The Status of Religion and the Public Benefit in Charity Law Anthem Press
'The Status of Religion and the Public Benefit in Charity Law' is an apologetic for maintaining the presumption of public benefit for the charitable category 'advancement of religion' in democratic countries within the English common law tradition. In response to growing academic and political pressure to reform charity law - including recurring calls to remove tax exemptions granted to religious charities - the scholars in this volume analyse the implications of legislative and legal developments in Canada, the UK, Australia, New Zealand and South Africa. In the process, they also confront more fundamental, sociological or philosophical questions on the very nature and role of religion in a secular society that would deny any space for religious communities outside their houses of worship. In other words, this book is concerned with the place of religion - and religious institutions - in contemporary society. It represents a series of concerns about the proper role of the state in relation to the differing beliefs of citizens - some of which will quite rightly

manifest in actions to benefit the wider society. This debate, then, naturally engages with broader issues related to secularism, civic engagement and liberal democratic freedoms.

OECD Multi-level Governance Studies Making Decentralisation Work in Chile Towards Stronger Municipalities Towards Stronger Municipalities OECD Publishing This report provides a comprehensive analysis of the challenges confronting Chile's centralised growth model and recommendations towards developing a more integrated territorial approach.

A Research Agenda for Public Administration Edward Elgar Publishing This book addresses salient current issues in public administration research. It seeks to suggest where future research may or indeed ought to be focussed. To advocate the future routes for the development of research, this book is divided into themes, with a clear overlap between different approaches. The book has contributions that will assist students of public administration/public sector management and public policy, especially new PhD students, but will also be a useful resource for more established researchers to understand the major emerging issues within the field.

Benefit-Risk Assessment of Medicines The Development and Application of a Universal Framework for Decision-Making and Effective Communication Springer This book proposes and investigates a universal framework, and accompanying documentation system, to facilitate and catalogue benefit-risk decisions; a valuable addition to the benefit-risk toolbox. Over the past decade, pharmaceutical companies and regulatory agencies have been reviewing the benefit-risk assessment of medicines with a view to developing a structured, systematic, standardized approach. Examining the evaluation of such an approach by several mature regulatory authorities ensures that the reader gains a unique insight into the ongoing debate in this area. The field of benefit-risk assessment continues to evolve at a rapid pace due to political and societal pressure, as is reflected in the recent FDA PUDFA agreement as well as in the EMA 2015 Roadmap. Rather than provide a comprehensive snap-shot of this constantly changing environment, this book evaluates selected current approaches to benefit-risk assessment. The strengths and weaknesses of publicly available documents in communicating benefit-risk decisions to stakeholders are reviewed and these evaluations are used to inform development of a prospective framework that could be used to harmonise procedures globally.

The Public Productivity and Performance Handbook Routledge A productive society is dependent upon high-performing government. This third edition of The Public Performance and Productivity Handbook includes chapters from leading scholars, consultants, and practitioners to explore all of the core elements of improvement. Completely revised and focused on best practice, the handbook comprehensively explores managing for high performance, measurement and analysis, costs and finances, human resources, and cutting-edge organizational tools. Its coverage of new and systematic management approaches and well-defined measurement systems provides guidance for organizations of all sizes to improve productivity and performance. The contributors discuss such topics as accountability, organizational effectiveness after budget cuts, the complementary roles of human capital and "big data," and how to teach performance management in the classroom and in public organizations. The handbook is accompanied by an online companion volume providing examples of performance measurement and improvement

