowledge of the empirical magnitude of the phenomenon is scant owing to the lack of systematic data sources. This paper presents estimates of emigration rates from 61 developing countries to OECD countries for three educational categories constructed using 1990 U.S. Census data, Barro and Lee's data set on educational attainment, and OECD migration data. Although still tentative in many respects, these estimates reveal a substantial brain drain from the Caribbean, Central America, and some African and Asian countries. Landon Cabell Garland The Prince of Southern Educators Bulletin Of Vanderbilt University, Volume 38, Number 2. Extended Producer Responsibility Updated Guidance for Efficient Waste Management OECD This report updates the 2001 Guidance Manual for Governments on Extended Producer Responsibility (EPR), which provided a broad overview of the key issues, general considerations, and the potential benefits and costs associated with producer responsibility for managing the waste generated by their products put on the market. Since then, EPR policies to help improve recycling and reduce landfilling have been widely adopted in most OECD countries; product coverage has been expanded in key sectors such as packaging, electronics, batteries and vehicles; and EPR schemes are spreading in emerging economies in Asia, Africa and South America, making it relevant to address the differing policy contexts in developing countries. In light of all of the changes in the broader global context, this updated review of the guidelines looks at some of the new design and implementation challenges and opportunities of EPR policies, takes into account recent efforts undertaken by governments to better assess the cost and environmental effectiveness of EPR and its overall impact on the market, and addresses some of the specific issues in emerging market economies. Tax Practitioner's Guide to Identity Theft Cch Tax-related identity theft crimes have risen dramatically in recent years, with millions affected annually. Tax Practitioner Guide to Identity Theft explores federal and state statutes that criminalize identity theft, and the recent cooperative steps taken by the IRS, the Department of Justice, the FBI, the Secret Service, and the U.S. Postal Inspection Service to protect personally identifiable information and pursue identity thieves. The book covers recent case law and provides twenty-five best practices that clients can employ to decrease the risk of both tax-related and non-tax related identity theft Advances in Design and Digital Communication Proceedings of the 4th International Conference on Design and Digital Communication, Digicom 2020, November 5-7, 2020, Barcelos, Portugal Springer Nature This book reports on research findings and practical lessons featuring advances in: digital and interaction design; graphic design and branding; design strategies and methodologies; design education; society and communication in design practice; and other related areas. International Mobility of the Highly Skilled Organisation for Economic Co-operation and Development Considering that improved knowledge and understanding of these issues are necessary for informing the policy agenda, the OECD held a seminar on "International Mobility of Highly Skilled Workers: From Statistical Analysis to the Formulation of Policies", in Paris on 11-12 June 2001. This seminar was organised by the Directorate for Science, Technology and Industry (DSTI) and the Directorate for Education, Employment, Labour and Social Affairs (DEELSA).

The seminar targeted three main objectives, which are mirrored in the structure of the book: Provide data on the scale and characteristics of flows and stocks of skilled and highly skilled foreign workers in the OECD Member countries and certain non-member economies: South Africa, China, India, Israel, Russia and Chinese Taipei; to assess the quality of the data available and the concepts used, and to help improve their comparability.
