## The Challenge of Public Pension Reform in Advanced and Emerging Economies

**International Monetary Fund Pension reform is high on the policy agenda of many advanced and emerging market economies. In advanced economies the challenge is generally to contain future increases in public pension spending as the population ages. In emerging market economies, the challenges are often different. Where pension coverage is extensive, the issues are similar to those in advanced economies. Where pension coverage is low, the key challenge will be to expand coverage in a fiscally sustainable manner. This volume examines the outlook for public pension spending over the coming decades and the options for reform in 52 advanced and emerging market economies.**

## Classification - the Ubiquitous Challenge

Proceedings of the 28th Annual  
Conference of the Gesellschaft für

# Klassifikation e.V., University of Dortmund, March 9-11, 2004

**Springer Science & Business Media** The contributions in this volume represent the latest research results in the field of Classification, Clustering, and Data Analysis. Besides the theoretical analysis, papers focus on various application fields as Archaeology, Astronomy, Bio-Sciences, Business, Electronic Data and Web, Finance and Insurance, Library Science and Linguistics, Marketing, Music Science, and Quality Assurance.

# Model Rules of Professional Conduct

**American Bar Association** The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

# Meeting the Challenge of Private

# Sector Development

## Evidence from the Mekong Sub-region

**OECD** This book explores how governments can help firms in developing countries better seize the opportunities created by globalization and contribute to improving employment opportunities and poverty reduction. More specifically, it analyzes how local firms can get involved in global value chains, access distant and more profitable markets and upgrade their capabilities. Based on case studies, the book focuses on selected industries and reviews experiences of governments and enterprises in the Mekong sub-region (Cambodia, Laos, Thailand and Vietnam). It seeks to draw bottom up policy conclusions from firm- and industry-level analyses in specific country settings about how best to support private sector development in developing countries.--Publisher's description.

## Antibiotic Resistance

### The End of Modern Medicine?

**Bridget Williams Books** In ten years' time, will antibiotics still work? Have we let bacteria get the upper hand in the evolutionary arms race? In the 1920s the discovery of the antibiotic penicillin started a golden age of medicine. However, experts warn that the end of that age may be just a decade away. In this **BWB Text**, microbiologist Siouxsie Wiles explores the looming crisis of antibiotic resistance and its threat to New Zealand. Wiles concludes that New Zealand must do more to protect the public from a future without antibiotics.

## Private International Law and the Internet

**Kluwer Law International B.V.** In this, the fourth edition of *Private International Law and the Internet*, Professor Dan Svantesson provides a detailed and insightful account of what has emerged as the most crucial current issue in private international law; that is, how the Internet affects and is affected by the five fundamental questions: When should a lawsuit be entertained by the courts? Which state's law should be applied? When should a court that can entertain a lawsuit decline to do so? How wide 'scope of jurisdiction' should be afforded to a court with jurisdiction over a

dispute? And will a judgment rendered in one country be recognized and enforced in another? Professor Svantesson identifies and investigates twelve characteristics of Internet communication that are relevant to these questions and then proceeds with a detailed discussion of what is required of modern private international law rules. Focus is placed on several issues that have far-reaching practical consequences in the Internet context, including the following: cross-border defamation; cross-border business contracts; cross-border consumer contracts; and cross-border intellectual property issues. A wide survey of private international law solutions encompasses insightful and timely analyses of relevant laws adopted in a variety of jurisdictions, including Australia, England, Hong Kong SAR, the United States, Germany, Sweden, and China, as well as in a range of international instruments. There is also a chapter on advances in geo-identification technologies and their special value for legal practice. The book concludes with two model international conventions, one on cross-border defamation and one on cross-border contracts, as well as a set of practical checklists to guide legal practitioners faced with cross-border matters within the discussed fields. Professor Svantesson's book brings together a wealth of research findings in the overlapping disciplines of law and technology that will be of particular utility to practitioners and academics working in this complex and rapidly changing field. His thoughtful analysis of the interplay of the developing Internet and private international law will also be of great value, as will the tools he offers with which to anticipate the future. *Private International Law and the Internet* provides a remarkable stimulus to continue working towards globally acceptable private international law rules for communication via the Internet.

