10TH GRADE

A NOVEL

Random House *Jeremiah Reskin has big plans for tenth grade—he wants to make some friends and he wants to take a girl's shirt off. It's not going too well at first, but when he meets a group of semibohemian outcasts, things start to change. Soon he's negotiating his way through group back rubs and trying to find the courage to make a move on Renee Shopmaker, the hottest girl in school. At the behest of his composition teacher, Jeremy's also chronicling everything in his own novel—a disastrously ungrammatical but unflinching look at sophomore year.*

COMPARATIVE PERSPECTIVES ON SCHOOL TEXTBOOKS

ANALYZING SHIFTING DISCOURSES ON NATIONHOOD, CITIZENSHIP, GENDER, AND RELIGION

Springer Nature *This book examines the discourses on nation-building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date, practical, and scholarly information on qualitative and mixed-method textbook analysis, as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and*

ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks.

PLACE, NOT RACE

A NEW VISION OF OPPORTUNITY IN AMERICA

Beacon Press From a nationally recognized expert, a fresh and original argument for bettering affirmative action Race-based affirmative action had been declining as a factor in university admissions even before the recent spate of related cases arrived at the Supreme Court. Since Ward Connerly kickstarted a state-by-state political mobilization against affirmative action in the mid-1990s, the percentage of four-year public colleges that consider racial or ethnic status in admissions has fallen from 60 percent to 35 percent. Only 45 percent of private colleges still explicitly consider race, with elite schools more likely to do so, although they too have retreated. For law professor and civil rights activist Sheryll Cashin, this isn't entirely bad news, because as she argues, affirmative action as currently practiced does little to help disadvantaged people. The truly disadvantaged—black and brown children trapped in high-poverty environs—are not getting the quality schooling they need in part because backlash and wedge politics undermine any possibility for common-sense public policies. Using place instead of race in diversity programming, she writes, will better amend the structural disadvantages endured by many children of color, while enhancing the possibility that we might one day move past the racial resentment that affirmative action engenders. In *Place, Not Race*, Cashin reimagines affirmative action and champions place-based policies, arguing that college applicants who have thrived despite exposure to neighborhood or school poverty are deserving of special consideration. Those blessed to have come of age in poverty-free havens are not. Sixty years since the historic decision, we're undoubtedly far from meeting the promise of *Brown v. Board of Education*, but Cashin offers a new framework for true inclusion for the millions of children who live separate and unequal lives. Her proposals include making standardized tests optional, replacing merit-based financial aid with need-based financial aid, and recruiting high-achieving students from overlooked places, among other steps that encourage cross-racial alliances and social mobility. A call for action toward the long overdue promise of equality, *Place, Not Race* persuasively shows how the social costs of racial preferences actually outweigh any of the marginal benefits when effective race-neutral alternatives are available.

BUILDING THE FOUNDATION: WHOLE NUMBERS IN THE PRIMARY GRADES

THE 23RD ICMI STUDY

Springer This twenty-third ICMI Study addresses for the first time mathematics teaching and learning in the primary school (and pre-school) setting, while also taking international perspectives, socio-cultural diversity and institutional constraints into account. One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level. Accordingly, a focus area that is central to the discussion was chosen, together with a number of related questions. The broad area of Whole Number Arithmetic (WNA), including operations and relations and arithmetic word problems, forms the core content of all primary mathematics curricula. The study of this core content area is often regarded as foundational for later mathematics learning. However, the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon, and practice varies substantially from country to country. As such, this study presents a meta-level analysis and synthesis of what is currently known about WNA, providing a useful base from which to gauge gaps and shortcomings, as well as an opportunity to learn from the practices of different countries and contexts.

