INTRODUCTION TO THE HONG KONG BASIC LAW

Hong Kong University Press **Effective since China's resumption of sovereignty on 1 July 1997, the Hong Kong Basic Law lays down the general policies and system of government for Hong Kong under the "one country, two systems" formula. It guarantees Hong Kong a high degree of autonomy, enshrines the rights and freedoms of residents, and preserves a separate common law system with an independent judiciary. This introduction traces the origins of the Hong Kong Basic Law and the concepts and legal issues that surround it. Drawing on the experience of the first 15 years, it then analyses the content of the Hong Kong Basic Law, especially in relation to Hong Kong's political system, the judiciary, and human rights. Intended especially for students at all levels in law, politics, and other disciplines, this book—the only introductory guide of its kind to the subject—will also appeal to the general reader interested in Hong Kong's experience under "one country, two systems". "Danny Gittings's Introduction to the Hong Kong Basic Law makes a significant contribution to an important subject. It is expressed in reader-friendly terms. The insights that it provides are of value not only to lawyers but also to the general public." —The Hon. Mr. Justice Kemal Bokhary, Permanent Judge of the Hong Kong Court of Final Appeal (1997-2012), Non-Permanent Judge (2012-). "This well-researched and very readable introduction explains the history, practices and future of the Basic Law—Hong Kong's key constitutional document. It also explores how far the Basic Law is able to address the many political and legal issues now facing Hong Kong. The book is suitable for a wide range of readers. Students of Hong Kong law at all levels will find it essential reading. General readers with an interest in Hong Kong's governance will find in it a lucid and accurate guide—and a timely one as the debate about implementing democracy intensifies." —Professor Fu Hualing, Faculty of Law, University of Hong Kong. "Many of us approach law books with trepidation. But Gittings, a legal academic, used to be a journalist and this shows in his ability to make the book accessible to the general reader. [...] The Basic Law will continue to be central to issues facing the city for years to come. This book enables the reader to quickly acquire a much better understanding of them." — South China Morning Post "As Professor Gittings points out in his book, which includes a chapter on what might happen after Hong Kong's 50-year autonomy ends, readability was a key aim. Acronyms are kept to a minimum and details set up neatly and comprehensively in footnotes so that the main text is kept as clean as possible." — Hong Kong Lawyer**

NOVEL & SHORT STORY WRITER'S MARKET 40TH EDITION

THE MOST TRUSTED GUIDE TO GETTING PUBLISHED

Penguin **The best resource for getting your fiction published, fully revised and updated Novel & Short Story Writer's Market is the go-to resource you need to get your short stories, novellas, and novels published. The 40th edition of NSSWM features hundreds of updated listings for book publishers, literary agents, fiction publications, contests, and more. Each listing includes contact information, submission guidelines, and other essential tips. This edition of Novel & Short Story Writer's Market also offers • Hundreds of updated listings for fiction-related book publishers, magazines, contests, literary agents, and more • Interviews with bestselling authors Celeste Ng, Viet Thanh Nguyen, Beverly Jenkins, and Chris Bohjalian • A detailed look at how to choose the best title for your fiction writing • Articles on tips for manuscript revision, using out-of-character behavior to add layers of intrigue to your story, and writing satisfying, compelling endings • Advice on working with your editor, keeping track of your submissions, and diversity in fiction**

CHINA'S MEDIA GO GLOBAL

Routledge **As part of its 'going out' strategy, China is using the media to promote its views and vision to the wider world and to counter negative images in the US-dominated**

international media. China's Media Go Global, the first edited collection on this subject, evaluates how the unprecedented expansion of Chinese media and communications is changing the global media landscape and the role of China within it. Each chapter examines a different dimension of Chinese media's globalization, from newspapers, radio, film and television, to social media and journalism. Topics include the rise of Chinese news networks, China Daily as an instrument of China's public diplomacy and the discussion around the growth of China's state media in Africa. Other chapters discuss entertainment television, financial media and the advertising market in China. Together, this collection of essays offers a comprehensive evaluation of complex debates concerning the impact of China on the international media landscape, and makes a distinctive addition to Chinese media studies, as well as to broader global media discourses. Beyond its primary readership among academics and students, China's Media Go Global is aimed at the growing constituency of general readers, for whom the role of the media in globalization is of wider interest.