## Federal Register

## User-Driven Healthcare: Concepts, Methodologies, Tools, and Applications

## Concepts, Methodologies, Tools, and Applications

*IGI Global User-Driven Healthcare: Concepts, Methodologies, Tools, and Applications* provides a global discussion on the practice of user-driven learning in healthcare and connected disciplines and its influence on

learning through clinical problem solving. This book brings together different perspectives for researchers and practitioners to develop a comprehensive framework of user-driven healthcare.

## Private Enterprise-Led Economic Development in Sub-Saharan Africa

### The Human Side of Growth

**Springer Private Enterprise-Led Development in Sub-Saharan Africa** provides a novel theoretical and conceptual model to guide research into Africa's economic development. It endorses the view that private enterprise-led growth will help reduce poverty since it strengthens individuals' capacity to care for themselves and their families.

## The Emerald Handbook of Challenge Based Learning

**Emerald Group Publishing** This is the first handbook offering an in-depth exploration on how to conceive, design, implement, monitor, and develop Challenge-Based Learning initiatives in Higher Education Institutions. It presents contributions from international experts, from theory to practice, and provides insightful directions for future research on this topic.

## Data Protection and Privacy

## Data Protection and Democracy

**Bloomsbury Publishing** The subjects of this volume are more relevant than ever, especially in light of the raft of electoral scandals concerning voter profiling. This volume brings together papers that offer conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy and data protection. It is one of the results of the twelfth annual International Conference on Computers, Privacy and Data Protection, CPDP, held in Brussels in January 2019. The book explores the following topics: dataset nutrition labels, lifelogging and privacy by design, data protection iconography, the substance and essence of the right to data protection, public registers and data protection, modelling and verification in data protection impact assessments, examination scripts and data protection law in Cameroon, the protection of children's digital rights in the GDPR, the concept of the scope of risk in the GDPR and the ePrivacy Regulation. This interdisciplinary book has been written at a time

when the scale and impact of data processing on society - not only on individuals, but also on social systems - is becoming ever starker. It discusses open issues as well as daring and prospective approaches, and will serve as an insightful resource for readers with an interest in computers, privacy and data protection.

# Health Data Pools Under European Data Protection and Competition Law

## Health as a Digital Business

**Springer Nature** This book explores the emerging economic reality of health data pools from the perspective of European Union policy and law. The contractual sharing of health data for research purposes is giving rise to a free movement of research data, which is strongly encouraged at European policy level within the Digital Single Market Strategy. However, it has also a strong impact on data subjects fundamental right to data protection and smaller businesses and research entities ability to carry out research and compete in innovation markets. Accordingly the work questions under which conditions health data sharing is lawful under European data protection and competition law. For these purposes, the work addresses the following sub-questions: i) which is the emerging innovation paradigm in digital health research?; ii) how are health data pools addressed at European policy level?; iii) do European data protection and competition law promote health data-driven innovation objectives, and how?; iv) which are the limits posed by the two frameworks to the free pooling of health data? The underlying assumption of the work is that both branches of European Union law are key regulatory tools for the creation of a common European health data space as envisaged in the Commissions 2020 European strategy for data. It thus demonstrates that both European data protection law, as defined under the General Data Protection Regulation, and European competition law and policy set research enabling regimes regarding health data, provided specific normative conditions are met. From a further perspective, both regulatory frameworks place external limits to the freedom to share (or not share) research valuable data. .

## Understanding housing policy (third

edition)

**Policy Press** The 3rd edition of this bestselling textbook has been completely revised to address the range of socio-economic factors that have influenced UK housing policy in the years since the previous edition was published. The issues explored include the austerity agenda, the impact of the Coalition government's housing policies, the 2015 Conservative government's policy direction, the evolving devolution agenda and the recent focus on housing supply. The concluding chapter examines new policy ideas in the context of theoretical approaches to understanding housing policy: laissez-faire economics; social reformism; Marxist political economy; behavioural perspectives and social constructionism. Throughout the textbook, substantive themes are illustrated by boxed examples and case studies. The author focuses on principles and theory and their application in the process of constructing housing policy, ensuring that the book will be a vital resource for undergraduate and postgraduate level students of housing and planning and related social policy modules.