EDUCATION LAW

EQUALITY, FAIRNESS, AND REFORM

Aspen Publishing Written by Derek Black, one of the nation's foremost experts in education law and policy, and Education Law Association's 2015 Goldberg Award for Most Significant Publication in Education Law recipient, this third edition casebook develops Education Law through the themes of equality, fairness, and reform. The book focuses on the laws of equal educational opportunity for various disadvantaged student populations, recent reform movements designed to improve education, and the general constitutional rights that extend to all students. New to the Third Edition:

Updates on litigation regarding the fundamental right to education, school funding, and their intersection with COVID-19 issues New cases and analysis on the rights of LGBTQ youth, including Bostock v. Clayton County Department of Education’s new regulatory structure for investigating and resolving sexual harassment claims Two new U.S. Supreme Court special education cases defining the meaning of “free and appropriation public education” and the intersection of Rehabilitation Act with the Individuals with Disabilities in Education Act New cases on student walkouts and protests New U.S. Supreme Court case, Espinoza v. Montana, on vouchers and the free exercise of religion New analysis and updates on the Every Student Succeeds Act New materials on the U.S. Supreme Court’s decision striking down mandatory teacher union fees Professors and student will benefit from: Efficient presentation of cases—to permit more comprehensive inclusion of case law and issues Problems—which can be modified for group exercises, in-class discussion, or out-of-class writing assignments Contextualization and situation of case law in the broader education world—by including edited versions of federal policy guidelines, seminal law review articles, social science studies, and organization reports and studies Careful editing of cases and secondary sources—for ease of reading and comprehension Narrative introductions to every chapter, major section, and case—synthesize and foreshadow the material to improve student comprehension and retention Teaching materials Include: Teacher’s Manual

The author also discusses some of the regulations and ordinances of 100 cities including one from Lincoln, Nebraska that required patrons to keep their bodies at least six inches apart.

MULTIPLE REGRESSION AND BEYOND

AN INTRODUCTION TO MULTIPLE REGRESSION AND STRUCTURAL EQUATION MODELING

Routledge Companion Website materials: <https://tzkeith.com/> Multiple Regression and Beyond offers a conceptually-oriented introduction to multiple regression (MR) analysis and structural equation modeling (SEM), along with analyses that flow naturally from those methods. By focusing on the concepts and purposes of MR and related methods, rather than the derivation and calculation of formulae, this book introduces material to students more clearly, and in a less threatening way. In addition to illuminating content necessary for coursework, the accessibility of this approach means students are more likely to be able to conduct research using MR or SEM--and more likely to use the methods wisely. This book:

- Covers both MR and SEM, while explaining their relevance to one another
- Includes path analysis, confirmatory factor analysis, and latent growth modeling
- Makes extensive use of real-world research examples in the chapters and in the end-of-chapter exercises
- Extensive use of figures and tables providing examples and illustrating key concepts and techniques

New to this edition:

- New chapter on mediation, moderation, and common cause
- New chapter on the analysis of interactions with latent variables and multilevel SEM
- Expanded coverage of advanced SEM techniques in chapters 18 through 22
- International case studies and examples
- Updated instructor and student online resources

THE NAVY

THE COVENANT WITH BLACK AMERICA - TEN YEARS LATER

Hay House, Inc In 2006, Tavis Smiley—along with a team of esteemed contributors—laid out a national plan of action to address the ten most crucial issues facing African Americans. The Covenant, which became a #1 New York Times bestseller, ran the gamut from health care to criminal justice, affordable housing to education, voting rights to racial divides. But a decade later, Black men still fall to police bullets and brutality, Black women still die from preventable diseases, Black children still struggle to get a high quality education, the digital divide and environmental inequality persist, and American cities from Ferguson to Baltimore burn with frustration. In short, the last decade has seen the evaporation of Black wealth, with Black fellow citizens having lost ground in nearly every leading economic category. And so in these pages Smiley calls for a renewal of The Covenant, presenting the original action plan alongside new data from the Indiana University School of Public & Environmental Affairs (SPEA) to underscore missed opportunities and the work that remains to be done. While life for far too many African Americans remains a struggle, the great freedom fighter Frederick Douglass

was right: "If there is no struggle, there is no progress." Now is the time to finally convert the trials and tribulations of Black America into the progress that all of America yearns for.