manuals across a wide variety of public organizations. The Public Performance and Productivity Handbook, Third Edition, is required reading for all public administration practitioners, as well as for students and scholars interested in the state of the public performance and productivity field. **The British Study Edition of the Urantia Papers Book [eReader PDF] Tigran Aivazian** The British Study Edition of the Urantia Papers is based on the standard SRT text, but uses the metric system and adds a critical apparatus of textual variants and study notes. **UPSC MAINS GENERAL STUDIES SOLVED PAPERS (2008-2020) PDF IAS EXAM PORTAL** Medium: English Pages: 600+ E-BOOK NAME : UPSC MAINS GENERAL STUDIES SOLVED PAPERS PDF Contents: General Studies UPSC MAIN - 2020 Paper-1 to Paper-4 General Studies UPSC MAIN - 2019 Paper-1 to Paper-4 General Studies UPSC MAIN - 2018 Paper-1 to Paper-4 General Studies UPSC MAIN - 2017 Paper-1 to Paper-4 General Studies UPSC MAIN - 2016 Paper-1 to Paper-4 General Studies UPSC MAIN - 2015 Paper-1 to Paper-4 General Studies UPSC MAIN - 2014 Paper-1 to Paper-4 General Studies UPSC MAIN - 2013 Paper-1 to Paper-4 General Studies UPSC MAIN - 2012 Paper-1 to Paper-4 General Studies UPSC MAIN - 2011 Paper-1 to Paper-2 General Studies UPSC MAIN - 2010 Paper-1 to Paper-2 General Studies UPSC MAIN - 2009 Paper-1 to Paper-2 General Studies UPSC MAIN - 2008 Paper-1 to Paper-2 **The 'New' Public Benefit Requirement Making Sense of Charity Law? Bloomsbury Publishing** This book examines the 'public benefit requirement', which provides that a charity's purposes must be for the public benefit. This requirement was given statutory force by the Charities Act 2006, which also provided that 'public benefit' is to be construed in accordance with existing case law and not presumed. The author examines guidance published by the Charity Commission in 2008 and 2013 and measures its accuracy against principles extrapolated from case law, with a focus on fee-charging charities, and independent schools in particular. She also considers the implementation of the Charity Commission's public benefit assessments of independent schools during 2008-10. The book offers a comparative study of the law relating to public benefit in Scotland and presents an analysis of the decision of the Upper Tribunal (Tax and Chancery) in proceedings brought by the Independent Schools Council and Attorney General in 2011. It also considers subsequent reviews of the 2006 Act by Lord Hodgson and the Public Administration Select Committee and the Government's response to those reviews in September 2013. The fact that the law automatically bestows certain privileges on charities, including tax exemptions, means that the charitable status of fee-paying schools has proved particularly contentious and was described by Lord Campbell-Savours as making 'an absolute nonsense' of charity law. Here, the author asks whether the public benefit requirement, as enacted and interpreted, has succeeded in bringing any sense to our law of charity in recent years. **OECD Public Governance Reviews Brazil's Federal Court of Accounts Insight and Foresight for Better Governance Insight and Foresight for Better Governance OECD Publishing** This report suggests concrete steps Brazil's Federal Court of Accounts can take to adapt its own strategies, approaches and audit programming to provide valuable insight and foresight to policy makers in the centre of government. **Civil Society in China The Legal Framework from Ancient Times to the "New Reform Era" Oxford University Press** This is the definitive

book on the legal and fiscal framework for civil society organizations (CSOs) in China from earliest times to the present day. Civil Society in China traces the ways in which laws and regulations have shaped civil society over the 5,000 years of China's history and looks at ways in which social and economic history have affected the legal changes that have occurred over the millennia. This book provides an historical and current analysis of the legal framework for civil society and citizen participation in China, focusing not merely on legal analysis, but also on the ways in which the legal framework influenced and was influenced in turn by social and economic developments. The principal emphasis is on ways in which the Chinese people - as opposed to high-ranking officials or cadres -- have been able to play a part in the social and economic development of China through the associations in which they participate. Civil Society in China sums up this rather complex journey through Chinese legal, social, and political history by assessing the ways in which social, economic, and legal system reforms in today's China are bound to have an impact on civil society. The changes that have occurred in China's civil society since the late 1980's and, most especially, since the late 1990's, are nothing short of remarkable. This volume is an essential guide for lawyers and scholars seeking an in depth understanding of social life in China written by one of its leading experts. **OECD Digital Government Studies Benchmarking Digital Government Strategies in MENA Countries OECD Publishing** This report benchmarks digital government strategies in MENA countries against OECD standards and best practices. **Federal IT Capital Planning and Investment Control Berrett-Koehler Publishers** Reduce risk and improve the overall performance of IT assets! Federal IT Capital Planning and Investment Control is the first book to provide a comprehensive look at the IT capital planning and investment control (CPIC) process. Written from a practitioner's perspective, this book covers a range of topics designed to provide both strategic and operational perspectives on IT CPIC. From planning to evaluation, this valuable resource helps managers and analysts at all levels realize the full benefits of the CPIC process. •Explore the full range of IT investment principles and practices •Learn CPIC project management techniques including earned-value management, integrated baseline review, cost-benefit analysis, and risk-adjusted cost and schedule estimates •Identify strategies to improve how your organization manages its IT portfolio and selects, controls, and evaluates investments •Discover how to leverage scarce IT resources and align investments with program priorities •Benefit from the in-depth coverage—excellent for the experienced as well as those new to the CPIC process **The Benefit of Broad Horizons Intellectual and Institutional Preconditions for a Global Social Science BRILL** More than perhaps anybody else in the world, the Swedish social scientist Björn Wittrock has contributed - both on the intellectual and institutional level - to making a truly global science possible. This book is devoted to an appreciation of his contributions. **New Frontiers of Philanthropy A Guide to the New Tools and New Actors that Are Reshaping Global Philanthropy and Social Investing Oxford University Press** The resources of both governments and traditional philanthropy are either barely growing or in decline, yet the problems of poverty, ill-health, and environmental degradation balloon daily. It is therefore increasingly clear that we urgently need new models for financing and promoting social and environmental objectives.