## The Challenge of Public Pension Reform in Advanced and Emerging Economies

**International Monetary Fund** This paper reviews past trends in public pension spending and provides projections for 27 advanced and 25 emerging economies over 2011-2050. In constructing these projections, the paper incorporates the impact of recent pension reforms and highlights the key assumptions underlying these projections and associated risks. The paper also presents reform options to address future pension spending pressures in the advanced and emerging economies. These reforms—mainly increasing retirement ages, reducing replacement rates, or increasing payroll taxes—are discussed in the context of their role in fiscal consolidation, and their implications for both equity and economic growth. In addition, the paper examines the challenge of emerging economies of expanding coverage in a fiscally sustainable manner

## Africa's Development Dynamics 2022 Regional Value Chains for a

# Sustainable Recovery

## Regional Value Chains for a Sustainable Recovery

**OECD Publishing** Africa's Development Dynamics uses lessons from Central, East, North, Southern and West Africa to develop policy recommendations and share good practices. The 2022 edition explores how developing regional value chains can help African countries rebound from the socio-economic shocks of the COVID-19 pandemic and accelerate productive transformation.

# China's Economic Challenge: Unconventional Success

**World Scientific** This book analyzes economic strategies responsible for China's 40 years of 40-fold growth, suggesting how such strategies might be applied elsewhere. It combines a seven-chapter chronological analysis of China's growth with three additional chapters on the government's leadership role, success in poverty reduction, and China's combined international finance and trade experience. The book recaps why China's success challenges the United States and the field of development economics. One of its emphases, the 1980s, reports how generous rural price and land-tenure reforms caused a rural income boom that threatened urban subsidized livelihoods and underpinned consequent violence. It describes how China will likely face a similar challenge moving forward, during the planned merger of rural and urban workforces. The book includes an analysis of the US-China trade war and China's economic prospects in the wake of COVID-19. It is a clear and timely account for anyone interested in understanding the institutions and policies responsible for China's successful development and its likely continuation.

# Guide to Security Assurance for Cloud Computing

**Springer** This practical and didactic text/reference discusses the leading edge of secure cloud computing, exploring the essential concepts and principles, tools, techniques and deployment models in this field. Enlightening perspectives are presented by an international collection of pre-eminent authorities in cloud security assurance from both academia

and industry. Topics and features:

- Describes the important general concepts and principles of security assurance in cloud-based environments
- Presents applications and approaches to cloud security that illustrate the current state of the art
- Reviews pertinent issues in relation to challenges that prevent organizations moving to cloud architectures
- Provides relevant theoretical frameworks and the latest empirical research findings
- Discusses real-world vulnerabilities of cloud-based software in order to address the challenges of securing distributed software
- Highlights the practicalities of cloud security, and how applications can assure and comply with legislation
- Includes review questions at the end of each chapter

This Guide to Security Assurance for Cloud Computing will be of great benefit to a broad audience covering enterprise architects, business analysts and leaders, IT infrastructure managers, cloud security engineers and consultants, and application developers involved in system design and implementation. The work is also suitable as a textbook for university instructors, with the outline for a possible course structure suggested in the preface. The editors are all members of the Computing and Mathematics Department at the University of Derby, UK, where Dr. Shao Ying Zhu serves as a Senior Lecturer in Computing, Dr. Richard Hill as a Professor and Head of the Computing and Mathematics Department, and Dr. Marcello Trovati as a Senior Lecturer in Mathematics. The other publications of the editors include the Springer titles *Big-Data Analytics and Cloud Computing*, *Guide to Cloud Computing* and *Cloud Computing for Enterprise Architectures*.

