Life

A Critical User's Manual

John Wiley & Sons How can we think of life in its dual expression, matter and experience, the living and the lived? Philosophers and, more recently, social scientists have offered multiple answers to this question, often privileging one expression or the other - the biological or the biographical. But is it possible to conceive of them together and thus reconcile naturalist and humanist approaches? Using research conducted on three continents and engaging in critical dialogue with Wittgenstein, Benjamin, and Foucault, Didier Fassin attempts to do so by developing three concepts: forms of life, ethics of life, and politics of life. In the conditions of refugees and asylum seekers, in the light of mortality statistics and death benefits, and via a genealogical and ethnographical inquiry, the moral economy of life reveals troubling tensions in the way contemporary societies treat human beings. Once the pieces of this anthropological composition are assembled, like in Georges Perec's jigsaw puzzle, an image appears: that of unequal lives.

The Gospel at Colonus

Theatre Communications Group "I've been in a lot of shows in my life, and I've thought a lot of 'em were pretty good, but this is a masterpiece." -Morgan Freeman "An ancient drama explodes into a hand-clapping, soul-stirring gospel musical." -Chicago Tribune "One of the most marvelous shows the decade... Colonus is a triumph of reconciliation, bringing together black and white, pagan and

Christian, ancient and modern in a sunburst of joy that seems to touch the secret heart of civilization itself." -Jack Kroll, Newsweek

Writing at the end of his own long life, in Oedipus at Colonus Sophocles depicted his doomed hero's final hours; at the moment of his death the aged Oedipus is free at last. Envisioning this rarely performed meditation on mortality as a rousing service in a black church, Lee Breuer has created a remarkable text based on Robert Fitzgerald's splendid translation. Rearranging, simplifying, cutting here and enhancing there, Breuer has above all honored the spirit and the poetry of Sophocles's lovely work, giving it a new life in this time and place. Inspired by the joyous faith at the heart of African-American Christianity, Breuer and composer Bob Telson have turned a momentary wish of Sophocles' chorus into a central desire of Oedipus himself. "I wish the wind would lift me," he sings, "so I could look with the eyes of the angels." The fundamental action of The Gospel of Colonus is to "lift him up" - at the hour of Oedipus' death to celebrate his life, to journey through grief to triumphal resurrection. "Man," says lead actor Morgan Freeman, "this is what theatre is all about." Lee Breuer is a founding member of the acclaimed avant-garde company Mabou Mines. He has written and directed many groundbreaking works for theatre including a trilogy of "Animations," A Prelude to Death in Venice and Haji. Sister Suzie Cinema, a cinema collection of his poems and performances, was previously published by TCG. Bob Telson's recent projects include collaborating with Breuer on The Warrior Ant and composing the score for the film Bagdad Caf .

The Need for Roots

Prelude to a Declaration of Duties Towards Mankind

Routledge Hailed by Andre Gide as the patron saint of all outsiders, Simone Weil's short life was ample testimony to her beliefs. In 1942 she fled France along with her family, going firstly to America. She then moved back to London in order to work with de Gaulle. Published posthumously The Need for Roots was a direct result of this collaboration. Its purpose was to help rebuild France after the war. In this, her most famous book, Weil reflects on the importance of religious and political social structures in the life of the individual. She wrote that one of the basic obligations we have as human beings is to not let another suffer from hunger. Equally as important, however, is our duty towards our community: we may have declared various human rights, but we have overlooked the obligations and this has left us self-righteous and rootless. She could easily have been issuing a direct warning to us today, the citizens of Century 21.

Nineteen Eighty-Four

epubli "Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

Economics of Feeding the Hungry

Sustainable Intensification and Sustainable Food

Security

Routledge As productivity expands to cater for population increase and shifting diets, many individuals remain hungry, whilst others suffer obesity, and significant amounts of food are wasted. Yet, this triple dilemma oversimplifies the underlying complexity. This book explores this complexity from an economics perspective, looking at the processes involved and the institutional structures that direct and constrain their interaction. After discussing alternative approaches to measuring hunger and food insecurity, this volume considers the four dimensions of food security: availability, affordability, utilization and stability. In summarising the main debates, issues and policy interventions, Russell discusses the problems of ensuring sufficient food in the face of ever-slowing growth in productivity and constraints on land and water. The problems of food affordability, the need for safety nets, and the need for poverty alleviation measures that reach excluded and disadvantaged groups is also discussed. This is alongside an exploration of issues related to food utilization and the problems of hidden hunger, obesity, food waste, and the interventions needed to relieve these problems. This volume is of great interest to those who study rural development, ecological economics and development economics, as well as policy makers who seek a better understanding of underlying processes, ongoing and emerging issues, and potentially relevant interventions.