Fortunately, a significant revolution appears to be underway on the frontiers of philanthropy and social investing, tapping not only philanthropy, but also private investment capital, and providing at least a partial response to this dilemma. This book examines the new actors and new tools that form the heart of this revolution, and shows how they are reshaping the way we go about supporting solutions to social and environmental problems throughout the world. With contributions from leading experts in the field, *New Frontiers of Philanthropy* provides a comprehensive analysis of the many new institutions that have surfaced on this new frontier of philanthropy and social investment; the new tools and instruments these institutions are bringing to bear; the challenges that these actors and tools still encounter; and the steps that are needed to maximize their impact. The result is a powerful and accessible guide to developments that are already bringing significant new resources into efforts to solve the world's problems of poverty, ill-health, and environmental degradation; unleashing new energies and new sources of ingenuity for social and environmental problem-solving; and generating new hope in an otherwise dismal scenario of lagging resources and resolve. Investors, philanthropists, social entrepreneurs, nonprofit leaders, business executives, government officials, and students the world over will find much to build on in these pages.

Trust and Records in an Open Digital Environment Routledge *Trust and Records in an Open Digital Environment* explores issues that arise when digital records are entrusted to the cloud and will help professionals to make informed choices in the context of a rapidly changing digital economy. Showing that records need to ensure public trust, especially in the era of alternative truths, this volume argues that reliable resources, which are openly accessible from governmental institutions, e-services, archival institutions, digital repositories, and cloud-based digital archives, are the key to an open digital environment. The book also demonstrates that current established practices need to be reviewed and amended to include the networked nature of the cloud-based records, to investigate the role of new players, like cloud service providers (CSP), and assess the potential for implementing new, disruptive technologies like blockchain. Stančić and the contributors address these challenges by taking three themes – state, citizens, and documentary form – and discussing their interaction in the context of open government, open access, recordkeeping, and digital preservation. Exploring what is needed to enable the establishment of an open digital environment, *Trust and Records in an Open Digital Environment* should be essential reading for data, information, document, and records management professionals. It will also be a key text for archivists, librarians, professors, and students working in the information sciences and other related fields.

Transport and accessibility to public services third report of session 2013-14, Vol. 1: Report, together with formal minutes, oral and written evidence Stationery Office This report looks at progress on improving accessibility since 2003 and ways of improving accessibility. Problems with transport provision and the location of services can reinforce social exclusion by preventing people from accessing key local services and undermines government policies to tackle worklessness, increase participation in education, reduce crime and narrow health inequalities. Insufficient progress has been made since the 2003 Social Exclusion Unit's *Making the Connections* report, many findings of which are relevant today. There is evidence

that accessibility is worsening, driven by tight budgets in central and local government. Accessibility statistics show travel times to key services steadily increasing over time, particularly for access to hospitals. The Department for Transport needs to focus more closely on improving accessibility as well as on supporting the economy. Existing transport funding could be better coordinated and directed to 'accessibility'-focused initiatives, which will have a swifter impact on people's well-being than large infrastructure projects. The social value of transport and accessibility needs to be explicitly considered in policy-making and in the planning system and should no longer be seen as a second-order criterion. The Committee believes it will take time for any improvements to make a noticeable difference. Their recommendations focus on improving how government operates rather than funding. Central government cannot abdicate its role in coordinating action across departmental silos and helping local authorities and service providers to share best practice. Accessibility planning, introduced by Making the Connections, has had limited success and needs to be re-energised. **Discretion and Public**

