[Lulu.com](#) **Marine Corps Warfighting Publication MCWP 6-10 (Formerly MCWP 6-11) Leading Marines 2 May 2016 The act of leading Marines is a sacred responsibility and a rewarding experience. This publication describes a leadership philosophy that speaks to who we are as Marines. It is about the relationship between the leader and the led. It is also about the bond between all Marines that is formed in the common forge of selfless service and shared hardships. It's in this forge where Marines are hardened like steel, and the undefinable spirit that forms the character of our Corps is born. It draws from shared experiences, hardships, and challenges in training and combat. Leading Marines is not meant to be read passively; as you read this publication, think about the material. You should reflect on, discuss, and apply the concepts presented in this publication. Furthermore, it is the responsibility of leaders at all levels to mentor and develop the next generation of Marine leaders.**

THE GUERRILLA AND HOW TO FIGHT HIM

MCDP 1-3 TACTICS

Createspace Independent Publishing Platform **This publication is about winning in combat. Winning requires many things: excellence in techniques, an appreciation of the enemy, exemplary leadership, battlefield judgment, and focused combat power. Yet these factors by themselves do not ensure success in battle. Many armies, both winners and losers, have possessed many or all of these attributes. When we examine closely the differences between victor and vanquished, we draw one conclusion. Success went to the armies whose leaders, senior and junior, could best focus their efforts-their skills and their resources-toward a decisive end. Their success arose not merely from excellence in techniques, procedures, and material but from their leaders' abilities to uniquely and effectively combine them. Winning in combat depends upon tactical leaders who can think creatively and act decisively.**

THE ART OF DECEPTION

CONTROLLING THE HUMAN ELEMENT OF SECURITY

[John Wiley & Sons](#) The world's most infamous hacker offers an insider's view of the low-tech threats to high-tech security Kevin Mitnick's exploits as a cyber-desperado and fugitive form one of the most exhaustive FBI manhunts in history and have spawned dozens of articles, books, films, and documentaries. Since his release from federal prison, in 1998, Mitnick has turned his life around and established himself as one of the most sought-after computer security experts worldwide. Now, in The Art of Deception, the world's most notorious hacker gives new meaning to the old adage, "It takes a thief to catch a thief." Focusing on the human factors involved with

information security, Mitnick explains why all the firewalls and encryption protocols in the world will never be enough to stop a savvy grifter intent on rifling a corporate database or an irate employee determined to crash a system. With the help of many fascinating true stories of successful attacks on business and government, he illustrates just how susceptible even the most locked-down information systems are to a slick con artist impersonating an IRS agent. Narrating from the points of view of both the attacker and the victims, he explains why each attack was so successful and how it could have been prevented in an engaging and highly readable style reminiscent of a true-crime novel. And, perhaps most importantly, Mitnick offers advice for preventing these types of social engineering hacks through security protocols, training programs, and manuals that address the human element of security.

GOVERNMENT FAILURE VERSUS MARKET FAILURE

MICROECONOMICS POLICY RESEARCH AND GOVERNMENT PERFORMANCE

Brookings Institution Press **When should government intervene in market activity and when is it best to let market forces take their natural course? How does the existing empirical evidence about government performance guide our answers to these questions? In this clear, concise book, Clifford Winston offers his innovative analysis—shaped by thirty years of evidence—to assess the efficacy of government interventions. Markets fail when it is possible to make one person better off without making someone else worse off, thus indicating inefficiency. Governments fail when an intervention is unwarranted because markets are performing well or when the intervention fails to correct a market problem efficiently. Winston concludes from existing research that the cost of government failure may actually be considerably greater than the cost of market failure: "My search of the evidence is not limited to policy failures. I will report success stories, but few of them emerged from my search." The prevalence of market failure is due to a lack of conviction in favor of markets, the inflexibility of intervening government agencies, and political forces that enable certain interest groups to benefit at the expense of society as a whole. Winston suggests that government policy can be improved by making greater use of market-oriented solutions that have already produced benefits in certain situations.**