ARABIC-ENGLISH-ARABIC LEGAL TRANSLATION

[Routledge](#) **Arabic-English-Arabic Legal Translation** provides a groundbreaking investigation of the issues found in legal translation between Arabic and English. Drawing on a contrastive-comparative approach, it analyses parallel authentic legal documents in both Arabic and English to examine the features of legal discourse in both languages and uncover the different translation techniques used. In so doing, it addresses the following questions: What are the features of English and Arabic legal texts? What are the similarities and differences of English and Arabic legal texts? What are the difficult areas of legal translation between English and Arabic legal texts? What are the techniques for translating these difficult areas on the lexical and syntactic levels? Features include: A thorough description of the features of legal translation in both English and Arabic, drawing on empirical new research, corpus data analysis and strategic two-way comparisons between source texts and target texts Coverage of a broad range of topics including an outline of the chosen framework for data analysis, a historical survey of legal discourse developments in both Arabic and English and detailed analyses of legal literature at both the lexical and syntactic levels Attention to common areas of difficulty such as Shariah Law terms, archaic terms and model auxiliaries Many examples and excerpts from a wide selection of authentic legal documents, reinforced by practical discussion points, exercises and practice drills to encourage active engagement with the material and opportunities for hands-on learning. Wide-ranging, scholarly and thought-provoking, this will be a valuable resource for advanced undergraduates and postgraduates on Arabic, Translation Studies and Comparative Linguistics courses. It will also be essential reading for translation professionals and researchers working in the field.

IGCSE CAMBRIDGE INTERNATIONAL MATHEMATICS (0607) EXTENDED

ORBITAL MECHANICS FOR ENGINEERING STUDENTS

[Elsevier](#) **Orbital Mechanics for Engineering Students, Second Edition**, provides an introduction to the basic concepts of space mechanics. These include vector kinematics in three dimensions; Newton's laws of motion and gravitation; relative motion; the vector-based solution of the classical two-body problem; derivation of Kepler's equations; orbits in three dimensions; preliminary orbit determination; and orbital maneuvers. The book also covers relative motion and the two-impulse rendezvous problem; interplanetary mission design using patched conics; rigid-body dynamics used to characterize the attitude of a space vehicle; satellite attitude dynamics; and the characteristics and design of multi-stage launch vehicles. Each chapter begins with an outline of key concepts and concludes with problems that are based on the material covered. This text is written for undergraduates who are studying orbital mechanics for the first time and have completed courses in physics, dynamics, and mathematics, including differential equations and applied linear algebra. Graduate students, researchers, and experienced practitioners will also find useful review materials in the book. **NEW:** Reorganized and improved discussions of coordinate systems, new discussion on perturbations and quaternions **NEW:** Increased coverage of attitude dynamics, including new Matlab algorithms and examples in chapter 10 New examples and homework problems

I WANT YOU!

THE EVOLUTION OF THE ALL-VOLUNTEER FORCE

[Rand Corporation](#) As U.S. military forces appear overcommitted and some ponder a possible return to the draft, the timing is ideal for a review of how the American military transformed itself over the past five decades, from a poorly disciplined force of conscripts and draft-motivated "volunteers" to a force of professionals revered throughout the world. Starting in the early 1960s, this account runs through the current war in Iraq, with alternating chapters on the history of the all-volunteer force and the analytic background that supported decisionmaking. The author participated as an analyst and government policymaker in many of the events covered in this book. His insider status and access offer a behind-the-scenes look at decisionmaking within the Pentagon and White House. The book includes a foreword by former Secretary of Defense Melvin R. Laird. The accompanying DVD contains more than 1,700 primary-source documents-government memoranda, Presidential memos and letters, staff papers, and reports-linked directly from citations in the electronic version of the book. This unique technology presents a treasure trove of materials for specialists, researchers, and students of military history, public administration, and government affairs to draw upon.