## The Big Book of Conflict Resolution Games: Quick, Effective Activities to Improve Communication, Trust and Collaboration

McGraw Hill Professional Make workplace conflict resolution a game that EVERYBODY wins! Recent studies show that typical managers devote more than a quarter of their time to resolving coworker disputes. The *Big Book of Conflict-Resolution Games* offers a wealth of activities and exercises for groups of any size that let you manage your business (instead of managing personalities). Part of the acclaimed, bestselling *Big Books* series, this guide offers step-by-step directions and customizable tools that empower you to heal rifts arising from ineffective communication, cultural/personality clashes, and other specific problem areas—before they affect your organization's bottom line. Let *The Big Book of Conflict-Resolution Games* help you to: Build trust Foster morale Improve processes Overcome diversity issues And more Dozens of physical and verbal

activities help create a safe environment for teams to explore several common forms of conflict—and their resolution. Inexpensive, easy-to-implement, and proved effective at Fortune 500 corporations and mom-and-pop businesses alike, the exercises in *The Big Book of Conflict-Resolution Games* delivers everything you need to make your workplace more efficient, effective, and engaged.

## Open Research Problems in Network Security

### IFIP WG 11.4 International Workshop, INetSec 2010, Sofia, Bulgaria, March 5-6, 2010, Revised Selected Papers

**Springer Science & Business Media** This book constitutes the refereed post-conference proceedings of the IFIP WG 11.4 International Workshop, iNetSec 2010, held in Sofia, Bulgaria, in March 2010. The 14 revised full papers presented together with an invited talk were carefully reviewed and selected during two rounds of refereeing. The papers are organized in topical sections on scheduling, adversaries, protecting resources, secure processes, and security for clouds.

## Strengthening Forensic Science in the United States

### A Path Forward

**National Academies Press** Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic

Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. **Strengthening Forensic Science in the United States** gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

## Information Privacy in the Evolving Healthcare Environment, 2nd Edition

CRC Press Advances in health information technology (health IT) have the potential to improve the quality of healthcare, to increase the availability of health information for treatment, and to implement safeguards that cannot be applied easily or cost-effectively to paper-based health records. However, the digitization of health information is also raising new privacy risks and concerns. Sensitive health information in digital form is more easily aggregated, used, and shared. In addition, the rising cost of healthcare and the search for efficiency may create incentives to use the information in new ways. Research has consistently shown that while the public sees the potential value of health information exchange and technological advancements, it remains gravely concerned about the privacy of their sensitive health information. As a result, it is becoming increasingly clear that ensuring public trust will be critical to the successful implementation of nationwide health information exchange. The purpose of this second edition is two-fold: 1) to educate readers about privacy concepts and 2) highlight key privacy issues facing the nation and the healthcare community as it moves towards electronic health records and health information exchange. The first three chapters are descriptive in nature, defining privacy and distinguishing it from security, defining the complex legal landscape for health information privacy, and setting the stage for the following chapters by describing the current landscape of the evolving healthcare environment. The following chapters discuss specific privacy issues and challenges in detail. The book concludes with a chapter providing a view to the future of healthcare and the association privacy implications. This is an updated version of one of HIMSS' best-selling books on information privacy.

# The GDPR Challenge

## Privacy, Technology, and Compliance in an Age of Accelerating Change

**CRC Press Consent is necessary for collecting, processing and transferring Personal Identifiable Information (PII) and sensitive personal data. But to what extent? What are the limitations and restricts to avoid penalties under The General Data Protection Regulation 2018 (GDPR) rules, which may be up to 4% of annual global turnover or €20 million (whichever is higher), enforcements and sanctions? Under GDPR Article 51, each EU Member State shall maintain an independent public authority to be responsible for monitoring the application of this regulation to protect the fundamental rights of data subjects (Supervisory Authority). The Supervisory Authority has powers to issue warnings, conduct audits, recommend remediation, order erasure of data and suspend data transfers to a third country. GDPR has changed the way data is used, accessed and stored. It's reach extends well beyond the European Union and is the basis of other data privacy laws around the world. This book provides a review and guidance on implementing and compliance of GDPR while taking advantage of technology innovations and supported by real-life examples. The book shows the wide scope of applications to protect data privacy while taking advantage of processes and techniques in various fields such as eDiscovery, Cyber Insurance, Virtual-based Intelligence, Information Security, Cyber Security, Information Governance, Blockchain and Biometric technologies and techniques.**

