Veterans Law Cases and Theory This casebook is the first since the creation of the Court of Appeals for Veterans Claims to fully support a doctrinal course on the law of veterans benefits. The book equally supports theory-based classroom instruction and practice-based clinical teaching. The cases focus on those most influential on everyday work in the field, while the notes and questions support discussions of descriptive and normative theory. The overall approach is to compare how veterans law handles issues common to related areas, such as torts, evidence, administrative law, and civil procedure. It is the liveliest and probably the most widely read philosophical journal in Britain. This anthology reprints some of the best articles to have appeared in the journal during the past five years. It covers topics in social and moral philosophy which are central to current controversies on the left, focusing on theoretical issues raised by the socialist, feminist and environmental movements. Topics covered include feminist perspectives on a range of traditional philosophical issues and contemporary problems; theoretical questions involved in the rethinking of socialism and Marxism; and questions about the relation between humanity and nature raised by environmental debates. But do they also apply it in the same manner? Although Article 7 of the CISG underscores "the need to promote uniformity in its application", it gives little guidance as to how to achieve this goal. Each judge and arbitrator is influenced by the legal methodology of his home jurisdiction. Therefore it is somewhat of a paradox that whilst the number of contracting states is constantly increasing so too is the threat of variation in application. In this book the most important issues of the CISG's methodology are analysed by leading experts from five continents. Whereas some authors provide a thorough analysis of the central topics of interpretation, others enter almost uncharted territories. **Hong Kong Culture and Society in the New Millennium** Hong Kong as Method Springer This book discusses the notion of "Hong Kong as Method" as it relates to the rise of China in the context of Asianization. It explores new Hong Kong imaginaries with regard to the complex relationship between the local, the national and the global. The major theoretical thrust of the book is to address the reconfiguration of Hong Kong's culture and society in an age of global modernity from the standpoints of different disciplines, exploring the possibilities of approaching Hong Kong as a method. Through critical inquiries into different fields related to Hong Kong's culture and society, including gender, resistance and minorities, various perspectives on the country's culture and society can be re-assessed. New directions and guidelines related to Hong Kong are also presented, offering a unique resource for researchers and students in the fields of cultural studies, media studies, postcolonial studies, globalization and Asian studies. **Marxism, Religion and Ideology Themes from David McLellan** Routledge As austerity measures are put into place the world over and global restructuring is acknowledged by all as an attempt to bolster the economic system that led to the crash, there is a great need to come to grips with the economic, political and philosophical legacy of Marx. Of particular interest are Marx's analyses of alienation and the cycles of boom and bust thought to be integral to the functioning of capitalism. Moreover, as the Cold War drifts into the history books, it is possible to reconsider the lasting impact of Marx's analyses without the shadows cast by the Soviet version of communism. Equally, though, scholars are increasingly turning to Marx for insight into the rise of religion and the corresponding demise of political ideologies that seems to mark the contemporary age. Are we witnessing 'the return of Marx'? Few scholars have done as much to tease out the intricacies of Marx, ideology and religion and their overlapping concerns as the eminent writer and Marx biographer, Professor David McLellan. This book brings together a group of internationally renowned academics to reflect upon, develop and criticise McLellan's analyses of these three themes with a view to contributing more broadly to scholarly debates in these fields. This exciting and timely analysis will be of interest to scholars of political theory, the history of political thought (including historical methodology), Marx and Marxism, sociology of knowledge (particularly in relation to discussions of ideology), religion and theology more widely. **International Handbook of Career Guidance** Springer Nature This handbook offers a comprehensive review on career guidance, with an emphasis on the applied aspects of guidance together with research methods and perspectives. This handbook covers such subjects as educational and vocational guidance in a social context, theoretical foundations, educational and vocational guidance in practice, specific target groups, testing and assessment, and evaluation. **Marxism and Human Nature** Routledge Is there such a thing as human nature? Here Sean Sayers defends the controversial theory that human nature is in fact an historical phenomenon. He gives an ambitious and wide ranging defence of the Marxist and Hegelian historical approach and engages with a wide range of work at the heart of the contemporary debate in social and moral philosophy. **Marx and Alienation Essays on Hegelian Themes** Springer The concepts of alienation and its overcoming are central to Marx's thought. They underpin his critique of capitalism and his vision of future society. Marx's ideas are explained in rigorous and clear terms. They are situated in the context of the Hegelian ideas that inspired them and put into dialogue with contemporary debates. **Encyclopedia of Gerontology and Population Aging** Springer This eight-volume encyclopedia brings together a comprehensive collection of work highlighting established research and emerging science in all relevant disciplines in gerontology and population aging.