CAMBRIDGE CHECKPOINT ENGLISH 1

[Hodder Education](#) Build confidence and understanding throughout the year with hundreds of additional practice questions. This Workbook supports our bestselling Checkpoint series, with exercises specifically matched to the Cambridge Progression tests and the Checkpoint tests. - Develops understanding and builds confidence ahead of assessment with exercises matched to the tests - Ensures a thorough understanding of all aspects of the course by following the structure of the relevant textbook - Saves planning time with exercises that are suitable for use in class or as homework This Workbook is matched to the Cambridge Lower Secondary Curriculum Framework and follows the structure of the equivalent Checkpoint Student's Book exactly. This Workbook has not been through the Cambridge endorsement process. The answers to the Checkpoint English workbooks and revision guide are online: www.hoddereducation.co.uk/cambridgeextras

JULIUS CAESAR

[Standard Ebooks](#) After defeating enemies in battle, Roman citizens celebrate in the streets as Julius Caesar and his entourage make their way through the city. As Caesar passes a soothsayer, he receives an ominous warning: "Beware the ides of March," which he immediately disregards. Meanwhile, some of his closest followers are convinced their leader has become too powerful and plot his removal. Plutarch's Lives of the Noble Grecians and Romans was Shakespeare's primary source for Julius Caesar. This Standard Ebooks edition is based on William George Clark and William Aldis Wright's 1887 Victoria edition, which is taken from the Globe edition. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

THE YOUTH'S INSTRUCTOR

INTERPERSONAL RELATIONSHIPS IN EDUCATION: FROM THEORY TO PRACTICE

[Springer](#) This book brings together recent research on interpersonal relationships in education from a variety of perspectives including research from Europe, North America and Australia. The work clearly demonstrates that positive teacher-student relationships can contribute to student learning in classrooms of various types. Productive learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, at the school level, teacher learning thrives when there are positive and mentoring interrelationships among professional colleagues. Work on this book began with a series of formative presentations at the second International Conference on Interpersonal Relationships in Education (ICIRE 2012) held in Vancouver, Canada, an event that included among others, keynote addresses by David Berliner, Andrew Martin and Mieke Brekelmans. Further collaboration and peer review by the editorial team resulted in the collection of original research that this book comprises. The volume (while eclectic) demonstrates how constructive learning environment relationships can be developed and sustained in a variety of settings. Chapter contributions come

from a range of fields including educational and social psychology, teacher and school effectiveness research, communication and language studies, and a variety of related fields. Together, they cover the important influence of the relationships of teachers with individual students, relationships among peers, and the relationships between teachers and their professional colleagues.

PUBLIC WORKS AS A SAFETY NET

DESIGN, EVIDENCE, AND IMPLEMENTATION

[World Bank Publications](#) **A review of the conceptual underpinnings and operational elements of public works programs around the world., drawing from a rich evidence base and analyzing previously unassimilated data, to fill a gap in knowledge related to public works programs, now so popular.**

UNDOING THE DEMOS

NEOLIBERALISM'S STEALTH REVOLUTION

[MIT Press](#) **Tracing neoliberalism's devastating erosions of democratic principles, practices, and cultures.**

THE TEMPEST / THE WORKS OF WILLIAM SHAKESPEARE ILLUSTRATED

The Tempest is a play by William Shakespeare, probably written in 1610-1611, and thought to be one of the last plays that Shakespeare wrote alone. After the first scene, which takes place on a ship at sea during a tempest, the rest of the story is set on a remote island, where the sorcerer Prospero, a complex and contradictory character, lives with his daughter Miranda, and his two servants--Caliban, a savage monster figure, and Ariel, an airy spirit. The play contains music and songs that evoke the spirit of enchantment on the island. It explores many themes, including magic, betrayal, revenge, and family. In Act IV, a wedding masque serves as a play-within-the play, and contributes spectacle, allegory, and elevated language.