Benefit in a Regulatory Agency The Australian Authorisation Process ANU E

Press This book explores the manner in which a variety of public benefits such as environmental protection and consumer safety have been accommodated through the authorisation process within competition law and policy in Australia. While the regulator's use of its discretion can be explained as a triumph of practice over theory, this book explores the potential for competition principles to be imbued by the wider discourses of democratic participation and human rights. In doing so it makes a significant contribution to the Australian competition policy as well as reconceptualising the way in which discretion is used by regulators...a very important and creative contribution to the literatures on both business regulation in general and Australian competition and consumer protection law in particular. It pays special attention to an everyday regulatory function that is often ignored in scholarship. And it is very important in challenging--on both empirical and normative policy oriented grounds--a narrowly economic approach to competition law, and proposing an alternative understanding and practice for the public benefit test in ACCC authorisations. **A Beneficial Ownership Implementation Toolkit Inter-**

American Development Bank In 2016, the G20 called on the FATF and the Global Forum to propose ways to improve the implementation of the international standards on transparency, including on the availability of beneficial ownership information, and its international exchange. The Global Forum developed a framework of proposed actions to answer that call, including a plan to facilitate effective implementation through examples of good implementation and technical assistance. This toolkit is in furtherance of the Global Forum's commitment to support countries' effective implementation. It is intended to help jurisdictions to develop an understanding of the beneficial ownership concepts contained in the international standards of transparency and exchange of information, and for use in conjunction with technical assistance seminars. It will support policy and implementation discussions in conjunction with capacity building workshops and technical assistance activities carried out by the Global Forum Secretariat as well as other supporting international organizations. **Representing Corporate Officers and Directors and LLC Managers [formerly Representing Corporate Officers, Directors,**

Managers, and Trustees], 3rd Edition Wolters Kluwer Representing Corporate Officers and Directors and LLC Managers, Third Edition (formerly titled Representing Corporate Officers, Directors, Managers, and Trustees) is a guide to the practical aspects of corporate governance for attorneys, corporate officers and directors, LLC managers, and trustees. Following the repercussions of past corporate and accounting scandals, new legislation, rules, and standards by governmental bodies and society have greatly increased the focus on the responsibilities and liabilities of directors, officers, managers, and trustees. Increased SEC oversight, new NYSE and NASDAQ listing standards, new cybersecurity compliance guidance, new fiduciary and other duties, and new criminal penalties have all changed the landscape for those who control corporations. By logically laying out the steps to safe corporate governance, the analysis, cases, tables, and checklists guide the veteran and neophyte alike. Representing Corporate Officers and Directors and LLC Managers tells you what to look for...what to look out for...and what steps to take to protect your corporate clients in today's harsh regulatory environment. It's the only up-to-date work of its kind to offer both in-depth analysis and practical guidance on key aspects of this critically important area. This updated Third Edition thoroughly covers: Directors' duties of care and loyalty-- including the different standards which have been imposed on directors regarding the duty of care...the duty of loyalty...the business judgment rule... when directors are entitled to rely on the advice of others...improperly influencing audits under the Sarbanes-Oxley Act... improper distributions...and more. Conflicts of interest--with examples of conflict of interest transactions, and discussion of loans to or by directors and officers...secret profits...and the duty to safeguard confidential or inside information-- plus, how certain transactions considered improper can be ratified and thus become legitimate. Federal securities laws--including everything from overviews of the laws, the SEC, and securities themselves-- to jurisdiction, pleading, remedies, and defenses in securities cases... criminal penalties...and attorneys' responsibilities regarding liability under Sarbanes-Oxley. Indemnification and insurance-- with discussion of mandatory and permissive indemnification and the scope of indemnification in various states... when a director may be indemnified even if not wholly successful in defense of an action...directors' and officers' liability insurance...types and extent of insurance coverage...tax law treatment...and exclusions. Tender offers--including antitakeover measures, two-tier and squeeze-out mergers, and golden parachute agreements, poison pill plans, and greenmail...potential liability in tender offers...and implementing mergers and acquisitions, with securities law, antitrust, tax, accounting, and labor law considerations. **The Government and Copyright The Government as Proprietor, Preserver and User of Copyright Material Under the Copyright Act 1968 Sydney University Press** The Government and Copyright: The Government as Proprietor, Preserver and User of Copyright Material Under the Copyright Act 1968 focuses on the interplay between law, policy and practice in copyright law by investigating the rights of the government as the copyright owner, the preserver of copyright material and the user of other's copyright material under the Copyright Act 1968 (Cth). The first of two recurring themes in the book asks the question whether the needs and status of government should be different from

