Digital Processes

Planning, Designing, Production

[Walter de Gruyter](#) these days a computer is as much a part of every household's standard equipment as a refrigerator, and yet the explosion of computer technology in the last several decades has transformed the daily life of every member of society far more than even utopians would ever have allowed themselves to dream. No wonder, then, that from design to production, architecture too is becoming more and more subject to digital influences. The range of those influences stretches from the classical computer programs used in design and presentation to media-supported design processes all the way to computerized production techniques, to say nothing of industrialized bricklayer "robots." From measurement to planning and production, architecture is the product of a closely coordinated digital process chain. What influence do digital design digital design and production methods have on contemporary architecture? How are these methods changing architecture and the way it is created? Where does the potential of digital media for architecture lie? What are the areas in which every individual firm can begin to use them? What are the advantages of working electronically? How and at what cost can these methods be integrated into the day-to-day work of the professional architect? This publication offers answers to these and many other questions on all aspects of the digital design and construction process.

Alone

[Sourcebooks, Inc.](#) This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...