REINVENTING AMERICA'S SCHOOLS

CREATING A 21ST CENTURY EDUCATION SYSTEM

[Bloomsbury Publishing USA](#) **One of the world's foremost experts on public sector reform offers a comprehensive analysis of the charter school movements and presents a theory that will do for American schools what his New York Times" bestseller "Reinventing Government" did for public governance in 1992.**

HANDBOOK OF INDUSTRIAL CRYSTALLIZATION

[Butterworth-Heinemann](#) **Crystallization is an important separation and purification process used in industries ranging from bulk commodity chemicals to specialty chemicals and pharmaceuticals. In recent years, a number of environmental applications have also come to rely on crystallization in waste treatment and recycling processes. The authors provide an introduction to the field of newcomers and a reference to those involved in the various aspects of industrial crystallization. It is a complete volume covering all aspects of industrial crystallization, including material related to both fundamentals and applications. This new edition presents detailed material on crystallization of biomolecules, precipitation, impurity-crystal interactions, solubility, and design. Provides an ideal introduction for industrial crystallization newcomers Serves as a worthwhile reference to anyone involved in the field Covers all aspects of industrial crystallization in a single, complete volume**

LORIS MALAGUZZI AND THE SCHOOLS OF REGGIO EMILIA

A SELECTION OF HIS WRITINGS AND SPEECHES, 1945-1993

[Routledge](#) **Loris Malaguzzi was one of the most important figures in 20th century early childhood education, achieving world-wide recognition for his educational ideas and his role in the creation of municipal schools for young children in the Italian city of Reggio Emilia, the most successful example ever of progressive, democratic and public education. Despite**

Malaguzzi's reputation, very little of what he wrote or said about early childhood education has been available in English. This book helps fill the gap, presenting for the first time in English, writings and speeches spanning 1945 to 1993, selected by a group of his colleagues from an archive established in Reggio Emilia. They range from short poems, letters and newspaper articles to extended pieces about Malaguzzi's early life, the origins of the municipal schools and his ideas about children, pedagogy and schools. This material is organised into five chronological chapters, starting at the end of World War Two and ending just before his death, with introductions to each chapter providing background, including the historical context, the main events in Malaguzzi's life and the rationale for the selection of documents. The book provides a unique insight into the background, thinking and work of Malaguzzi, revealing, in his own words, how his thinking developed, how he moved between theory and practice, how he border-crossed many disciplines and subjects, and how he combined many roles ranging from administrator and campaigner to researcher and pedagogue. Academics, students and practitioners alike will find this landmark publication provides rich insights into his life and work.

PATHWAYS FOR PEACE

INCLUSIVE APPROACHES TO PREVENTING VIOLENT CONFLICT

World Bank Publications Violent conflicts today are complex and increasingly protracted, involving more nonstate groups and regional and international actors. It is estimated that by 2030—the horizon set by the international community for achieving the Sustainable Development Goals—more than half of the world's poor will be living in countries affected by high levels of violence. Information and communication technology, population movements, and climate change are also creating shared risks that must be managed at both national and international levels. Pathways for Peace is a joint United Nations†World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention. A scaled-up system for preventive action would save between US\$5 billion and US\$70 billion per year, which could be reinvested in reducing poverty and improving the well-being of populations. The study aims to improve the way in which domestic development processes interact with security, diplomacy, mediation, and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion—from access to power, natural resources, security and justice, for example—that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful, the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community. Development policies and programs must be a core part of preventive efforts; when risks are high or building up, inclusive solutions through dialogue, adapted macroeconomic policies, institutional reform, and redistributive policies are required. Inclusion is key, and preventive action needs to adopt a more people-centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision making is fundamental to sustaining peace, as well as long-term policies to address the aspirations of women and young people.

OBJECT-ORIENTED AND CLASSICAL SOFTWARE ENGINEERING

McGraw-Hill Science, Engineering & Mathematics Classical and Object-Oriented Software Engineering, 5/e is designed for an introductory software engineering course. This book provides an excellent introduction to software engineering fundamentals, covering both traditional and object-oriented techniques. Schach's unique organization and style makes it excellent for use in a classroom setting. It presents the underlying software engineering theory in Part I and follows it up with the more practical life-cycle material in Part II. Many software engineering books are more like reference books, which do not provide the appropriate fundamentals before inundating students with implementation details. In this edition, more practical material has been added to help students understand how to use what they are learning. This has been done through the use of "How To" boxes and greater implementation detail in the case study. Additionally, the new edition contains the references to the most current literature and includes an overview of extreme programming. The website in this edition will be more extensive. It will include Solutions, PowerPoints that incorporate lecture notes, newly developed self-quiz questions, and source code for the term project and case study.