private sector institutions, which also obtain copyright protection under the law. The second theme aims to identify the relationship between government copyright law and policy, national cultural policy and fundamental governance values. "As the first authoritative treatise on government copyright to be published in Australia, this book will be of immediate interest and relevance to Australian lawyers and policy makers, particularly in the light of ongoing efforts to ensure that the intellectual property system stimulates innovation and fosters trade and investment. Given that government copyright is recognised to some extent in most countries worldwide, this book is a valuable contribution to the international literature on this topic, which remains sparse." From the Introduction by Dr Anne Fitzgerald and Prof. Brian Fitzgerald

The Oxford Handbook of Administrative Justice Oxford University Press The Oxford Handbook of Administrative Justice examines the wide range of scholarship exploring the administrative decisions made by public authorities that affect individual citizens and the mechanisms available for the provision of redress. The Handbook identifies and provides a survey of key transnational themes in administrative justice research, considers theoretical and methodological approaches to administrative justice, and provides a view of the future of administrative justice research. One aspect of administrative justice, namely the study of law and administration, is a core component of law school syllabuses and scholarly research around the world. For many public lawyers, this area of study has been focused heavily on legalistic redress systems (e.g. judicial review). Justice against administrations, however, is delivered through a much broader range of mechanisms than legalistic processes alone: fair initial decision-making procedures, internal review systems, ombuds, administrative tribunals/adjudication, and other institutions play a vital role. Despite their importance to modern governance across the globe (and to the lives of individual citizens), these broader aspects of administrative justice have been left relatively neglected and under-researched, and the Handbook represents a groundbreaking achievement in establishing administrative justice research as a vital and discrete area of study. The Oxford Handbook of Administrative Justice will be an essential resource for legal scholars and social scientists wishing to understand the complexity of this important field.

Creating an Effective Public Sector Routledge This book offers an in-depth look at developing effectiveness in the public sector and how to achieve the best possible outcomes for people rather than just good or efficient outputs. In 15 comprehensive chapters, the authors present structured ideas and practical approaches for achieving a more effective public sector. The book sets out a framework for visualising success in complex situations with multiple stakeholders. Topics include how you stimulate change and influence people to adopt changes, how you manage politics, set targets and standards, and measure them, and how you create a culture of high performance with a focus on getting the right things done. Effectiveness does not arise from excellence in one area alone and the book weaves together ideas on leadership, managing expectations, and keeping focus on the longer term. Creating an Effective Public Sector will be of interest to decision makers in the public sector, project managers working on central and local government projects, and senior civil servants. It will also be invaluable for advanced undergraduate and post-graduate students studying in the fields of government, project management, and public-

sector management. **TALIS Creating Effective Teaching and Learning Environments First Results from TALIS First Results from TALIS OECD Publishing** This publication is the first report from the OECD's Teaching and Learning International Survey (TALIS). It provides quantitative, policy-relevant information on the teaching and learning environment in schools in 23 countries.

OECD Development Policy Tools Corruption in the Extractive Value Chain Typology of Risks, Mitigation Measures and Incentives Typology of Risks, Mitigation Measures and Incentives OECD Publishing This report is intended to help policy makers, law enforcement officials and stakeholders strengthen prevention efforts at both the public and private levels, through improved understanding and enhanced awareness of corruption risk and mechanisms.

Budget of the United States Government Analytical perspectives Budget of the United States Government Analytical perspectives Cost-Benefit Analysis Concepts and Practice Cambridge University Press A comprehensive and authoritative introduction to cost-benefit analysis that aims to be readable and user-friendly.