## Healthcare Systems Management: Methodologies and Applications

### 21st Century Perspectives of Asia

**Springer This edited volume focuses on research conducted in the area of healthcare systems management. Chapters are extensions of works presented at the International Conference on Management of Ergonomic Design, Industrial Safety and Healthcare Systems. The book addresses the need to have the knowledge of technological and resource management, clinical performances and quality of healthcare delivery systems in order to**

make hospital systems well and adequately designed and operationally effective ensuring the quality of healthcare to patients. It is a useful resource for students, researchers, industrial professionals and design engineers.

## The Private Sector and Water Pricing in Efficient Urban Water Management

**Routledge** This book focuses on participation of the public and private sectors in urban water management and on the role of water pricing. It discusses in-depth topics such as public choices of urban water service management; dynamics of privatization and regulation of water services; adoption of water demand instruments; impacts of price and non-price policies on residential water demand; quality of water services; lessons from not-for-profit public-private partnerships; and critical examinations of models and projections of demands in water utility resource planning in England and Wales. Appropriateness of water prices and tariffs in achieving socially desirable outcomes is also analyzed and a global survey of urban water tariffs is approached with a focus on sustainability, efficiency and fairness. This book was originally published as a special issue of the International Journal of Water Resources Management.

## Handbook of Research on Educational Communications and Technology

### A Project of the Association for Educational Communications and Technology

**Routledge First** Published in 2008. Routledge is an imprint of Taylor & Francis, an informa company.

# The Pension Challenge

## Risk Transfers and Retirement Income Security

**OUP Oxford** This book, the first in a new series produced by the Pension Research Council of the Wharton School in collaboration with Oxford University Press, explores ways to enhance retirement security in a volatile financial environment. Mitchell and Smetters begin by assessing the myriad retirement risks confronting employees, retirees, employers, and governments, and it shows how stakeholders can work to reinvent pensions that perform well in a competitive global setting. Contributors then indicate how pension systems can be better designed to help protect against these risks. Of special interest is a discussion of new financial products and structures to meet and manage challenges to old-age security. Examples considered include pension investment guarantees and hedges, adapting catastrophe bonds to the pension context, and key regulatory structures and portfolio requirements designed to protect unwary or unwitting pension participants. The contributors draw important lessons for a wide range of countries, drawing from both developed and developing market experiences. Contributors include world-famous finance experts and risk management faculty, development economists, pension regulators, and pension consultants.

## The Nonresponse Challenge to Surveys and Statistics

**SAGE** Surveys are the principal source of data not only for social science, but for consumer research, political polling, and federal statistics. In response to social and technological trends, rates of survey nonresponse have risen markedly in recent years, prompting observers to worry about the continued validity of surveys as a tool for data gathering. Newspaper stories, magazine articles, radio programs, television broadcasts, and Internet blogs are filled with data derived from surveys of one sort or another. Reputable media outlets generally indicate whether a survey is representative, but much of the data routinely bandied about in the media and on the Internet are not based on representative samples and are of dubious use in making accurate statements about the populations they purport to represent. Surveys are social interactions, and like all interactions between people, they are embedded within social structures and guided by shared cultural understandings. This issue of *The ANNALS* examines the difficulties with finding willing respondents to these surveys

and how the changing structure of society, whether it be the changing family structure, mass immigration, rising inequality, or the rise of technology, has presented new issues to conducting surveys. This volume will be of interest to faculty and students who specialize in sociological movements as well as economic and immigration movements and its effect on surveying.