THE ECONOMY OF PRESTIGE

PRIZES, AWARDS, AND THE CIRCULATION OF CULTURAL VALUE

Harvard University Press This is a book about one of the great untold stories of modern cultural life: the remarkable ascendancy of prizes in literature and the arts. James F. English documents the dramatic rise of the awards industry and its complex role within what he describes as an economy of cultural prestige.

HUMAN RIGHTS IN INTERNATIONAL INVESTMENT LAW AND ARBITRATION

Oxford University Press **There is a growing interplay between international investment law, arbitration and human rights. This book offers a systematic analysis of this interaction, exploring the role of principles of justice in investment law, comparing investment arbitration with other courts, and examining case studies on human rights and protection standards.**

THE HUNDRED LANGUAGES OF CHILDREN

THE REGGIO EMILIA APPROACH TO EARLY CHILDHOOD EDUCATION

The city-run early childhood program of Reggio Emilia, Italy, has become recognized and acclaimed as one of the best systems of education in the world. Over the past 30 years, educators there have evolved an innovative approach that fosters children's intellectual development through a systematic focus on symbolic representation. Young children are encouraged to explore their environment and express themselves through many "languages", or modes of expression, including words, movement, drawing, painting, sculpture, shadow play, collage and music.... This book brings together the reflections of the Italian educators who founded and developed the system, as well as North Americans who have observed and/or studied there. It is a comprehensive introduction covering history and philosophy, curriculum and methods of teaching, school and system organization, the use of space and physical environments, and adult professional roles. -Back cover.

THE SLIGHTLY AWESOME TEACHER

EDU-RESEARCH MEETS COMMON SENSE

Most books on teaching ask teachers to be inspirational, to operate at 100 miles an hour with creativity oozing out of every pore. Dominic Salles says that's unsustainable. But you can get brilliant results using some simple practices taken from the myriad of educational research on classroom practices. It isn't a guide to all the extra stuff you should do to become cool and awesome. It is a book that will get you to forget about teaching and think about learning: another way of saying, it will help you to stop stressing about what you do, and get the students to work harder and smarter at what they do. Dominic Salles believes that every teacher can be slightly awesome. And here he shows you how.

INFRASTRUCTURE INVESTMENT IN INDONESIA

A FOCUS ON PORTS

Infrastructure Investment in Indonesia: A Focus on Ports presents an important and original collation of current material investigating the efficient facilitation of major infrastructure projects in Indonesia and Australia, with an emphasis on infrastructure investment and a focus on port planning and development. This interdisciplinary collection-spanning the disciplines of engineering, law and planning-draws helpfully on a range of practical and theoretical perspectives. It is the collaborative effort of leading experts in the fields of infrastructure project initiation and financing, and is based on international research conducted by the University of Melbourne, Universitas Indonesia and Universitas Gadjah Mada. The volume opens with a macroscopic perspective, outlining the broader economic situations confronting Indonesia and Australia, before adopting a more microscopic perspective to closely examine the issues surrounding major infrastructure investment in both countries. Detailed case studies are provided, key challenges are identified, and evidence-based solutions are offered. These solutions respond to such topical issues as how to overcome delays in infrastructure project initiation; how to enhance project decision-making for the selection and evaluation of projects; how to improve overall efficiency in the arrangement of project finance and governance; and how to increase the return provided by investment in infrastructure. Special focus is given to proposed improvements to the port cities of Indonesia in the areas of major infrastructure project governance, policies,

engagement, operation and processes. By rigorously investigating the economic, transport, finance and policy aspects of infrastructure investment, this book will be a valuable resource for policy makers and government officials in Indonesia and Australia, infrastructure investment organisations, and companies involved in exporting services between Indonesia and Australia. This book will also be of interest to researchers and students of infrastructure planning and financing, setting a solid foundation for subsequent investigations of financing options for large-scale infrastructure developments. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