Wild & Scenic Rivers Suitability Report, Northwest Oregon Assesses the suitability of fifty-one river segments that have been previously identified as eligible components of the National Wild and Scenic Rivers System. This suitability study includes all river segments within the Bureau of Land Management's (BLM) western Oregon district boundaries that have been determined to meet the eligibility criteria for Wild and Scenic Rivers. Six Western Oregon BLM districts are simultaneously revising respective Resource Management Plans for BLM-administered public lands under one environmental impact statement. The BLM district offices are: Coos Bay; Eugene; Medford; Roseburg; Salem; and Klamath Falls.

Global Trends 2030 Alternative Worlds Createspace Independent Publishing Platform This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations.

There are estimated to be 400,000 adults with autism in England, many of whom may require specialised support. Yet the NAO found that most NHS organisations and local authorities do not know how many people with autism there are in the areas they serve, and three quarters of local authorities do not have a specific commissioning strategy for adults with autism. GPs and social care staff have low awareness of autism and how to diagnose it, with 80 per cent of GPs surveyed reporting that they need additional guidance and training in order to identify and treat patients with autism more effectively. Around 200,000 adults with autism do not have a learning disability. This group often fails to secure appropriate support, as health and social care services are traditionally configured for people with a learning disability, a physical illness or disability, or a mental health problem (which autism is not). Three quarters of local authorities said adults with autism who do not meet eligibility criteria experience or report difficulties accessing the services they require. Almost two thirds felt that current services for adults with autism are limited. Providing specialised support could improve outcomes for this group of people and their carers, and potentially enhance value for money, as the costs of establishing such support could be outweighed over time by overall savings. There are few specialised employment support services for people with autism. A lack of understanding of autism is a significant barrier to gaining employment and more training is needed for those delivering employment support and those administering benefits. **Research Handbook on Corporate Purpose and Personhood Edward**

Elgar Publishing This insightful Research Handbook contributes to the theoretical and practical understanding of corporate purpose and personhood, which has become the central debate of corporate law. It provides cutting-edge thoughts on the role of corporations in society and the nature of their rights and responsibilities.

A Modest Proposal Phoenix Classics Ebooks A Modest Proposal Jonathan Swift - To ease poverty in Ireland by eating the children of the poor was the satirical 'solution' suggested by Jonathan Swift in his essay 'A Modest Proposal' (1729). Here Swift unleashes the full power of his ironic armoury and corrosive wit, finding his targets - the British ruling class and avaricious landlords, and the brutalized Irish, complicit in their own oppression - with deadly precision.

Innovations in E-government The Thoughts of Governors and Mayors Rowman & Littlefield In *Innovations in E-Government*, Erwin A. Blackstone, Michael L. Bognanno, and Simon Hakim make the case that E-government is expected to make middle management of lesser value and flatten the pyramid of management in government. Improved communications, measurability of output, and the greater accountability of workers will reduce the necessary level of worker supervision and reduce the need for middle management. In turn, decisions by top management become more transparent and their accountability will also rise. Thus, as a result of improved technology, government could become leaner. Workers will be more empowered, efficient, and accountable. When considering the long term effects of e-government on the structure and activities of government, increased transparency becomes a most beneficial aspect. When activities are reported, meetings are broadcast and information is easily accessed, citizens become more informed. This will make government more accountable and good governance in one locality will increase the pressure on others to also adopt the same innovations. E-government is a technological innovation and moves from an inefficient and mainly unaccountable bureaucracy to a new entrepreneurial and accountable culture. It enables workers at lower levels of the hierarchy to take part in and be accountable for decision-making. E-government is being used to improve the management of cities and to achieve a more efficient use of resources. In the long run, opportunities exist for e-government to bring about a reorganization of government, one that would reduce excessively bureaucratic processes and organizational structures. It is these changes that may ultimately bring the biggest cost savings to taxpayers.