## Cyber Security, Artificial Intelligence, Data Protection & the Law

**Springer Nature** This book provides a comparison and practical guide of the data protection laws of Canada, China (Hong Kong, Macau, Taiwan), Laos, Philippines, South Korea, United States and Vietnam. The book builds on the first book *Data Protection Law. A Comparative Analysis of Asia-Pacific and European Approaches*, Robert Walters, Leon Trakman, Bruno Zeller. As the world comes to terms with Artificial Intelligence (AI), which now pervades the daily lives of everyone. For instance, our smart or Iphone, and smart home technology (robots, televisions, fridges and toys) access our personal data at an unprecedented level. Therefore, the security of that data is increasingly more vulnerable and can be compromised. This book examines the interface of cyber security, AI and data protection. It highlights and recommends that regulators and governments need to undertake wider research and law reform to ensure the most vulnerable in the community have their personal data protected adequately, while balancing the future benefits of the digital economy.

## Health Professions Education A Bridge to Quality

**National Academies Press** The Institute of Medicine study *Crossing the Quality Chasm* (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. *Health Professions Education: A Bridge to Quality* is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators,

administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.

## Amnesty and Revolution: An Amateur's View of Life As It Stands

eBookIt.com Through engagement with human behaviour from the level of the private individual to the international community, in *Amnesty and Revolution: An Amateur's View of Life As It Stands* a holistic type of reform is advocated; solutions to scarcity and inequity are formulated with due regard to the cost of revoking commitments already in motion. The author's rationale is to provide a counterbalance wherever excess or paucity is perceived, and by applying a moderate degree of erudition and scientific understanding to the exercise of drawing inferences and forging creative associations, the book's themes are addressed intellectually and intuitively. In *Amnesty and Revolution* the author specifically addresses domestic economic and social policy, social work, mental health, health problems associated with modern technology, renewable and non-renewable energy, environmental policy, globalisation, international conflicts and internal security. The author consistently targets systems rather than specific actors, in order to appease those who despite their culpability possess skills and experience which may be useful in effecting peaceable reform. In several places within the text there are extensive descriptions which serve as expedient points of access to the text's central arguments. Since these descriptions serve as introductions to topics which are related to academic specialisms, although hitherto they may not have been recognised as such, this book would be of great value to academics. Indeed, industrial specialisation and the manner in which this can prevent the context of a specialism being understood by its practitioners is a theme which is explored within the text. While some explanations would be understood more easily with foreknowledge of certain scientific principles, the central arguments of the text are accessible without scientific explanations needing to be fully understood. Accordingly the book is suitable for a general audience, and especially anyone with an interest in progressive politics, addressing as it does a range of contentious issues.

## Somali Piracy

### A Criminological Perspective

Routledge Maritime piracy off the coast of Somalia was first recognised as a global concern in 2008 after the hijackings of World Food Programme vessels. It remains a serious impediment to international maritime trade

and a significant risk to seafarers. Bringing a criminological perspective to the subject, this book presents an analysis of Somali piracy by means of Routine Activity Theory and regulatory pluralism. Based on data from a range of sources, including published documents and in-depth interviews with representatives of industry, government, and international organisations, the study concludes that no one institution or policy will suffice to control Somali piracy. Accordingly, a number of different actors and institutions have a role to play in reducing the supply of motivated offenders, the vulnerability of prospective victims, and in enhancing guardianship. The book envisages a holistic counter-piracy program based on a pluralistic regulatory model that is sustainable within the region, and managed by the region, providing the best opportunity for both the immediate future, and for long-term success. This study will be essential reading for criminologists, public policy and legal scholars, as well as policy makers and regulators in countries affected by and dealing with piracy, and international professional advocacy groups operating in the maritime space.