SUPPLYING WASHINGTON'S ARMY

FIRST TO FIGHT

AN INSIDE VIEW OF THE U.S. MARINE CORPS

Naval Institute Press **"Required Reading" Marine Corps Professional Reading Program Bluejacket Paperback Book Series** In this riveting insider's chronicle, legendary Marine General "Brute" Krulak submits an unprecedented examination of U.S. Marines--their fights on the battlefield and off, their extraordinary esprit de corps. Deftly blending history with autobiography, action with analysis, and separating fact from fable, General Krulak touches the very essence of the Corps: what it means to be a Marine and the reason behind its consistently outstanding performance and reputation. Krulak also addresses the most basic but challenging question of all about the Corps: how does it manage to survive--even to flourish--despite overwhelming political odds and, as the general writes, "an extraordinary propensity for shooting itself in the foot?" To answer this question Krulak examines the foundation on which the Corps is built, a system of intense loyalty to God, to country, and to other Marines. He also takes a close look at Marines in war, offering challenging accounts of their experiences in World War II, Korea, and Vietnam. In addition, he describes the Corps's relationship to other services, especially during the unification battles following World War II, and offers new insights into the decision-making process in times of crisis. First published in hardcover in 1984, this book has remained popular ever since with Marines of every rank.

THE MARINES OF MONTFORD POINT

AMERICA'S FIRST BLACK MARINES

Univ of North Carolina Press **With an executive order from President Franklin Roosevelt in 1941, the United States Marine Corps--the last all-white branch of the U.S. military--was forced to begin recruiting and enlisting African Americans. The first black recruits received basic training at the segregated Camp Montford Point, adjacent to Camp Lejeune, near Jacksonville, North Carolina. Between 1942 and 1949 (when the base was closed as a result of President Truman's 1948 order fully desegregating all military forces) more than 20,000 men trained at Montford Point, most of them going on to serve in the Pacific Theatre in World War II as members of support units. This book, in conjunction with the documentary film of the same name, tells the story of these Marines for the first time. Drawing from interviews with 60 veterans, The Marines of Montford Point relates the experiences of these pioneers in their own words. From their stories, we learn about their reasons for enlisting; their arrival at Montford Point and the training they received there; their lives in a segregated military and in the Jim Crow South; their experiences of combat and service in**

World War II, Korea, and Vietnam; and their legacy. The Marines speak with flashes of anger and humor, sometimes with sorrow, sometimes with great wisdom, and always with a pride fostered by incredible accomplishment in the face of adversity. This book serves to recognize and to honor the men who desegregated the Marine Corps and loyally served their country in three major wars.

COMMUNITIES IN ACTION

PATHWAYS TO HEALTH EQUITY

[National Academies Press](#) **In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.**

GLOBAL MONITORING REPORT 2014/2015

ENDING POVERTY AND SHARING PROSPERITY

World Bank Publications The Global Monitoring Report 2014/2015 will, for the first time, monitor and report on the World Bank Group's twin goals of ending extreme poverty by 2030 and boosting shared prosperity, while continuing to track progress toward the Millennium Development Goals (MDGs). This Global Monitoring Report examines how a select set of policies in the areas of human capital and the environment can create jobs and make development more inclusive and sustainable, while highlighting how social assistance policies can help end poverty and improve growth prospects. It discusses most of these issues across a full spectrum of countries. This means the Report not only addresses low- and middle-income countries but also, for the first time, includes a discussion of high-income countries as well. The Report will contain quantitative information about the World Bank Group's twin goals: It will provide an assessment on how far the world has to go to end extreme poverty by 2030 and how much of prosperity has been shared with the bottom 40 percent of a country's population. The report is prepared in collaboration with the International Monetary Fund (IMF) and the Organization for Economic Co-operation and