Energy Justice and Energy Law Oxford University Press Energy justice has emerged over the last decade as a matter of vital concern in energy law, which can be seen in the attention directed to energy poverty, and the United Nations Sustainable Development Goals. There are energy justice concerns in areas of law as diverse as human rights, consumer protection, international law and trade, and in many forms of regional and national energy law and regulation. This edited collection explores in detail at four kinds of energy justice. The first, distributive justice, relates to the equitable distribution of the benefits and burdens of energy activities, which is challenged by the existence of people suffering from energy poverty. Secondly, procedural (or participation) justice consists of the right of all communities to participate in decision-making regarding energy projects and policies that affect them. This dimension of energy justice often includes procedural rights to information and access to courts. Under the concept of reparation (or restorative) justice, the book looks at even-handed enforcement of

energy statutes and regulations, as well as access to remedies when legal rights are violated. Finally, the collection addresses social justice, with the recognition that energy injustice cannot be separated from other social ills, such as poverty and subordination based on race, gender, or indigeneity. These issues feed into a wider conversation about how we achieve a 'just' energy transition, as the world confronts the urgent challenges of climate change. **Beyond the HIPAA Privacy Rule**

Enhancing Privacy, Improving Health Through Research National

Academies Press In the realm of health care, privacy protections are needed to preserve patients' dignity and prevent possible harms. Ten years ago, to address these concerns as well as set guidelines for ethical health research, Congress called for a set of federal standards now known as the HIPAA Privacy Rule. In its 2009 report, *Beyond the HIPAA Privacy Rule: Enhancing Privacy, Improving Health Through Research*, the Institute of Medicine's Committee on Health Research and the Privacy of Health Information concludes that the HIPAA Privacy Rule does not protect privacy as well as it should, and that it impedes important health research. **The Oxford**

Handbook of Citizenship Oxford University Press Contrary to predictions that it would become increasingly redundant in a globalizing world, citizenship is back with a vengeance. The *Oxford Handbook of Citizenship* brings together leading experts in law, philosophy, political science, economics, sociology, and geography to provide a multidisciplinary, comparative discussion of different dimensions of citizenship: as legal status and political membership; as rights and obligations; as identity and belonging; as civic virtues and practices of engagement; and as a discourse of political and social equality or responsibility for a common good. The contributors engage with some of the oldest normative and substantive quandaries in the literature, dilemmas that have renewed salience in today's political climate. As well as setting an agenda for future theoretical and empirical explorations, this Handbook explores the state of citizenship today in an accessible and engaging manner that will appeal to a wide academic and non-academic audience. Chapters highlight variations in citizenship regimes practiced in different countries, from immigrant states to 'non-western' contexts, from settler societies to newly independent states, attentive to both migrants and those who never cross an international border. Topics include the 'selling' of citizenship, multilevel citizenship, in-between statuses, citizenship laws, post-colonial citizenship, the impact of technological change on citizenship, and other cutting-edge issues. This Handbook is the major reference work for those engaged with citizenship from a legal, political, and cultural perspective. Written by the most knowledgeable senior and emerging scholars in their fields, this comprehensive volume offers state-of-the-art analyses of the main challenges and prospects of citizenship in today's world of increased migration and globalization. Special emphasis is put on the question of whether inclusive and egalitarian citizenship can provide political legitimacy in a turbulent world of exploding social inequality and resurgent populism. **Geospatial Research: Concepts, Methodologies, Tools, and Applications Concepts,**

Methodologies, Tools, and Applications IGI Global Having the ability to measure and explore the geographic space that surrounds us provides endless opportunities for us to utilize and interact with the world. As a broad field of study, geospatial research has applications in a variety of fields including military science,

environmental science, civil engineering, and space exploration. Geospatial Research: Concepts, Methodologies, Tools, and Applications is a multi-volume publication highlighting critical topics related to geospatial analysis, geographic information systems, and geospatial technologies. Exploring multidisciplinary applications of geographic information systems and technologies in addition to the latest trends and developments in the field, this publication is ideal for academic and government library inclusion, as well as for reference by data scientists, engineers, government agencies, researchers, and graduate-level students in GIS programs.

Minnesota Law Review Promoting social cohesion Implications for policy

and evaluation Policy Press This book makes a forthright case for a shift in policy focus from 'community cohesion' to the broader notion of social cohesion, and is distinctive and innovative in its focus on evaluation. It constitutes an extremely valuable source both for practitioners involved in social cohesion interventions and for researchers and students studying theory-based evaluation and the policy areas highlighted (housing, intergenerational issues, the recession, education, communications, community development).

Managing Overdues A How-to-do-it

Manual for Librarians Neal Schuman Pub Based on findings from a survey of public library systems across the country, this text is a guide to the subject of library overdues. It contains helpful tips, techniques, and examples of successful strategies currently used by librarians.