## Potter & Perry's Fundamentals of Nursing ANZ edition - eBook

Elsevier Health Sciences Now in its 6th edition, this trusted reference for nursing students supports the development of safe, effective and person-centred practice. The text has been comprehensively revised by nursing leaders and experts from across the spectrum of clinical practice, education, research and health policy settings; and a highly experienced editorial team, which includes Jackie Crisp, Clint Douglas, Geraldine Rebeiro and Donna Waters. Chapters of Potter & Perry's Fundamentals of Nursing, 6e engage students with contemporary concepts and clinical examples, designed to build clinical reasoning skills. Early chapters introduce frameworks such as Fundamentals of Care and cultural safety, as ways of being and practising as a nurse. These frameworks are then applied in clinical and practice context chapters throughout. Reflection points in each chapter encourage curiosity and creativity in learning, including the importance of self-care and self-assessment. 79 clinical skills over 41 chapters updated to reflect latest evidence and practice standards, including 4 new skills Fully aligned to local learning and curriculum outcomes for first-year nursing programs Aligned to 2016 NMBA Registered Nurse Standards for Practice and National Safety and Quality Health Service Standards Easy-to-understand for beginning students Focus on person-centred practice and language throughout 44 clinical skills videos (including 5 NEW) available on Evolve, along with additional student and instructor resources Accompanied by Fundamentals of nursing clinical skills workbook 4e An eBook included in all print purchases Additional resources on Evolve: • eBook on VitalSource Instructor resources: Testbank

**Critical Reflection Points and answers Image collection Tables and boxes collection PowerPoint slides Students and Instructor resources: 44 Clinical Skills videos Clinical Cases: Fundamentals of nursing case studies Restructured to reflect current curriculum structure New chapters on end-of-life care and primary care New online chapter on nursing informatics aligned to the new National Nursing and Midwifery Digital Health Capabilities Framework, including a new skill and competency assessment tool**

## OECD Private Pensions Outlook 2008

**OECD Publishing Provides essential data on assets, investments, membership, and industry structure, and an evaluation of trends in the private pensions industry; comprehensive country profiles; and an analysis of the implications of the financial crisis for pensions policy.**

## Region-Building in Southern Africa Progress, Problems and Prospects

**Zed Books Ltd. How successful have Southern African states been in dealing with the major issues that have faced the region in recent years? What could be done to produce more cohesive and effective region-building in Southern Africa? In this original and wide-ranging volume, which draws on an interdisciplinary team of mainly African and African-based specialists, the key political, socio-economic, and security challenges facing Southern Africa today are addressed. These include the various issues confronting the Southern African Development Community (SADC) and its institutions; such as HIV/AIDS, migration and xenophobia, land-grabbing and climate change; and the role of the main external actors involved with the region, including the United Nations, the European Union, the United States, and China. The book also looks at the Southern African Customs Union and Southern African Development Finance Institutions, including the Development Bank of Southern Africa and Industrial Development Corporation, and issues of gender and peacebuilding. In doing so, the book goes to the heart of analyzing the effectiveness of SADC and other regional organisation, suggesting how region-building in Southern Africa may be compared with similar attempts elsewhere in Africa and other parts of the world.**

# Comparative and International Education

## Survey of an Infinite Field

**Emerald Group Publishing** This book explores the evolution and current state of the scholarly field of comparative and international education over 200 years of development. Experts in the field explore comparative and international education in each of the major world regions.

## Challenge for Change

# Activist Documentary at the National Film Board of Canada

**McGill-Queen's Press - MQUP** Pioneering participatory, social change-oriented media, the program had a national and international impact on documentary film-making, yet this is the first comprehensive history and analysis of its work. The volume's contributors study dozens of films produced by the program, their themes, aesthetics, and politics, and evaluate their legacy and the program's place in Canadian, Québécois, and world cinema. An informative and nuanced look at a cinematic movement, *Challenge for Change* reemphasizes not just the importance of the NFB and its programs but also the role documentaries can play in improving the world.

## Agri-hire in sub-Saharan Africa

# Business models for investing in sustainable mechanization

**Food & Agriculture Org.** There has been a surge in the attention to sustainable agricultural mechanization for Africa. The need to support agricultural mechanization in the value chain in order to achieve agricultural and rural development is well recognized. Therefore, it is vital to address the major challenge of ensuring that business models for mechanization hire services driven by the private sector (including farmers, cooperatives, and small and medium enterprises) are not only profitable, sustainable and inclusive for smallholder farmers and

**vulnerable community members including women and youth, but also resilient to the effects of climate change. For a better understanding of how agricultural mechanization hire service provision can contribute to agricultural and rural development, this publication aims to (i) showcase a variety of business models of private-sector businesses providing agricultural mechanization hire services in Africa, (ii) identify success factors, and (iii) provide entry points for investment.**