DISEASE CONTROL PRIORITIES, THIRD EDITION (VOLUME 7)

INJURY PREVENTION AND ENVIRONMENTAL HEALTH

Disease Control Priorities The substantial burden of death and disability that results from interpersonal violence, road traffic injuries, unintentional injuries, occupational health risks, air pollution, climate change, and inadequate water and sanitation falls disproportionately on low- and middle-income countries. Injury Prevention and Environmental Health addresses the risk factors and presents updated data on the burden, as well as economic analyses of platforms and packages for delivering cost-effective and feasible interventions in these settings. The volume's contributors demonstrate that implementation of a range of prevention strategies-presented in an essential package of interventions and policies-could achieve a convergence in death and disability rates that would avert more than 7.5 million deaths a year.

FULFILLING OUR POTENTIAL

TEACHING EXCELLENCE, SOCIAL MOBILITY AND STUDENT CHOICE

This consultation contains proposals to reshape the higher education landscape to have students at its heart. Its core aims are to raise teaching standards, provide greater focus on graduate employability, widen participation in higher education, and open up the sector to new high-quality entrants. This document sets out proposals for how the Government's manifesto commitment to introduce a Teaching Excellence Framework will deliver better value for money for students, employers and taxpayers. It also sets out plans to drive social mobility by further increasing higher education participation by those from disadvantaged and under-represented groups. This consultation proposes a new single gateway for entry to the sector, which would create a common system for all providers. It sets out proposed new architecture for the higher education system, to reflect the way higher education is now funded by students, and to reduce the regulatory burden on the sector. Finally, this consultation considers the potential implications of these changes for the research landscape.

CRYSTALLIZATION IN FOODS

Boom Koninklijke Uitgevers In the food industry, controlling crystallization is a key factor in quality as it relates to texture, with some foods requiring the promotion of crystallization

and others its prevention. In the first publication to focus specifically on this process as it applies to food, *Crystallization in Foods* covers fundamental principles in ice, sugar, and lipid crystallization, and their applications. Drawing on examples throughout of the practical use and impact of crystallization on food structure, texture, and quality; and enhanced with numerous equations and illustrations, *Crystallization in Foods* is a valuable resource for food engineers and other scientists working with crystallization in foods, particularly in the dairy, confectionery, frozen foods, and baked goods industries. In addition, this book may be of interest to scientists and other professionals in the personal care and cosmetics industry, which shares some of the same quality and texture concerns as the food industry.

SENTINEL LYMPH NODE BIOPSY

CRC Press An intuitive, ingenious and powerful technique, sentinel lymph node biopsy has entered clinical practice with astonishing rapidity and now represents a new standard of care for melanoma and breast cancer patients, while showing great promise for the treatment of urologic, colorectal, gynecologic, and head and neck cancers. This text, written by international experts in the technique, provides a clear and comprehensive guide, presenting a detailed overview and discussing the various mapping techniques available and how these are applied in a number of leading institutions. This essential resource for surgical oncologists, pathologists, and specialists in nuclear medicine will also provide key information for those planning to start a sentinel lymph node program.

INTERNATIONAL AIR LAW

(INCLUDING WARSAW CONVENTION 1929 & MONTREAL CONVENTION 1999)

Reliance Publishing House The Indian epic Ramayana contains the description of an aircraft known as Pushpak Vimana in which Lord Rama returned to his Kingdom at Ayodhya by travelling by air from Lanka, after winning the war and destroying the demon King Ravana. This may be a myth but a myth is a result of the human thought fossils because they teach us in allegories and symbols the story of cultures and civilisations that preceded ours. Apparently, the present day aviation is the outcome of the past geniuses. International Air Law has assumed great importance since the sudden increase in the International Air transport during the twentieth century. The protection of the passengers was provided for, in the Warsaw Convention 1929. The airline industry was protected by limiting the liability of the Air Carrier under the International Law of Civil Aviation. The tragic event of 11 September 2001 whereby the twin World Trade Towers of New York were blown off by the hijacked aeroplanes, has been the greatest set back to the growing air transportation since then
